## **Independent Auditor's Report**

To the Board of Directors and Shareholder Bharat Forge Aluminum USA, Inc.

#### **Opinion**

We have audited the financial statements of Bharat Forge Aluminum USA, Inc. (the "Company"), which comprise the balance sheets as of March 31, 2023, and March 31, 2022, and the related statements of loss for the year ended March 31, 2023, and for the period from January 1, 2022, to March 31, 2022, changes in stockholder's equity and cash flows for the year and the period then ended and the related notes to the financial statements.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the financial position of the Company as of March 31, 2023, and 2022, and the result of its operations and its cash flows for the year and period then ended, in accordance with accounting principles generally accepted in the United States of America.

## **Basis for opinion**

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

# Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

# Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Atlanta, Georgia June 30, 2023

# Balance Sheet as on March 31, 2023

(All amounts are stated in United States Dollars, unless otherwise stated)

| Allowance for doubtful accounts receivable                                                                               | 22,420,384      | 272,698      | -                                                      |
| Provision on inventory obsolescence                                                                                      | 12,959,192      | 157,622      | -                                                      |
| Write-off of property, plant, and equipment.                                                                             | 23,052,797      | 280,390      | -                                                      |
| Inventory written-off                                                                                                    | 1,539,758       | 18,728       | -                                                      |
| Changes in net operating assets and liabilities                                                                          |                 |              |                                                        |
| Accounts receivables                                                                                                     | (541,675,851)   | (6,588,376)  | (1,013,740)                                            |
| Inventories                                                                                                              | (669,344,226)   | (8,141,200)  | (863,955)                                              |
| Other receivables, related party                                                                                         | (18,805,718)    | (228,733)    | -                                                      |
| Other current assets                                                                                                     | (4,364,155)     | (53,081)     | 60,113                                                 |
| Other payables, related party                                                                                            | (470,351,539)   | (5,720,862)  | 2,179,622                                              |
| Accounts payable                                                                                                         | (6,600,537)     | (80,282)     | 5,769,033                                              |
| Other current liabilities                                                                                                | 863,134,064     | 10,498,256   | 782,595                                                |
| Other non-current assets                                                                                                 | 1,847,496       | 22,471       | -                                                      |
| Net cash provided by operating activities                                                                                | (2,293,829,557) | (27,899,733) | 6,120,961                                              |
| Cash flow from investing activities                                                                                      |                 |              |                                                        |

(The accompanying notes are an integral part of these financial statements)

#### **Notes to Financial Statements**

#### **NOTE A: NATURE OF OPERATIONS**

Bharat Forge Aluminum USA, Inc. (hereinafter referred to as "BFALU" or the "Company") was incorporated in the State of North Carolina on September 27, 2019, and is a wholly-owned subsidiary of Bharat Forge America Inc ("BFA" or "the Parent company"). Bharat Forge Limited (ultimate Parent Company or "BFL") a publicly listed company in India owns 100% of the common stock of Bharat Forge America, Inc.

The Company has set up a new greenfield facility in Sanford, North Carolina, to cater to the aluminum forgings requirements for global marquee OEMs. The Company designs, produces and supplies aluminum and steel automotive components for the auto industry. The new facility will play a key role in enhancing the BFL's presence in the Electric Vehicle ("EV") transition globally. The Company completed the capital expenditure for Phase I and commenced commercial production. Phase I involved the strategic establishment of a forging line, which reached completion in September 2021. Currently, the Company is in the process of commencing the capex for Sanford Phase 2 expansion which is estimated to be completed by end of the year 2024.

#### **NOTE B: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

A summary of significant accounting policies applied in the presentation of accompanying financial statements is as follows:

#### 1. Basis of preparation

- a. The accompanying financial statements are prepared under the historical cost convention on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States of America ("US GAAP") to reflect the financial position, results of operations, stockholder's equity, and cash flows.
- b. All amounts are stated in United States Dollars except as otherwise specified.
- c. The financial statements are for the year ended March 31, 2023, and three-months period ended March 31, 2022.
- d. Certain reclassifications, regroupings, and reworking have been made in the financial statements of the prior year to conform to the classifications used in the current year. This has no impact on previously reported net loss or stockholder's equity.
- e. During the previous year, the Company changed its financial year end to March from the earlier year end of December, to align it with the broader reporting objectives of the ultimate Parent Company. Accordingly, the current financial statements are for the 12 months period beginning from April 1, 2022, through March 31, 2023. The numbers reported in the financial statements are not comparable with the previous period, which are for the three months period from January 1, 2022, through March 31, 2022.

# 2. Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the statements of loss and the reported amounts of revenues and expenses during the reporting period. The Company's most significant estimates relate to the useful life of property plant and equipment, allowance for doubtful accounts receivable, and other intangible assets. The management's estimates use historical information and other relevant factors available to management. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Any revision to accounting estimates is recognized prospectively in the current and future periods.

# 3. Cash and cash equivalents

Cash equivalents consist of highly liquid investments with an initial maturity of three months or less. The carrying value of cash and cash equivalents approximates fair value because of the short maturities of those financial instruments. Cash balances in bank accounts are insured by Federal Deposit Insurance Corporation up to an aggregate of \$250,000 per depositor at each financial institution.

#### 4. Revenue recognition

Revenue is recognized when obligations under the terms of a contract with a customer are satisfied; generally, this occurs with the transfer of control of the Company's products or services. The Company's payment terms are typically 30-90 days. Revenue is measured as the amount of consideration the Company expects to receive in exchange for transferring goods or providing services. A performance obligation is a promise in a contract to transfer a distinct good or service to the customer and is the unit of account in the contract. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied. In determining the transaction price, the Company considers the effects of variable consideration, the existence of significant financing contracts, noncash consideration, and consideration payable to the customer, if any.

The Company's revenue represents sales of finished goods with incoterms ex-factory/ex-works wherein the goods are made available at Company's factory location to be picked up by the customers. The performance obligation is met at the time of goods being made available for pick up by customers.

# 5. Accounts receivable and provision for doubtful debts

Accounts receivable consist of uncollateralized customer obligations, which generally require payment within 90 days from the invoice date. Accounts receivables are stated at net invoice amounts. The Company follows the specific identification method for recognizing provision for doubtful debts. Management analyzes the composition of the accounts receivable aging, historical bad debts, current economic trends, and customer creditworthiness of each account receivable when evaluating the adequacy of the provision for doubtful accounts. All amounts deemed to be uncollectible are charged against the provision for doubtful debt in the period that determination is made and is included in 'Selling, general and administrative expenses' in the statements of loss.

#### 6. Inventories

Inventories are stated at a lower of cost or market value, with the cost determined using the weighted average method. Raw materials and packing materials are valued at cost. Cost includes all the appropriate allocable overheads. The cost in the case of work-in-progress and finished goods comprises direct labor, material, cost, and production overheads. Work-in-progress and finished goods are valued at lower of cost or market value after providing for obsolescence and other losses. The Company is required to make assumptions regarding the level of reserves required to value potentially obsolete or overvalued items at a lower of cost or market value. These assumptions require the Company to analyze the aging of and forecasted demand for its inventory, forecast future product sales prices, pricing trends, and margins, and to make judgments and estimates regarding obsolete or excess inventory. Future product sales prices, pricing trends, and margins are based on the best available information at that time, including actual orders received, negotiations with the Company's customers for future orders, including their plans for expenditures, and market trends for similar products. The Company's judgments and estimates for excess or obsolete inventory are based on an analysis of actual and forecasted usage. The Company makes adjustments to its inventory reserve based on the identification of specific situations and increases its inventory reserves accordingly. As further changes in future economic or industry conditions occur, the Company will revise the estimates that were used to calculate its inventory reserves.

# 7. Property, plant, and equipment and depreciation

Property, plant, and equipment are stated at cost less accumulated depreciation. The cost of items of property, plant, and equipment comprise the cost of purchase and other costs necessarily incurred to bring it to the condition and location necessary for its intended use.

Major maintenance projects that extend the life of the related equipment are capitalized. The cost of maintenance and repairs are charged to expense when incurred.

# **Bharat Forge Aluminum USA Inc.**

The Company depreciates property, plant, and equipment over the estimated useful life using the straight-line method, including finance lease assets which are depreciated over the terms of their respective leases. Upon retirement or disposal of assets, the cost and accumulated depreciation are eliminated from the accounts, and the resulting gain or loss is credited or charged to operations.

The estimated useful life used to determine depreciation is:

| Building                      | 30 – 50 years |
|-------------------------------|---------------|
| Machinery and equipment       | 1 – 20 years  |
| Tooling                       | 10 years      |
| Equipment under finance lease | 5 years       |
| Office equipment              | 5 years       |

Deposits paid towards the acquisition of property, plant, and equipment outstanding as of each balance sheet date and the cost of property, plant, and equipment not ready for use before such date are disclosed under capital work-in-progress.

# 8. Intangible assets

Intangible assets are stated at cost less accumulated amortization. The Company amortizes intangible assets over their estimated useful lives unless such lives are determined to be indefinite. Amortizable intangible assets are amortized over their estimated useful lives in proportion to the economic benefits consumed in each period. Intangible assets with indefinite lives are tested at least annually for impairment and written down to the fair value as required. The estimated useful lives of the amortizable intangible assets are as follows:

| Software | 3 years |
|----------|---------|
|----------|---------|

#### 9. Impairment of long-lived assets

Long-lived assets, including certain identifiable intangible assets, to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Such assets are considered to be impaired if the carrying amount of the assets is higher than the future undiscounted net cash flows expected to be generated from the assets. The impairment amount to be recognized is measured by the amount by which the carrying value of the assets exceeds its fair value.

#### 10. Income taxes

In accordance with the provisions of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 740 "Income Taxes," income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The deferred tax asset is reduced by a valuation allowance if it is more likely than not that some portion or all of the assets will not be realized.

The Company is a member of a group that files a consolidated federal tax return. Accordingly, income taxes payable to the tax authority are recognized on the financial statements of the Parent company, which is the taxpayer for income tax purposes. The Company approximates the amounts that would be reported if it were separately filing its tax return.

# 11. Leases

Accounting Standard Update ("ASU") 2016-02, Leases. On April 1, 2022, the Company early adopted Accounting Standards Codification 842 and all the related amendments ("new lease standard") using the modified retrospective method. The comparative information has not been restated and continues

to be reported under the lease accounting standard in effect of those periods. The new lease standard requires all leases to be reported on the balance sheet as lease right-of-use assets and lease obligations. The Company elected the practical expedients permitted under the transition guidance of the new standard that retained the lease classification and initial direct costs for any leases that existed prior to adoption of the standard.

The Company's leases are classified as finance and operating leases, which are included in lease right-of-use assets and lease liabilities in the Company's balance sheet. Right-of-use assets and lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at the commencement date for leases exceeding 12 months. Minimum lease payments include only the fixed lease component of the agreement, as well as any variable rate payments that depend on an index, initially measured using the index at the lease commencement date. Lease terms may include options to renew when it is reasonably certain that the Company will exercise that option.

The Company's estimation considers the market rates of the Company's outstanding collateralized borrowings and interpolations of rates outside of the terms of the outstanding borrowings, including comparisons to comparable borrowings of similarly rated companies with longer term borrowings. Lease expense is recognized on a straight-line basis over the lease term and is included in the cost of revenue or general and administrative expenses. Leases with a lease term of 12 months or less from the commencement date that do not contain a purchase option are recognized as an expense on a straight-line basis over the lease term. The Company notes that adopting the new standard resulted in recording a finance lease liability and right-of- use asset associated with the Company's lease agreement totalling \$970,172 as of April 01, 2022. The operating lease liability and right-of-use asset associated with the Company's facility lease agreement totalling \$576,810, as of April 01, 2022.

## 12. Commitments and contingencies

Liabilities for loss contingencies arising from claims, assessments, litigations, fines, penalties, and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred. Contingent liabilities are not recognized but are disclosed in notes. Contingent assets are neither recognized nor disclosed in the financial statements.

# 13. Fair value measurement

Assets and liabilities recorded at fair value in the financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels which are directly related to the amount of subjectivity associated with the inputs to the valuation of these assets or liabilities are as follows:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date.

Level 2 – inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data.

Level 3 – unobservable inputs for the asset or liability only used when there is little if any market activity for the asset or liability at the measurement date.

This hierarchy requires the Company to use observable market data when available, and to minimize the use of unobservable inputs when determining fair value.

The Company's financial instruments consist of cash and cash equivalents, accounts payable, and accrued liabilities. The estimated fair value of cash accounts payable and accrued liabilities approximates their carrying amounts due to the short-term nature of these instruments. None of these instruments are held for trading purposes.

#### 14. Recently issued accounting standards not yet adopted

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments," or ASU No. 2016-13. The amendments in ASU No. 2016-13 introduce an approach based on expected losses to estimated credit losses on certain

types of financial instruments, modify the impairment model for available-for-sale debt securities and provide for a simplified accounting model for purchased financial assets with credit deterioration since their origination. The new standard requires financial assets measured at amortized cost be presented at the net amount expected to be collected through an allowance for credit losses that is deducted from the amortized cost basis. The standard will be effective for the Company on April 1, 2023, with early application permitted. The Company is evaluating the impact of adopting this new accounting guidance on its financial statements.

#### NOTE C: FINANCIAL INSTRUMENTS AND CONCENTRATION OF CREDIT RISK

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash equivalents and trade receivables. The cash resources of the Company are invested with banks after an evaluation of the credit risk. By their nature, all such cash equivalents and trade receivables involve risk including the credit risk of non-performance by counter parties.

In management's opinion, as of March 31, 2023, there was no significant risk of loss in the event of nonperformance of the counter parties to these cash equivalents and trade receivables.

As at March 31, 2023, two customers accounted for approximately 80% of the total accounts receivable and contributed for around 81% of the Company's revenue during the year ended March 31, 2023.

#### **NOTE D: CASH AND CASH EQUIVALENTS**

Cash and cash equivalents include the following:

| As at          | As at          |
|----------------|----------------|
| March 31, 2023 | March 31, 2022 |
| 417,038        | 1,277,213      |
| 417,038        | 1,277,213      |

Balances on deposits with the banks are insured by the Federal Deposit Insurance Corporation up to an aggregate of \$250,000. The Company believes it is not exposed to any significant risk on cash and cash equivalents.

# **NOTE E: ACCOUNTS RECEIVABLE, NET OF ALLOWANCES**

Accounts receivable as of March 31, 2023, and March 31, 2022, represent due from customers of \$7,923,216 and \$1,334,840, respectively. Accounts receivable, net, are stated net of provision for doubtful receivables and other allowances.

Accounts receivable includes following:

|                                                   | As at          | As at          |
|---------------------------------------------------|----------------|----------------|
|                                                   | March 31, 2023 | March 31, 2022 |
| Accounts receivable                               | 7,923,216      | 1,334,840      |
| Less: allowance for doubtful accounts receivables | (272,698)      | -              |
| Accounts receivable, net of allowances            | 7,650,518      | 1,334,840      |

The following table provides the details of doubtful accounts receivables:

|                                                         | As at March 31, 2023 | As at March 31, 2022 |
|---------------------------------------------------------|----------------------|----------------------|
| Balance at beginning of the year / period               | -                    | -                    |
| Provision for doubtful receivables and other allowances | 272,698              | -                    |
| Balance at the end of the year /period                  | 272,698              | -                    |
|                                                         |                      |                      |

# **NOTE F: INVENTORIES, NET**

Inventories includes following:

|                                                          | As at          | As at          |
|----------------------------------------------------------|----------------|----------------|
|                                                          | March 31, 2023 | March 31, 2022 |
| Raw material                                             | 5,405,614      | 1,221,975      |
| Work in progress                                         | 817,957        | -              |
| Finished goods [includes items lying with third parties] | 993,749        | 818,324        |
| Stores, spares, and loose tools                          | 2,964,541      | 362            |
| Less: inventory reserve                                  | (176,350)      | -              |
| Total                                                    | 10,005,511     | 2,040,661      |

The activity in inventory reserve is as follows:

|                                         | As at March 31, 2023 | As at March 31, 2022 |
|-----------------------------------------|----------------------|----------------------|
| Balance at beginning of the year/period | -                    | -                    |
| Provision during the period             | 176,350              |                      |
| Balance at the end of the year/period   | 176,350              | -                    |

During the current year ended March 31, 2023, inventory worth \$18,728 (March 31, 2022 : NIL) was written off on account of its net realizable value being less than cost. This inventory's net realized value reduced on account of discontinuance of contract with the customer.

#### **NOTE G: OTHER CURRENT ASSETS**

Other current assets include:

|         | As at          | As at          |
|---------|----------------|----------------|

# **Bharat Forge Aluminum USA Inc.**

Depreciation for the year ended March 31, 2023, was \$5,491,113 (March 31, 2022: Nil). During the year ended March 31, 2023, certain assets amounting to \$280,390 were write-off (March 31, 2022: Nil), as their recoverable value was determined to be zero as of the balance sheet date.

# **NOTE I: INTANGIBLE ASSETS, NET**

Intangible assets include the following:

|                               | As at          | As at          |
|-------------------------------|----------------|----------------|
|                               | March 31, 2023 | March 31, 2022 |
| ftware                        | 560,407        | -              |
| ess: accumulated amortization | (168,231)      | -              |
| ntangible assets, net         | 392,176        | -              |

Amortization for the year ended March 31, 2023, was \$168,231 (March 31, 2022: Nil).

#### **NOTE J: OTHER NON-CURRENT ASSETS**

Other non-current assets include:

|                                     | As at          | As at          |
|-------------------------------------|----------------|----------------|
|                                     | March 31, 2023 | March 31, 2022 |
| Advance payments to capital vendors | 9,537,303      | -              |
| Other receivables                   | 2,200          | 24,672         |
| Total                               | 9,539,503      | 24,672         |

# **NOTE K: SHORT-TERM BORROWINGS**

Short term borrowings include the following:

| As at          | As at          |
|----------------|----------------|
| March 31, 2023 | March 31, 2022 |
| 85,000,000     | 34,000,000     |
| 85,000,000     | 34,000,000     |

Under multiple line of credit agreements (the "agreement") with three banks, the Company has available borrowings of \$85,000,000 (March 31, 2022: \$34,000,000). The entire amount is withdrawn as of March 31, 2023, and March 31, 2022, respectively. The entire outstanding balance is repayable within twelve months from balance sheet dates.

The interest rate as per the agreement was stipulated at 1% plus the applicable LIBOR resulting in interest rate of 6.13% for the year ended March 31, 2023 (for the three months period ended March 31, 2022: 2.40%)

The interest expense for the year ended March 31, 2023, was \$4,297,651 (for the three months ended March 31, 2022: \$242,139). Out of the interest expenses, \$1,467,897 is capitalized as capital work-in-progress (for the three months ended March 31, 2022: \$239,724). Net interest expense towards borrowings amounts to \$2,829,754 (for the three months ended March 31, 2022: \$2,415). Interest outstanding is \$1,329,686 and \$230,249 as of March 31, 2023, and March 31, 2022, respectively.

#### **NOTE L: LOANS FROM RELATED PARTIES**

Loans from related parties include the following:

|                                          | As at          | As at          |
|------------------------------------------|----------------|----------------|
|                                          | March 31, 2023 | March 31, 2022 |
| Loan from Parent company (Refer note Q)  | 5,000,000      | 19,500,000     |
| Loan from related parties (Refer note Q) | 9,500,000      | 11,500,000     |
| Total                                    | 14,500,000     | 31,000,000     |

The Company has received line of credits from related parties. to facilitate working capital requirements. The line of credit has a maximum aggregate permissible limit of \$14,500,000 (March 31, 2022: \$31,000,000). The entire loan is repayable with twelve months from balance sheet date. As at March 31, 2023 the Company has made withdrawals to the tune of \$14,500,000 (March 31, 2022: \$31,000,000).

As of March 31, 2023, the applicable rate of interest on the outstanding loan was 5.45% per annum (March 31, 2022: 2.28%).

The interest expense for the year ended March 31, 2023, was \$522,139 (for the three months ended March 31, 2022: \$90,350). Out of the interest expenses, \$178,341 is capitalized. as capital work-in-progress (for the three months ended March 31, 2022: \$89,449). Net interest expense towards loans from related parties amounts to \$343,798 (for the three months ended March 31, 2022: \$901). Interest outstanding is \$287,513 and \$27,699 as of March 31, 2023 and 2022, respectively.

#### **NOTE M: OTHER CURRENT LIABILTIES**

Other current liabilities include:

|                                                               | As at          | As at          |
|---------------------------------------------------------------|----------------|----------------|
|                                                               | March 31, 2023 | March 31, 2022 |
| Capital advances                                              | 6,533,590      | -              |
| Accrued interest on short term borrowings                     | 1,329,686      | 230,249        |
| Accrued interest on loans from related parties (refer note Q) | 287,513        | 27,699         |
| Provision for property taxes                                  | 307,620        | 57,416         |
| Employee related liabilities                                  | 337,967        | 525,848        |
| Accrued expenses                                              | 22,309         | 1,288          |
| Total                                                         | 8,818,685      | 842,500        |

#### **NOTE N: LEASE RIGHT-OF-USE ASSETS**

Prior to the adoption of ASC 842, rent expense on finance and operating leases was recognized on a straight-line basis over the term of the lease.

**General description of the lease:** The Company facilities and vehicles under finance and operating leases which have non-cancellable terms.

**Non-lease components:** Leases that contain non-lease components are accounted for as a single component and recorded on the balance sheet for certain asset classes including equipment. Non-lease components include, but are not limited to, common area maintenance and service arrangements.

**Package of practical expedients:** The Company will not reassess whether any expired or existing contracts are leases or contain leases, the lease classification for any expired or existing leases or any initial direct costs for any expired or existing leases as of the transition date.

Additional transition method: The Company adopted the standard using a modified retrospective approach,

# **Bharat Forge Aluminum USA Inc.**

applying the standard's transition provisions at the beginning of the period of adoption and maintain previous disclosure requirements for comparative periods.

The Company used the following policies and/or assumptions in evaluating the lease population:

**Lease determination:** The Company considers a contract to be or to contain a lease if the contract conveys the right to control the use of identified property, plant, or equipment (an identified asset) for a period of time in exchange for consideration.

**Discount rate:** When the lease contracts do not provide a readily determinable implicit rate, the Company uses the estimated incremental borrowing rate based on information available at the inception of the lease. The discount rate is determined by asset class.

**Variable payments:** The Company includes payments that are based on an index or rate within the calculation of right of use leased assets and lease liabilities, initially measured at the lease commencement date. There are variable payments in the nature of origination fees for office equipment, machinery and equipment and therefore are not treated as a part of lease payments.

**Purchase options:** Certain leases include options to purchase office equipment. The depreciable life of assets are limited by the expected lease term, unless there is a transfer of title or purchase option reasonably certain of exercise.

**Renewal options:** Most leases include one or more options to renew, with renewal terms that can extend the lease term from one or more years. The exercise of lease renewal options is at the Company's sole discretion.

**Residual value guarantees, restrictions, or covenants:** The lease agreements do not contain any material residual value guarantees or material restrictive covenants.

**Short-term leases:** Leases with an initial term of 12 months or less are not recorded on the balance sheet; the Company recognizes lease expense for these leases on a straight-line basis over the lease term and expense the associated operating lease costs to administrative expenses on the statements of income.

Components of finance and operating leases is shown below:

|                                                                                  | As at March 31, 2023 |
|----------------------------------------------------------------------------------|----------------------|
| Operating lease cost:                                                            |                      |
| Operating lease cost                                                             | 269,937              |
| Total operating lease cost                                                       | 269,937              |
|                                                                                  |                      |
| Finance lease cost:                                                              |                      |
| Amortization of right-of-use assets                                              | 587,384              |
| Interest on lease liabilities                                                    | 9,059                |
| Total finance lease cost                                                         | 587,384              |
| Maturities of operating lease liabilities as of March 31, 2023, were as follows: |                      |
| Weighted average remaining lease term                                            | 2.00 years           |
| Weighted average discount rate                                                   | 1.34%                |
| Maturities of finance lease liabilities as of March 31, 2023, were as follows:   |                      |
| Weighted average remaining lease term                                            | 2.79 years           |
|                                                                                  | •                    |

#### **NOTE P: INCOME TAXES**

The Company will file a consolidated federal tax return as per regulations applicable to Chapter C corporations in the United States. Accordingly, no provision for federal income taxes has been made in the accompanying financial statements.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the entity's net deferred income taxes are as follows:

|                                                   | As at          | As at          |
|---------------------------------------------------|----------------|----------------|
|                                                   | March 31, 2023 | March 31, 2022 |
| Non-current deferred tax liabilities              |                |                |
| Property, plant, and equipment                    | (1,327,875)    | -              |
| Total deferred tax liabilities                    | (1,327,875)    | -              |
| Non-current deferred tax assets                   |                |                |
| Inventory obsolescence provision                  | 504,727        | 17,307         |
| Unpaid related party provision disallowed u/s 267 | 77,555         | 10,960         |
| Start-up costs                                    | 984,375        | 840,001        |
| State tax - net operating loss carryforward       | 7,175,185      | 1,339,661      |
| Total deferred tax assets                         | 8,741,842      | 2,348,939      |
| Net deferred taxes                                | 7,413,967      | 2,348,939      |
| Less: deferred tax assets valuation allowance     | (7,413,967)    | (2,348,939)    |
| Net deferred taxes                                | -              | -              |
|                                                   |                |                |

Realization of net deferred tax assets is dependent upon generation of sufficient taxable income in future years, benefit from the reversal of taxable temporary differences and tax planning strategies. Management assesses the available positive and negative evidence to estimate whether sufficient future taxable income will be generated to permit use of the existing deferred tax assets. The amount of net deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income change.

Management believes that negative evidence outweighs the positive evidence and thus it is more likely than

not that the benefit from deferred tax asset may not be realized in foreseeable future. In recognition of this risk, a valuation allowance of \$7,413,967 and \$2,348,939 has been created as at March 31, 2023 and March 31, 2022, respectively.

As at March 31, 2023, the Company has federal net operating loss (NOL's) carry forwards of approximately \$34,167,549, as per Tax Cuts and Jobs Act it will be carried forward indefinitely for utilization.

The Company has state NOL's carry forward in North Carolina State of approximately \$34,900,908 as at March 31, 2023, which if unutilized will expire in the years 2034 through 2035.

# Accounting for uncertain tax position

The Company recognizes the benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company has no unrecognized tax positions as at March 31, 2023 and March 31, 2022.

The tax years of 2019 through 2021 remain subject to examination by the taxing authorities.

<sup>\*</sup>During the year ended March 31, 2023, Loan from parent of for an amount \$22,000,000 and the corresponding accrued interest of \$875,833 were converted into equity.

#### **NOTE R: EMPLOYEE BENEFIT PLANS**

The Company has an employee savings plan which qualifies under Section 401(k) of the Internal Revenue Code. The plan allows eligible employees to make voluntary contributions based on a specific percentage of compensation which may not exceed limitations under the Internal Revenue Code.

The Company has a discretionary matching contribution of 50% up to 6% of compensation. The total expense for employee retirement contribution plans for the year ended March 31, 2023, was \$116,506 (for the three months period ended March 31, 2022: \$35,146.).

## **NOTE S: COMMON STOCK**

#### Common stock authorized, issued and outstanding.

The authorized common stock is 100 shares with a par value of \$10 per share as at March 31, 2023 and March 31, 2022 of which 10 shares were issued as of that date.

#### **Voting**

Each holder of common stock is entitled to one vote in respect of each share held by him in the records of the Company for all matters submitted to a vote.

#### Liquidation

In the event of liquidation of the Company, the holders of common stock shall be entitled to receive all of the remaining assets of the Company, after distribution of all preferential amounts, if any. Such amounts will be in proportion to the number of equity shares held by the shareholders.

# **NOTE T: SUBSEQUENT EVENTS**

The Company evaluated all events and transactions that occurred after March 31, 2023, through the date the financial statements are available to be issued. Based on the evaluation, the Company is not aware of any subsequent events or transactions, which would require recognition or disclosure in the financial statements.

## **Independent Auditor's Report**

# To the Board of Directors and Stockholder Bharat Forge America, Inc.

# **Qualified Opinion**

We have audited the separate parent company financial statements of Bharat Forge America, Inc. ('the Company'), which comprise the balance sheets as at March 31, 2023 and March 31, 2022 and the related statements of loss for the period from April 1, 2022 to March 31, 2023 and January 1, 2022 to March 2022, changes in stockholder's equity, and cash flows for the year and period then ended respectively and the related notes to the separate parent company financial statements.

In our opinion, except for the effects of non-consolidating all wholly owned subsidiaries, as discussed in the Basis for qualified opinion section of our report, the accompanying separate parent company financial statements present fairly, in all material respects, the financial position of Bharat Forge America, Inc. as at March 31, 2023 and March 31, 2022, the results of its operations and its cash flows for the year and period then ended in accordance with accounting principles generally accepted in the United States of America.

# **Basis for qualified opinion**

As discussed in Note B.1(f) to the separate parent company financial statements, the Company reports its investments in its wholly owned subsidiaries applying equity method of accounting. Accounting principles generally accepted in the United States of America require all majority-owned subsidiaries be accounted for as consolidated subsidiaries. Information regarding the subsidiaries is disclosed in Note F.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in Auditor's responsibilities for the audit of the separate parent company financial statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

# Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of the separate parent company financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of separate parent company financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate parent company financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the separate parent company financial statements are available to be issued.

#### Auditor's responsibilities for the audit of financial statements

Our objectives are to obtain reasonable assurance about whether the separate parent company financial statements are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in aggregate, they would influence the judgment made by a reasonable user based on the separate parent company financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the separate parent company financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the separate parent company financial statements.
- Obtain an understanding of internal control relevant to the audit to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the separate parent company financial statements.
- Conclude whether, in our judgment, there are conditions or events considered in the aggregate that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Atlanta, Georgia June 30, 2023

# Balance Sheet as on March 31, 2023

(The accompanying notes are an integral part of these separate parent company financial statements)

# **Notes to Separate Parent Company Financial Statements**

#### **NOTE A: NATURE OF OPERATIONS**

Bharat Forge America, Inc. ("BFA" or the "Company"), incorporated on March 22, 2005, in the State of Delaware, is an international holding company and a wholly owned subsidiary of Bharat Forge Limited ("the Parent Company"), a public company, listed on stock exchanges in India.

On November 30, 2016, the Company acquired 100 percent of the shares of Bharat Forge Tennessee Inc. ("BFT") (formerly known as PMT Holdings, Inc.) and 82.10 percent of the membership interest of Bharat Forge PMT Technologie, LLC ("PMT") (formerly known as Walker Forge Tennessee, LLC).

The Company also has two wholly owned subsidiaries, namely Bharat Forge Aluminum USA, Inc. ("BFALU") and Kalyani Mobility, Inc. ("KMI") (until September 30, 2021). Both the subsidiaries were incorporated on September 27, 2019.

#### **NOTE B: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

A summary of significant accounting policies applied in the preparation of the accompanying separate parent company financial statements is as follows:

# 1. Basis of preparation

- a. The accompanying separate parent company financial statements are prepared under the historical cost convention on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States of America ("US GAAP") to reflect the financial position, results of operations, stockholders' equity, and cash flows.
- b. All amounts are stated in United States Dollars, except as otherwise specified.
- c. The separate parent company financial statements are for the year ended March 31, 2023, and the three months period ended March 31, 2022.
- d. Certain reclassifications, regroupings, and reworking have been made in the prior period's financial statements to conform to the classifications used in the current year. This has no impact on previously reported net loss or stockholder's equity.
- e. During the previous year, the Company changed its financial year end to March end from the earlier year end of December to align it with the broader reporting objectives of the parent company. Accordingly, the current financial statements are for the twelve months, April 1, 2022, through March 31, 2023. The numbers reported in the financial statements are not comparable with the previous year, which are for the three months period from January 1, 2022, through March 31, 2022.
- f. The Company reported its investments in Bharat Forge Tennessee, Inc., Bharat Forge PMT Technologie LLC, Bharat Forge Aluminum USA, Inc., and Kalyani Mobility, Inc. applying the equity method of accounting, which is a departure from accounting principles generally accepted in the United States of America.

#### 2. Use of estimates

The preparation of separate parent company financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the separate parent company financial statements and the reported amounts of revenues and expenses during the reporting period. The management's estimates for determination of the provision for doubtful debts, valuation allowance for deferred tax assets and inventory valuation. Management believes that the estimates used in the preparation of the separate parent company financial statements are prudent and reasonable. Actual results could differ from these

estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimate. Any revision to accounting estimates is recognized prospectively in the current and future periods.

# 3. Cash and cash equivalents

Cash equivalents consist of highly liquid investments with a initial maturity of three months or less. The carrying value of cash and cash equivalents approximates fair value because of the short maturities of those financial instruments. Cash balances in bank accounts are insured by the Federal Deposit Insurance Corporation up to an aggregate of \$250,000 per depositor at each financial institution.

# 4. Revenue recognition

Revenue is recognized when obligations under the terms of a contract with a customer are satisfied; generally, this occurs with the transfer of control of the Company's products or services. The Company's payment terms are typically 30-90 days. Revenue is measured as the amount of consideration the Company expects to receive in exchange for transferring goods or providing services. A performance obligation is a promise in a contract to transfer a distinct good or service to the customer and is the unit of account in the contract. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied. In determining the transaction price, the Company considers the effects of variable consideration, the existence of significant financing contracts, noncash consideration, and consideration payable to the customer, if any.

The Company's revenue represents sales of finished goods with incoterms ex-factory/ex-works wherein the goods are made available at the Company's factory location to be picked up by the customers. The performance obligation is met at the time of goods being made available for pick up by customers.

## 5. Accounts receivable and provision for doubtful debts

Receivables relate to amounts receivable from affiliates and the Parent on account of market development and other support services provided by the Company. Based on the management's review of outstanding receivable balances and historical collection information, management's best estimate is that all balances will be collected. Accordingly, the Company has not established an allowance for doubtful accounts.

# 6. Investments in subsidiaries

The Company's investments in BFT, PMT, BFALU, and KMI (till September 30, 2021) are accounted for using the equity method. Under the equity method, the investment is carried at cost, adjusted for the Company's proportionate share of undistributed earnings or losses. The Company has determined to account for its investments in subsidiaries, over which it can exercise significant influence, and has an interest in excess of 50 percent, using the equity method, which is a departure from US GAAP as the subsidiaries should be consolidated. Impairment losses due to a decline in the value of investment other than temporary are recognized when incurred.

#### 7. Inventories

Inventories are stated at the lower of cost or market value, with the cost determined using the weighted average method. Raw materials and packing materials are valued at cost. Cost includes all the appropriate allocable overheads. The cost in the case of work-in-progress and finished goods comprises direct labor, material, cost, and production overheads. Work-in-progress and finished goods are valued at lower of cost or market value after providing for obsolescence and other losses. The Company is required to make assumptions regarding the level of reserves required to value potentially obsolete or overvalued items at a lower of cost or market value. These assumptions require the Company to analyze the aging of and forecasted demand for its inventory, forecast future product sales prices, pricing trends, and margins, and to make judgments and estimates regarding obsolete or excess inventory. Future product sales prices, pricing trends, and margins are based on the best available information at that time, including actual orders received, negotiations with the Company's customers for future orders, including their plans for expenditures, and market trends for similar products. The Company's judgments and estimates for excess or obsolete inventory are based on an analysis of actual and forecasted usage. The Company makes adjustments to its inventory reserve based on the identification of specific situations

and increases its inventory reserves accordingly. As further changes in future economic or industry conditions occur, the Company will revise the estimates that were used to calculate its inventory reserves.

#### 8. Income taxes

In accordance with the provisions of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 740 "Income Taxes," income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The deferred tax asset is reduced by a valuation allowance if it is more likely than not that some portion or all of the asset will not be realized.

The Company recognizes liabilities for uncertain tax positions based on a two-step process. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. The Company recognizes interest and penalties related to uncertain tax positions within the provision for income taxes.

### 9. Commitments and contingencies

Liabilities for loss contingencies arising from claims, assessments, litigations, fines, penalties, and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred. Contingent liabilities are not recognized but are disclosed in the notes. Contingent assets are neither recognized nor disclosed in the separate parent company financial statements.

# 10. Government grant

Government grant is recognized only when there is a reasonable assurance that (a) the entity will comply with any conditions attached to the grant and (b) the grant will be received. The grant is recognized as income over the period necessary to match them with the related costs, for which they are intended to compensate, on a systematic period.

# 11. Fair values measurement

The Company applies fair value measurements to certain assets, liabilities, and transactions that are periodically measured at fair value.

Assets and liabilities recorded at fair value in the separate parent company financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels which are directly related to the amount of subjectivity associated with the inputs to the valuation of these assets or liabilities are as follows:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date.

Level 2 – inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data.

Level 3 – unobservable inputs for the asset or liability only used when there is little if any, market activity for the asset or liability at the measurement date.

This hierarchy requires the Company to use observable market data when available and to minimize the use of unobservable inputs when determining fair value.

# 12. Recently issued accounting standards not yet adopted.

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments," or ASU No. 2016-13. The amendments in ASU No. 2016-13 introduce an approach based on expected losses to estimated credit losses on certain types of financial instruments, modify the impairment model for available-for-sale debt securities and provide for a simplified accounting model for purchased financial assets with credit deterioration since their origination. The new standard requires financial assets measured at amortized cost to be presented at the net amount expected to be collected, through an allowance for credit losses deducted from the amortized cost basis. The standard will be effective for the Company on April 1, 2023, with early application permitted. The Company is currently evaluating the impact of adopting this new accounting quidance on its separate parent company financial statements.]

# **NOTE C: CASH AND CASH EQUIVALENTS**

Cash and cash equivalents include the following:

|                   | As at March 31, 2023 | As at March 31, 2022 |
|-------------------|----------------------|----------------------|
| alance with banks | 24,519               | 471,676              |
|                   | 24,519               | 471,676              |

Balances on deposits with the bank are insured by the Federal Deposit Insurance Corporation up to an aggregate of \$250,000. The Company believes it is not exposed to any significant risk on cash and cash equivalents.

#### **NOTE D: LOANS TO RELATED PARTIES**

Loans from related parties include the following:

|                                     | As at March 31, 2023 | As at March 31, 2022 |
|-------------------------------------|----------------------|----------------------|
| Loan to subsidiaries (refer note J) | 14,500,000           | 25,500,000           |
| Total                               | 14,500,000           | 25,500,000           |

The Company has provided line of credits to related parties. to facilitate working capital requirements. The line of credit has a maximum aggregate permissible limit of \$14,500,000 (March 31, 2022: \$25,500,000). The entire loan is repayable within twelve months from balance sheet date. As at March 31, 2023 the Company has made withdrawals to the tune of \$14,500,000 (March 31, 2022: \$25,500,000).

As of March 31, 2023, the applicable rate of interest on the outstanding loan was 5.45% per annum (March 31, 2022: 2.28%).

The interest expense for the year ended March 31, 2023, was \$488,460 (for the three months ended March 31, 2022: \$144,470). Interest outstanding is \$408,735 and \$198,500 as of March 31, 2023 and 2022, respectively.

#### **NOTE E: OTHER CURRENT ASSETS**

Other current liabilities include the following:

| As at March 31, 2023 | As at March 31, 2022 |
|----------------------|----------------------|
| 408,735              | 198,500              |
| 2,914                | 17,727               |
| 411,649              | 216,227              |
|                      | 408,735<br>2,914     |

#### NOTE F: INVESTMENTS IN NON-CONSOLIDATED SUBSIDIARIES AND AFFILIATE

Investments include the following:

|                                                 | As at March 31, 2023 | As at March 31, 2022 |
|-------------------------------------------------|----------------------|----------------------|
| Investment in Bharat Forge Tennessee, Inc.      | 6,410,591            | 6,158,192            |
| Investment in Bharat Forge PMT Technologie, LLC | 11,506,980           | 9,412,835            |
| Investment in Bharat Forge Aluminum USA Inc     | 10,293,172           | 2,011,506            |
| Investment in Kalyani Mobility, Inc.            | (300)                | (300)                |
| Total                                           | 28,210,443           | 17,582,233           |

On November 30, 2016, the Company acquired 100 percent of shares of Bharat Forge Tennessee Inc. ("BFT") and 82.10% of the membership interest of Bharat Forge Technologie, LLC ("PMT"), both of which are accounted for using the equity method.

Following is a summary of the financial position of PMT as of March 31, 2023, and March 31, 2022:

|                                                       | As at March 31, 2023 | As at March 31, 2022 |
|-------------------------------------------------------|----------------------|----------------------|
| Current assets                                        | 21,573,883           | 14,779,653           |
| Property and equipment                                | 11,400,313           | 10,910,013           |
| Capital work-in-progress                              | 436,952              | 95,850               |
| Intangible assets, net                                | -                    | 14,302               |
| Operating lease right-of-use-assets                   | 325,330              | -                    |

| Stockholder's equity                                   | 25,294,187           | 17,011,506           |

BFALU has revenue of \$22,085,113 and net loss of \$24,593,152 during the year ended March 31, 2023 (for the three months ended March 31, 2022: revenue was NIL and net loss was \$792,707). The net loss is adjusted for depreciation based on fair value of fixed assets.

# **NOTE G: SHORT-TERM BORROWINGS**

Short-term borrowings include the following:

|               | As at March 31, 2023 | As at March 31, 2022 |
|---------------|----------------------|----------------------|
| ne of credits | 14,500,000           | 28,000,000           |
|               | 14,500,000           | 28,000,000           |

Under multiple lines of credit agreements (the "agreements") with multiple banks, the Company has available borrowings of \$14,500,000 (as on March 31, 2023: \$28,000,000). The entire loan is repayable in the next 12 months. The interest rate as per the agreements was stipulated at 1% plus the applicable LIBOR. The average effective rate for all the facilities is 5.36% and 2.40% for the year ended March 31, 2023, and the three months ended March 31, 2022, respectively. The line of credits is unsecured.

The interest expense for the year ended March 31, 2023, was \$488,460 (\$144,470 for the three months ended March 31, 2022). The interest outstanding as of March 31, 2023, was \$408,733, and March 31, 2022, was \$198,500.

#### **NOTE H: OTHER CURRENT LIABILITIES**

Short-term borrowings include the following:

|                     | As at March 31, 2023 | As at March 31, 2022 |
|---------------------|----------------------|----------------------|
| Accrued interest    | 408,735              | 198,500              |
| Provision for taxes | -                    | 50,573               |
| Accrued expenses    | 13,190               | 12,637               |
| Total               | 421,925              | 261,710              |

#### **NOTE J: INCOME TAXES**

The Company files a consolidated federal tax return per regulations applicable to Chapter corporations in the United States.

The Company files combined state tax returns with its US subsidiaries in states where nexus is determined and combined filing is required or permitted based on the state statutes.

The provisions for income tax are NIL for state and federal for year ended March 31, 2023, and three months ended March 31, 2022.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's net deferred income taxes are as follows:

Significant components of the Company's net deferred income taxes are as follows:

|                                                 | As at March 31, 2023 | As at March 31, 2022 |
|-------------------------------------------------|----------------------|----------------------|
| Non-current deferred tax assets                 |                      |                      |
| Goodwill                                        | 43,313               | 41,844               |

| Total deferred tax assets                       | 7,194,059            | 6,897,547            |
| Non-current deferred tax liabilities            |                      | _                    |
| Investment in Bharat Forge PMT Technologie, LLC | (1,365,292)          | (879,372)            |
| Total deferred tax liabilities                  | (1,365,292)          | (879,372)            |
| Net deferred taxes                              | 5,828,767            | 6,018,175            |
| Less: deferred tax asset valuation allowance    | (5,828,767)          | (6,018,175)          |
| Net deferred taxes                              | -                    | -                    |

Realization of net deferred tax assets is dependent upon the generation of sufficient taxable income in future years, benefit from the reversal of taxable temporary differences, and tax planning strategies. Management assesses the available positive and negative evidence to estimate whether sufficient future taxable income will be generated to permit the use of the existing deferred tax assets. The amount of net deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income change.

Management believes that negative evidence outweighs positive evidence. Thus, it is more likely than not that the benefit from deferred tax assets may not be realized in the foreseeable future. In recognition of this risk, a valuation allowance of \$5,828,767 and \$6,018,175 has been created as of March 31, 2023, and March 31, 2022, respectively.

As at March 31, 2023, the Company has federal net operating loss (NOL's) carryforwards of approximately \$34,051,175. Out of total available NOL's of \$34,051,175, NOL's aggregating to \$28,720,579 pertaining to tax years 2006-2017 will expire through tax years 2026 and 2037. As per Tax Cuts and Jobs Act, NOL's aggregating to \$5,330,596 generated in tax years 2018 through 2021 will be carried forward indefinitely for utilization.

# Accounting for uncertain tax positions

The Company recognizes the benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the separate parent company financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company has no unrecognized tax positions as of March 31, 2023, and March 31, 2022. There are no interest and penalties related to uncertain tax positions during the year ended March 31, 2023 and three months ended March 31, 2022.

The tax years of 2019 through 2021 remain subject to examination by the taxing authorities.

### **NOTE L: COMMITMENTS AND CONTINGENCIES**

### **Lease obligations**

The Company is obligated under operating leases with unrelated parties primarily for equipment. As of March 31, 2023, the lease was terminated. The rental expense for the year ended March 31, 2023, is \$23,296 (\$9,027 for the three months ended March 31, 2022)

#### **NOTE M: COMMON STOCK**

#### Common stock authorized, issued, and outstanding.

The authorized common stock is 3,000 shares with a par value of \$0.01 as of March 31, 2023, and March 31, 2022, of which 60 shares were issued as of that date.

### **Voting**

Each holder of common stock is entitled to one vote in respect of each share held in the records of the Company for all matters submitted to a vote.

### Liquidation

In the event of liquidation of the Company, the holders of common stock shall be entitled to receive all of the remaining assets of the Company after the distribution of all preferential amounts, if any. Such amounts will be in proportion to the number of equity shares held by the shareholders.

# **NOTE N: SUBSEQUENT EVENTS**

The Company evaluated all events and transactions after March 31, 2023, through the date the separate parent company financial statements are available to be issued. Based on the evaluation, the Company is unaware of any subsequent events or transactions that would require recognition or disclosure in the separate parent company financial statements.

# **Independent Auditor's Report**

# To Bharat Forge CDP GmbH, Ennepetal

# **Audit Opinions**

We have audited the annual financial statements of Bharat Forge CDP GmbH, Ennepetal, which comprise the balance sheet as at December 31, 2022 and the income statement for the fiscal year from January 1, 2022 to December 31, 2022 and notes to the financial statements, including the presentation of the recognition and measurement policies. In addition, we have audited the management report of Bharat Forge CDP GmbH, Ennepetal, for the financial year from January 1, 2022 to December 31, 2022. In accordance with German legal requirements, we have not audited the statement on the corporate governance statement in accordance with § (Article) 289f (4) HGB (Handelsgesetzbuch: German Commercial Code) (disclosures on the quota for women on executive boards).

In our opinion, on the basis of the knowledge obtained in the audit

- the accompanying annual financial statements comply, in all material respects, with the requirements of German commercial law applicable to business corporations and give a true and fair view of the assets, liabilities and financial position of the Company as at December 31, 2022 and of its financial performance for the financial year from January 1, 2022 to December 31, 2022 in compliance with German Legally Required Accounting Principles, and
- the accompanying management report as a whole provides an appropriate view of the Company's position. In all material respects, this management report is consistent with the annual financial statements, complies with German legal requirements and appropriately presents the opportunities and risks of future development. Our audit opinion on the management report does not cover the content of the statement on corporate governance referred to above.

Pursuant to § 322 Abs. 3 Satz (sentence) 1 HGB, we declare that our audit has not led to any reservations relating to the legal compliance of the annual financial statements and of the management report.

### **Basis for the Audit Opinions**

We conducted our audit of the annual financial statements and of the management report in accordance with § 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (Institute of Public Auditors in Germany) (IDW). Our responsibilities under those requirements and principles are further described in the "Auditor's Responsibilities for the Audit of the Annual Financial Statements and of the Management Report" section of our auditor's report. We are independent of the Company in accordance with the requirements of German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions on the annual financial statements and on the management report.

#### **Other Information**

The executive directors are responsible for the other information. The other information comprises the statement on corporate governance pursuant to § 289f Abs. 4 HGB (disclosures on the quota for women on executive boards).

Our audit opinions on the annual financial statements and on the management report do not cover the other information, and consequently we do not express an audit opinion or any other form of assurance conclusion thereon.

In connection with our audit, our responsibility is to read the other information and, in so doing, to consider whether the other information

- is materially inconsistent with the annual financial statements, with the management report or our knowledge obtained in the audit, or
- otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# Responsibilities of the Executive Directors and the Supervisory Board for the Annual Financial Statements and the Management Report

The executive directors are responsible for the preparation of the annual financial statements that comply, in all material respects, with the requirements of German commercial law applicable to business corporations, and that the annual financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Company in compliance with German Legally Required Accounting Principles. In addition, the executive directors are responsible for such internal control as they, in accordance with German Legally Required Accounting Principles, have determined necessary to enable the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the executive directors are responsible for assessing the Company's ability to continue as a going concern. They also have the responsibility for disclosing, as applicable, matters related to going concern. In addition, they are responsible for financial reporting based on the going concern basis of accounting, provided no actual or legal circumstances conflict therewith.

Furthermore, the executive directors are responsible for the preparation of the management report that as a whole provides an appropriate view of the Company's position and is, in all material respects, consistent with the annual financial statements, complies with German legal requirements, and appropriately presents the opportunities and risks of future development. In addition, the executive directors are responsible for such arrangements and measures (systems) as they have considered necessary to enable the preparation of a management report that is in accordance with the applicable German legal requirements, and to be able to provide sufficient appropriate evidence for the assertions in the management report.

The supervisory board is responsible for overseeing the Company's financial reporting process.

# Auditor's Responsibilities for the Audit of the Annual Financial Statements and of the Management Report

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and whether the management report as a whole provides an appropriate view of the Company's position and, in all material respects, is consistent with the annual financial statements and the knowledge obtained in the audit, complies with the German legal requirements and appropriately presents the opportunities and risks of future development, as well as to issue an auditor's report that includes our audit opinions on the annual financial statements and on the management report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with § 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements and this management report.

We exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual financial statements and of the management report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- Obtain an understanding of internal control relevant to the audit of the annual financial statements and
  of arrangements and measures relevant to the audit of the management report in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing an audit
  opinion on the effectiveness of these systems of the Company.

# **Bharat Forge CDP GmbH**

- Evaluate the appropriateness of accounting policies used by the executive directors and the reasonableness of estimates made by the executive directors and related disclosures.
- Conclude on the appropriateness of the executive directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the annual financial statements and in the management report or, if such disclosures are inadequate, to modify our respective audit opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to be able to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether the annual financial statements present the underlying transactions and events in a manner that the annual financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Company in compliance with German Legally Required Accounting Principles.
- Evaluate the consistency of the management report with the annual financial statements, its conformity with German law, and the view of the Company's position it provides.
- Perform audit procedures on the prospective information presented by the executive directors in the
  management report. On the basis of sufficient appropriate audit evidence we evaluate, in particular,
  the significant assumptions used by the executive directors as a basis for the prospective information,
  and evaluate the proper derivation of the prospective information from these assumptions. We do not
  express a separate audit opinion on the prospective information and on the assumptions used as a
  basis. There is a substantial unavoidable risk that future events will differ materially from the prospective
  information.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

# **Bharat Forge CDP GmbH**

# 1. General

The company is registered as "Bharat Forge CDP GmbH" in the Commercial Register of the Local Court of Hagen under HRB 10053. The company has its registered office in Ennepetal.

Bharat Forge CDP GmbH, Ennepetal, is a large corporation in accordance with Section 267 (3) HGB (German Commercial Code).

The business year covers the period from 01.01.2022 to 31.12.2022.

#### 2. General information about the content and structure of the annual financial statements

The presentation of the annual financial statements has not changed.

The structure of the balance sheet and income statement comply with Sections 266 and 275 HGB. The income statement has been prepared unchanged in accordance with the total cost method as defined in Section 275(2), HGB.

#### 3. Accounting and valuation methods

The annual financial statements as at 31 December 2022 were prepared in accordance with the provisions of Sections 242 to 256a and Sections 264 to 288, HGB. Supplementary provisions of GmbH-Gesetz (German Limited Liability Companies Act) concerning the annual financial statements were observed.

The accounting and valuation methods were applied without change com-pared to the previous year.

Acquired **intangible assets** are valued at acquisition cost. In the case of fixed assets, use of which is limited in terms of time, the acquisition and manufacturing costs are reduced by way of scheduled depreciation. The useful life is generally assumed to be three years unless a different period arises from the type of asset.

**Property, plant and equipment** are generally stated at acquisition or production cost less scheduled depreciation based on use. In addition to directly attributable costs, the production costs of self-constructed assets also include necessary overhead costs.

Depreciation is regularly applied using the straight-line method. Low-value assets, i.e. items with acquisition or production costs up to and including  $\in$  250, are depreciated in full in the year of acquisition. A group item is formed for asset additions in a business year if the acquisition or production costs of an individual asset are more than  $\in$  250 but not more than  $\in$  1,000. The respective group item is to be liquidated in the year in which it was set up and in the following four financial years in each case at a rate of one fifth affecting net income. Depreciation is applied on a pro rata temporis basis for additions. Insofar as own work capitalised is to be recorded, it is valued at production cost, which also includes appropriate portions of the necessary material and production overheads as well as production-related depreciation.

Useful life times are determined by asset group as follows:

| Asset                             | Useful life   |
|-----------------------------------|---------------|
| Intangible assets                 | 3 years       |
| Buildings                         | 25 – 33 years |
| Outdoor facilities                | 8 - 33 years  |
| Technical equipment and machinery | 5 - 10 years  |
| Tools                             | 3 years       |
| Fixtures, fittings and equipment  | 5 - 10 years  |
| EDP equipment                     | 3 years       |

**Financial assets** are stated at acquisition cost.

If the value of fixed assets determined according to the above principles exceeds the value to be attributed to them on the balance sheet date, this is taken into account by means of unscheduled depreciation or value adjustments in the event of a probable permanent reduction in value.

**Inventories** are stated at acquisition or production cost using permissible simplified valuation methods or at lower fair values. In addition to the directly attributable costs, the manufacturing costs also include appropriate portions of the necessary production and material overheads. Interest on borrowed capital is not stated. Administrative costs are only included in the calculation of production costs to the extent that they are caused by production. Appropriate deductions are made for storage and marketability risks.

**Receivables** and other assets are stated at cost less appropriate allowances for identifiable individual risks. The general credit risk is taken into account by way of a general bad debt allowance.

The **deferred charges and prepaid expenses item** comprises general expenses prior to the reporting date provided they constitute expenses for a certain period after that date.

**Subscribed capital** is stated at nominal value.

**Pension obligations** are calculated at their actuarial value according to the projected unit credit method using the Dr Klaus Heubeck 2018 G mortality tables based on the following assumptions:

Discount rate:
Projected benefit trend:
BBG trend:
Pension trend:
Fluctuation:
1.78 % p.a.
2.00 % p.a.
2.40 % p.a.
1.00 % p.a.

**Other provisions** take into account all identifiable risks, contingent liabilities and impending losses from pending transactions, insofar as these exist. They are generally valued at their necessary settlement amount according to reasonable commercial judgement.

Provisions with a residual term of more than one year are discounted at the average market interest rate of the past seven financial year's corresponding to their residual term in accordance with Section 253(2), Sentence 1, HGB (German Commercial Code). In the case of provisions for anniversary bonuses and similar long-term obligations, the interest rate in accordance with Section 253(2), Sentence 2, HGB, is applied, which results from a residual term assumed as a flat rate of 15 years. The longer term portion of the provision for personnel measures, which is already agreed on the basis of agreed terms, was discounted at 0%.

The amount of the obligation from partial retirement was netted with the fair value of the securities account for insolvency protection of the employees' partial retirement claims.

The **liabilities** correspond to their settlement amounts. Liabilities in foreign currencies were translated at the average spot exchange rate on the balance sheet date in accordance with Section 256a HGB.

#### 4. Notes to the balance sheet and income statement

# 4.1 Assets

The composition and development of fixed assets is shown in the following fixed asset movement schedule.

Fixed Assets Analysis as at December 31, 2022

|                                                                                                        | 111,245,024.68 | 4,904,552.69              | 3,232,424.99 | 0.00                | 112,917,152.38 | 83,636,892.87 | 7,244,097.74             | 3,184,484.31 | 87,696,506.30 | 25,220,646.08 | 27,608,131.81 |
|                                                                                                        |                |                           |              |                     |                |               |                          |              |               |               |               |

### 4.2 Receivables and other assets

Other assets include claims for electricity and energy tax refunds in the sum of  $\in$  401k because accrued items that do not legally arise until after the balance sheet date. In addition, an agreement was entered into with one of the house banks in December 2021 for the securitisation of selected receivables, resulting in receivables of  $\in$  1,829k.

# 4.3 Provision for pensions

The portion of provisions for pensions not yet recognised as a liability due to the application of Article 67 (1) EC-HGB (distribution of the adjustment amount resulting from the valuation according to BilMoG), originally  $\in$  1,181k, still totals  $\in$  157k as at 31 December 2022.

The resulting effect in accordance with Section 253(6), HGB, is € 628k as at 31.12.2022. There is a distribution block in this amount.

The pension provision is  $\in$  10,153k as at the balance sheet date.

#### 4.4 Other reserves

Provisions for partial retirement obligations were offset against the corresponding value of the securities deposit for insolvency protection in the amount of  $\in$  534k (previous year:  $\in$  537k).

Other provisions include the following significant items:

|                           | €k    |
|---------------------------|-------|
| Personnel                 | 4,039 |
| Customers                 | 1,712 |
| Obligations from interest | 677   |
| Suppliers                 | 543   |

# 4.5 Liabilities

Of the liabilities to banks,  $\in$  15,943k have a remaining term of up to one year,  $\in$  9,675k have a remaining term of 1 - 5 years.

Long term liabilities to a bank in the sum of  $\in$  14,400k (as of 31.12.2022) arise from two loan agreements and are secured by land charges in the sum of  $\in$  18,900k.

Furthermore, current account liabilities of € 11,218k to two banks are secured by way of an agreement in favour of these banks, by which all inventories and trade receivables are deemed assigned as collateral.

#### 4.6 Breakdown of sales revenue

Revenues are broken down by domestic and foreign markets as follows:

|         | 2022    | PY      | Change |
|---------|---------|---------|--------|
|         | €k      | €k      | €k     |
| Germany | 83,762  | 70,711  | 13,051 |
| Abroad  | 125,050 | 103,942 | 21,108 |
|         | 208,812 | 174,653 | 31,159 |

# 4.7 Income and expenses unrelated to the accounting period and of extraordinary significance

Other operating income includes  $\in$  2,507k in income attributable to previous financial years. This includes income from the reversal of provisions in the sum of  $\in$  2,480k (previous year:  $\in$  789k).

Other operating expenses include € 168k in expenses attributable to previous financial years.

# 4.8 Offsetting expenses and income

Expenses and income in the sum of  $\in$  2k have been offset in the financial result.

#### 5. Other disclosures

# 5.1 Contingent liabilities and other financial obligations

**Other financial obligations** exist for rental and leasing contracts totalling € 2,319k, of which € 933k are due within 2023.

There were no **contingent liabilities**.

The loan agreements provide for covenants on the part of BF CDP, which were honoured as at 31 December 2022.

# 5.2 Number of employees

On average, the company employed

|                      | 2022 | PY  |
|----------------------|------|-----|
| Commercial employees | 330  | 360 |
| Salaried employees   | 104  | 109 |
| Apprentices          | 17   | 28  |
|                      | 451  | 497 |

# **5.3** Members of the Board of Management

The following persons were appointed as managing directors:

- Michael Weis, Dipl.-Ing., development and strategy, Schönaich (until Oct. 12, 2022)
- Martin Kübelbäck, Dipl.-Kfm., Commercial Area, Meerbusch (until Dec. 19, 2022)
- Dr. Jens Ludmann, Dipl. Ing. / Dipl. Wirtsch.-Ing., Sales and Technology, Engelskirchen (from Sept. 8, 2022)
- Sebastian Ochs, MBA, Commercial Area, Nuremberg (from Dec. 1, 2022)

The managing Directors received no compensation in 2022.

#### 5.4 Members of the Advisory Board

Members of the Advisory Board were:

- Kishore M. Saletore
- Subodh E. Tandale

#### 5.5 Balance sheet auditor's fee

The total fee charged by the balance sheet auditor for the 2022 financial year in accordance with Section 285, No. 17, HGB, is included in the corresponding note to the consolidated financial statements as at 31 December 2022 of Bharat Forge Global Holding GmbH.

#### 5.6 Holdings

|                        | Equity | Share | Result 2021 |
|------------------------|--------|-------|-------------|
|                        | €k     | %     | €k          |
| Bharat Forge Daun GmbH | 4,643  | 100   | 1,763*      |

<sup>\*</sup> before profit transfer to Bharat Forge CDP GmbH

# 5.7 Incorporation in the consolidated financial statement

Bharat Forge Ltd, Mundhwa, Pune, India, is the parent company that prepares the consolidated financial statements for the largest group of companies. In case of disclosure, this is done with

the Registrar of Companies in Maharashtra, Pune, India. Bharat Forge Global Holding GmbH, Ennepetal, is the parent company that prepares the consolidated financial statements for the smallest group of companies. In the event of disclosure, this is made in the company register.

# **5.8** Proposal for the appropriation of profits

The net profit for the financial year shall be transferred to the parent company in accordance with the profit and loss transfer agreement.

Ennepetal, March 31, 2023

## **Independent Auditor's Report**

## To Bharat Forge Daun GmbH, Daun

#### **Audit Opinions**

We have audited the annual financial statements of Bharat Forge Daun GmbH, Daun, which comprise the balance sheet as at December 31, 2022 and the income statement for the fiscal year from January 1, 2022 to December 31, 2022 and notes to the financial statements, including the presentation of the recognition and measurement policies. In addition, we have audited the management report of Bharat Forge Daun GmbH, Daun, for the financial year from January 1, 2022 to December 31, 2022.

In our opinion, on the basis of the knowledge obtained in the audit

- the accompanying annual financial statements comply, in all material respects, with the requirements of German commercial law applicable to business corporations and give a true and fair view of the assets, liabilities and financial position of the Company as at December 31, 2022 and of its financial performance for the financial year from January 1, 2022 to December 31, 2022 in compliance with German Legally Required Accounting Principles, and
- the accompanying management report as a whole provides an appropriate view of the Company's position. In all material respects, this management report is consistent with the annual financial statements, complies with German legal requirements and appropriately presents the opportunities and risks of future development.

Pursuant to § 322 Abs. 3 Satz (sentence) 1 HGB, we declare that our audit has not led to any reservations relating to the legal compliance of the annual financial statements and of the management report.

### **Basis for the Audit Opinions**

We conducted our audit of the annual financial statements and of the management report in accordance with § 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (Institute of Public Auditors in Germany) (IDW). Our responsibilities under those requirements and principles are further described in the "Auditor's Responsibilities for the Audit of the Annual Financial Statements and of the Management Report" section of our auditor's report. We are independent of the Company in accordance with the requirements of German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions on the annual financial statements and on the management report.

# Responsibilities of the Executive Directors and the Supervisory Board for the Annual Financial Statements and the Management Report

The executive directors are responsible for the preparation of the annual financial statements that comply, in all material respects, with the requirements of German commercial law applicable to business corporations, and that the annual financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Company in compliance with German Legally Required Accounting Principles. In addition, the executive directors are responsible for such internal control as they, in accordance with German Legally Required Accounting Principles, have determined necessary to enable the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the executive directors are responsible for assessing the Company's ability to continue as a going concern. They also have the responsibility for disclosing, as applicable, matters related to going concern. In addition, they are responsible for financial reporting based on the going concern basis of accounting, provided no actual or legal circumstances conflict therewith.

Furthermore, the executive directors are responsible for the preparation of the management report that as a whole provides an appropriate view of the Company's position and is, in all material respects, consistent with the annual financial statements, complies with German legal requirements, and appropriately presents

the opportunities and risks of future development. In addition, the executive directors are responsible for such arrangements and measures (systems) as they have considered necessary to enable the preparation of a management report that is in accordance with the applicable German legal requirements, and to be able to provide sufficient appropriate evidence for the assertions in the management report.

The supervisory board is responsible for overseeing the Company's financial reporting process.

# Auditor's Responsibilities for the Audit of the Annual Financial Statements and of the Management Report

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and whether the management report as a whole provides an appropriate view of the Company's position and, in all material respects, is consistent with the annual financial statements and the knowledge obtained in the audit, complies with the German legal requirements and appropriately presents the opportunities and risks of future development, as well as to issue an auditor's report that includes our audit opinions on the annual financial statements and on the management report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with § 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements and this management report.

We exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual financial statements and of the
  management report, whether due to fraud or error, design and perform audit procedures responsive to
  those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit
  opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one
  resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations,
  or the override of internal controls.
- Obtain an understanding of internal control relevant to the audit of the annual financial statements and
  of arrangements and measures relevant to the audit of the management report in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing an audit
  opinion on the effectiveness of these systems of the Company.
- Evaluate the appropriateness of accounting policies used by the executive directors and the reasonableness of estimates made by the executive directors and related disclosures.
- Conclude on the appropriateness of the executive directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the annual financial statements and in the management report or, if such disclosures are inadequate, to modify our respective audit opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to be able to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether the annual financial statements present the underlying transactions and events in a manner that the annual financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Company in compliance with German Legally Required Accounting Principles.
- Evaluate the consistency of the management report with the annual financial statements, its conformity with German law, and the view of the Company's position it provides.
- Perform audit procedures on the prospective information presented by the executive directors in the

# **Bharat Forge Daun GmbH**

management report. On the basis of sufficient appropriate audit evidence we evaluate, in particular, the significant assumptions used by the executive directors as a basis for the prospective information, and evaluate the proper derivation of the prospective information from these assumptions. We do not express a separate audit opinion on the prospective information and on the assumptions used as a basis. There is a substantial unavoidable risk that future events will differ materially from the prospective information.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### 1. General

The company is registered as "Bharat Forge Daun GmbH" in the Commercial Register of the Local Court of Wittlich under HRB 40331. The company has its registered office in Daun.

Bharat Forge Daun GmbH, Daun, is a large corporation in accordance with Section 267(2), HGB (German Commercial Code).

The company makes use of the size-dependent relief in accordance with Section 288(2), HGB.

The business year covers the period from 01.01.2022 to 31.12.2022.

### 2. General information about the content and structure of the annual financial statement

The presentation of the annual financial statements has not changed.

The structure of the balance sheet and income statement comply with Sections 266 and 275 HGB. The income statement has been prepared unchanged in accordance with the total cost method as defined in Section 275(2), HGB.

# 3. Accounting and valuation methods

The annual financial statements as at 31 December 2022 were prepared in accordance with the provisions of Sections 242 to 256a and Sections 264 to 288, HGB. Supplementary provisions of GmbH-Gesetz (German Limited Liability Companies Act) concerning the annual financial statements were observed.

The accounting and valuation methods were applied without change compared to the previous year.

Acquired **intangible assets** are valued at acquisition cost. In the case of fixed assets, the use of which is limited in terms of time, the acquisition and manufacturing costs are reduced by way of scheduled depreciation. The useful life is generally assumed to be three years unless a different period arises from the type of asset.

**Property, plant and equipment** are generally stated at acquisition or production cost less scheduled depreciation based on use.-

Depreciation is regularly applied using the straight-line method. Low-value assets, i.e. items with acquisition or production costs up to and including  $\in$  250, are depreciated in full in the year of acquisition. A collective item is formed for asset additions in a business year if the acquisition or production costs of an individual asset are more than  $\in$  250 but not more than  $\in$  1,000. The respective group item is to be liquidated in the year in which it was set up and in the following four financial years in each case at a rate of one fifth affecting net income. Depreciation is applied on a pro rata temporis basis for additions.

Insofar as own work capitalised is to be recorded, it is valued at production cost, which also includes appropriate portions of the necessary material and production overheads as well as production-related depreciation.

Useful life times are determined by asset group as follows:

| Asset                             | Useful life   |
|-----------------------------------|---------------|
| Intangible assets                 | 3 years       |
| Buildings                         | 25 – 33 years |
| Outdoor facilities                | 8 - 33 years  |
| Technical equipment and machinery | 5 - 10 years  |
| Tools                             | 3 years       |
| Fixtures, fittings and equipment  | 5 - 10 years  |
| EDP equipment                     | 3 years       |

If the value of fixed assets determined according to the above principles exceeds the value to be attributed to them on the balance sheet date, this is taken into account by means of unscheduled depreciation or value adjustments in the event of a probable permanent reduction in value.

**Inventories** are stated at acquisition or production cost using permissible simplified valuation methods or at lower fair values. Inventories are stated at acquisition or production cost using permissible simplified valuation methods or at lower fair values. Interest on borrowed capital is not stated. Administrative costs are only included in the calculation of production costs to the extent that they are caused by production. Appropriate deductions are made for storage and marketability risks.

**Receivables** and other assets are stated at cost less appropriate allowances for identifiable individual risks. The general credit risk is taken into account by way of a general bad debt allowance.

The **deferred charges and prepaid expenses** item comprises exclusively expenses prior to the reporting date, provided they constitute expenses for a certain period after that date.

**Subscribed capital** is stated at nominal value.

**Pension obligations** are calculated at their actuarial value according to the projected unit credit method using the Dr Klaus Heubeck 2018 G mortality tables based on the following assumptions:

- Discount rate: 1.78 % p.a. (10-Years-Average)

BBG trend: 0.00 % p.a.
 Pension trend: 2.40 % p.a.
 Fluctuation: 1.00 % p.a.

**Other provisions** take into account all identifiable risks, contingent liabilities and impending losses from pending transactions, insofar as these exist. They are generally valued at their necessary settlement amount according to reasonable commercial judgement.

Provisions with a residual term of more than one year are discounted at the average market interest rate of the past seven financial year's corresponding to their residual term in accordance with Section 253(2), Sentence 1, HGB (German Commercial Code). In the case of provisions for anniversary bonuses and similar long-term obligations, the interest rate in accordance with Section 253(2), Sentence 2, HGB, is applied, which results from a residual term assumed as a flat rate of 15 years.

The amount of the obligation from partial retirement was netted with the fair value of the securities account for insolvency protection of the employees' partial retirement claims. The fair value is measured according to the price determined on a regulated market on the balance sheet date. No obligations existed on the balance sheet date.

The **liabilities** correspond to their settlement amounts. Liabilities in foreign currencies were translated at the average spot exchange rate on the balance sheet date in accordance with Section 256a HGB.

#### 4. Notes to the balance sheet and income statement

#### 4.1 Assets

The composition and development of fixed assets is shown in the following fixed asset movement schedule.

Fixed Assets Analysis as at December 31, 2022

|                                                                                                        |               |                                               |              |                   |               |               |               |           |               |              |              |
|                                                                                                        | 19,065,019.52 | 1,316,524.58                                  | 429,669.32   | 00.00             | 19,951,874.78 | 15,381,008.52 | 1,061,743.41  | 79,870.32 | 16,362,881.61 | 3,588,993.17 | 3,684,011.00 |
|                                                                                                        |               |                                               |              |                   |               |               |               |           |               |              |              |

### 4.2 Receivables and other assets

Other assets include claims for electricity and energy tax refunds in the amount of  $\in$  46k as accrued items that do not legally arise until after the reporting date.

#### 4.3 Provision for pensions

The portion of provisions for pensions not yet recognised as a liability due to application of Article 67(1), EGHGB (distribution of the adjustment amount resulting from the valuation according to BilMoG), originally  $\in$  81k, still totals  $\in$  11k as at 31 December 2022. The resulting effect in accordance with Section 253(6), HGB, is  $\in$  90k as at 31.12.2022. There is a distribution block in this amount.

#### 4.4 Other reserves

Other provisions include the following significant items:

|           | €k  |
|-----------|-----|
| Personnel | 492 |
| Suppliers | 48  |
| Total     | 540 |

A difference on the assets side results from the hedging of partial retirement obligations via associated hedging assets. The acquisition costs of the assets offset in accordance with Section 246(2) HGB, are  $\in$  20k, the fair values are  $\in$ 18k and the settlement amount of the offset liabilities is  $\in$  0k.

#### 4.5 Liabilities

All liabilities have a residual term of up to one year.

# 5. Other disclosures

#### 5.1 Contingent liabilities and other financial obligations

Contingent liabilities in favour of affiliated companies consisted of the assumption of debt to secure a KfW entrepreneurial loan in the sum of  $\in$  9,900k.

The parent company's financial position remains solid in view of its high equity ratio, medium-term bank loans and sufficient credit lines. Utilization is not currently expected, as the Company has insight into the parent company's planning. If required, there is also support from the Group and therefore no provision is required at the current time.

**Other financial obligations** exist for rental and leasing contracts totalling € 108k, of which € 73k shall fall due within 2023.

## 5.2 Number of employees

On average, the company employed

|                      | 2022 | PY  |
|----------------------|------|-----|
| Commercial employees | 79   | 75  |
| Salaried employees   | 18   | 16  |
| Apprentices          | 10   | 11  |
|                      | 107  | 102 |

### **5.3** Members of the Managing Directors

The following persons were appointed as managing directors:

- Michael Weis, Dipl.-Ing., development and strategy, Schönaich (until Oct. 12, 2022)
- Martin Kübelbäck, Dipl.-Kfm., Commercial Area, Meerbusch (until Dec. 19, 2022)

# **Bharat Forge Daun GmbH**

- Dr. Jens Ludmann, Dipl. Ing. / Dipl. Wirtsch.-Ing., Sales and Technology, Engelskirchen (from Sept. 8, 2022)
- Sebastian Ochs, MBA, Commercial Area, Nuremberg (from Dec. 1, 2022)

The managing Directors received no compensation in 2022.

# 5.4 Members of the Advisory Board

Members of the Advisory Board were:

- Kishore M. Saletore
- Subodh E. Tandale

## 5.5 Incorporation in the consolidated financial statement

Bharat Forge Ltd, Mundhwa, Pune, India, is the parent company that prepares the consolidated financial statements for the largest group of companies. In case of disclosure, this is done with the Registrar of Companies in Maharashtra, Pune, India. Bharat Forge Global Holding GmbH, Ennepetal, is the parent company that prepares the consolidated financial statements for the smallest group of companies. In the event of disclosure, this is made in the company register.

## 5.6 Proposal for the appropriation of profits

The net profit for the financial year shall be transferred to the parent company in accordance with the profit and loss transfer agreement. No allocation to reserves is planned.

# Strategic Report for the year ended 31 March 2023

The directors present the strategic report for the year ended 31 March 2023.

#### Fair review of the business

Over a few years, the company has established firm foundations from which it can grow and flourish.

This year, there has been a steady recovery and this is reflected in the company's turnover. Revenue for the year to 31 March 2023 was \$419 million compared to \$355 million in the same period in 2022.

Relaxation of Covid-19 restrictions worldwide has meant a turnaround in global economies and a successful year for the company.

# **Principal risks and uncertainties**

The company is exposed to logistic and credit risks in accordance with group policies

Other risks include;

- Vulnerability to exchange markets or mechanisms
- Inflation risk

All companies within this market are exposed to these risks. These risks have been managed appropriately during the year and we will continue to manage them as they evolve.

In any event the company has the continued support of its parent Bharat Forge Limited to ensure that the company will have every opportunity to benefit from any improvement in the economic conditions in which the company operates. We therefore look forward with some confidence to 2024 and beyond.

# **Key performance indicators**

The directors are of the opinion that the key performance indicator for this business is this reported turnover which has seen an increase from \$355 m in 2022 to \$419 m in 2023. In percentage terms it has increased by 18%.

#### Section 172 statement

Throughout, we have kept to our task and continued to promote the success of the company by:

- Working with the short, medium and long term in mind to maintain the loyalty of our customer base with a view to building on both our new and long standing relationships.
- Encouraging our talented, skilled and loyal workforce to deliver impeccable customer service. We take this opportunity to thank them for their continued enthusiasm and attitude towards their work, as they go on to produce a world class service.
- Collaborating carefully with our suppliers, who we acknowledge as part of the team, we are able to build the support and offer real value to our customers.
- Having regard to the effect of our board decisions not only on the local community, but also on the environment globally.
- Acting ethically and with integrity at all times, such that we do not lose the trust of all
- Aiming to act fairly with every stakeholder in the company including customers, suppliers, employees, shareholders and all with whom the company interacts.

On behalf of the board

#### **Mr Kedar Dixit**

Director

28 April 2023

# Directors' Report for the year ended 31 March 2023

The directors present their annual report and financial statements for the year ended 31 March 2023.

# **Principal activities**

The principal activity of the company continued to be that of the distribution of forged and machined components for the automotive and industrial segments. The financial statements have been prepared in US Dollars.

#### **Results and dividends**

The results for the year are set out on herein.

No ordinary dividends were paid. The directors do not recommend payment of a final dividend.

#### **Directors**

The directors who held office during the year and up to the date of signature of the financial statements were as follows:

Mr B N Kalyani

Mr A B Kalyani

Mr S G Joglekar

Mr Kedar Dixit

Mr P G Pawar

# Supplier payment policy

The company's current policy concerning the payment of trade creditors is to follow the CBI's Prompt Payers Code (copies are available from the CBI, Centre Point, 103 New Oxford Street, London WC1A 1DU).

The company's current policy concerning the payment of trade creditors is to:

- settle the terms of payment with suppliers when agreeing the terms of each transaction;
- ensure that suppliers are made aware of the terms of payment by inclusion of the relevant terms in contracts; and
- pay in accordance with the company's contractual and other legal obligations.

#### **Auditor**

In accordance with the company's articles, a resolution proposing that Eacotts International Limited be reappointed as auditor of the company will be put at a General Meeting.

### **Energy and carbon report**

As the company has not consumed more than 40,000 kWh of energy in this reporting period, it qualifies as a low energy user under these regulations and is not required to report on its emissions, energy consumption or energy efficiency activities.

# **Statement of disclosure to auditor**

Each director in office at the date of approval of this annual report confirms that:

- so far as the director is aware, there is no relevant audit information of which the company's auditor is unaware, and
- the director has taken all the steps that he / she ought to have taken as a director in order to make himself / herself aware of any relevant audit information and to establish that the company's auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of section 418 of the Companies Act 2006.

On behalf of the board

# **Mr Kedar Dixit**

Director

28 April 2023

# **Bharat Forge International Limited**

# Directors' Responsibilities Statement for the year ended 31 March 2023

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the United Kingdom. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, International Accounting Standard 1 requires that directors:

- properly select and apply accounting policies;
- present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- provide additional disclosures when compliance with the specific requirements in IFRSs are insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance; and
- make an assessment of the company's ability to continue as a going concern.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

#### Independent Auditor's Report to the Members of Bharat Forge International Ltd.

### **Opinion**

We have audited the financial statements of Bharat Forge International Ltd (the 'company') for the year ended 31 March 2023 which comprise the income statement, the statement of comprehensive income, the statement of financial position, the statement of changes in equity, the statement of cash flows and notes to the financial statements, including significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and UK adopted international accounting standards.

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 March 2023 and of its profit for the year then ended;
- have been properly prepared in accordance with UK adopted international accounting standards; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the <u>Auditor's responsibilities</u> for the audit of the <u>financial statements</u> section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Conclusions relating to going concern**

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

#### Other information

The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

#### **Opinions on other matters prescribed by the Companies Act 2006**

In our opinion, based on the work undertaken in the course of our audit:

• the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and

## **Bharat Forge International Limited**

• the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

#### Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

#### **Responsibilities of directors**

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

#### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the company and industry, we identified that the principal risks of non-compliance with laws and regulations related to industry sector regulations and unethical and prohibited business practices, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as Companies Act 2006 and UK Tax Legislation. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls). Appropriate audit procedures in response to these risks were carried out. These procedures included:

- Enquiry of management and those charged with governance around actual and potential litigation and claims.
- Enquiry of entity staff in tax and compliance functions to identify any instances of non-compliance with laws and regulations.
- Reviewing minutes of meetings of those charged with governance.
- Reviewing financial statement disclosures and testing to supporting documentation to assess compliance with applicable laws and regulations.

- Auditing the risk of management override of controls, including through testing journal entries and other adjustments for appropriateness, and evaluating the business rationale of significant transactions outside the normal course of business.
- Challenging assumptions and judgements made by management in their significant accounting estimates.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members; and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

There are inherent limitations in the audit procedures described above and the further non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we would become aware of it. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error.

A further description of our responsibilities is available on the Financial Reporting Council's website at: https://www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

#### Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

| Bank overdrafts                                        |       |             | (1,498,943,085) |          | (18,231,569) |             | (21,524,780) |

#### Notes to the Financial Statements for the year ended March 31, 2023

#### 1 Accounting policies

#### **Company information**

Bharat Forge International Ltd is a private company limited by shares incorporated in England and Wales. The registered office is Boston House Business Centre, 69-75 Boston Manor Road, Brentford, Middlesex, TW8 9JJ. The company's principal activities and nature of its operations are disclosed in the directors' report.

#### 1.1 Accounting convention

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted for use in the United Kingdom and with those parts of the Companies Act 2006 applicable to companies reporting under IFRS, except as otherwise stated.

The financial statements are prepared in US Dollars, which is the functional currency of the company. Monetary amounts in these financial statements are rounded to the nearest \$.

The financial statements have been prepared under the historical cost convention. The principal accounting policies adopted are set out below.

#### 1.2 Going concern

At the time of approving the financial statements, the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. The directors also confirm continuous support from the parent company, Bharat Forge Limited. Thus the directors continue to adopt the going concern basis of accounting in preparing the financial statements.

#### 1.3 Revenue

Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The company recognises revenue when it transfers control of a product or service to a customer.

When cash inflows are deferred and represent a financing arrangement, the fair value of the consideration is the present value of the future receipts. The difference between the fair value of the consideration and the nominal amount received is recognised as interest income.

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer (usually on dispatch of the goods), the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the entity and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from contracts for the provision of professional services is recognised by reference to the stage of completion when the stage of completion, costs incurred and costs to complete can be estimated reliably. The stage of completion is calculated by comparing costs incurred, mainly in relation to contractual hourly staff rates and materials, as a proportion of total costs. Where the outcome cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

The company recognises revenue from the following major sources:

- Sale of goods
- Interest income

The nature, timing of satisfaction of performance obligations and significant payment terms of the company's major sources of revenue are as follows:

#### Sale of goods

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer. Generally this is the date on which the goods are withdrawn from the warehouse. Where goods are shipped directly to the customer the revenue is recognised on the date which the goods reach the customer. The normal credit term is 30 - 90 days upon withdrawal or delivery.

#### **Interest income**

Interest income is recognised on receipt.

#### 1.4 Property, plant and equipment

Property, plant and equipment are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Land and buildings Freehold Straight line over 30 years

Fixtures, fittings & equipment 10-20% Straight line
Plant and machinery 33% Straight line
Motor vehicles 20% Straight line

Right of use asset Straight line over expected lease term

The gain or loss arising on the disposal of an asset is determined as the difference between the sale proceeds and the carrying value of the asset, and is recognised in the income statement.

#### 1.5 Non-current investments

Interests in subsidiaries, associates and jointly controlled entities are initially measured at cost and subsequently measured at cost less any accumulated impairment losses. The investments are assessed for impairment at each reporting date and any impairment losses or reversals of impairment losses are recognised immediately in profit or loss.

#### 1.6 Impairment of tangible and intangible assets

At each reporting end date, the company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cashgenerating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

#### 1.7 Inventories

Inventories are stated at the lower of cost and estimated selling price less costs to complete and sell. Cost comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition.

At each reporting date, an assessment is made for impairment. Any excess of the carrying amount of inventories over its estimated selling price less costs to complete and sell is recognised as an impairment loss in profit or loss. Reversals of impairment losses are also recognised in profit or loss.

#### 1.8 Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities.

#### 1.9 Financial assets

Financial assets are recognised in the company's statement of financial position when the company becomes party to the contractual provisions of the instrument. Financial assets are classified into specified categories, depending on the nature and purpose of the financial assets.

At initial recognition, financial assets classified as fair value through profit and loss are measured at fair value and any transaction costs are recognised in profit or loss. Financial assets not classified as fair value through profit and loss are initially measured at fair value plus transaction costs.

#### Financial assets at fair value through profit or loss

Basic financial assets, which include trade and other receivables and cash and bank balances, are initially measured at transaction price including transaction costs and are subsequently carried at amortised cost using the effective interest method unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest.

Financial assets classified as receivable within one year are not amortised.

#### Financial assets held at amortised cost

Financial assets with fixed or determinable payments and fixed maturity dates that the Company has the positive intent and ability to hold to maturity are classified as held to maturity investments.

Held to maturity investments are measured at amortised cost using the effective interest method less any impairment, with revenue recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating the interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the debt instrument to the net carrying amount on initial recognition.

Trade receivables, loans and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are measured at amortised cost using the effective interest method, less any impairment.

Interest is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial. The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating the interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the debt instrument to the net carrying amount on initial recognition.

#### **Impairment of financial assets**

In accordance with IFRS 9, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- a. Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- b. Lease receivables
- c. Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of IAS 11 and IAS 18
- d. Financial assets that are measured at fair value through the statement of other comprehensive income (FVTOCI)

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

As a practical expedient, the Company uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss. This amount is reflected under the head 'other expenses' in the statement of profit and loss.

The balance sheet presentation for various financial instruments is described below:

• Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables:

ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the

asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

Debt instruments measured at FVTOCI:

Since financial assets are already reflected at fair value, impairment allowance is not further reduced from its value. Rather, ECL amount is presented as 'accumulated impairment amount' in the OCI.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

• The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/origination.

#### **Derecognition of financial assets**

Financial assets are derecognised only when the contractual rights to the cash flows from the asset expire or are settled, or when the company transfers the financial asset and substantially all the risks and rewards of ownership to another entity, or if some significant risks and rewards of ownership are retained but control of the asset has transferred to another party that is able to sell the asset in its entirety to an unrelated third party.

#### 1.10 Financial liabilities

Basic financial liabilities, including trade and other payables, bank loans, loans from fellow group companies and preference shares that are classified as debt, are initially recognised at transaction price unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest. Financial liabilities classified as payable within one year are not amortised.

Debt instruments are subsequently carried at amortised cost, using the effective interest rate method.

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Amounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade payables are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

#### Other financial liabilities

Other financial liabilities, including borrowings, trade payables and other short-term monetary liabilities, are initially measured at fair value net of transaction costs directly attributable to the issuance of the financial liability. They are subsequently measured at amortised cost using the effective interest method. For the purposes of each financial liability, interest expense includes initial transaction costs and any premium payable on redemption, as well as any interest or coupon payable while the liability is outstanding.

#### **Derecognition of financial liabilities**

Financial liabilities are derecognised when, and only when, the company's obligations are discharged, cancelled, or they expire.

#### 1.11 Equity instruments

Equity instruments issued by the company are recorded at the proceeds received, net of direct issue costs. Dividends payable on equity instruments are recognised as liabilities once they are no longer at the discretion of the company.

#### 1.12 Taxation

The tax expense represents the sum of the tax currently payable and deferred tax.

#### **Current tax**

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the reporting end date.

#### **Deferred tax**

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting end date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity. Deferred tax assets and liabilities are offset when the company has a legally enforceable right to offset current tax assets and liabilities and the deferred tax assets and liabilities relate to taxes levied by the same tax authority.

#### 1.13 Employee benefits

The costs of short-term employee benefits are recognised as a liability and an expense, unless those costs are required to be recognised as part of the cost of inventories or non-current assets.

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the company is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

#### 1.14 Retirement benefits

Payments to defined contribution retirement benefit schemes are charged as an expense as they fall due.

#### 1.15 Leases

At inception, the company assesses whether a contract is, or contains, a lease within the scope of IFRS 16. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Where a tangible asset is acquired through a lease, the company recognises a right-of-use asset and a lease liability at the lease commencement date. Right-of-use assets are included within property, plant and equipment, apart from those that meet the definition of investment property.

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date plus any initial direct costs and an estimate of the cost of obligations to dismantle, remove, refurbish or restore the underlying asset and the site on which it is located, less any lease incentives received.

## **Bharat Forge International Limited**

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of other property, plant and equipment. The right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are unpaid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the company's incremental borrowing rate. Lease payments included in the measurement of the lease liability comprise fixed payments, variable lease payments that depend on an index or a rate, amounts expected to be payable under a residual value guarantee, and the cost of any options that the company is reasonably certain to exercise, such as the exercise price under a purchase option, lease payments in an optional renewal period, or penalties for early termination of a lease.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in: future lease payments arising from a change in an index or rate; the company's estimate of the amount expected to be payable under a residual value guarantee; or the company's assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The company has elected not to recognise right-of-use assets and lease liabilities for short-term leases of machinery that have a lease term of 12 months or less, or for leases of low-value assets including IT equipment. The payments associated with these leases are recognised in profit or loss on a straight-line basis over the lease term.

#### 1.16 Grants

Government grants are recognised when there is reasonable assurance that the grant conditions will be met and the grants will be received.

#### 1.17 Foreign exchange

Transactions in currencies other than US Dollars are recorded at the rates of exchange prevailing at the dates of the transactions. At each reporting end date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing on the reporting end date. Gains and losses arising on translation are included in the income statement for the period.

## 2 Revenue

An analysis of the company's revenue is as follows:

|                                                                           | 2023        | 2022        |
|---------------------------------------------------------------------------|-------------|-------------|
|                                                                           | \$          | \$          |
| Revenue analysed by class of business                                     |             |             |
| Forged and machined components for automotive and non-automotive industry | 419,296,068 | 355,318,285 |
| Other significant revenue                                                 |             |             |
| Interest income                                                           | 912,979     | 634,882     |
| Grants received                                                           | -           | 16,413      |
| Revenue analysed by geographical market                                   |             |             |
| United States of America                                                  | 344,143,083 | 289,282,757 |
| Europe                                                                    | 69,925,106  | 60,307,901  |

| Investments held at fair value through other comprehensive income | -       | -    | 1,719,300   | 1,719,300 |  |

The company holds an investment of 51,536 (1.76%) shares in Tevva Motors (Jersey) Limited. Tevva Motors (Jersey) Limited, incorporated in Jersey, holds an investment of 1.95m shares in Tevva Motors Limited or 27.05% of the company. The shares of Tevva Motors Ltd are currently valued at \$50 based on a recent funding round. As a result the company has decided to revalue its investment in 2022. The investment value remains at \$50 per share and no revaluation of the investment has taken place in 2023.

#### Judgements and key sources of estimation uncertainty

The preparation of these financial statements requires management to make judgements, estimates and assumptions that affect the amounts reported for assets and liabilities as at the statement of financial position date and the amounts reported for revenues and expenses during the year. However, the nature of estimation means that actual outcomes could differ from those estimates. The above revaluation has the most significant effect on amounts recognised in the financial statements.

#### **Unlisted Investments**

| At 1st April 2021                      | \$0         |
|----------------------------------------|-------------|
| Revaluation                            | \$1,719,300 |
| At 31st March 2022 and 31st March 2023 | \$1,719,300 |

#### Fair value of financial assets

The directors consider that the carrying amounts of financial assets are carried at fair value in the financial statements.

Trade receivables disclosed above are classified as loans and receivables and are therefore measured at amortised cost.

#### 15 Trade receivables - credit risk

#### Fair value of trade receivables

The directors consider that the carrying amount of trade and other receivables is approximately equal to their fair value.

No significant receivable balances are impaired at the reporting end date.

#### 16 Borrowings

|                                      | 2023       | 2022       |
|--------------------------------------|------------|------------|
|                                      | \$         | \$         |
| Secured borrowings at amortised cost |            |            |
| Bank overdrafts                      | 18,231,569 | 21,524,780 |
|                                      |            |            |

#### **Analysis of borrowings**

The company's bankers hold security over all the company's assets (present, future, actual or contingent and whether incurred alone or jointly with another) including interest and expenses.

Current liabilities **18,231,569 21,524,780** 

### 17 Fair value of financial liabilities

The directors consider that the carrying amounts of financial liabilities carried at amortised cost in the financial statements approximate to their fair values.

## 18 Liquidity risk

The following table details the remaining contractual maturity for the company's financial liabilities with agreed repayment periods. The contractual maturity is based on the earliest date on which the company may be required to pay.

|                  | Less than 1 year | 1 – 5 years | Total       |
|------------------|------------------|-------------|-------------|
|                  | \$               | \$          | \$          |
| At 31 March 2022 |                  |             |             |
| Bank overdraft   | 21,524,780       | -           | 21,524,780  |
| Trade payables   | 13,995           | -           | 13,995      |

#### 19 Market risk

## Market risk management

#### Foreign exchange risk

The carrying amounts of the company's foreign currency denominated monetary assets and liabilities at the reporting date are as follows:

|                | Assets     | Assets Liabilite |            | Assets Liabilites |  | Assets Liabilites |  | Assets |  | s |
|----------------|------------|------------------|------------|-------------------|--|-------------------|--|--------|--|---|
|                | 2023       | 2022             | 2023       | 2022              |  |                   |  |        |  |   |
|                | \$         | \$               | \$         | \$                |  |                   |  |        |  |   |
| Euro           | 41,217,896 | 32,778,791       | 42,568,863 | 41,757,156        |  |                   |  |        |  |   |
| Pound sterling | 2,385,603  | 2,505,056        | 16,987,109 | 14,736,895        |  |                   |  |        |  |   |
|                | 43,603,499 | 35,283,847       | 59,555,972 | 56,494,051        |  |                   |  |        |  |   |

#### **Interest rate risk**

The carrying amounts of financial liabilities which expose the company to cash flow interest rate risk are as follows:

| 2023 | 2022 |
|------|------|
| %    | %    |
| 3    | 2    |
| 3    | 2    |
|      |      |

## 20 Trade and other payables

|                                           | 2023        | 2022        |  |
|-------------------------------------------|-------------|-------------|--|
|                                           | \$          | \$          |  |
| Trade payables                            | 709,723     | 13,995      |  |
| Amount owed to parent undertaking         | 248,623,857 | 203,977,092 |  |
| Amounts owed to fellow group undertakings | 233,722     | 233,722     |  |
| Amounts owed to related parties           | 255,946     | 10,557,734  |  |
| Accruals                                  | 1,974,402   | 897,256     |  |
| Social security and other taxation        | 145,971     | 88,030      |  |
| Other payables                            | 802,880     | 580,173     |  |
|                                           | 252,746,501 | 216,348,002 |  |
|                                           |             |             |  |

## 21 Lease liabilities

| 2023    | 2022                      |
|---------|---------------------------|
| \$      | \$                        |
|         |                           |
| 150,330 | 102,502                   |
| 446,730 | 463,913                   |
| 88,845  | 217,997                   |
| 685,905 | 784,412                   |
|         | \$ 150,330 446,730 88,845 |

Lease liabilities are classified based on the amounts that are expected to be settled within the next 12 months and after more than 12 months from the reporting date, as follows:

|                         | 685,905 | 784,412 |
|-------------------------|---------|---------|
| Non-current liabilities | 535,575 | 681,910 |
| Current liabilities     | 150,330 | 102,502 |

The fair value of the company's lease obligations is approximately equal to their carrying amount.

#### 22 Deferred taxation

The following are the major deferred tax liabilities and assets recognised by the company and movements thereon during the current and prior reporting period.

|                                        | Revaluation | <b>Provisions</b> | <b>Provisions</b> |
|----------------------------------------|-------------|-------------------|-------------------|
|                                        | \$          | \$                | \$                |
| Asset at 1 April 2021                  | -           | (190,760)         | (190,760)         |
| Deferred tax movements in prior year   |             |                   |                   |
| Charge/(credit) to profit or loss      | -           | (31,350)          | (31,350)          |
| Asset at 1 April 2022                  | -           | (222,110)         | (222,110)         |
| Deferred tax movements in current year |             |                   |                   |
| Charge/(credit) to profit or loss      | 257,874     | (70,140)          | 187,734           |
| Asset at 31 March 2023                 | 257,874     | (292,250)         | (34,376)          |

#### 23 Retirement benefit schemes

|                                                                     | 2023   | 2022  |
|---------------------------------------------------------------------|--------|-------|
|                                                                     | \$     | \$    |
| Defined contribution schemes                                        |        |       |
| Charge to profit or loss in respect of defined contribution schemes | 28,733 | 8,614 |

The company operates a defined contribution pension scheme for all qualifying employees. The assets of the scheme are held separately from those of the company in an independently administered fund.

## 24 Share capital

|                                   | 2023    | 2022    |

### **Auditor's report**

To the general meeting of the shareholders of **Bharat Forge Kilsta AB, corporate identity number 556061-2565** 

#### Report on the annual accounts

#### **Opinions**

We have audited the annual accounts of Bharat Forge Kilsta AB for the year 2022-01-01 - 2022-12-31.

In our opinion, the annual accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the Bharat Forge Kilsta AB as of December 31, 2022 and its financial performance and cash flow for the year then ended in accordance with the Annual Accounts Act. The statutory administration report is consistent with the other parts of the annual accounts.

We therefore recommend that the general meeting of shareholders adopts the income statement and balance sheet.

#### **Basis for Opinions**

We conducted our audit in accordance with International Standards on Auditing (ISA) and generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the **Auditor's Responsibilities** section. We are independent of the Bharat Forge Kilsta AB in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

#### Responsibilities of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of the annual accounts and that they give a fair presentation in accordance with the Annual Accounts Act. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the Board of Directors and the Managing Director are responsible for the assessment of the company's ability to continue as a going concern. They disclose, as applicable, matters related to going concern and using the going concern basis of accounting. The going concern basis of accounting is however not applied if the Board of Directors and the Managing Director intend to liquidate the company, to cease operations, or has no realistic alternative but to do so.

#### Auditor's responsibility

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and generally accepted auditing standards in Sweden will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of the company's internal control relevant to our audit in order to design audit

procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors and the Managing Director.
- Conclude on the appropriateness of the Board of Directors' and the Managing Director's use of the going concern basis of accounting in preparing the annual accounts. We also draw a conclusion, based on the audit evidence obtained, as to whether any material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion about the annual accounts. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual accounts, including the disclosures, and whether the annual accounts represent the underlying transactions and events in a manner that achieves fair presentation.

We must inform the Board of Directors of, among other matters, the planned scope and timing of the audit. We must also inform of significant audit findings during our audit, including any significant deficiencies in internal control that we identified.

#### Report on other legal and regulatory requirements

#### **Opinions**

In addition to our audit of the annual accounts, we have also audited the administration of the Board of Directors and the Managing Director of Bharat Forge Kilsta AB for the year 2022-01-01 - 2022-12-31 and the proposed appropriations of the company's profit or loss.

We recommend to the general meeting of shareholders that the profit be appropriated in accordance with the proposal in the statutory administration report and that the members of the Board of Directors and the Managing Director be discharged from liability for the financial year.

#### **Basis for Opinions**

We conducted the audit in accordance with generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the **Auditor's Responsibilities** section. We are independent of the Bharat Forge Kilsta AB in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

#### Responsibilities of the Board of Directors and the Managing Director

The Board of Directors is responsible for the proposal for appropriations of the company's profit or loss. At the proposal of a dividend, this includes an assessment of whether the dividend is justifiable considering the requirements which the company's type of operations, size and risks place on the size of the company's equity, consolidation requirements, liquidity and position in general.

The Board of Directors is responsible for the company's organization and the administration of the company's affairs. This includes among other things continuous assessment of the company's financial situation and ensuring that the company's organization is designed so that the accounting, management of assets and the company's financial affairs otherwise are controlled in a reassuring manner. The Managing Director shall manage the ongoing administration according to the Board of Directors' guidelines and instructions and among other matters take measures that are necessary to fulfill the company's accounting in accordance with law and handle the management of assets in a reassuring manner.

## **Bharat Forge Kilsta AB**

#### **Auditor's responsibility**

Our objective concerning the audit of the administration, and thereby our opinion about discharge from liability, is to obtain audit evidence to assess with a reasonable degree of assurance whether any member of the Board of Directors or the Managing Director in any material respect:

- has undertaken any action or been guilty of any omission which can give rise to liability to the company, or
- in any other way has acted in contravention of the Companies Act, the Annual Accounts Act or the Articles of Association.

Our objective concerning the audit of the proposed appropriations of the company's profit or loss, and thereby our opinion about this, is to assess with reasonable degree of assurance whether the proposal is in accordance with the Companies Act.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with generally accepted auditing standards in Sweden will always detect actions or omissions that can give rise to liability to the company, or that the proposed appropriations of the company's profit or loss are not in accordance with the Companies Act.

As part of an audit in accordance with generally accepted auditing standards in Sweden, we exercise professional judgment and maintain professional skepticism throughout the audit. The examination of the administration and the proposed appropriations of the company's profit or loss is based primarily on the audit of the accounts. Additional audit procedures performed are based on our professional judgment with starting point in risk and materiality. This means that we focus the examination on such actions, areas and relationships that are material for the operations and where deviations and violations would have particular importance for the company's situation. We examine and test decisions undertaken, support for decisions, actions taken and other circumstances that are relevant to our opinion concerning discharge from liability. As a basis for our opinion on the Board of Directors' proposed appropriations of the company's profit or loss we examined whether the proposal is in accordance with the Companies Act.

#### **Criticism**

The former CEO Niklas Blom has, during the year, granted himself a loan of SEK 159 644 which is in violation of 21 Chap. of the Swedish Companies Act. The loan was repaid before the end of the financial year.

Karlstad, 9th June, 2023

**Ernst & Young AB** 

#### **Tomas Karlsson**

**Authorized Public Accountant** 

## **Administration Report**

#### **General information on the Company and business**

The Company is one of the leading manufactures of forged crankshafts for diesel engines in the world. Other products are front axle beams, steering- and transmission ports for the vehicle industry. The production facilities are three forging presses with a pressing capacity of 2500, 4000 and 16000 tons respectively and equipment for heat-treatment and machinery for cutting processes. The heavy press is fully automatic as well as one of the biggest in the world.

Ownership structure, see note 8.

#### Significant events

The world economy in 2022 was characterized by the war in Ukraine, the energy crisis, high inflation and higher interest rates.

Sales tonnage during the financial year amounted to 41590 tons, which is 4.5% higher than budgeted. The production volume during the financial year amounted to 41420 tons, which is 7.4% higher than budgeted. Demand for the Company's products has thus remained high, despite events in the outside world and an upcoming recession.

The two new machines for machining of front axle beams, which were ordered in 2021, were commissioned at the end of 2022. A third machine for machining of front axle beams has also been ordered. With the new machines, some of the machining of front axle beams that is currently available from an external machinist, will be insourced.

The Company's electricity costs have increased sharply during the year, as a result of the higher prices in the market. Part of the electricity consumption is secured in advance through futures contracts. The Company has requested, and received, compensation from its customers to cover the cost increases on electricity.

Steel prices have continued to increase during the financial year. The main driver of the price increases is the increased energy costs of steel mills. The Company has requested, and received, compensation from its customers to cover the cost increases on steel.

The Company's interest expenses have increased as a result of the higher interest rates.

The Company's interest expenses have increased as a result of the higher interest rates.

Michael Weis was appointed CEO on June 15. Jens Ludmann was appointed CEO on September 9th.

During the year, the Company continued to use the possibilities for deferral of tax payments.

## Significant events after year-end

Sales tonnage in the 2023 financial year is expected to increase by approximately 3.5% compared to 2022. The year 2023 has started with sales tonnage, which roughly follows what has been budgeted.

The Company has applied for, and been granted, a continued deferral of tax payments.

During the first quarter 2023, the Company is changing its main financing to the MUFG-bank. The change gives lower interest costs compared to previous financing, as well as an expansion of the Company's loan framework from EUR 26 million to EUR 30 million.

#### **Expected future development, risk and uncertainties**

The Company operates within a highly competitive market and the business is associated with risks. The Company is exposed to both operational and financial risks. The development of steel and energy prices and increased competition are among the main operational risks. The financial risk consists of a credit risk, i.e. that the Company is not paid for its trade receivables, and the development of EUR/SEK because the Company has its financing in EUR.

## **Bharat Forge Kilsta AB**

Since the Company is a subcontractor to the automotive industry, the Company cannot influence its sales in the short term. Sales volumes thus depend on the overall economic development and how sales volumes develop among the Company's customers.

How the Company's sales volumes will develop during 2023 is difficult to assess. It depends on how deep the ongoing recession will be, how long it will last, and whether the recession is also spreading to the automotive industry.

It is also uncertain whether the high inflation suffered by the world economy in 2022 will continue in 2023. The Company purchases large quantities of steel, electricity and other consumables, and it is important that the Company can pass on the cost increases to the Company's customers. The years following the Covid epidemic have also been characterized by disruptions in supply chains, and it is uncertain whether these disruptions will continue, subside or deepen.

If sales were to fall, it could lead to the need for additional liquidity. In general, the Group strives to ensure that all its companies cover their own cash needs on their own. In terms of financing costs, there is a risk that interest rates will increase further, and thus also interest costs.

In the forging industry, unplanned production downtime is generally common. In order to reduce the negative consequences of downtime, the Company has focused on preventive maintenance. The Company is working on several projects within "Industry 4.0", such as sensor technology and various forms of digitalization to identify further preventive measures.

Adequate insurance coverage is available for all relevant operational risks - including damage to property, interruptions, as well as third-party claims.

Management believes that the measures planned and implemented in the short term are appropriate to ensure earning capacity and financial strength in the current situation.

#### **Research and development**

The research and development activities of the Company amounted 0,21% (0,24%) of the total operating expenses during the financial year.

#### Sustainability report

The Company has issued a separate Sustainability Report, available at request from the Company.

#### **Environmental issues**

The Company is conducting manufacturing which needs environmental permission. Permission for manufacturing of 120.000 metric tonnes of forge products per year is in place. The most important environmental influences of the Company is the exploit of resources depending on the huge use of steel and energy. Influence by direct discharge into air and water is insignificant. Almost all of the Company's production corresponds to the environmental permission.

#### Comparative figures covering several years

The financial development for the Company in summary. Definitions of key figures, down below.

|                                         | 2022      | 2021    | 2020     | 2019     |
|-----------------------------------------|-----------|---------|----------|----------|
| Net sales, TSEK                         | 1,206,087 | 906,894 | 662,788  | 907,408  |

| Balance sheet total, TSEK               | 641,877   | 573,425 | 508,402  | 506,737  |
| Number of employees,                    | 274       | 271     | 288      | 338      |
| Equity/assets ratio, %                  | 4,3       | 8,4     | 5,4      | 2,0      |
| Return on total assets, %               | 2,4       | 6,3     | Neg      | Neg      |
| Return on equity, %                     | Neg       | 43,5    | Neg      | Neg      |

#### **Equity/assets ratio**

Equity and untaxed reserves (less deferred tax) as a percentage of total assets.

#### **Return on total assets**

Income before taxes plus financial income related to balance sheet total.

#### **Return on equity**

Income after financial items as a percentage of equity and untaxed reserves (less deferred tax).

### Proposed treatment of gain/losses

To the disposal of the annual general meeting are the following loss (SEK)

Unappropriated loss brought forward 15,949,712

Net loss for the year (21,018,127)

(5,068,415)

The Board of Directors propose that the unappropriated loss be distributed as follows

Retained loss carried forward (5,068,415)

## **Result and financial position**

## **Note 1 : Accounting principles**

Bharat Forge Kilsta ABs Annual Report is prepared in accordance with the Annual Accounts Act and the guidelines issued by the Accounting Standard Board (BFN) 2012:1 Annual Report and consolidation statement (K3). If nothing else is stated the principles are unchanged compared to last year.

## **Foreign currencies**

Monetary assets and liabilities in foreign currencies are translated at the closing rate. Transactions in foreign currency are translated using the transaction date. Non-monetary assets and liabilities are not recalculated and are reported at time for acquisition.

#### **Revenues**

Sales of goods are recognized when the significant risks and rewards passes from seller to buyer under conditions of sale. Sales are reported after deduction of VAT and discounts. Interest income is recognized using the effective interest method.

#### **Income taxes**

Current taxes are valued using tax rates and tax laws applicable at the balance sheet date.

Deferred tax loss carryforwards or other future tax deductions are recognized to the extent that is it probable that the deduction can be used against future taxable profits. Receivables and liabilities are reported as net when there is a legally right to set off.

Current taxes, as well as changes in deferred tax is recognized in the income statement unless the tax belongs to an event or transaction which is recognized directly in equity. Tax effects of items recognized directly in equity is recognized in equity.

#### **Intangible fixed assets**

#### Research and development

The Company applies the expensing model internally generated intangible fixed assets. Expenditures are recognized when they occur.

## **Tangible fixed assets**

Tangible fixed assets are stated at cost less depreciation. Cost includes expenditure that directly belongs to the acquisition of the asset. When a component of a fixed asset is replaced, disposal is made of the remaining old component and the new component is activated. Expenditures for repair and maintenance are recognized as expenses. Capital gain or capital loss on disposal of a fixed asset is recognized as other operating income or other operating costs. Tangible fixed assets are systematically depreciated over estimated useful life. When the depreciation amount is determined also the residual value is considered. Property land has an unlimited useful life and is not depreciated.

Linear base are used for other types of tangible fixed assets. No borrowing costs are capitalized.

In this respect the following depreciation periods are applied:

|                                         | Number of years |
|-----------------------------------------|-----------------|
| Residential property                    | 50              |
| Industrial buildings                    |                 |
| - Structure                             | 40-50           |
| - Facade, windows, roof                 | 15-30           |
| - Interior finishes                     | 10-15           |
| Land improvements                       | 20              |
| Plant and machinery                     | 1-30            |
| Equipment, tools, fixtures and fittings | 3-33            |
|                                         |                 |

## **Bharat Forge Kilsta AB**

Plant and machinery applies individual component split and amortization are estimated at each investment.

#### Impairment of non-financial assets

When there is an indication that an asset is impaired, an assessment is made of impairment. Have the assets a recovery value that is lower than the reported amount, will it be written down to its recoverable amount. When assessing impairment, the recoverable amount for the whole of cash-generating unit to which the asset belongs.

#### Lease

All leases where the Company is the lessee are treated as operating leases, whether the contracts are financial or operational. Lease payments are recognized as an expense on a linear basis over the lease term.

#### **Financial instruments**

Financial instruments recognized in the balance sheet include account receivables and other receivables, payables and loan.

## Account receivables and other receivables

Receivables are recognized as current assets. Receivables are recorded at the amount expected to be paid after deductions for individually assessed impaired receivables.

## Loan and payables

Loan and payables are recognized initially at cost, less transaction costs.

#### Netting of financial asset and financial liability

A financial asset and a financial liability are netted and the net amount are presented in the balance sheet only if a legally enforceable right exists and then verifies with a net amount or when a disposal of the asset and adjustment of liabilities will take place.

#### Impairment of financial assets

At each reporting date, the company estimates whether there is any indication of impairment in any of the financial fixed assets. Impairment is recognized if the impairment is estimated to be permanent. Impairment losses are recognized in the income statement item Income from other investments held as fixed assets. The impairment is tested individually for stocks and shares and other individual financial assets that are essential.

#### **Inventories**

Inventories are valued to the lower of cost or net realizable value. Inventories are valued as acquisition cost using weighted average price. Raw material includes all costs directly attributable to the acquisition of the goods in cost. Goods and finished goods include design costs, raw material, direct labor, other direct costs, related production costs and loan costs. Individual obsolescence assessment is ongoing.

#### **Provisions**

The Company recognizes a provision when there is a legal or constructive obligation and a reliable estimate can be made. The Company calculates the present value of obligations that are expected to be settled after more than twelve months. The increase in the provision due to passage of time is recognized as interest expense.

## **Employee benefits**

#### Short term benefits

Short term benefits contain salary, social security contributions, paid vacation, paid sick leave and bonuses. Short term benefits are recognized as an expense and a liability when there is a legal or constructive obligation to pay compensation.

#### Post-employment benefits

Plans for post-employment benefits are classified as either defined contribution plans and defined benefit pension plans.

In defined contribution plans, the Company pays fixed contributions into a different Company, usually an insurance company and has no further obligation to the employee when the fee is paid.

The size of the employee's retirement benefits depends on the contributions paid and the return on those fees. In defined benefit plans, the company has an obligation to provide the agreed benefits to current and former employees. The company should substantially all the risk that the compensation will be higher than expected (actuarial risk) and risk of return on assets from expectations (investment risk). Investment risk exists even if the assets are transferred to another company. The charges for defined contribution plans are recognized as an expense. Unpaid fees are recognized as a liability. For defined benefit plans, the Company has elected to apply the simplification rules in BFNAR 2012:1. For defined benefit plans funded in-house, the company has chosen to report these in accordance with IAS 19. Actuarial gains and losses are recognized in equity as retained earnings.

#### Termination benefits

Termination benefits is payable when the Company decides to terminate employment before normal retirement date or whenever an employee accepts an offer of voluntary retirement in exchange for such compensation. If the compensation not gives any future economic benefit, a liability and an expense is made when the Company has a legal or constructive obligation to provide such compensation. The compensation is valued at the best estimate of the compensation that would be required to settle the obligation at the balance sheet date.

#### **Cash flow**

The cash flow statement is prepared using the indirect method. Reported cash flow includes only transactions that involve receipts or payments.

#### **Estimates and assessments**

The preparation of financial statements and applicable accounting principles are often based on management's judgments, estimates and assumptions that are considered reasonable at the time the assessment is made. Estimates and judgments are based on historical experience and a number of other factors, which under current circumstances are considered reasonable. The results of these are used to assess the reported values of assets and liabilities, which are not otherwise clearly evident from other sources. The actual outcome may differ from these estimates and assessments. Estimates and assessments are reviewed regularly.

According to company management, significant judgments are made regarding applied accounting principles and sources of uncertainty in estimates, mainly related to tangible fixed assets, capitalized deficits reported as deferred tax assets, doubtful accounts receivable and accounting for inventories.

#### Fixed assets

Tangible fixed assets are valued at cost less accumulated depreciation according to plan and any write-downs. Depreciation and write-downs are determined on the basis of an individual assessment of the financial life and value of the assets. The assessment of the useful life and value of fixed assets is material and has a major impact on the income statement and balance sheet. Company management bases its assessments on historical outcomes and physical observations of significant facilities as well as assessments of technical and economic life. If there is a need for an impairment, the asset's recoverable amount is calculated. Recoverable value is the highest of fair value less sales costs and value in use.

When calculating the value in use, the present value is calculated from the future cash flows that the asset is expected to give rise to in its current operations and when it is divested or disposed of. The discount rate used is before tax and reflects market assessments of the time value of money and the risks related to the asset. An earlier write-down is reversed only if the reasons on which the recovery value was calculated at the last write-down have changed.

#### Deferred tax assets

As a result of losses in recent years, corporate management has estimated that tax losses are only capitalized insofar as there are temporary differences on which deferred tax liabilities are reported, see also note 11 deferred tax.

## Bharat Forge Kilsta AB

#### Accounts receivables

Accounts receivable are recognized net after provision for doubtful accounts receivable. The reserve for accounts receivable is based on an individual assessment. The net worth corresponds to the expected value. Current management is deemed sufficient by management.

#### Inventories

Inventories are valued at the lower of cost and net realizable value. The size of the net realizable value includes calculations, among other things, based on future sales prices, when assessed price reductions are taken into account. The actual outcome of future sales prices may deviate from assessments made.

#### **CSR/Sustainability report**

According to Annual Accounts Act chapter 7 §31a the company does not establish a statutory sustainability report. Bharat Forge Kilsta AB is a wholly owned subsidiary to Bharat Forge Global Holding GmbH. Bharat Forge Global Holding GmbH, corp. id HRB6669 is registered at "Handelsregister B des Amtsgerichts Hagen", Mittelstrasse 64, 58256 Ennepetal.

#### **Independent Auditor's Report**

## To the Members Bharat Forge PMT Technologie, LLC

#### **Opinion**

We have audited the financial statements of Bharat Forge PMT Technologie, LLC (the "Company"), which comprises the balance sheets as of March 31, 2023, and March 31, 2022, and the related statements of loss for the year ended March 31, 2023 and for the period from January 1, 2022 to March 31, 2022, changes in members' equity and cash flows for the year and period then ended and the related notes to the financial statements.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the financial position of the Company as of March 31, 2023, and March 31, 2022, and the result of its operations, and its cash flows for the year and period then ended, in accordance with accounting principles generally accepted in the United States of America.

#### **Basis for opinion**

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

#### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
  or error, and design and perform audit procedures responsive to those risks. Such procedures include
  examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Atlanta, Georgia June 30, 2023

## Balance Sheet as on March 31, 2023

#### **Notes to Financial Statements**

#### **NOTE A: NATURE OF OPERATIONS**

Bharat Forge PMT Technologie, LLC (formerly Walker Forge Tennessee, LLC, or the "Company") is engaged in the manufacture and sale of steel forgings. The Company sells its products primarily to customers in the automotive, construction, and recreational vehicle industries.

On November 30, 2016, the Company was acquired by Bharat Forge America, Inc. (82.10%) and Bharat Forge Tennessee, Inc. (17.90%). Subsequent to this acquisition, the Company changed its name from Walker Forge Tennessee, LLC to Bharat Forge PMT Technologie, LLC. Bharat Forge Limited (ultimate Parent Company or "BFL") a publicly listed Company in India, owns 100% of the common stock of Bharat Forge America, Inc.

#### **NOTE B: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

A summary of significant accounting policies applied in the preparation of the accompanying financial statements is as follows:

## 1. Basis of preparation

- a. The accompanying financial statements are prepared under the historical cost convention on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States of America ("US GAAP") to reflect the financial position, results of operations, members' equity, and cash flows.
- b. All amounts are stated in United States Dollars except as otherwise specified.
- c. The financial statements are for the year ended March 31, 2023, and three months period ended March 31, 2022.
- d. Certain reclassifications, regroupings, and reworking have been made in the financial statements of the prior year to confirm the classifications used in the current year. This has no impact on the previously reported net loss or members' equity.
- e. During the previous year, the Company changed its financial year end to March from the earlier year end of December to align it with the broader reporting objectives of the ultimate Parent Company BFL. Accordingly, the current financial statements are for the twelve months period beginning from April 1, 2022, through March 31, 2023. The numbers reported in the current year's financial statements are not comparable with the previous period, which are for the three months period from January 1, 2022, through March 31, 2022.

#### 2. Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The management's estimates for determination of useful lives of property, plant and equipment and intangibles, allowance for doubtful accounts receivable, valuation allowance for deferred tax assets, inventory valuation and events at the balance sheet dates represent certain of these particularly sensitive estimates. The estimates use historical information and other relevant factors available to management. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Any revision to accounting estimates is recognized prospectively in the current and future periods.

#### 3. Cash and cash equivalents

Cash equivalents consist of highly liquid investments with an initial maturity of three months or less. The carrying value of cash and cash equivalents approximates fair value because of the short maturities of

those financial instruments. Cash balances in bank accounts are insured by Federal Deposit Insurance Corporation up to an aggregate of \$250,000 per depositor at each financial institution.

#### 4. Revenue recognition

Revenue is recognized when obligations under the terms of a contract with a customer are satisfied; generally, this occurs with the transfer of control of the Company's products or services. The Company's payment terms are typically 30-90 days. Revenue is measured as the amount of consideration the Company expects to receive in exchange for transferring goods or providing services. A performance obligation is a promise in a contract to transfer a distinct good or service to the customer and is the unit of account in the contract. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied. In determining the transaction price, the Company considers the effects of variable consideration, the existence of significant financing contracts, noncash consideration, and consideration payable to the customer, if any.

The Company's revenue represents sales of finished goods with incoterms ex-factory/ex-works wherein the goods are made available at the Company's factory location to be picked up by the customers. The performance obligation is met at the time of goods being made available for pick up by customers.

## 5. Accounts receivable and provision for doubtful debts

Accounts receivable consist of uncollateralized customer obligations, which generally require payment within 90 days from the invoice date. Accounts receivables are stated at net invoice amounts. The Company follows the specific identification method for recognizing provision for doubtful debts. Management analyzes the composition of the accounts receivable aging, historical bad debts, current economic trends, and customer creditworthiness of each account receivable when evaluating the adequacy of the provision for doubtful accounts. All amounts deemed to be uncollectible are charged against the provision for doubtful debt in the period that determination is made and is included in marketing and selling expenses in the statements of loss.

#### 6. Inventories

Inventories are stated at a lower of cost or market value, with the cost determined using the weighted average method. Raw materials and packing materials are valued at cost. Cost includes all the appropriate allocable overheads. The cost in the case of work-in-progress and finished goods comprises direct labor, material, cost, and production overheads. Work-in-progress and finished goods are valued at lower of cost or market value after providing for obsolescence and other losses. The Company is required to make assumptions regarding the level of reserves required to value potentially obsolete or overvalued items at a lower of cost or market value. These assumptions require the Company to analyze the aging of and forecasted demand for its inventory, forecast future product sales prices, pricing trends, and margins, and to make judgments and estimates regarding obsolete or excess inventory. Future product sales prices, pricing trends, and margins are based on the best available information at that time, including actual orders received, negotiations with the Company's customers for future orders, including their plans for expenditures, and market trends for similar products. The Company's judgments and estimates for excess or obsolete inventory are based on an analysis of actual and forecasted usage. The Company makes adjustments to its inventory reserve based on the identification of specific situations and increases its inventory reserves accordingly. As further changes in future economic or industry conditions occur, the Company will revise the estimates that were used to calculate its inventory reserves.

## 7. Property, plant and equipment and depreciation

Property, plant, and equipment are stated at the cost less accumulated depreciation. The cost of items of property, plant, and equipment comprises the cost of purchase and other costs necessarily incurred to bring it to the condition and location necessary for its intended use.

Major maintenance projects that extend the life of the related equipment are capitalized. The cost of maintenance and repairs is charged to expense when incurred.

The Company depreciates property, plant, and equipment over the estimated useful life using the straight-line method, including finance lease assets which are depreciated over the terms of their

respective leases. Upon retirement or disposal of assets, the cost and accumulated depreciation are eliminated from the accounts and the resulting gain or loss is credited or charged to operations.

The estimated useful life used to determine depreciation is:

| Building improvements         | 10 years   |
|-------------------------------|------------|
| Machinery and equipment       | 1-20 years |
| Equipment under finance lease | 5 years    |
| Production tools and dies     | 4-8 years  |
| Office furniture              | 5-10 years |
| Vehicles                      | 9 years    |

Deposits paid towards the acquisition of property, plant, and equipment outstanding as of each balance sheet date and the cost of property, plant, and equipment not ready for use before such date are disclosed under capital work-in-progress.

#### 8. Intangible assets

Intangible assets are stated at cost less accumulated amortization. The Company amortizes intangible assets over their estimated useful lives unless such lives are determined to be indefinite. Amortizable intangible assets are amortized over their estimated useful lives in proportion to the economic benefits consumed in each period. Intangible assets with indefinite lives are tested at least annually for impairment and written down to the fair value as required. The estimated useful lives of the amortizable intangible assets are as follows:

Software 3 years

## 9. Impairment of long-lived assets

Long-lived assets, including certain identifiable intangible assets, to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Such assets are considered to be impaired if the carrying amount of the assets is higher than the future undiscounted net cash flows expected to be generated from the assets. The impairment amount to be recognized is measured by the amount by which the carrying value of the assets exceeds its fair value.

#### 10. Income taxes

In accordance with the provisions of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 740 "Income Taxes," income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The deferred tax asset is reduced by a valuation allowance if it is more likely than not that some portion or all of the assets will not be realized.

The Company recognizes liabilities for uncertain tax positions based on a two-step process. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. The Company recognizes interest and penalties related to uncertain tax positions within the provision for income taxes.

#### 11. Leases

Accounting Standard Update ("ASU") 2016-02, Leases. On April 1, 2022, the Company early adopted

Accounting Standards Codification 842 and all the related amendments ("new lease standard") using the modified retrospective method. The comparative information has not been restated and continues to be reported under the lease accounting standard in effect of those periods. The new lease standard requires all leases to be reported on the balance sheet as lease right-of-use assets and lease obligations. The Company elected the practical expedients permitted under the transition guidance of the new standard that retained the lease classification and initial direct costs for any leases that existed prior to the adoption of the standard.

The Company's leases are classified as operating leases, which are included in operating lease right-of-use assets and operating lease liabilities in the Company's balance sheet. Right-of-use assets and lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at the commencement date for leases exceeding 12 months. Minimum lease payments include only the fixed lease component of the agreement, as well as any variable rate payments that depend on an index, initially measured using the index at the lease commencement date. Lease terms may include options to renew when it is reasonably certain that the Company will exercise that option.

The Company's estimation considers the market rates of the Company's outstanding collateralized borrowings and interpolations of rates outside of the terms of the outstanding borrowings, including comparisons to comparable borrowings of similarly rated companies with longer term borrowings. Lease expense is recognized on a straight-line basis over the lease term and is included in the cost of revenue or general and administrative expenses. Leases with a lease term of 12 months or less from the commencement date that do not contain a purchase option are recognized as an expense on a straight-line basis over the lease term. The Company notes that adopting the new standard resulted in recording a lease liability and right-of-use asset associated with the Company's facility lease agreement totalling \$186,660, as of April 1, 2022.

## 12. Commitments and contingencies

Liabilities for loss contingencies arising from claims, assessments, litigation, fines, and penalties, and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred. Contingent liabilities are not recognized but are disclosed in the notes. Contingent assets are neither recognized nor disclosed in the financial statements.

#### 13. Fair value measurement

Assets and liabilities recorded at fair value in the financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels which are directly related to the amount of subjectivity associated with the inputs to the valuation of these assets or liabilities are as follows:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date.

Level 2 – inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data.

Level 3 – unobservable inputs for the asset or liability only used when there is little if any market activity for the asset or liability at the measurement date.

This hierarchy requires the Company to use observable market data when available, and to minimize the use of unobservable inputs when determining fair value.

The Company's financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable, and accrued liabilities. The estimated fair value of cash, accounts receivable, accounts payable and accrued liabilities approximate their carrying amounts due to the short-term nature of these instruments. None of these instruments are held for trading purposes.

#### 14. Recently issued accounting standards not yet adopted

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments," or ASU No. 2016-13. The amendments in ASU

No. 2016-13 introduce an approach based on expected losses to estimated credit losses on certain types of financial instruments, modify the impairment model for available-for-sale debt securities and provide for a simplified accounting model for purchased financial assets with credit deterioration since their origination. The new standard requires financial assets measured at amortized cost to be presented at the net amount expected to be collected through an allowance for credit losses deducted from the amortized cost basis. The standard will be effective for the Company on April 1, 2023, with early application permitted. The Company is evaluating the impact of adopting this new accounting guidance on its financial statements.

#### NOTE C: FINANCIAL INSTRUMENTS AND CONCENTRATION OF CREDIT RISK

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash equivalents and trade receivables. The cash resources of the Company are invested with banks after an evaluation of the credit risk. By their nature, all such cash equivalents and trade receivables involve risk, including the credit risk of non-performance by counter parties.

In management's opinion, as of March 31, 2023, there was no significant risk of loss in the event of nonperformance of the counter parties to these cash equivalents and trade receivables.

As of March 31, 2023, and March 31, 2022, three customers accounted for approximately 74% and 57% of the total accounts receivable and contributed for around 70% and 68% of the Company's revenue during the year ended March 31, 2023, and three months ended March 31, 2022, respectively.

#### **NOTE D: CASH AND CASH EQUIVALENTS**

Cash and cash equivalents include the following:

|                    | As at          | As at          |
|--------------------|----------------|----------------|
|                    | March 31, 2023 | March 31, 2022 |
| Cash in hand       | -              | 3,126          |
| Balance with banks | 1,842,493      | 766,522        |
| Total              | 1,842,493      | 769,648        |

Balances on deposits with the bank are insured by the Federal Deposit Insurance Corporation up to an aggregate of \$250,000. The Company believes it is not exposed to any significant risk on cash and cash equivalents.

## **NOTE E: ACCOUNTS RECEIVABLE, NET**

Accounts receivable consist of:

| As at          | As at                                    |
|----------------|------------------------------------------|
| March 31, 2023 | March 31, 2022                           |
| 8,960,888      | 5,202,439                                |
| (160,623)      | (222,253)                                |
| 8,800,265      | 4,980,186                                |
|                | March 31, 2023<br>8,960,888<br>(160,623) |

The following table provides the details of doubtful accounts receivables:

|                                                         | As at          | As at          |
|---------------------------------------------------------|----------------|----------------|
|                                                         | March 31, 2023 | March 31, 2022 |
| Balance at the beginning of the period                  | 222,253        | 222,253        |
| Provision for doubtful accounts receivables             | 287,716        | -              |
| Reversal of provision for doubtful accounts receivables | (349,346)      | -              |
| Balance at the end of the period                        | 160,623        | 222,253        |

## **NOTE F: INVENTORIES, NET**

Inventories include the following:

|                                                          | As at          | As at          |
|----------------------------------------------------------|----------------|----------------|
|                                                          | March 31, 2023 | March 31, 2022 |
| Raw material                                             | 520,012        | 2,210,162      |

| ess: accumulated amortization | (467,939)      | (453,637)      |
| Intangible assets, net        |                | 14,302         |

Amortization for the year ended March 31, 2023, was \$14,302 (for the three months ended March 31, 2022: \$8,378).

## **NOTE J: OTHER NON-CURRENT ASSETS**

Other non-current assets include the following:

|                                     | As at          | As at          |
|-------------------------------------|----------------|----------------|
|                                     | March 31, 2023 | March 31, 2022 |
| Advance payments to capital vendors | 3,035,339      | -              |
| Security deposits                   | 81,900         | 81,900         |
| Total                               | 3,117,239      | 81,900         |

## **NOTE K: LOANS FROM RELATED PARTY**

Loan from related party include the following:

| As at          | As at                       |
|----------------|-----------------------------|
| March 31, 2023 | March 31, 2022              |
| 9,500,000      | 6,000,000                   |
| 9,500,000      | 6,000,000                   |
|                | March 31, 2023<br>9,500,000 |

In June 2022, the Company has received line of credit from its parent company, Bharat Forge America, Inc. to facilitate working capital requirements. The line of credit has a maximum aggregate permissible limit of \$9,500,000 (March 31, 2022: \$6,000,000). The entire outstanding balance is repayable within twelve months from the balance sheet date. As of March 31, 2023, the Company has made withdrawals in the amount of \$9,500,000 (March 31, 2022: \$6,000,000) under this line of credit. During the year ended March 31, 2023, a total of \$2,000,000 from the outstanding loan balance, along with its accompanying outstanding interest in the amount of \$47,083, were converted into equity by the parent company. (**Refer note R**)

Interest on the line of credit is stipulated at 1% plus applicable LIBOR. As of March 31, 2023, the applicable rate of interest on the outstanding line of credit was 5.45% per annum (March 31, 2022: 2.28%).

The interest expense for the year ended March 31, 2023, was \$323,863. (For the three months ended March 31, 2022: \$46,949). The interest outstanding as of March 31, 2023, was \$244,138 (March 31, 2022: \$171,870).

#### **NOTE L: OTHER CURRENT LIABILITIES**

Other current liabilities include the following:

|                                            | As at          | As at          |  |
|--------------------------------------------|----------------|----------------|--|
|                                            | March 31, 2023 | March 31, 2022 |  |
| Accrued interest expense (Refer note R)    | 244,138        | 171,870        |  |
| Accrued expenses                           | 171,376        | 70,454         |  |
| Capital advances                           | 179,252        | 298,672        |  |
| Employee related liabilities               | 179,953        | 350,355        |  |
| Finance lease liabilities, current portion | -              | 85,741         |  |
| Accrual of property taxes                  | 28,163         | -              |  |
| Total                                      | 802,882        | 977,092        |  |

#### **NOTE M: LONG-TERM BORROWINGS**

Long-term borrowings include the following:

|                                      | As at          | As at          |  |
|--------------------------------------|----------------|----------------|--|
|                                      | March 31, 2023 | March 31, 2022 |  |
| Loan from bank                       | 5,000,000      | -              |  |
| Less: unamortized debt issuance cost | (134,221)      | -              |  |
| Total                                | 4,865,779      | -              |  |

In December 2022, the Company obtained a long-term loan from a bank in the amount of \$5,000,000 for funding the acquisition of capital assets. The total amount of loan outstanding as of March 31, 2023, was \$4,865,779. (March 31, 2022, \$ Nil)

The effective interest rate ("EIR") on the loans is around 9.87% for the year ended March 31, 2023. The interest expense recorded for the year ended March 31, 2023, is \$107,151 (March 31, 2022 \$ Nil) which is entirely capitalized. Accrued interest as of March 31, 2023 is \$15,779 (March 31, 2022 \$ Nil). The loan is secured by the property, plant, and equipment of the Company.

Total processing costs incurred on the facility is \$150,000, out of which \$15,779 is expensed in the year ended March 31, 2023 (March 31, 2022 \$ Nil).

The future maturities of the Company's borrowing arrangements are as follows:

| For the year ending | Amount    |
|---------------------|-----------|
| March 31, 2024      | -         |
| March 31, 2025      | 312,500   |
| March 31, 2026      | 1,250,000 |
| March 31, 2027      | 1,250,000 |
| Thereafter          | 2,187,500 |
| Total               | 5,000,000 |

#### **NOTE N: OPERATING LEASE RIGHT-OF-USE ASSETS**

Prior to the adoption of ASC 842, "Leases" rent expense on operating leases was recognized on a straight-line basis over the term of the lease. In addition, certain of the Company's operating lease agreements for office space also include rent holidays and scheduled rent escalations during the initial lease term. The Company recorded the rental holidays as a deferred rent within other liabilities on the balance sheets. The Company expects to record deferred rent liability and scheduled rent increase on a straight-line basis into rent expense over the lease term commencing on the date the Company took possession of the leased space.

#### General description of the lease

The Company facilities and office space under operating leases which have non-cancellable terms.

**Non-lease components:** Leases that contain non-lease components are accounted for as a single component and recorded on the balance sheet for certain asset classes including equipment. Non-lease components include, but are not limited to, common area maintenance and service arrangements.

**Package of practical expedients:** The Company will not reassess whether any expired or existing contracts are leases or contain leases, the lease classification for any expired or existing leases or any initial direct costs for any expired or existing leases as of the transition date.

**Additional transition method:** The Company adopted the standard using a modified retrospective approach, applying the standard's transition provisions at the beginning of the period of adoption and maintain previous disclosure requirements for comparative periods.

The Company used the following policies and/or assumptions in evaluating the lease population:

**Lease determination:** The Company considers a contract to be or to contain a lease if the contract conveys the right to control the use of identified property, plant, or equipment (an identified asset) for a period of time in exchange for consideration.

**Discount rate:** When the lease contracts do not provide a readily determinable implicit rate, the Company uses the estimated incremental borrowing rate based on information available at the inception of the lease. The discount rate is determined by asset class.

**Variable payments:** The Company includes payments that are based on an index or rate within the calculation of right of use leased assets and lease liabilities, initially measured at the lease commencement date. There are variable payments in the nature of origination fees for office equipment, machinery and equipment and therefore are not treated as a part of lease payments.

**Purchase options:** Certain leases include options to purchase office equipment. The depreciable life of assets are limited by the expected lease term unless there is a transfer of title or purchase option reasonably certain of exercise.

**Renewal options:** Most leases include one or more options to renew, with renewal terms that can extend the lease term from one or more years. The exercise of lease renewal options is at the Company's sole discretion.

**Residual value guarantees, restrictions, or covenants:** The lease agreements do not contain any material residual value guarantees or material restrictive covenants.

**Short-term leases:** Leases with an initial term of 12 months or less are not recorded on the balance sheet; the Company recognizes lease expense for these leases on a straight-line basis over the lease term and expense the associated operating lease costs to administrative expenses on the statements of income.

There are various office premises and facilities under non-cancelable operating leases that expire at various dates through February 2032. Some of the Company's leases contain one or more options to extend. The Company considers options to extend the lease in determining the lease term.

Operating lease expense for the year ended March 31, 2022, was \$123,832. The Company records operating lease expense in the statements of loss within selling, general and administrative expenses.

On adoption of topic ASC 842 "Leases", balance sheet information as of March 31, 2023 related to operating leases are shown below:

| Weighted average remaining lease term | 2.61 Years |
|---------------------------------------|------------|
| Weighted average discount rate        | 2.77%      |

# Supplemental cash flow information related to leases for financial year ended March 31, 2023, was as follows:

| follows:                                                                |                      |
|-------------------------------------------------------------------------|----------------------|
|                                                                         | As at March 31, 2023 |
| Cash paid for amounts included in the measurement of lease liabilities: |                      |
| Operating cash flows from operating leases                              | 123,832              |
| Right-of-use assets obtained in exchange for lease obligations:         | 186,661              |
| Operating lease right-of-use assets                                     | 325,330              |
| Operating lease                                                         |                      |
| Current liability                                                       | 134,596              |
| Non-current liability                                                   | 190,872              |
| Total lease liabilities                                                 | 325,468              |
| Maturities of lease liabilities for the years ending were as follows:   | As at March 31, 2023 |
| March 31, 2024                                                          | 139,777              |
| March 31, 2025                                                          | 116,878              |
| March 31, 2026                                                          | 75,229               |
| March 31, 2027                                                          | 4,399                |

#### **NOTE P: INCOME TAXES**

The limited liability company files a federal tax return as per applicable regulations in the United States of America. Generally, the income of a partnership is not subject to federal tax at the partnership level, but rather the partners are required to include a pro-rata share of the partnership's taxable income or loss in their income tax return. Accordingly, no provision for federal income taxes has been made in the accompanying financial statements.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the entity's net deferred income taxes are as follows:

|                                               | As at          | As at          |
|-----------------------------------------------|----------------|----------------|
|                                               | March 31, 2023 | March 31, 2022 |
| Non-current deferred tax liabilities          |                |                |
| Property, plant, and equipment                | (773,744)      | (617,961)      |
| Total deferred tax liabilities                | (773,744)      | (617,961)      |
| Non-current deferred tax assets               |                |                |
| Inventories                                   | 11,870         | 12,733         |
| Inventory obsolescence provision              | 8,526          | 45,793         |
| Interest disallowed u/s 163(j)                | 19,320         | -              |
| State tax credit carryforward                 | 174,367        | 203,388        |
| State tax - net operating loss carryforward   | 1,909,902      | 2,087,025      |
| Total deferred tax assets                     | 2,123,985      | 2,348,939      |
| Net deferred taxes                            | 1,350,241      | 1,730,978      |
| Less: deferred tax assets valuation allowance | (1,350,241)    | (1,730,978)    |
| Net deferred taxes                            | <u> </u>       | -              |

Realization of net deferred tax assets is dependent upon generation of sufficient taxable income in future years, benefit from the reversal of taxable temporary differences and tax planning strategies. Management assesses the available positive and negative evidence to estimate whether sufficient future taxable income

will be generated to permit use of the existing deferred tax assets. The amount of net deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income change.

Management believes that negative evidence outweighs the positive evidence and thus it is more likely than not that the benefit from deferred tax asset may not be realized in foreseeable future. In recognition of this risk, a valuation allowance of \$1,350,241 and \$1,730,978 has been created as at March 31, 2023 and March 31, 2022, respectively.

The Company has net operating loss (NOL's) carryforward in the State of Tennessee of approximately \$32,016,447 as at March 31, 2023, which, if unutilized will expire during the years 2027 through 2035.

#### Accounting for uncertain tax position

The Company recognizes the benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company has no unrecognized tax positions as at March 31, 2023 and March 31, 2022.

The tax years of 2019 through 2021 remain subject to examination by the taxing authorities.

#### **NOTE Q: EMPLOYEE BENEFIT PLANS**

The Company has an employee savings plan which qualifies under Section 401(k) of the Internal Revenue Code. The plan allows eligible employees to make voluntary contributions based on a specific percentage of compensation which may not exceed limitations under the Internal Revenue Code.

The Company has a discretionary matching contribution of 50% up to 6% of compensation. The total expense for employee retirement contribution plans for the year ended March 31, 2023, was \$110,753 (for the period from January 1, 2022 to March 31, 2022, was \$25,633.).

## **NOTE R: RELATED PARTY TRANSACTIONS**

The Company had transactions with-

#### A. Ultimate parent company

1. Bharat Forge Limited (owning 100% of common stock of Bharat Forge America, Inc.) (BFL)

#### **B.** Parent company

Bharat Forge America, Inc. (owning approximately 82% of the membership interest) (BFA)

#### C. Other related parties where common control exists

- 1. Bharat Forge Tennessee, Inc. (owning approximately 18% of the membership interest) (BFT)
- 2. Bharat Forge Aluminum USA, Inc. (BFALU)
- 3. Bharat Forge Infrastructure Limited

The summary of balances due to and from related parties are as follows:

#### **Independent Auditor's Report**

# To The Board of Directors and Stockholder Bharat Forge Tennessee, Inc.

#### **Opinion**

We have audited the financial statements of Bharat Forge Tennessee, Inc. (the "Company"), which comprises the balance sheets as of March 31, 2023, and March 31, 2022, and the related statements of (loss) income for the year ended March 31, 2023 and for the period from January 01, 2022 to March 31, 2022, changes in stockholder's equity and cash flows for the year and period then ended and the related notes to the financial statements.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the financial position of the Company as of March 31, 2023, and March 31, 2022, and the result of its operations, and its cash flows for the year ended and period then ended, in accordance with accounting principles generally accepted in the United States of America.

#### **Basis for opinion**

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

#### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Atlanta, Georgia June 30, 2023

## Balance Sheet as on March 31, 2023

(All amounts are stated in United States Dollars, unless otherwise stated)

The accompanying notes are an integral part of these financial statements)

#### **Notes to Financial Statements**

#### **NOTE A: NATURE OF OPERATIONS**

The Company is a wholly-owned subsidiary of Bharat Forge America, Inc. ("BFA" or "the Parent"). Subsequent to its acquisition, by the Parent on November 30, 2016, the Company changed its name from PMT Holdings, Inc. to Bharat Forge Tennessee, Inc. The effects of the acquisition have not been pushed down to these financial statements. Bharat Forge Limited (ultimate Parent Company or "BFL") a publicly listed Company in India owns 100% of the common stock of Bharat Forge America, Inc.

Bharat Forge Tennessee, Inc. ("BFT" or the "Company") leases land and a forging facility to Bharat Forge PMT Technologies, LLC, ("PMT'), in which the Company has a minority interest of 17.90%.

#### **NOTE B: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

A summary of significant accounting policies applied in the preparation of the accompanying financial statements is as follows:

#### 1. Basis of preparation

- a. The accompanying financial statements are prepared under the historical cost convention on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States of America ("US GAAP") to reflect the financial position, results of operations, stockholder's equity, and cash flows.
- b. All amounts are stated in United States Dollars, except as otherwise specified.
- c. The financial statements are for the year ended March 31, 2023, and for the three months period ended March 31, 2022.
- d. Certain reclassifications, regroupings, and reworking have been made in the financial statements of the prior year to conform to the classifications used in the current year. This has no impact on previously reported net income or stockholder's equity.
- e. During the previous year, the Company changed its financial year end to March from the earlier year end of December, to align it with the broader reporting objectives of the ultimate Parent Company BFL. Accordingly, the current financial statements are for the 12 months period beginning from April 1, 2022, through March 31, 2023. The numbers reported in the financial statements are not comparable with the previous period, which are for the three months period from January 1, 2022, through March 31, 2022.

#### 2. Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The management's estimates for determination of useful lives for property and plant, provision for doubtful debts and valuation allowance for deferred tax assets represent certain of these particularly sensitive estimates. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimate.

#### 3. Cash and cash equivalents

Cash equivalents consist of highly liquid investments with an initial maturity of three months or less. The carrying value of cash and cash equivalents approximates fair value because of the short maturities of those financial instruments. Cash balances in bank accounts are insured by Federal Deposit Insurance Corporation up to an aggregate of \$ 250,000 per depositor at each financial institution.

### 4. Revenue recognition

The Company leases land and a forging facility to Bharat Forge PMT Technologies, LLC, a related party, under a month-to-month lease agreement, which is accounted for as an operating lease. Bharat Forge PMT Technologies, LLC is responsible for paying property taxes, insurance, and other property expenses.

#### 5. Accounts receivable and provision for doubtful debts

All accounts receivables are derived from lease agreements with Bharat Forge PMT Technologies, LLC. An allowance for doubtful debts has not been recorded on March 31, 2023, and March 31, 2022, as management considers all accounts receivable collectible.

#### 6. Property and plant and depreciation

Land, building, and equipment are stated at cost less accumulated depreciation. The cost of items of land, building, and equipment comprise the cost of purchase and other costs incurred to bring it to the condition and location necessary for its intended use.

The Company depreciates land improvements and building over the estimated useful life using the straight-line method, including capital lease assets which are depreciated over the terms of their respective leases. Upon retirement or disposal of assets, the cost and accumulated depreciation are eliminated from the accounts, and the resulting gain or loss is credited or charged to operations.

The estimated useful life used to determine depreciation is:

| Land              | -           |
|-------------------|-------------|
| Land improvements | 30 years    |
| Buildings         | 10-30 years |

#### 7. Investment in non-consolidated affiliate

The investment is accounted for using the equity method. Under this method, the investment is carried at cost and adjusted for the Company's proportionate share of undistributed earnings or losses in the investee.

#### 8. Income taxes

In accordance with the provisions of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 740 "Income Taxes," income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The deferred tax asset is reduced by a valuation allowance if it is more likely than not that some portion or all of the assets will not be realized.

The Company is a member of a group that files a consolidated federal tax return. Accordingly, income taxes payable to the tax authority are recognized on the financial statements of the Parent company which is the taxpayer for income tax purposes. The Company approximates the amounts that would be reported if it were separately filing its tax return.

#### 9. Commitments and contingencies

Liabilities for loss contingencies arising from claims, assessments, litigations, fines, penalties, and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred.

#### 10. Recently issued accounting standards not yet adopted.

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments," or ASU No. 2016-13. The amendments in ASU No. 2016-13 introduce an approach based on expected losses to estimated credit losses on certain types of financial instruments, modify the impairment model for available-for-sale debt securities and provide for a simplified accounting model for purchased financial assets with credit deterioration since their origination. The new standard requires financial assets measured at amortized cost be presented at the net amount expected to be collected, through an allowance for credit losses that is deducted from the amortized cost basis. The standard will be effective for the Company on January 1, 2023, with early application permitted. The Company is currently evaluating the impact of adopting this new accounting quidance on its financial statements.

#### **NOTE C: CASH AND CASH EQUIVALENTS**

Cash and cash equivalents include the following:

| As at          | As at          |
|----------------|----------------|
| March 31, 2023 | March 31, 2022 |
| 139,739        | 128,369        |
| 139,739        | 128,369        |

Cash balances on deposits with the bank are insured by the Federal Deposit Insurance Corporation up to an aggregate of \$250,000. The Company believes it is not exposed to any significant risk on cash and cash equivalents.

#### **NOTE D: PROPERTY AND PLANT, NET**

Property and equipment include the following:

|                                | As at          | As at          |
|--------------------------------|----------------|----------------|
|                                | March 31, 2023 | March 31, 2022 |
| Land                           | 282,889        | 282,889        |
| Land improvements              | 260,049        | 260,049        |
| Building                       | 3,482,181      | 3,482,181      |
| Total Property and plant       | 4,025,119      | 4,025,119      |
| Less: Accumulated depreciation | (1,023,517)    | (861,821)      |
| Property and plant, net        | 3,001,602      | 3,163,298      |
|                                |                |                |

Depreciation expense for the year ended March 31, 2023, and period ended March 31, 2022, was \$161,696 and \$39,870, respectively.

#### **NOTE E: INVESTMENT IN NON-CONSOLIDATED AFFILIATE**

Investment in non-consolidated affiliate includes the following:

|                                                  | As at          | As at          |
|--------------------------------------------------|----------------|----------------|
|                                                  | March 31, 2023 | March 31, 2022 |
| Investment in Bharat Forge PMT Technologies, LLC | 3,767,916      | 3,712,886      |
| Total                                            | 3,767,916      | 3,712,886      |

Following is a summary of the financial position of PMT as of March 31, 2023, and March 31, 2022:

|                                                       | As at          | As at          |
|-------------------------------------------------------|----------------|----------------|
|                                                       | March 31, 2023 | March 31, 2022 |
| Current assets                                        | 21,573,883     | 14,779,653     |
| Property, plant and equipment, net                    | 11,400,313     | 10,910,013     |
| Capital work in progress                              | 436,952        | 95,850         |
| Intangible assets, net                                | -              | 14,302         |
| Operating lease right-of-use assets                   | 325,330        | -              |
| Other non-current assets                              | 3,117,239      | 81,900         |
| Total assets                                          | 36,853,717     | 25,881,718     |
| Current liabilities                                   | (13,808,013)   | (9,505,750)    |
| Long-term borrowings                                  | (4,865,779)    | -              |
| Operating lease liabilities excluding current portion | (190,872)      | -              |
| Other non-current liabilities                         |                | (117,826)      |
| Member's equity                                       | 17,989,053     | 16,258,142     |

PMT has revenues of \$37,781,343 and loss after taxes of \$316,172 for the year ended March 31, 2023 (for the three months ended March 31, 2022: revenue \$7,162,319, and loss of \$256,492). The loss is adjusted for depreciation based on fair value of fixed assets.

#### **NOTE F: OTHER CURRENT LIABILITIES**

Other current liabilities include:

|      | As at          | As at          |
|------|----------------|----------------|
|      | March 31, 2023 | March 31, 2022 |
| nx . | 13,445         | 32,430         |
|      | 13,445         | 32,430         |

#### **NOTE G: INCOME TAXES**

The Company will file a federal tax return as a member of Bharat Forge America Inc. consolidated group for the year ended March 31, 2023.

The Company files combined state tax returns in states where nexus is determined and combined filing is required or permitted based on the state statutes.

Income tax expense is as follows:

| Year ended     | Year ended     |  |
|----------------|----------------|--|
| March 31, 2023 | March 31, 2022 |  |
|                |                |  |
| -              | -              |  |
| -              | -              |  |
| _              | _              |  |
|                |                |  |
|                | March 31, 2023 |  |

|                            | Year ended     | Year ended     |
|----------------------------|----------------|----------------|
|                            | March 31, 2023 | March 31, 2022 |
| Deferred taxes             |                |                |
| Federal                    | (7,506)        | (58,126)       |
| State                      | (15,245)       | (9,506)        |
| Total deferred tax benefit | (22,751)       | (67,632)       |
| Income taxes benefit       | (22,751)       | (67,632)       |

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's net deferred income taxes are as follows:

|                                                 | As at          | As at          |
|-------------------------------------------------|----------------|----------------|
|                                                 | March 31, 2023 | March 31, 2022 |
| Non-current deferred tax assets                 |                |                |
| Federal & state net operating losses            | 264,879        | 240,622        |
| Total deferred tax asset                        | 264,879        | 240,622        |
| Non-current deferred tax liabilities            | ,              | _              |
| Land improvements and building                  | (480,360)      | (576,218)      |
| Investment in Bharat Forge PMT Technologie, LLC | (333,679)      | (236,585)      |
| Total deferred tax liabilities                  | (814,309)      | (812,803)      |
| Net deferred liabilities                        | (549,430)      | (572,181)      |

Realization of net deferred tax assets is dependent upon the generation of sufficient taxable income in future years, benefit from the reversal of taxable temporary differences, and tax planning strategies. Management assesses the available positive and negative evidence to estimate whether sufficient future taxable income will be generated to permit the use of the existing deferred tax assets. The amount of net deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income change. Net deferred tax liabilities of \$549,430 and \$572,181 are recorded as at March 31, 2023, and March 31, 2022, respectively.

The Company has federal net operating loss carryforwards (NOLs) of approximately \$982,885 as at March 31, 2023 and as per the provisions of Tax Cuts and Jobs Act those will be carried forward indefinitely for utilization. The Company has state NOL's carryforward of approximately \$1,138,713 in Tennessee State as at March 31, 2023, which if unutilized will expire during the years 2033 through 2034.

#### Accounting for uncertain tax positions

The Company recognizes the benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company has no unrecognized tax positions as at March 31, 2023, and March 31, 2022.

The tax years of 2019 through 2021 remain subject to examination by the taxing authorities.

#### **NOTE H: RELATED PARTY TRANSACTIONS**

The Company had transactions with-

#### A. Ultimate Parent Company

Bharat Forge Limited (owning 100% of common stock of Bharat Forge America, Inc.) (BFL)

#### **NOTE I: COMMON STOCK**

#### Common stock authorized, issued, and outstanding.

The authorized common stock is 10,000 shares with a par value of \$ 0.01 as of March 31, 2023, of which 100 shares were issued as of that date.

#### **Voting**

Each holder of common stock is entitled to one vote in respect of each share held in the records of the Company for all matters submitted to a vote.

#### Liquidation

In the event of liquidation of the Company, the holders of common stock shall be entitled to receive all of the remaining assets of the Company, after distribution of all preferential amounts, if any. Such amounts will be in proportion to the number of equity shares held by the shareholders.

#### **NOTE J: SUBSEQUENT EVENTS**

The Company evaluated all events and transactions that occurred after March 31, 2023, through the date the financial statements are available to be issued. Based on the evaluation, the Company is not aware of any subsequent events or transactions, which would require recognition or disclosure in the financial statements.

#### **Independent Auditor's Report**

# To the Board of Directors and Stockholders Kalyani Mobility, Inc.

#### **Opinion**

We have audited the financial statements of Kalyani Mobility, Inc. (the "Company" or "KMI"), which comprises the balance sheets as of March 31, 2023, and March 31, 2022, and the related statements of loss for the year ended March 31, 2023 and for the period from January 1, 2022 to March 31, 2022, changes in stockholders' equity and cash flows for the year and period then ended and the related notes to the financial statements.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the financial position of the Company as of March 31, 2023, and March 31, 2022, and the result of its operations, and its cash flows for the year ended and period then ended, in accordance with accounting principles generally accepted in the United States of America.

#### **Basis for opinion**

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

#### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

(The accompanying notes are an integral part of these separate parent company financial statements)

#### **Notes to Financial Statements**

#### **NOTE A: NATURE OF OPERATIONS**

Kalyani Mobility, Inc. (hereinafter referred to as "KMI" or the "Company") was incorporated in the State of North Carolina on September 27, 2019, and was a wholly-owned subsidiary of Bharat Forge America Inc ("BFA") until September 30, 2021. With effect from October 1, 2021, Kalyani Powertrain Limited ("KTPL" or "parent company") holds 99% shares of the Company, the remaining 1% is held by BFA. Bharat Forge Limited ("ultimate parent company" or "BFL") a publicly listed company in India owns 100% of the common stock of Kalyani Powertrain Limited.

The Company is set up to support product development for light-weighting and E-mobility business. The ultimate parent company has set up this Company with a plan to integrate the Company and an affiliate in Germany to enhancing the development capability and the customer experience. The Company is still in its start-up phase and is in the process of setting up.

#### **NOTE B: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

A summary of significant accounting policies applied in the preparation of the accompanying financial statements is as follows:

#### 1. Basis of preparation

- a. The accompanying financial statements are prepared under the historical cost convention on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States of America ("US GAAP") to reflect the financial position, results of operations, stockholders' equity, and cash flows.
- b. All amounts are stated in United States Dollars, except as otherwise specified.
- c. The financial statements are for the year ended March 31, 2023, and three months period ended March 31, 2022.
- d. Certain reclassifications, regroupings, and reworking have been made in the financial statements of the prior year to conform to the classifications used in the current year. This has no impact on previously reported net loss or stockholders' equity.
- e. During the previous year, the Company changed its financial year end to March from the earlier year end of December, to align it with the broader reporting objectives of the parent company. Accordingly, the current financial statements are for the 12 months period beginning from April 1, 2022, through March 31, 2023. The numbers reported in the financial statements are not comparable with the previous year, which are for the three months period from January 1, 2022, through March 31, 2022.

#### 2. Management plans

In February 2022, KTPL provided long-term loan amounting to \$2,000,000, to the Company, out of which the entire \$2,000,000 amount has been utilized. The loan along with the interest outstanding is repayable within 3 years from the receipt date. The loan is provided at an interest rate of 5% to facilitate the Company's working capital needs.

In August 2022, KTPL obtained additional long-term loan amounting to \$3,300,000, out of which the entire \$3,300,000 amount has been utilized. The loan along with the interest outstanding is repayable within 3 years from the receipt date. The loan is provided at an interest rate of 5% to facilitate the Company's working capital needs.

KTPL will continue to provide financial support to the Company to meet its capital requirements.

#### 3. Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect

the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The management's estimates for the provision for doubtful debts, valuation allowance for deferred tax assets represent certain of these particularly sensitive estimates. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimate. Any revision to accounting estimates is recognized prospectively in the current and future periods.

#### 4. Cash and cash equivalents

Cash equivalents consist of highly liquid investments with an initial maturity of three months or less. The carrying value of cash and cash equivalents approximates fair value because of the short maturities of those financial instruments. Cash balances in bank accounts are insured by Federal Deposit Insurance Corporation up to an aggregate of \$250,000 per depositor at each financial institution.

#### 5. Revenue recognition

Revenue is recognized when obligations under the terms of a contract with a customer are satisfied; generally, this occurs with the transfer of control of the Company's products or services. The Company's payment terms are typically 30-90 days. Revenue is measured as the amount of consideration the Company expects to receive in exchange for transferring goods or providing services. A performance obligation is a promise in a contract to transfer a distinct good or service to the customer and is the unit of account in the contract. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied. In determining the transaction price, the Company considers the effects of variable consideration, the existence of significant financing contracts, noncash consideration, and consideration payable to the customer, if any.

The Company's revenue represents sales of finished goods with incoterms ex-factory/ex-works wherein the goods are made available at the Company's factory location to be picked up by the customers. The performance obligation is met at the time of goods being made available for pick up by customers.

#### 6. Receivables and provision for doubtful debts

Receivables relate to amounts receivable on account of other support services provided by the Company. Based on the management's review of outstanding receivable balances and historical collection information, management's best estimate is that all balances will be collected. Accordingly, the Company has not established an allowance for doubtful accounts.

#### 7. Income taxes

In accordance with the provisions of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 740 "Income Taxes," income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The deferred tax asset is reduced by a valuation allowance if it is more likely than not that some portion or all of the assets will not be realized.

The Company is a member of a group that files a consolidated federal tax return. Accordingly, income taxes payable to the tax authority are recognized on the financial statements of the parent company which is the taxpayer for income tax purposes. The Company approximates the amounts that would be reported if it were separately filing its tax return.

#### 8. Government incentives

The Company receives incentives from Community Economic Development, North Carolina in the form of business development grants. These grants will be recognized at their fair values in the statements

of loss where there is a reasonable assurance that all grant conditions have been complied with and the grant will be received. There are no government incentives received in the financial year ended March 31, 2023 and three months ended March 31, 2022.

# 9. Commitments and contingencies

Liabilities for loss contingencies arising from claims, assessments, litigations, fines, penalties, and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred. Contingent liabilities are not recognized but are disclosed in the notes. Contingent assets are neither recognized nor disclosed in the financial statements.

#### 10. Fair value measurement

Assets and liabilities recorded at fair value in the financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels which are directly related to the amount of subjectivity associated with the inputs to the valuation of these assets or liabilities are as follows:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date.

Level 2 – inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data.

Level 3 – unobservable inputs for the asset or liability only used when there is little, if any, market activity for the asset or liability at the measurement date.

This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

The Company's financial instruments consist of accounts receivable and accrued liabilities. The estimated fair value of related party receivable and payable approximate their carrying amounts due to the short-term nature of these instruments. None of these instruments are held for trading purposes.

#### 11. Recently issued accounting standards not yet adopted

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments," or ASU No. 2016-13. The amendments in ASU No. 2016-13 introduce an approach based on expected losses to estimated credit losses on certain types of financial instruments, modify the impairment model for available-for-sale debt securities and provide for a simplified accounting model for purchased financial assets with credit deterioration since their origination. The new standard requires financial assets measured at amortized cost be presented at the net amount expected to be collected, through an allowance for credit losses that is deducted from the amortized cost basis. The standard will be effective for the Company on April 1, 2023, with early application permitted. The Company is currently evaluating the impact of adopting this new accounting guidance on its financial statements.

#### **NOTE C: CASH AND CASH EQUIVALENTS**

Cash and cash equivalents include the following:

| As at          | As at                        |
|----------------|------------------------------|
| March 31, 2023 | March 31, 2022               |
| 16,602         | 201,020                      |
| 16,602         | 201,020                      |
|                | <b>March 31, 2023</b> 16,602 |

Balances on deposits with the bank are insured by the Federal Deposit Insurance Corporation up to an aggregate of \$250,000. The Company believes it is not exposed to any significant risk on cash and cash equivalents.

#### **NOTE D: ACCOUNTS RECEIVABLE**

Accounts receivable include the following:

|   | As at          | As at          |
|---|----------------|----------------|
|   | March 31, 2023 | March 31, 2022 |
| 2 | 227,016        | -              |
|   | 227,016        |                |

#### **NOTE E: LOANS TO RELATED PARTY**

Loans to a related party include the following:

|                                        | As at          | As at          |
|----------------------------------------|----------------|----------------|
|                                        | March 31, 2023 | March 31, 2022 |
| Loan to a related party (refer note L) | 500,000        | 500,000        |
| Total                                  | 500,000        | 500,000        |

In March 31, 2022, the Company granted a loan facility of \$500,000 (the "loan") to Bharat Forge Aluminum USA, Inc. ("BFALU"). The Company granted an additional loan amounting to \$1,000,000 in July 2022, to BFALU, which was later repaid by BFALU in December 2022. The entire loan of \$1,500,000 carried an interest rate of 5% until January 31, 2023. The interest rate was subsequently increased to 6.5% from February 1, 2023. The loan is repayable on demand.

The loan receivable and interest receivable as of March 31, 2023, are \$500,000 and \$17,743, respectively (As of March 31, 2022: \$500,000 and \$1,069). The loan receivable and interest receivable have been presented in the balance sheets under the head "Loan to a related party" and "Other current assets", respectively. Interest income on the loan during the year ended March 31, 2023, is \$52,132 (period ended March 31, 2022: \$1,069), which is presented in the statements of loss under the head "Interest income".

#### **NOTE F: OTHER CURRENT ASSETS**

Other current assets include:

|                                        | As at          | As at          |
|----------------------------------------|----------------|----------------|
|                                        | March 31, 2023 | March 31, 2022 |
| Capital advances                       | 1,630,050      | -              |
| Accrued interest income (refer note L) | 17,743         | 1,069          |
| Total                                  | 1,647,793      | 1,069          |

#### **NOTE G: INVESTMENT**

Investment comprise:

|                                   | As at          | As at          |
|-----------------------------------|----------------|----------------|
|                                   | March 31, 2023 | March 31, 2022 |
| Investment in shares of Harbinger | 4,032,548      | 4,032,548      |
| Total                             | 4,032,548      | 4,032,548      |

The Company, under a convertible promissory note agreement (the "Agreement") with Harbinger Motors Inc. (erstwhile "Electron Transport Inc" and referred to as "Harbinger Motors"), had issued a note amounting to \$2,000,000 on July 29, 2021. The maturity date for this note was July 28, 2023, i.e., 24 months from the date

### Kalyani Mobility, Inc.

of issue. The interest rate as per the agreement was stipulated at a cumulative rate of 6% p.a. In January 2022, the note was converted into 5,202,880 Series Seed-3 Preferred Stock of Harbinger Motors, in exchange for the promissory note plus accrued interest thereon aggregating to \$2,032,548.

In addition to the above, the Company acquired additional 3,288,932 Series Seed Preferred Stock of Harbinger Motors amounting to \$2,000,000 in February 2022. As on March 31, 2022, and March 31, 2023, the Company holds 8,491,812 preferred stocks of ETI which comprise 5.16% of the total equity of Harbinger.

#### **NOTE H: LONG-TERM LOAN FROM RELATED PARTY**

The long-term loan includes the following:

|                                             | As at          | As at          |
|---------------------------------------------|----------------|----------------|
|                                             | March 31, 2023 | March 31, 2022 |
| Loan from the parent company (refer note L) | 5,300,000      | 2,000,000      |
| Total                                       | 5,300,000      | 2,000,000      |

In February 2022, the Company obtained a loan from the parent company amounting to \$2,000,000. The loan along with the interest outstanding is repayable within 3 years from the receipt date. i.e., February 9, 2025.

In August 2022, the Company obtained an additional loan from the parent company amounting to \$3,300,000. The loan along with the interest outstanding is repayable within 3 years from the receipt date. i.e., August 18, 2025.

This loan received is to facilitate the Company's working capital requirements. The interest rate for the loan is 5% per annum until January 31, 2023, and 6.5% with effect from February 1, 2023.

The interest expense for the year ended March 31, 2023, was \$214,563 (period ended March 31, 2022: \$13,779). Entire interest payable on loan from parent company amounting to \$228,662 is outstanding as of March 31, 2023, (March 31, 2022: \$14,099).

#### **NOTE I: REVENUE FROM CONTRACTS WITH CUSTOMERS**

|                      | For the year<br>April 1, 2022 to<br>March 31, 2023 | For the period<br>January 1, 2022 to<br>March 31, 2022 |
|----------------------|----------------------------------------------------|--------------------------------------------------------|
| Type of services     |                                                    |                                                        |
| Miscellaneous income | 227,016                                            | -                                                      |
| Total                | 227,016                                            | -                                                      |

#### **NOTE J: INCOME TAXES**

The Company files a consolidated federal tax return as per regulations applicable to Chapter C corporations in the United States.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's net deferred income taxes are as follows:

|                                                   | As at          | As at          |  |
|---------------------------------------------------|----------------|----------------|--|
|                                                   | March 31, 2023 | March 31, 2022 |  |
| Non-current deferred tax assets:                  |                |                |  |
| Unpaid related party provision disallowed u/s 267 | 47,935         | -              |  |
| Start-up costs                                    | 327,441        | -              |  |
| Total deferred tax asset                          | 375,376        | -              |  |
| Net deferred taxes                                | 375,376        | -              |  |
| Less: deferred tax asset valuation allowance      | (375,376)      | -              |  |
| Net deferred taxes                                | -              | _              |  |

Realization of net deferred tax assets is dependent upon the generation of sufficient taxable income in future years, benefit from the reversal of taxable temporary differences, and tax planning strategies. Management assesses the available positive and negative evidence to estimate whether sufficient future taxable income will be generated to permit the use of the existing deferred tax assets. The amount of net deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income change.

The Company has provided a valuation allowance of \$375,376 as of March 31, 2023, (NIL as of March 31, 2022) against the net deferred tax assets.

#### Accounting for an uncertain tax position

The Company recognizes the benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company has no unrecognized tax positions as of March 31, 2023, and March 31, 2022.

#### **NOTE K: COMMITMENTS**

#### **Commitments:**

Electron Transport Inc. ("ETI") has entered into purchase commitments with the Company where the Company is willing to sell to ETI, and ETI is willing to purchase from KMI goods worth \$500,000. Based on the agreement the Company will receive future equity in the amount of \$500,000 in ETI as compensation for these sales. (the "Safe Note").

#### **Termination:**

The termination of this Safe Note will occur automatically, without releasing the Company from any obligations resulting from a previous breach or non-compliance with this Safe Note. The termination will take effect immediately upon the earliest of the following events: (i) the issuance of Capital Stock to the Company through the automatic conversion of this Safe Note, or (ii) the payment of amounts due to the Company or the allocation of funds for such payment.

#### **NOTE M: EMPLOYEE BENEFIT PLANS**

The Company has an employees' savings plan which qualifies under Section 401(k) of the Internal Revenue Code. The plan allows eligible employees to make voluntary contributions based on a specific percentage of compensation which may not exceed limitations under the Internal Revenue Code.

The Company has a discretionary matching contribution of 50% up to 6% of compensation. The total expense for employee retirement contribution plans for the year ended March 31, 2023, was \$29,041 (for the three months period ended March 31, 2022: \$35,146).

#### **NOTE N: COMMON STOCK**

#### Common stock authorized, issued, and outstanding.

The authorized common stock is 100 shares with a par value of NIL as of March 31, 2023, and March 31, 2022, of which 10 shares were issued as of that date.

#### **Voting**

Each holder of common stock is entitled to one vote in respect of each share held by him in the records of the Company for all matters submitted to a vote.

#### Liquidation

In the event of liquidation of the Company, the holders of common stock shall be entitled to receive all of the remaining assets of the Company, after distribution of all preferential amounts, if any. Such amounts will be in proportion to the number of equity shares held by the shareholders.

#### **NOTE O: SUBSEQUENT EVENTS**

The Company evaluated all events and transactions that occurred after March 31, 2023, through the date the financial statements are available to be issued. Based on the evaluation, the Company is not aware of any subsequent events or transactions, which would require recognition or disclosure in the financial statements.

#### **Independent Auditor's Report**

To the Board of Directors of Kalyani Strategic Systems Australia Pty Ltd.

#### Report on the special purpose financial statements

#### Opinion

We have audited the accompanying special purpose financial statements of **Kalyani Strategic Systems Australia Pty Ltd.** ("the Company") which comprise the Balance Sheet as at 31<sup>st</sup> March, 2023 and the Statement of Profit and Loss, the Statement of Changes in Equity and the Cash Flow Statement for the year ended, and a summary of significant accounting policies and other explanatory information (hereinafter referred to as the 'Special Purpose Financial Statements'). The Special Purpose Financial Statements have been prepared by the Management of the Company to assist Bharat Forge Limited, the Ultimate Holding Company to comply with the requirements of Section 129(3) of the Companies Act, 2013 (the 'Act') and for the purpose of submission of Annual Performance Report under FEMA regulations to Reserve Bank of India. These financial statements may not be useful for any other purposes.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid special purpose financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its loss including other comprehensive income, the changes in equity and its cash flows for the year ended on that date.

#### **Basis for opinion**

We conducted our audit of special purpose financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the special purpose financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# Responsibility of management and those charged with governance for the special purpose financial statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these special purpose financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the special purpose financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the special purpose financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The board of directors is also responsible for overseeing the Company's financial reporting process.

#### Auditor's responsibilities for audit of the special purpose financial statements

Our objectives are to obtain reasonable assurance about whether the special purpose financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these special purpose financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the special purpose financial statements,
  whether due to fraud or error, design and perform audit procedures responsive to those risks, and
  obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of
  not detecting a material misstatement resulting from fraud is higher than for one resulting from error,
  as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of
  internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the special purpose financial statements, including the disclosures, and whether the special purpose financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

#### **Basis of preparation**

We draw attention to Note 2 to the Special Purpose Financial Statements, which describes the basis of preparation of the special purpose financial statements. Our opinion is not modified in respect of this matter.

# Kalyani Strategic Systems Australia Pty Limited

#### **Restriction on distribution or use**

This report is intended solely for the information of the Company's and its Ultimate Holding Company's board of directors for their internal use and accordingly, should not be used, referred to or distributed for any other purpose or to any other party without our prior written consent. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company, the Company's and Ultimate Holding Company's board of directors, for our audit work, for this report, or for the opinions we have formed.

# Notes forming part of the special purpose financial statements for the period ended 31<sup>st</sup> March, 2023

# **1** Corporate information:

Kalyani Strategic Systems Australia Pty Ltd. was incorporated on 10<sup>th</sup> November, 2021, as a proprietary company under the Corporations Act, 2001 registered in Australian Capital Territory; The Company is a wholly owned subsidiary of Kalyani Strategic Systems Limited, a company registered in india as per the Companies Act 2013. The Company was engaged in setting up of the business during the current finacials year.

#### 2 Basis of accounting and preparation of special purpose financial statements:

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013 (to the extent notified).

These special purpose financial statements have been prepared for the period from the date of incorporation, i.e. 10th November, 2021 to 31st March, 2023. The financial information based on which these special purpose financial statements are prepared is expressed in AUD, have been translated into the Indian Rupees by applying the applicable exchange rate/s. This being the first year, the question of providing previous year's figures does not arise.

These special purpose financial statements have been prepared to assist Bharat Forge Limited, the Ultimate Holding Company to comply with the requirements of Section 129(3) of the Companies Act, 2013 and for submission of the Annual Performance report under the FEMA Regulations with the Reserve Bank of India by the Holding Company i.e. Kalyani Strategic Systems Limited.

The financial statements are presented in INR and all values are rounded to the nearest Hundred.

#### 3 Significant accounting policies:

#### 3.1 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or
- iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

#### 3.2 Foreign currency transactions and translations :

The functional currency of the Company is Australlian Dollar (AUD). These financial statements are presented in INR.

#### a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

#### 3.3 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets, and significant liabilities, such as contingent consideration. Selection criteria

include market knowledge, reputation, independence and whether professional standards are maintained. Valuers are normally rotated every three years.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

#### 3.4 Property, plant and equipment:

Property, plant and equipment, capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including excise duty, wherever applicable. All the significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the profit or loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Assets under improvement to leased premises are fully depreciated over the lease period of the asset.

Losses arising from the retirement of, and gains and losses arising from disposal of property plant and equipment which are carried at cost are recognised in the Statement of Profit and Loss.

An item of property, plant and equipment or any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

#### 3.5 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for

impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is disposed.

#### 3.6 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or

Group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

#### 3.7 Provisions, Contingent Liabilities:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

#### 3.8 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial Asset:

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

#### b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)

#### c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are

met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

#### d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

#### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

### h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- i Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- iv Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over

the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected under the head 'other expenses' in the P&L.

The balance sheet presentation for various financial instruments is described below:

- i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables.

b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also

includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

#### ii Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

#### iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

#### c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

#### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract — with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

#### D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                                                                                                                                 |
|----------------------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised Cost             | FVTPL                     | Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.                                                                                                                     |
| FVTPL                      | Amortised Cost            | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.                                                                                                                 |
| Amortised Cost             | FVTOCI                    | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                           |
| FVTOCI                     | Amortised Cost            | Fair value at reclassification date becomes its new amortised cost carrying amount. However, cumulative gain or loss in OCI is adjusted against fair value. Consequently, the asset is measured as if it had always been measured at amortised cost. |
| FVTPL                      | FVTOCI                    | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                |
| FVTOCI                     | FVTPL                     | Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date.                                                                                              |

#### **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

#### 3.9 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term investments with

an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

#### 3.10 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

# 3.11 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

#### 3.12 Earnings per share:

Basic earnings per share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit attributable to the equity holders of the Company as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

#### 3.13 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

#### 3.14 Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

#### (iii) Balances outstanding

There is no balance outstanding with the Related Parties as on 31st March, 2023

#### 10 Significant accounting judgements, estimates and assumptions:

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the Company's accounting policies, management has made the following significant judgements, estimates and assumptions which have the most significant effect on the amounts recognised in the financial statements.

#### a) Current / Non-Current Classification

The Company evaluates funds requirement on the basis of internal budgets and forecasts and believes that on the basis of current scale of operations and cash realisation cycle, it would be able to generate sufficient funds from operations in order to meet such requirement in the foreseeable future of upto one year.

#### 11 Financial Instruments by category:

Set out below, is a comparison by class of the carrying amounts and fair value of the Company's financial instruments.

(In ₹ Hundreds)

| tal                         | 4,022.09                                               | 4,022.09                                                                           |  |  |
|                             | Measured at amortised costs  Cash and cash equivalents | Financial assets  Measured at amortised costs  Cash and cash equivalents  4,022.09 |  |  |

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

#### 12 Fair value hierarchy:

There are no financial instruments that are measured subsequent to initial recognition at fair value. Hence, disclosure of the fair value hierarchy of assets and liabilities measured at fair value is not applicable.

#### 13 Financial risk management disclosure :

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management advises on financial risks and the appropriate financial risk governance framework for the Company. The Company's senior management provides assurance to the board abount the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

#### a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

#### i) Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency).

The Company does not hedges its exposure to fluctuations on the translation.

#### b) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its

**Neelesh Tungar** 

operating activities and from its financing activities, including deposits with banks and financial institutions, and other financial instruments.

#### i) Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company's management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

#### c) Liquidity risk

The Company monitors its risk of a shortage of funds using a liquidity planning tool. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, preference shares, finance leases and hire purchase contracts. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

# Statutory Auditors' report on the financial statements For the year ended 31st December 2022

#### To the single-member company of MGL SAS,

#### **Opinion**

In compliance with the engagement entrusted to us by your annual general meeting, we have audited the accompanying financial statements of MGL SAS for the year ended 2022, 31st December.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the Company as at 2022, 31st December and of the results of its operations for the year then ended in accordance with French accounting principles.

#### **Basis for Opinion**

#### **Audit Framework**

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the Statutory Auditor Responsibilities for the Audit of the Financial Statements section of our report.

#### **Independence**

We conducted our audit engagement in compliance with independence requirements of the French Commercial Code (code de commerce) and the French Code of Ethics (code de déontologie) for statutory auditors rules applicable to us, for the period from 2022, 1st January to the date of our report.

#### **Justification of Assessments**

In accordance with the requirements of Articles L.823-9 and R.823-7 of the French Commercial Code (code de commerce) relating to the justification of our assessments, we inform you that the most important assessments made by us according to our professional judgment focused on the appropriateness of the accounting principles used in particular with regard to trade receivables.

The assessments were made in the context of our audit of the financial statements as a whole; approved in the conditions set out above, and in forming our opinion thereon. We do not provide a separate opinion on specific items of the financial statements.

#### **Specific Verifications**

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by French laws and regulations.

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the documents with respect to the financial position and the financial statements provided to the single-member company.

#### Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with French accounting principles and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless it is expected to liquidate the Company or to cease operations.

The financial statements were approved by the Chairman.

# **Statutory Auditors' Responsibilities for the Audit of the Financial Statements**

Our role is to issue a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As specified in Article L.823-10-1 of the French Commercial Code (code de commerce), our statutory audit does not include assurance on the viability of the Company or the quality of management of the affairs of the Company.

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor exercises professional judgment throughout the audit and furthermore:

- Identifies and assesses the risks of material misstatement of the financial statements, whether due
  to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit
  evidence considered to be sufficient and appropriate to provide a basis for his opinion. The risk of
  not detecting a material misstatement resulting from fraud is higher than for one resulting from error,
  as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of
  internal control.
- Obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control.
- Evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements.
- Assesses the appropriateness of management's use of the going concern basis of accounting and, based
  on the audit evidence obtained, whether a material uncertainty exists related to events or conditions
  that may cast significant doubt on the Company's ability to continue as a going concern. This assessment
  is based on the audit evidence obtained up to the date of his audit report. However, future events or
  conditions may cause the Company to cease to continue as a going concern. If the statutory auditor
  concludes that a material uncertainty exists, there is a requirement to draw attention in the audit
  report to the related disclosures in the financial statements or, if such disclosures are not provided or
  inadequate, to modify the opinion expressed therein.
- Evaluates the overall presentation of the financial statements and assesses whether these statements represent the underlying transactions and events in a manner that achieves fair presentation.

### **Accounting methods**

Annex to the balance sheet and the income statement for the year ended 2022/12/31 whose total assets prior distribution is €3 982 84 and the income statement of the year, presented as a list and a result of 282 718€.

The exercise has a duration of 12 months, covering the period from 01/01/2022 to 31/12/2022.

Notes or tables below are an integral part of the annual accounts.

The annual accounts have been established in accordance with the provisions of the Commercial Code and the general accounting plan (CCP).

General accounting policies have been applied, in respect of the precautionary principle, in accordance with the basic assumptions:

- continuity of operations,
- permanence of accounting from one exercise to another,
- independence exercises, and in accordance with the General rules of establishment and presentation of the annual accounts.

The basic method adopted for the assessment of the elements registered in accounting is the method of historical costs.

The main methods used are the following:

#### Information on the transactions entered in the balance sheet and income statement

Are not mentioned in the annex that the significant information.

#### **Depreciation**

Tangible fixed assets are valued at their cost of acquisition or production, given the costs necessary for the pretrial stage of use of these goods, and after deduction of the discount shopping, discounts, discounts obtained regulations.

The following decisions have been taken at the level of the presentation of the annual accounts:

- decomposable capital: the company has not been able to define decomposable capital or the decomposition of these does not have significant impact.
- no decomposable assets: the potential gap between periods of depreciation according to the duration of use and period of use has been recorded in derogatory depreciation.

The interest on loans specific to the production of fixed assets are not included in the production cost of these assets. Depreciation for depreciation are calculated according to the linear or degressive modes based on the expected life:

- Computer software 1 year,
- Buildings 10 to 20 years,
- Building layouts 04 to 15 years,
- Machinery and industrial equipment 01 to 10 years,
- Layouts, facilities, facilities 03 to 10 years,
- Transport equipment 04 to 05 years,
- Office equipment and computer 03 to 10 years.

### Participation, other long-term securities, investment securities

The gross value is constituted by the cost of buying out incidentals.

When the inventory value is less than this value, an impairment is made up of the amount of the difference.

#### **Stocks**

Inventories are valued according to the method "first in, first out".

The gross value of goods and supplies includes the purchase price and incidental expenses.

The manufactured products are valued at production cost including consumption and direct and indirect production costs, depreciation of goods directly involved in production.

The cost of the sub-activity is excluded from the value of stocks.

Interests are always excluded from the valuation of stocks.

Inventories have, where appropriate, written down to reflect their net realizable value at the date of closing of the accounts. Any more one-time two-year-old is valuated at the price of scrap.

#### **Receivables**

The receivables are valued at face value. A depreciation is performed when the inventory value is lower than the book value.

#### **Retirement commitments**

The commitments of the company in terms of severance pay to the retirement of its employees amounted to€ 0. These have not been the subject of recognition in the annual accounts.

The calculation is based on the following parameters:

mortality table: TG05

discount rate: 3.50% (rate iboxx to 31/12/2022)

the staff turnover rate: 10%

wage growth rate: 2%

#### **Information required by article R.123 -198-9 (the commercial code)**

The total amount of the fees of the auditor contained in the income statement for the year totalled € 15 600 tax-free.

#### **Average Manpower**

| <b>Employee categories</b>                   | Current year staff | Prior year staff |
|----------------------------------------------|--------------------|------------------|
| Executives                                   | 3                  | 4                |

#### **Independent Auditor's Report**

#### To the Members of BF Elbit Advanced Systems Private Limited

#### **Report on the Audit of the Financial Statements**

#### **Opinion**

We have audited the accompanying financial statements of **BF Elbit Advanced Systems Private Limited** ("the Company") which comprises the Balance Sheet as at 31<sup>st</sup> March, 2023, the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of changes in equity and the Statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its loss including other comprehensive income, the changes in equity and its cash flows for the year ended on that date.

#### **Basis for opinion**

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Information other than the financial statements and auditor's report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including annexures to Board's Report, but does not include the financial statements and our auditor's report thereon. The Board's Report including annexures to Board's Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Board's Report including annexures to Board's Report if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take such actions as are required under the provisions of the Companies Act, 2013.

#### Responsibility of management and those charged with governance for the financial statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities;

selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

#### Auditor's responsibilities for audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
  or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
  is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
  collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

#### **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "**Annexure A**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company, so far as appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss including other comprehensive income, the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
  - d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - e) On the basis of written representations received from the directors as on 31st March, 2023, taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2023, from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in **"Annexure B"**.
  - g) The Company has not paid any managerial remuneration during the financial year covered by this report. Accordingly, reporting requirements under section 197(16) of the Act do not apply to the Company.
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company does not have any pending litigations which would impact its financial position;
    - ii. The Company did not have any long-term contracts including derivatives contracts for which there were any material foreseeable losses;
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- c. Based on such audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) as provided under (a) and (b) above, contain any material misstatement.
- v. The Company has neither declared nor paid any dividend during the year.

# "ANNEXURE A" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF BF ELBIT ADVANCED SYSTEMS PRIVATE LIMITED FOR THE YEAR ENDED 31st MARCH, 2023.

In terms of the information and explanations sought by us and given by the Company and the books and records examined by us in the course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company has maintained proper records showing full particulars including quantitative details and situation of Property, Plant and Equipment and relevant details of right-of-use assets.
  - (B) The Company has maintained proper records showing full particulars of intangible assets.
  - (b) As explained to us, the Property, Plant and Equipment and relevant details of right-of-use assets have been physically verified by the Management at reasonable intervals, during the financial year. According to the information and explanations given to us, no discrepancies were noticed on physical verification of the Property, Plant and Equipment and relevant details of right-of-use assets.
  - (c) The Company does not own any immovable properties.
  - (d) The Company has not revalued any of its Property, Plant and Equipment (including right-of-use assets) and intangible assets during the year.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at 31<sup>st</sup> March, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) As explained to us, the Company was not required to hold any inventories during the period covered by this report. Hence, paragraph 3(ii)(a) of the Order is not applicable to the Company.
  - (b) The Company has not been sanctioned working capital limits in excess of ₹ 5 crore, in aggregate, at any point of time during the year, from banks or financial institutions on the basis of security of current assets and hence reporting under clause 3(ii)(b) of the Order is not applicable.
- (iii) The Company has not made any investment, provided guarantee or security, granted any loans or advances in the nature of loan, secured or unsecured to companies, firms, limited liability partnerships or other parties.
- (iv) The Company has neither given any loan to any person or other body corporate nor given any guarantee or provided security in connection with a loan to any other body corporate or person. Similarly, the Company has also not acquired by way of subscription, purchase or otherwise, the securities of any other body corporate.
- (v) The Company has not accepted deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules framed, there under.
- (vi) The requirement to maintain cost records under sub-section (1) of section 148 of the Companies Act, 2013 does not apply to the Company.
- (vii) (a) According to the records of the Company, the Company was found to be generally regular in depositing undisputed statutory dues including Goods and Services Tax, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities. As explained to us by the Management, the provisions of the Employees' State Insurance Act, 1948 and the Employees' Provident Fund and Miscellaneous Provisions Act 1952 do not apply to the Company. According to the information and explanations given to us, no undisputed amounts payable in respect of income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax and any other statutory dues were outstanding as at 31st March, 2023 for a period of more than six months from the date those became payable.

- (b) According to the records of the Company, there are no statutory dues which have not been deposited on account of any dispute.
- (viii) There were no transactions relating to previously unrecorded income that have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961.
- (ix) (a) In our opinion and according to the information and explanation given to us, the Company has not defaulted in repayment of loans or other borrowings or in the payment of interest, thereon, to any lender.
  - (b) According to the information and explanation given to us, the Company has not been declared as willful defaulter by any bank or financial institution or other lender.
  - (c) The Company has not taken any term loan during the year and there are no outstanding term loans at the beginning of the year. Hence, reporting under clause 3(ix)(c) of the Order is not applicable.
  - (d) On an overall examination of the financial statements of the Company, funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.
  - (e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
  - (f) The Company has not raised any loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies. Hence reporting under clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company did not raise any money by way of initial public offer or further public offer (including debt instruments) during the year. Accordingly, paragraph 3(x)(a) of the Order is not applicable.
  - (b) The Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) during the year. Hence reporting under clause 3(x)(b) of the Order is not applicable.
- (xi) (a) Based upon the audit procedures performed and the information and explanations given to us by the Management, we report that no fraud by the Company or no fraud on the Company has been noticed or reported during the period.
  - (b) No report under subsection (12) of section 143 of the Companies Act, 2013 was required to be filed by the auditors in Form ADT-4 as prescribed under rule 13 of the Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) The Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, paragraph 3(xii) of the Order is not applicable.
- (xiii) According to the records of the Company and according to the information and explanations given to us, the Company has not entered into any transactions with the related parties in contravention of the provisions of section 188 of the Companies Act, 2013. The details of related party transactions have been disclosed in the financial statements as required by the applicable accounting standards. Provisions of section 177 of the Act do not apply to the Company.
- (xiv) The provisions of section 138 of the Companies Act, 2013 do not apply to the Company and no internal audit was carried out during the year. Hence, reporting under clause 3(xiv) of the Order is not applicable.
- (xv) According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with them. Accordingly, paragraph 3(xv) of the Order is not applicable.
- (xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.

# **BF Elbit Advanced Systems Private Limited**

- (b) The Company has not conducted any Non-Banking Financial or Housing Finance activities requiring a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.
- (c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India.
- (d) In our opinion and according to the information and explanations given to us, there is no core investment company as part of the Group. Hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.
- (xvii) The Company has incurred the following amounts of cash losses during the financial year covered by this report and also in the preceding financial year.

|                      | Current Financial Year<br>₹ in Thousand | Preceding Financial Year<br>₹ in Thousand |
|----------------------|-----------------------------------------|-------------------------------------------|
| Cash losses incurred | 16,564.03                               | 15,191.09                                 |

- (xviii) There has been no resignation by the statutory auditors of the Company during the year.
- (xix) On the basis of the verification of the financial ratios, ageing and expected dates of the realization of financial assets and payment of financial liabilities and other information accompanying financial statements, and information and explanation given to us and particularly the willingness expressed by the Holding Company to continue to provide financial support to the Company as stated in the Note No. 27 forming part of the financial statements, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) Provisions of 135 of the Companies Act, 2013 do not apply to the Company. Hence, reporting under clause 3(xx) of the Order is not applicable.

# "ANNEXURE B" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF BF ELBIT ADVANCED SYSTEMS PRIVATE LIMITED FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2023.

We have audited the internal financial controls over financial reporting of **BF Elbit Advanced Systems Private Limited** ("the Company") as of 31<sup>st</sup> March, 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

## Management's responsibility for internal financial controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

# **Auditor's responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### Meaning of internal financial controls over financial reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

# **BF Elbit Advanced Systems Private Limited**

# Inherent limitations of internal financial controls over financial reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

# **Opinion**

In our opinion, the Company has, in all material respects, internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31st March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# Notes forming part of the financial statements for the year ended 31st March, 2023

#### **1** Corporate information:

BF Elbit Advanced Systems Private Limited was incorporated on 2<sup>nd</sup> August, 2012, as a private limited company under the erstwhile Companies Act, 1956. The Company is a subsidiary of Bharat Forge Limited and thus deemed to be a public company within the meaning of Sec. 2(71) of the Companies Act, 2013. The Company is a 51:49 Joint Venture between Bharat Forge Limited and Elbit Systems Land and C4I Limited of Israel. Bharat Forge Limited is the Holding Company.

The Company is engaged in the business of developing weapon systems with primary focus on artillery and mortar systems of all calibres. During the financial year covered by these statements, the Company was engaged in carrying out trial runs of its products.

These financial statements were authorised for issue in accordance with resolution of the Board of Directors on 2<sup>nd</sup> May, 2023.

# 2 Significant accounting policies:

# 2.1 Basis of accounting and preparation of financial statements:

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013 (to the extent notified).

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The financial statements are presented in INR and all values are rounded to the nearest Thousands.

#### 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or
- iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

#### 2.3 Foreign currency transactions and translations:

The Company's financial statements are presented in INR, which is also the Company's functional currency. Items included in the financial statements are measured using functional currency.

#### a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date, continuing the policy adopted for accounting for exchange difference arising from translation of long term foreign currency monetary items recognised in the financial statements for the year ended 31<sup>st</sup> March, 2016. Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise except for differences pertaining to Long Term Foreign Currency Monetary Items as mentioned subsequently.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

#### b) Exchange differences

The Company has availed the option available under Ind AS 101 para D13 AA pertaining to long term foreign currency translation difference account (FCMITDA). Hence, the Company has continued the policy adopted for accounting for exchange differences arising from translation of long term foreign currency monetary items recognised in the financial statements for the period ended 31st March, 2016 as per previous GAAP. Accordingly, the exchange differences are accounted for as under

- i Exchange differences arising on long-term foreign currency monetary items recognised in the financial statements for the year ended 31<sup>st</sup> March, 2016 related to acquisition of a fixed asset are capitalized and depreciated over the remaining useful life of the asset.
- ii Exchange differences arising on other long-term foreign currency monetary items recognised in the financial statements for the year ended 31<sup>st</sup> March, 2016 are accumulated in the "Foreign Currency Monetary Item Translation Difference Account" and amortized over the remaining life of the concerned monetary item.
- iii All other exchange differences are recognized as income or as expenses in the period in which they arise.

For the purpose of a and b above, the Company treats a foreign currency monetary item as "long-term foreign currency monetary item", if it has a term of 12 months or more at the date of its origination. In accordance with MCA circular dated 9<sup>th</sup> August, 2012, exchange differences for this purpose, are total differences arising on long-term foreign currency monetary items for the period. In other words, the Company does not differentiate between exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost and other exchange difference.

#### 2.4 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- i Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets, and significant liabilities, such as contingent consideration. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. Valuers are normally rotated every three years.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

#### 2.5 Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

The disclosures of significant accounting judgements, estimates and assumptions relating to revenue from contracts with customers are provided in Note no. 22.

#### a) Sale of Goods:

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer.

The control of the goods manufactured in case of export sales is transferred usually on the date of issue of Bill of Lading while in case of domestic sales, the control is transferred usually on delivery of goods.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company considers the effect of variable consideration.

#### b) Export incentives:

Income from export incentives are accounted for on export of goods if the entitlements can be estimated with reasonable assurance and conditions precedent to claim are fulfilled.

#### c) Sale of Services:

Revenue on time and material contracts are recognized as the related services are performed and revenue from the end of the last invoicing to there porting date is recognized as unbilled revenue. Revenue from fixed-price, fixed-time frame contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion.

#### d) Contract assets:

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

#### e) Trade receivables:

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in note no. 2.12.

#### f) Contract liabilities:

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

# g) Interest income:

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instruments (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

#### h) Profit / Loss on sale of investments:

Profit / Loss on sale of investments is recognised when all the significant risk and rewards of ownership in investment is transferred.

# 2.6 Taxes:

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognized for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realized.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the guidance note on

"Accounting for Credit Available in respect of Minimum Alternative Tax" under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

#### Indirect Taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of indirect taxes paid, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

## 2.7 Property, plant and equipment:

Property, plant and equipment, capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including GST for which credit is not available. All the significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the profit or loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Assets under improvement to leased premises are fully depreciated over the lease period of the asset.

The Management's estimate of the useful lives of various fixed assets, which is in line with the provisions of Schedule II to the Companies Act, 2013 is given below.

| Туре | of Asset                       | Estimated useful life |
|------|--------------------------------|-----------------------|
| i)   | Building - Temporary structure | 3 Years               |
| ii)  | Computers                      | 3 Years               |
| iii) | Office equipment               | 5 Years               |
| iv)  | Plant and Machinery            | 10 Years              |

Losses arising from the retirement of, and gains and losses arising from disposal of property plant and equipment which are carried at cost are recognised in the Statement of Profit and Loss.

An item of property, plant and equipment or any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

#### 2.8 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is disposed.

The Company amortizes software over three years.

# 2.9 Leases:

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

#### i) Right of use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the Underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or

before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

#### Type of Asset

#### i) Building

Over the period of lease agreement

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

#### ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liability and Right-of-use asset have been separately presented in the balance sheet and lease payments have been classified as financing cash flows.

#### iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

#### Group as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

# 2.10 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is

required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or Group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

#### 2.11 Provisions, Contingent Liabilities:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is

used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

#### 2.12 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial Asset:

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

#### b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)
- c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

#### d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

#### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

#### h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- i Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- iv Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument

ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected under the head 'other expenses' in the P&L.

The balance sheet presentation for various financial instruments is described below:

- i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables.

b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

## ii Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

#### iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

#### c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

#### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract — with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

#### D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those

assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                                                                                                                                             |
|----------------------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised Cost             | FVTPL                     | Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.                                                                                                                                 |
| FVTPL                      | Amortised Cost            | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.                                                                                                                             |
| Amortised Cost             | FVTOCI                    | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                                       |
| FVTOCI                     | Amortised Cost            | Fair value at reclassification date becomes its<br>new amortised cost carrying amount. However,<br>cumulative gain or loss in OCI is adjusted against<br>fair value. Consequently, the asset is measured as if<br>it had always been measured at amortised cost. |
| FVTPL                      | FVTOCI                    | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                            |
| FVTOCI                     | FVTPL                     | Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date.                                                                                                          |

#### **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

## 2.13 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

#### 2.14 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

## 2.15 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

#### 2.16 Earnings per share:

Basic earnings per share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit attributable to the equity holders of the Company as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

#### 2.17 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

#### 2.18 Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

# 3 Property, plant and equipment:

|                                                                          | Building -<br>Temporary<br>structure | Office<br>Equipment      | Computers                  | Plant and<br>Machinery | Total                        |
|--------------------------------------------------------------------------|--------------------------------------|--------------------------|----------------------------|------------------------|------------------------------|
| Gross block, at cost :                                                   |                                      |                          |                            |                        |                              |
| As at 1 <sup>st</sup> April, 2021                                        | 667.81                               | 179.84                   | 444.59                     | -                      | 1,292.24                     |
| Additions                                                                | -                                    | -                        | -                          | 20,140.74              | 20,140.74                    |

# 17 Segment reporting

Information reported to the chief operating decision maker (CODM) for the purposes of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided. The Company is engaged in the business of developing weapon systems with primary focus on artillery and mortar systems of all calibres; which in the context of Indian Accounting Standard 108 'Segment Information' represents single reportable business segment. The accounting policies of the reportable segments are the same as the accounting policies disclosed in Note 2. The revenues, total expenses and net profit/(loss) as per the Statement of Profit and Loss represents the revenue, total expenses and the net profit/(loss) of the sole reportable segment.

#### 22 Significant accounting judgements, estimates and assumptions:

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. These estimates are reviewed regularly and any change in estimates are adjusted prospectively.

In the process of applying the Company's accounting policies, management has made the following significant judgements, estimates and assumptions which have the most significant effect on the amounts recognised in the financial statements.

#### a) Revenue recognition

The Company's contracts with customers could include promises to transfer multiple services to a customer. The Company assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables.

Judgement is also required to determine the transaction price for the contract. The transaction price could be either a fixed amount of customer consideration or variable consideration with elements such as volume discounts, service level credits, performance bonuses, price concessions and incentives. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component. Any consideration payable to the customer is adjusted to the transaction price, unless it is a payment for a distinct product or service from the customer. The estimated amount of variable consideration is adjusted in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur and is reassessed at the end of each reporting period. The Company allocates the elements of variable considerations to all the performance obligations of the contract unless there is observable evidence that they pertain to one or more distinct performance obligations.

The Company uses judgement to determine an appropriate standalone selling price for a performance obligation. The Company allocates the transaction price to each performance obligation on the basis of the relative standalone selling price of each distinct product or service promised in the contract. Where standalone selling price is not observable, the Company uses the expected cost plus margin approach to allocate the transaction price to each distinct performance obligation.

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

Revenue for fixed-price contract is recognised using percentage-of-completion method. The Company uses judgement to estimate the future cost-to-completion of the contracts which is used to determine the degree of completion of the performance obligation.

#### b) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer note 23 and 24 for further disclosures.

#### c) Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Company.

#### d) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the

inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### e) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon acertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availabliity of adquate taxable income within the time permissible as per the taxing legislations.

# f) Current / Non-Current Classification

The Company evaluates funds requirement on the basis of internal budgets and forecasts and believes that on the basis of current scale of operations and cash realisation cycle, it would be able to generate sufficient funds from operations in order to meet such requirement in the foreseeable future of upto one year.

# 23 Financial instruments by category

Set out below, is a comparison by class of the carrying amounts and fair value of the Company's financial instruments :

(In ₹ Thousands)

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

#### 24 Fair value hierarchy

There are no financial instruments that are measured subsequent to initial recognition at fair value. Hence, disclosure of the fair value hierarchy of assets and liabilities measured at fair value is not applicable.

# 25 Financial risk management disclosure

The Company's principal financial liabilities, other than derivatives, comprise borrowing, trade and other payables and Interest on borrowing. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include Deposits, cash and cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a financial risk committee that advises on financial risks and the appropriate financial risk governance framework for the Company. The financial risk committee provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

## a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

The sensitivity analyses in the following sections relate to the position as at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022.

The analyses exclude the impact of movements in market variables on: the carrying values of gratuity and other post retirement obligations; provisions.

The following assumptions have been made in calculating the sensitivity analyses:

The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022 including the effect of hedge accounting (if any).

# i) Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency).

The Company does not hedges its exposure to fluctuations on the translation into INR of its foreign operations.

# ii) Foreign Currency Sensitivity

The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives. The Company's exposure to foreign currency changes for all other currencies is not material.

## b) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities and from its financing activities, including deposits with banks and financial institutions, and other financial instruments.

#### i) Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company's management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each

counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

# c) Liquidity risk

The Company monitors its risk of a shortage of funds using a liquidity planning tool. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, preference shares, finance leases and hire purchase contracts. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

(In ₹ Thousands)

# 26 Disclosure pursuant to Ind AS 115 on "Revenue from contracts with customers"

#### a) Trade receivables and Contract balances:

The Company classifies the right to consideration in exchange for deliverables as either a receivable or as unbilled revenue.

A receivable is a right to consideration that is unconditional upon passage of time. Revenue for time and material contracts are recognized as related service are performed. Revenue for fixed price maintenance contracts is recognized on a straight line basis over the period of the contract. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset for these cases as right to consideration is unconditional upon passage of time.

Revenue recognition for fixed price contracts is based on percentage of completion method. Invoicing to the clients is based on completion of the contract. This would result in the timing of revenue recognition being different from the timing of billing the customers. Unbilled revenue for fixed price development contracts is classified as non financial asset as the contractual right to consideration is dependent on completion of contractual milestones.

Invoicing in excess of earnings are classified as unearned revenue.

Trade receivable and unbilled revenues are presented net of impairment in the Balance Sheet.

#### b) Performance obligations and remaining performance obligations:

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognized as at the end of the reporting period and an explanation as to when

the Company expects to recognize these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts where the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date, typically those contracts where invoicing is on time and material basis. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revalidations, adjustment for revenue that has not materialized and adjustments for currency.

The Company does not have any performance obligations that are completely or partially unsatisfied as at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022, other than those meeting the exclusion criteria mentioned above.

# 27 Going concern:

The Company has incurred losses of ₹ 19,128.96/- in Thousand (31st March, 2022 : ₹ 16,174.66/- in Thousand) during the year. As at 31st March, 2023, the Company's accumulated losses are ₹ 167,917.95/- in Thousand (31st March, 2022 : ₹ 148,788.99/- in Thousand) which have completely eroded the net worth of the Company. The Company also has net current liabilities of ₹ 166,089.48/- in Thousand as at 31st March, 2023 (31st March, 2022 : ₹ 149,529.45/- in Thousand). The management is confident of streamlining the operations so as to start generating profits. The Company has received funding from the Holding Company and a Fellow Subsidiary Company in the form of demand loans. In view of the majority shareholders' continued commitment and support to the Company these financial statements have been prepared on going concern basis, and consequently, no adjustments have been made to the carrying values or classification of balance sheet accounts.

#### 28 Income tax

a) Reconciliation of tax expense and the accounting profit multiplied by India's domestic tax rate for 31st March, 2023 and 31st March, 2022:

(In ₹ Thousands)

|                                                                 | As at            | As at            |
|-----------------------------------------------------------------|------------------|------------------|
|                                                                 | 31st March, 2023 | 31st March, 2022 |
| Accounting loss before tax                                      | (19,128.96)      | (16,174.66)      |
| At India's enacted tax rate of 26.00% (31st March, 2023: 26%)   | -                | -                |
| Deferred tax savings on current year accounting loss            | (13,200.66)      | (7,437.79)       |
| Tax effect of non-deductible expenses                           | -                | -                |
| Deferred tax not recognised on prudence basis                   | 13,200.66        | 7,437.79         |
| At the effective income tax rate of 26% (31st March, 2022: 26%) | -                | -                |
| Income tax expense reported in the statement of profit and loss | -                | -                |

b) The Company has carried foraward business loss ₹ 38,719.29/- in thousand (31st March, 2022: ₹ 21,848.39/-in thousand) and unabsorbed depreciation of ₹ 7,554.25 in thousand/- (31st March, 2022: ₹ 2990.62/- in thousand). Business losses will expire in 8 years and may not be used to offset taxable income. The Company neither has any material taxable temporary difference nor any tax planning opportunities available that could partly support the recognition of these losses as deferred tax assets. On this basis, the Company has determined that it cannot recognise deferred tax assets on the tax losses carried forward. If the Company was able to recognise all unrecognised deferred tax assets, profit and equity would have increased by ₹ 13,200.66/- (31st March, 2022 ₹ 6,243.00/-).

# 29 Ratio analysis:

|                                                               | Numerator                     | Denominator            | 31 <sup>st</sup> Mar., 2023 | 31 <sup>st</sup> Mar., 2022 | Variance<br>% |
|---------------------------------------------------------------|-------------------------------|------------------------|-----------------------------|-----------------------------|---------------|
| (a) Current ratio (Refer note no. (i) below)                  | Current Assets                | Current<br>Liabilities | 0.05                        | 0.06                        | (17.66)       |
| (b) Trade payables turnover ratio (Refer note no. (ii) below) | Purchases +<br>Other expenses | Average trade payables | 0.24                        | 0.14                        | 70.48         |

#### Notes:

- (i) Reduction in average trade payables have resulted in improvement of ratio.
- (ii) Since there is a negative net worth and lossess during the current financial year as well as for previous financial year following rations can not be derived.

Return on equity ratio

Net profit ratio

Net capital turnover ratio

Return on capital employeed

(iii) The Company does not hold any Inventrory form the date of incorporation till year end hence inventory Turnover Ratio can not be derived

#### 30 Other Statutory Information:

- (a) In the opinion of the Directors, all the current assets have been stated in the balance sheet at least at a value at which those are expected to be realised in the ordinary course of business. The Directors also have to state that adequate provisions have been made in the accounts, in respect of all known, quantified and ascertained liabilities and none of the liabilities or provisions are in the nature of reserve.
- (b) No Proceedings have been initiated or pending against the company for holding any Benami Property under the Benami Transactions (Prohibition) Act, 1988.
- (c) The Company is not declared as a wilfull defaulter by any bank or any financial institution or other lender during the year
- (d) The company did not have any transactions with companies struck off under section 248 or section 560 of the Companies Act, 2013.
- (e) The Company have not traded or invested in Crypto currency or Virtual Currency during the financial year.

To the Members of BF Industrial Solutions Limited (formerly known as BF Industrial Solutions Private Limited) (formerly known as Nouveau Power and Infrastructure Private Limited)

# Report on the Audit of the Standalone Ind AS Financial Statements

## **Opinion**

We have audited the accompanying standalone Ind AS financial statements of BF Industrial Solutions Limited (formerly known as BF Industrial Solutions Private Limited) (formerly known as Nouveau Power and Infrastructure Private Limited) ("the Company"), which comprise the Balance Sheet as at 31 March 2023, the Statement of Profit and Loss, including Other Comprehensive Income, the Cash Flow Statement, the Statement of Changes in Equity for the year ended, and notes to the standalone Ind AS financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone Ind AS financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2023, its loss including other comprehensive income, its cash flows and changes in equity for the year ended on that date.

#### **Basis for Opinion**

We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing ("SAs"), as specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the 'Auditor's Responsibilities for the Audit of the standalone Ind AS financial statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the standalone Ind AS financial statements.

#### Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report but does not include the standalone Ind AS financial statements and our auditor's report thereon. Our opinion on the standalone Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

#### Management's responsibility for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules 2015, as amended. This responsibility also includes maintenance of adequate accounting

records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone Ind AS financial statements, the management and the Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of Directors is also responsible for overseeing the Company's financial reporting process.

# **Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements**

Our objectives are to obtain reasonable assurance about whether the standalone Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone Ind AS financial statements,
  whether due to fraud or error, design and perform audit procedures responsive to those risks, and
  obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of
  not detecting a material misstatement resulting from fraud is higher than for one resulting from error,
  as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of
  internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to standalone Ind AS financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone Ind AS financial statements, including the disclosures, and whether the standalone Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

# **BF Industrial Solutions Limited**

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

# **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the order, to the extent applicable.
- 2. (A) As required by Section 143 (3) of the Act, we report that:
  - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
  - (c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
  - (d) In our opinion, the aforesaid standalone Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - (e) On the basis of the written representations received from the directors as on 31 March 2023 taken on record by the Board of Directors, none of the directors are disqualified as on 31 March 2023 from being appointed as a director in terms of Section 164 (2) of the Act.
  - (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B" to this report.
  - (B) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company did not have any pending litigations as at 31 March 2023 which would impact its standalone Ind AS financial statements;
    - ii. The Company did not have any long-term contracts, including derivative contracts, for which there were any material foreseeable losses.
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. (i) The management has represented that to the best of it's knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - (ii) The management has represented that to the best of it's knowledge and belief, other than as disclosed in the notes to the accounts, no funds have been received by the Company from any persons or entities, including foreign entities ("Funding Parties"), with the understanding, recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries")

- or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
- (iii) Based on audit procedures which we have considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) contain any material misstatement.
- v. The Company has not declared or paid any dividend during the year.
- (C) In our opinion and according to the information and explanations given to us, the Company has not paid any managerial remuneration to its directors during the year.

Place : Pune Date : 3 May 2023 (Referred to in paragraph 2(f) in Report on Other Legal and Regulatory Requirements of the Independent Auditors' Report to the members of BF Industrial Solutions Limited (formerly known as Nouveau Power and Infrastructure Private Limited) on the standalone Ind AS financial statements for the year ended 31 March 2023)

# Report on the Internal Financial Controls under clause (i) of sub-section 3 of section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of BF Industrial Solutions Limited ("the Company") (formerly known as BF Industrial Solutions Private Limited) (formerly known as Nouveau Power and Infrastructure Private Limited) as of 31 March 2023 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

# **Management's Responsibility for Internal Financial Controls**

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting ("IFC-FR)" criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

#### **Auditors' Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by ICAI and the Standards on Auditing as specified under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls over financial reporting with reference to standalone Ind AS financial statements.

# Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of standalone Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of standalone Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance

# **BF Industrial Solutions Limited**

regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the standalone Ind AS financial statements.

# **Inherent Limitations of Internal Financial Controls over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

#### **Opinion**

In our opinion, the Company has, in all material respects, adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# Notes to the standalone financial statements for the year ended 31 March 2023

#### 1. Corporate Information

BF Industrial Solutions Limited (formerly known as Nouveau Power and Infrastructure Private Limited) ("the Company") is a public Company domiciled in India and incorporated under the provisions of the Companies Act, 1956. The name of the Company was changed to BF Industrial Solutions Private Limited during the year and subsequently to BF Industrial Solutions Limited. The Company also provides management and marketing services to its group Companies. Bharat Forge Limited ("BFL") is the Holding Company. The registered office of the Company is located at Mundhwa, Pune. The Company's CIN is U29100PN2011PLC138621. The financial statements were authorized for issue in accordance with a resolution of the Board of Directors passed on 3 May 2023.

# 2. Significant Accounting Policies

#### 2.1 Basis of preparation

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable to the financial statements of the Company.

The financial statements are presented in INR and all values are rounded to the nearest million (INR 000,000), except when otherwise indicated.

The Company has prepared the financial statements on the basis that it will continue to operate as a going concern.

The financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

#### 2.2 Summary of significant accounting policies

# a) Current and non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current / noncurrent classification. An asset is treated as current when it is:

- (i) Expected to be realized or intended to be sold or consumed in normal operating cycle;
- (ii) Held primarily for the purpose of trading;
- (iii) Expected to be realized within twelve months after the reporting period, or
- (iv) Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- (i) It is expected to be settled in normal operating cycle
- (ii) It is held primarily for the purpose of trading
- (iii) It is due to be settled within twelve months after the reporting period, or
- (iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

# b) Foreign currencies

The Company's financial statements are presented in Indian Rupees, which is also its functional currency.

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange difference that arise on settlement of monetary items or on reporting at each Balance Sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or Statement of Profit and Loss are also recognised in OCI or Statement of Profit and Loss, respectively).

# c) Investment in subsidiaries, joint ventures and associates

The Company has accounted for its investment in subsidiaries at cost less accumulated impairment [Refer note 2.2(g)].

#### d) Fair value measurement

The Company measures financial instruments at fair value at each Balance Sheet date.

Fair value is the price that would be received on sell of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on

the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets. Involvement of external valuers is decided upon annually by the management. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

The management decides, after discussions with the Company's external valuers, which valuation techniques and inputs to use for each case.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarizes accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Disclosures for valuation methods, significant estimates and assumptions (note 26)
- Quantitative disclosures of fair value measurement hierarchy (note 26)
- Investment in unquoted equity shares (note 3)
- Financial instruments (including those carried at amortised cost) (note 26)

#### e) Revenue

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer. The policy of recognizing the revenue is determined by the five-stage model proposed by Ind AS 115 "Revenue from contract with customers".

#### Sale of services

Revenue from sale of services are recognized when the services are rendered. The normal credit period is 60 days.

#### **Interest income**

For all debt instruments measured either at amortised cost interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in "Other income" in the Statement of

Profit and Loss.

#### **Dividends**

Dividend income is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

#### **Trade receivables**

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in Note 2.2 (i) Financial instruments – initial recognition and subsequent measurement.

#### **Contract liabilities**

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration in form of advance from customer (or an amount of consideration is due). If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognized when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Company performs the obligation as per the contract.

#### f) Taxes

#### **Current income tax**

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside the Statement of Profit and Loss is recognised outside the Statement of Profit and Loss (either in other comprehensive income ("OCI") or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

#### **Deferred tax**

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the Statement of Profit and Loss is recognised outside the Statement of Profit and Loss (either in other comprehensive income

("OCI") or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

#### g) Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries or country or countries in which the entity operates or for the market in which the asset is used.

For the assets, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased.

If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceeds the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss.

#### h) Provisions and contingent liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases

where there is a liability that cannot be recognized because it cannot be measured reliably.

The Company does not recognize a contingent liability but discloses its existence in the financial statements. A disclosure for a contingent liability is made where there is a possible obligation arising out of past event, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation arising out of a past event where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

### i) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### **Financial assets**

# **Initial recognition and measurement**

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Trade and other receivables arising as a result of transactions within scope of Ind AS 115 are initially recorded at transaction price.

Purchases or sales of financial assets that require delivery of assets within a timeframe established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e. the date that the Company commits to purchase or sell the asset.

#### <u>Subsequent measurement</u>

For purposes of subsequent measurement, financial assets are classified in three categories:

- Debt instruments at amortized cost
- Debt instruments, derivatives and equity instruments at fair value through Profit or Loss ('FVTPL')
- Equity instruments measured at fair value through other comprehensive income ('FVTOCI') or fair value through profit or loss ('FVTPL')

#### **Debt instruments at amortized cost**

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in other income in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss. This category generally applies to trade and other receivables.

#### **Debt instrument at FVTPL**

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as at FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or as at FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

#### **Equity investments**

All equity investments in scope of Ind AS 109 are measured at fair value. For all equity investments not held for trading, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity investment as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to the Statement of Profit and Loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity investment included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

#### **Derecognition**

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the Company's Balance Sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

# Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model

for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- (a) Financial assets that are debt instruments and are measured at amortised cost e.g. loans, debt securities, deposits, trade receivables and bank balance
- (b) Financial assets that are measured at FVTOCI
- (c) Lease receivables under Ind AS 116
- (d) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e. all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

As a practical expedient, the Company uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the Statement of Profit and Loss. This amount is reflected under the head 'other expenses' in the Statement of Profit and Loss.

The Balance Sheet presentation for various financial instruments is described below:

• Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables:

ECL is presented as an allowance, i.e. as an integral part of the measurement of

those assets in the Balance Sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

#### Debt instruments measured at FVTOCI:

Since financial assets are already reflected at fair value, impairment allowance is not further reduced from its value. Rather, ECL amount is presented as 'accumulated impairment amount' in the OCI.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e. financial assets which are credit impaired on purchase / origination.

#### **Financial liabilities**

## **Initial recognition and measurement**

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts.

#### Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

#### Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities designated upon initial recognition as at fair value through profit or loss.

Gains or losses on liabilities held for trading are recognised in the Statement of Profit and Loss.

#### **Loans and borrowings**

This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

This category generally applies to borrowings.

# Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

## Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

#### j) Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of Cash Flows, cash and cash equivalents consists of cash and short-term deposits, as defined above, net of outstanding bank overdrafts and cash credit facilities as they are considered an integral part of the Company's cash management.

# k) Dividend to equity holders of the Company

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

#### I) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision-Maker. The Chief Operating Decision-Maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

#### m) Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

#### 2.3 New amendments issued but not effective

The Ministry of Corporate Affairs has vide notification dated 31 March 2023 notified Companies (Indian Accounting Standards) Amendment Rules, 2023 (the 'Rules') which amends certain accounting standards and are effective 1 April 2023. These amendments are not expected to have a material impact on the Company in the current or future reporting periods and on foreseeable future transactions.

#### **Title**

#### **Key requirements**

Disclosure of Accounting Policies-Amendments to Ind AS 1, Presentation of financial statements The amendment requires entities to disclose their material rather than their significant accounting policies. The amendments define what is 'material accounting policy information' and explain how to identify when accounting policy information is material. They further clarify that immaterial accounting policy information does not need to be disclosed. If it is disclosed, it should not obscure material accounting information.

Definition of Accounting Estimates-Amendments to Ind AS 8, Accounting policies, changes in accounting estimates and errors The amendment clarifies how entities should distinguish changes in accounting policies from changes in accounting estimates. The distinction is important, because changes in accounting estimates are applied prospectively to future transactions and other future events, but changes in accounting policies are generally applied retrospectively to past transactions and other past events as well as the current period.

Deferred tax related to assets and liabilities arising from a single transaction- Amendments to Ind AS 12, Income taxes The amendment requires entities to recognise deferred tax on transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences. They will typically apply to transactions such as leases of lessees and decommissioning obligations and will require the recognition of additional deferred tax assets and liabilities.

The amendment should be applied to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, entities should recognise deferred tax assets (to the extent that it is probable that they can be utilised) and deferred tax liabilities at the beginning of the earliest comparative period for all deductible and taxable temporary differences associated with:

- right-of-use assets and lease liabilities, and
- decommissioning, restoration and similar liabilities, and the corresponding amounts recognised as part of the cost of the related assets.

The cumulative effect of recognising these adjustments is recognised in retained earnings, or another component of equity, as appropriate.

#### 2.4 Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures, including the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

# **Judgements**

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

## 1) Revenue from contracts with customers

The Company applied the following judgements that significantly affect the determination of the amount and timing of revenue from contracts with customers:

#### a) Identifying contracts with customers

Management has exercised judgement to determine contract with customers for the

purpose of Ind AS 115 and for identification of performance obligations and other associated terms.

# b) Identifying performance obligation

The Company enters into contract with customers for goods and services. The Company determined that both the goods and services are capable of being distinct. The Company also determined that the promises to transfer these goods and services are distinct within the context of the contract.

# c) Determination of timing of satisfaction of performance obligation

The Company concluded that services to be recognised over a period of time because it does not meet the criteria for recognising revenue at a point of time. The Company has applied judgement based on the criteria mentioned in the standard read along with the contract with customers, applicable laws and considering the industry practices.

# **Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

# 1) Impairment of non-financial assets (tangible and intangible)

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Unit's (CGU's) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. In determining the fair value less costs to disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators.

#### 2) Defined benefit plans

The cost of the defined benefit gratuity plan, other defined benefit plan and other postemployment plans are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, expected returns on plan assets and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The mortality rate is based on publicly available mortality tables for India. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases, discount rate and return on planned assets are based on expected future inflation rates for India. Further details about defined benefit plans are given in note 40.

# 3) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### (All amounts are in Indian Rupees millions, unless otherwise stated)

| ·                                                                                                                             | •             | -             |
|-------------------------------------------------------------------------------------------------------------------------------|---------------|---------------|
|                                                                                                                               | 31 March 2023 | 31 March 2022 |
| Investment in subsidiaries                                                                                                    |               |               |
| (at cost, unless other wise stated)                                                                                           |               |               |
| Unquoted                                                                                                                      |               |               |

#### Note 4.1: Balance in escrow account

During the year, Bharat Forge Limited through the Company has entered into a share purchase agreement with the shareholders of J S Autocast Foundry India Private Limited ("JSA") to purchase 39,68,330 equity shares for a total consideration of Rs. 3,460.98 millions as on 01 July 2022. In accordance with the aforementioned share purchase agreement, out of the total purchase consideration a sum of Rs. 100.00 millions is payable to the erstwhile shareholders of JSA after a period of 3 years from the date of purchase and the amount so payable is to be deposited in a separate Escrow account to be maintained with ICICI Bank Limited. Also, in accordance with the ESCROW agreement, the balance in aforementioned ESCROW account is restricted and not available for general use by the Company.

# 8.1 Rights, preference and restrictions attached to the shares

#### **Equity Share Capital**

The Company has only one class of equity shares having a par value of Rs. 10 per share. Each holder of equity shares is entitled to one vote per share. The Company declares and pays dividends in Indian Rupees. The dividend proposed by the Board of Directors is subject to the approval of shareholders in the ensuing Annual General Meeting.

In the event of liquidation of the Company, the holders of equity shares will be entitled to receive any of the remaining assets of the Company, after distribution of all preferential amounts. The distribution will be in proportion to the number of equity shares held by the shareholders.

#### **Preference Share Capital**

The non-cumulative, compulsorily convertible preference shares ('CCPS') having a par value of Rs. 10 per share carries a coupon rate of 8% and are convertible into equity shares of the Company after a period of 10 years from the date of issue in the ratio of 1:1 (i.e) 1 equity share for 1 CCPS at par. The CCPS do not carry any voting rights and have a preference over equity shares for payment of dividend and repayment of capital.

# 8.5 Details of terms of securities convertible into equity shares

During the year, the Company has issued 150,000,000 Compulsorily Convertible Preference Shares ('CCPS') of face value of Rs. 10 each via a rights issue. Bharat Forge Limited, ('the holding Company') subscribed to the rights issue. The details of terms of securities were as follows:

- (a) CCPS carries coupon rate of 8%;
- (b) CCPS is convertible into equity shares after a period of 10 years from the date of issue in the ratio of 1:1 (i.e) 1 equity share for 1 CCPS at par.
- (c) The CCPS do not carry any voting rights and have a preference over equity shares for payment of dividend and repayment of capital.

During the previous year, the Company issued 90,000,000 Zero Coupon Optionally Convertible Debentures ('ZOCD') of face value of Rs. 1,000 each to Bharat Forge Limited on 28 June 2021. The details of terms of securities of the abovementioned debentures were as follows

- (a) ZOCDs are unsecured and ranks pari passu with other unsecured creditors without any preference or priority over other.
- (b) The debentureholder shall have a right to conversion or redemption at fair value at any time after the date of allotment.
- (c) The debenture holders shall be entitled to transfer these ZOCDs in accordance with the provisions of Articles of Association of the Company and provisions of the Companies Act, 2013.

The debenture holders exercised their rights to conversion on 30 March 2022. Accordingly, 90,000,000 equity shares of the Company were allotted to the debentureholders in exchange of the ZOCDs during the year.

# (D) Deferred tax

18

Ind AS 12 - Accounting for taxes on income, states that where an enterprise has unused tax losses and unused tax credits, deferred tax assets should be recognised only to the extent it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised. Accordingly, the Company has not recognised deferred tax asset on unused tax losses and unused tax credits since it is not probable that future taxable profits will be available against which the unused tax losses and credits will be utilised.

# 19 Earnings per share (EPS)

Earnings per share has been computed as under:

| Pa | rticulars                                                            |             | 31 March 2023 | 31 March 2022 |

### 20 Segment information

#### Reportable segments

The Board of Directors have been identified as the Chief Operating Decision-Maker who examine the Company's performance from geographic perspective. The Chief Operating Decision Maker has identified only one reportable segment of "sale of services". Hence the revenue, expenses, results, assets and liabilities disclosed in the financial statements of the Company are allocable to one segment.

### 25 Financial Risk Management

The Company's principal financial liabilities comprises of loans and borrowings and trade payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include trade and other receivables, cash and bank balances that is derived directly from its operations.

The Company is exposed to market risks, credit risks and liquidity risks. The Company's management oversees the management of these risks. The management of the Company ensures that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

#### (A) Market risks

Market risk is the risk that the fair value of future cash flows of a financial instruments will fluctuate because of changes in market prices. Market risk comprises of three types of risk: interest rate risk, currency risk and other price risk, such as commodity risk. Financial instruments affected by market risks include loans and borrowings, deposits, investments in mutual funds and trade receivables.

#### (i) Interest rate risks

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not have exposure to the risk of changes in market interest rates as the borrowings availed by the Company did not carry any interest.

#### (ii) Foreign currency risk

Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company does not have exposure to the risk of changes in foreign exchange rates as the Company does not have any assets or liabilities in foreign currency. The Company does not hedge its foreign currency exposures.

# Other price risks

The Company has a policy of investing its surplus funds in mutual funds, interest bearing term deposits and other highly marketable debt investments. The Company is exposed to price risk for investments that are classified as fair value through profit and loss. To manage its price risk, the Company diversifies its portfolio. Diversification and investment in the portfolio is done in accordance with Company's investment policy approved by the Board of Directors. However, the Company has not invested any surplus funds during the year.

# (B) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, investment in mutual funds, other receivables and deposits, foreign exchange transactions and other financial instruments.

#### (i) Trade receivables

Customer credit risk is managed by the Company's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored and reconciled. At 31 March 2022, the Company has receivable from only two customer accounted for 100% of total value of trade receivable (31 March 2022 : one customer 100%). An impairment analysis is performed at each reporting date on an individual basis for major customers. The calculation is based on historical data and subsequent expectation of receipts. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and industries and operate in largely independent markets.

#### (ii) Other receivables, deposits with banks, mutual funds and loans granted

Credit risk from balances with banks, financial institutions and mutual funds is managed in accordance with the Company's approved investment policy. Investments of surplus funds are made only with reputed banks and financial institutions were the counterparty risk is minimum.

The Company's maximum exposure to credit risk for the components of the Balance Sheet at 31 March 2023 and 31 March 2022 is the carrying amounts as illustrated in the respective notes.

# (C) Liquidity risks

Liquidity risk is the risk that the Company is unable to meet its existing or future obligations as they fall due, due to insufficient availability of cash or cash equivalents. The Company's approach to managing liquidity is to ensure, sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damages to Company's reputation.

The Company maintained a cautious liquidity strategy, with a positive cash balance throughout the year ended 31 March 2023 and 31 March 2022. Cash flow from operating activities provides the funds to service the financial liabilities on a day-to-day basis.

The Company regularly monitors the rolling forecasts to ensure it has sufficient cash on an ongoing basis to meet operational needs. Any short term surplus cash generated, over and above the amount required for working capital management and other operational requirements, is retained as cash and cash equivalents (to the extent required) and any excess is invested in mutual funds, interest bearing term deposits and other highly marketable debt investments with appropriate maturities to optimise the cash returns on investments while ensuring sufficient liquidity to meet its liabilities.

The table below summarises the maturity profile of the Company's financial liabilities

| Particulars                 | Less than<br>1 years | 1 - 5 Years | More than<br>5 years | Total |
|-----------------------------|----------------------|-------------|----------------------|-------|
| 31 March 2023               |                      |             |                      |       |
| Shot term borrowings        | -                    | -           | -                    | -     |
| Trade payables              | 0.34                 | -           | -                    | 0.34  |
| Other financial liabilities |                      | 89.62       |                      | 89.62 |
| Total                       | 0.34                 | 89.62       | -                    | 89.96 |
| 31 March 2022               |                      | ,           |                      |       |
| Shot term borrowings        | -                    | -           | -                    | -     |
| Trade payables              | 8.70                 | -           | -                    | 8.70  |
| Total                       | 8.70                 | _           | -                    | 8.70  |

#### 26 Fair value measurement

#### A Financial instruments by category

The financial instruments are measured at Amortised cost or Fair Value through Profit and Loss ("FVTPL")

| S.N. Particulars |                                         | 31 March 2023 |                | 31 March 2022 |                |  |
|------------------|-----------------------------------------|---------------|----------------|---------------|----------------|--|
|                  |                                         | FVTPL         | Amortised cost | FVTPL         | Amortised cost |  |

|                  | Total financial liabilities             | -             | 89.96          | _             | 8.70           |  |

<sup>\*</sup> Since denominated in INR million

Financial assets included above do not include investments in subsidiaries which are carried at cost and hence, are not required to be disclosed as per Ind AS 107 "Financial Instruments Disclosures".

#### i) Fair value hierarchy

This section explains the judgments and estimates made in determining the fair values of the financial instruments that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

#### ii) Fair value of financial assets and liabilities measured at amortised cost

The carrying amounts of trade receivables, cash and cash equivalents, trade payables, and all other current financial liabilities are considered to be the same as their fair values, due to their short-term nature.

# iii) Valuation technique used to determine fair value

Fair value of market linked investments is determined using Net Asset Value ('NAV') report issued by mutual fund house.

#### 27 Capital management

For the purpose of the Company's capital management, capital includes issued equity share capital, preference shares and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants attached to the interest -bearing loans and borrowings. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

The Company has adopted the objectives, policies or processes of Bharat Forge Limited for managing capital during the year ended 31 March 2023.

# 28 Additional regulatory information required by Schedule III of the Companies Act, 2013

#### (a) Title deeds of immovable property not held in name of the Company

The Company does not hold any immovable properties.

#### (b) Valuation of Property, Plant and Equipment

The Company does not have any property, plant and equipment or intangible assets during the current or previous year. The Company does not have any investment property.

# (c) Loans or advances granted to promoters, directors, Key Managerial Personnel (KMPs) and the related parties

The Company has not granted any loans or advances in the nature of loans to promoters, directors, KMPs and the related parties either severally or jointly with any other person.

#### (d) Details of benami property held

No proceedings have been initiated on or are pending against the Company for holding benami property under the Benami Transactions (Prohibition) Act, 1988 (45 of 1988) and Rules made thereunder.

# (e) Reconciliation of returns or statements submitted with banks or financial institution

The Company does not have any borrowings from banks or financial institution, accordingly has not filled any periodical returns or statements with any banks or financial institution.

### (f) Wilful defaulter

The Company has not been declared wilful defaulter by any bank or financial institution or Government or any Government authority.

# (g) Relationship with struck off Companies

The Company has no transactions with the companies struck off under Companies Act, 2013 or Companies Act, 1956.

#### (h) Registration of charges or satisfaction with Registrar of Companies

The Company does not have any creation or satisfaction of charges to be registered with the Registrar of Companies during the current or previous financial year.

# (i) Compliance with number of layers of companies

The Company has complied with the rules related to number of layers of subsidiary prescribed under the Act.

# (j) Following ratios need to be disclosed:

| SN  | Ratio                            | 31 March 2023 | 31 March 2022 | % Change in ratio | Reasons          |
|-----|----------------------------------|---------------|---------------|-------------------|------------------|
| (a) | Current ratio                    | 27.89         | 2.42          | 1054.42%          | Refer Note (i)   |
| (b) | Debt-equity ratio                | -             | -             | 0.00%             | Refer Note (ii)  |
| (c) | Debt service coverage ratio      | -             | -             | 0.00%             | Refer Note (ii)  |
| (d) | Return on equity ratio           | (0.01)        | (0.02)        | 0.48%             | NA*              |
| (e) | Inventory turnover ratio         | -             | -             | 0.00%             | NA**             |
| (f) | Trade receivables turnover ratio | 0.60          | 2.00          | -139.86%          | Refer Note (iii) |
| (g) | Trade payables turnover ratio    | -             | -             | 0.00%             | NA**             |
| (h) | Net capital turnover ratio       | 0.08          | 0.12          | -4.47%            | NA*              |
| (i) | Net profit ratio                 | (32.80)       | (4.69)        | -2810.90%         | Refer Note (iv)  |
| (j) | Return on capital employed ratio | (0.01)        | 0.98          | -98.76%           | Refer Note (iv)  |
| (k) | Return on investment ratio       | (0.01)        | (0.01)        | 0.13%             | NA*              |

NA\* - variance in ratio is not more than 25%, accordingly no explanation for variance is detailed out.

#### Accounting Ratios formulas :

- (a) Current Ratio = Current Assets / Current liabilities
- (b) Debt-Equity Ratio = Total Debt / Total equity
- (c) Debt Service Coverage Ratio = Earnings available for debt service / Debt service
- (d) Return on Equity Ratio = Profit for the year / Average equity
- (e) Inventory Turnover Ratio = Cost of Goods Sold / Average Inventory
- (f) Trade receivables turnover ratio = Revenue from operations / Average Trade receivables
- (g) Trade payables turnover ratio = Revenue from operations / Average Trade payables
- (h) Net capital turnover ratio = Revenue from operations / Average Working Capital
- (i) Net profit ratio = Profit for the year / Revenue from operations
- (j) Return on Capital employed = EBIT / Capital employed (Total assets Current liabilities)
- (k) Return on investment = Profit for the year / (Debt + Total equity)

NA\*\* - variance in ratio could not be computed since the said ratios are not applicable to the Company.

#### **Accounting Ratios explanation:**

- (i) The outstanding trade payables of the Company in FY 2021-2022 were fully paid in the current financial year out of available bank balances. Accordingly, the current liabilities were reduced and the current ratio has increased significantly.
- (ii) The trade receivable trunover ratio has declines significantly on account of reduction in service revenues arising from the group Companies during the financial year.
- (iii) The Company has paid stamp duty and registration fees to increase the authorised capital of the Company in order to facilitate the transaction entered into with Bharat Forge Limited and J S Auto Cast Foundry India Private Limited. Accordingly, the net losses of the Compay has widened and the net profit ratio, return on capital employed ratio has changed significantly.

#### (k) Compliance with approved scheme(s) of arrangements

The Company has not entered into any scheme of arrangement which has an accounting impact on current year or previous year.

#### (I) Utilisation of borrowed funds and share premium

The Company has not advanced or granted any loan or invested funds to any other person(s) or entity(is), including foreign entities (Intermediaries) with the understanding that the Intermediary shall:

- a. directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company (Ultimate Beneficiaries) or
- b. provide any guarantee, security or the like to or on behalf of the ultimate beneficiaries.

During the year, the Company has received funds (via issue of equity shares and preference shares) from Bharat Forge Limited ('BFL'), with the understanding that the Company shall acquire shares from the existing shareholders J S Auto Cast Foundry India Private Limited, identified in the manner by BFL. The details of funds received and funds invested are mentioned below:

- Rs. 3,474.60 million (net) share application money pending allotment received for issue for equity share and preference share capital from Bharat Forge Limited.
- Rs. 3,374.60 million paid to the erstwhile shareholders of now subsidiary company towards purchase of 39,68,330 equity shares and Rs. 100.00 million depositied in a separate ESCROW account in accordance with the terms of Share Purchase Agreement.

The Company has not provided any guarantee, security or the like to or on behalf of the holding company.

The Company has received funds from its holding company, which is registered in India and the funds are received within India. Accordingly, relevant provisions of the Foreign Exchange Management Act, 1999 (42 of 1999) are not applicable.

The Company has complied with the relevant provisions of the Companies Act, 2013, as amended and these transactions are not violative of the Prevention of Money-Laundering act, 2002 (15 of 2003).

#### (m) Undisclosed income

There is no income surrendered or disclosed as income, which is not recorded in books of accounts during the current or previous year in the tax assessments under the Income Tax Act, 1961.

# (n) Details of crypto currency or virtual currency

The Company has not traded or invested in crypto currency or virtual currency during the current or previous year.

# 29 Compliance with Order of National Company Law Tribunal (NCLT) issued in the previous financial year

During the previous financial year, one of the erstwhile financial creditor of the Subsidiary Company "BF Industrial Technology & Solutions Limited" (formerly known as Sanghvi Forging & Engineering Limited), had filed an application under the Insolvency and Bankruptcy Code, 2016 (hereinafter referred as IBC, 2016) seeking appointment of Resolution Professional and initiation of the Corporate Insolvency Resolution Process (hereinafter referred as CIRP process) against the Subsidiary Company, for defaulting on repayment of the bank's loan, which was admitted by the National Company Law Tribunal (hereinafter referred to as NCLT).

The holding Company, Bharat Forge Limited, had submitted a resolution plan to the resolution professional which was approved by the NCLT. In accordance with the approved resolution plan the Company was selected to act as intermediary investment company between the holding Company (Bharat Forge Limited) and subsidiary Company (BF Industrial Technology & Solutions Limited).

Accordingly, the Company issued zero coupon optionally convertible debentures to Bharat Forge Limited for a total consideration of Rs. 900.00 million. Out of the proceeds received, the Company had paid Rs. 750.00 million towards the loans of the Subsidiary Company and Rs. 150.00 million were transferred to the Subsidiary Company. The subsidiary Company had issued 4,050,000 equity shares of face value of Rs. 10 each issued at par and 860,000 zero coupon optionally convertible debentures of face value of Rs. 1,000 each issued at par.

The other conditions as prescribed by the NCLT were completed through the operations of the subsidiary Company.

#### 30 Acquisition of J S Auto Cast Foundry India Private Limited

During the year, Bharat Forge Limited through the Company has entered into a share purchase agreement with the shareholders of J S Auto Cast Foundry India Private Limited ("JSA") to purchase 39,68,330 equity shares for a total consideration of Rs. 3460.98 millions. As part of the Business Transfer Agreement (BTA) the erstwhile promoters transferred the business on going concern basis on 01 July 2022.

#### 31 Prior period comparatives

Prior year comparatives have been regrouped/reclassified where necessary, to confirm with current year's presentation.

#### **Independent Auditors' Report**

To the Members of BF Industrial Technology & Solutions Limited (formerly known as Sanghvi Forging & Engineering Limited)

#### **Report on the Audit of the Ind AS Financial Statements**

#### **Opinion**

We have audited the accompanying Ind AS financial statements of BF Industrial Technology & Solutions Limited (formerly known as Sanghvi Forging & Engineering Limited) ("the Company"), which comprise the Balance Sheet as at 31 March 2023, the Statement of Profit and Loss, including Other Comprehensive Income, the Cash Flow Statement, the Statement of Changes in Equity for the year ended, and notes to the Ind AS financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2023, its profit including other comprehensive income, its cash flows and changes in equity for the year ended on that date.

#### **Basis for Opinion**

We conducted our audit of the Ind AS financial statements in accordance with the Standards on Auditing ("SAs"), as specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the 'Auditor's Responsibilities for the Audit of the Ind AS Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the Ind AS financial statements.

#### **Other Information**

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report but does not include the Ind AS financial statements and our auditor's report thereon. Our opinion on the Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Management's responsibility for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and

maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, the management and the Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of Directors is also responsible for overseeing the Company's financial reporting process.

### **Auditor's Responsibilities for the Audit of the Ind AS Financial Statements**

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether
  due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
  evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
  a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
  involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
  that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for
  expressing our opinion on whether the Company has adequate internal financial controls with reference
  to Ind AS financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

#### **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the order, to the extent applicable.
- 2. (A) As required by Section 143 (3) of the Act, we report that:
  - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
  - (c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
  - (d) In our opinion, the aforesaid Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - (e) On the basis of the written representations received from the directors as on 31 March 2023 taken on record by the Board of Directors, none of the directors are disqualified as on 31 March 2023 from being appointed as a director in terms of Section 164 (2) of the Act.
  - (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B" to this report.
  - (B) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company has disclosed the impact of pending litigations on its financial position in its Ind AS financial statements Refer Note 35 to the Ind AS financial statements;
    - ii. The Company did not have any long-term contracts, including derivative contracts, for which there were any material foreseeable losses.
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. (i) The management has represented that to the best of it's knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - (ii) The management has represented that to the best of it's knowledge and belief, no funds have been received by the Company from any persons or entities, including foreign entities ("Funding Parties"), with the understanding, recorded in writing or otherwise, that the Company shall, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
      - (iii) Based on such audit procedures which we have considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us

to believe that the representations under sub-clause (i) and (ii) contain any material misstatement.

- v. The Company has not declared or paid any dividend during the year.
- (C) In our opinion, the managerial remuneration for the year ended 31 March 2023 has been paid/ provided for by the Company to its directors in accordance with the provisions of section 197 read with Schedule V of the Act.

(Referred to in paragraph 1 in Report on Other Legal and Regulatory Requirements of the Independent Auditors' Report to the members of BF Industrial Technology & Solutions Limited (formerly known as Sanghvi Forging & Engineering Limited) on the Ind AS financial statements for the year ended 31 March 2023)

- (i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment.
  - (B) The Company has maintained proper records showing full particulars of intangible assets.
  - (b) The Company has a regular program of physical verification of its Property, Plant and Equipment, by which all the Property, Plant and Equipment are verified in a phased manner over a period of three years. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of the assets. No material discrepancies were noticed on such verification.
  - (c) The title deeds of the immovable properties disclosed in the Ind AS financial statements (other than those properties where the Company is the lessee and the lease agreements are executed in favour of the lessee) are held in the name of the Company.
  - (d) The Company has not revalued its Property, Plant and Equipment, Right of Use assets, or intangible assets during the year.
  - (e) In our opinion and according to the information and explanations given to us, no proceedings have been initiated or are pending against the Company for Holding any benami property under the Benami Transactions (Prohibition) Act, 1988 and rules made thereunder.
- (ii) (a) As explained to us, the inventory (including those lying with third parties) has been physically verified at reasonable intervals by the management during the year, including inventories lying with third parties. In our opinion, the frequency of verification by the management is reasonable and the coverage and procedure of such verification by the management is appropriate. There were no cases where the discrepancies exceeded 10% or more in aggregate for each class of inventory which were noticed during the year.
  - (b) In our opinion and according to the information and explanations given to us, the Company has been sanctioned fresh working capital limits in aggregate, exceeding five crore rupees from a bank on the basis of security of current assets. Based on the records examined by us in the normal course of audit of the Ind AS financial statements, the periodical statements filed by the Company with such bank are in agreement with books of accounts of the Company.
- (iii) In our opinion and according to the information and explanations given to us, the Company has not made any investments in, or provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured, to Companies, Firms, Limited Liability Partnerships or other parties during the year. Accordingly, paragraph 3 (iii) of the order is not applicable to the Company.
- (iv) In our opinion and according to the information and explanations given to us, the Company has not granted any loans or made investments in or provided guarantee or security to which the provisions of section 185 or section 186 of the Act apply. Accordingly, paragraph 3 (iv) of the Order is not applicable to the Company.
- (v) The Company has not accepted any deposits or amounts which are deemed to be deposits. Accordingly, the directives issued by the Reserve Bank of India and the provisions of section 73 to 76 or any other relevant provisions of the Act and rules made there under relating to the acceptance of deposits are not applicable to the Company.
- (vi) We have broadly reviewed the cost records maintained by the Company pursuant to the rules prescribed by the Central Government for the maintenance of cost records under Section 148(1) of the Act, in respect of the products manufactured by the Company and are of the opinion that prima facie, such accounts and records have been made and maintained. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

(vii) (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted / accrued in the books of account in respect of undisputed statutory dues including Goods and Services Tax, Provident Fund, Employees' State Insurance, Income Tax, Duty of Customs and other material statutory dues have generally been regularly deposited during the year by the Company with the appropriate authorities.

According to the information and explanations given to us, no undisputed amounts payable in respect of Goods and Services Tax, Provident Fund, Employees' State Insurance, Income Tax, Duty of Customs and other material statutory dues were in arrears as at 31 March 2023, for a period of more than six months from the date they became payable.

In our opinion and according to the information and explanations given to us, there are no dues of Goods and Services Tax, Provident Fund, Employees' State Insurance, Income Tax, Duty of Customs and other material statutory dues which have not been deposited on account of any dispute.

- (viii) According to the information and explanations given to us, the Company has not surrendered or disclosed any transactions which were not recorded in the books of accounts as income during the year in the tax assessments under the Income Tax Act, 1961.
- (ix) (a) In our opinion and according to the information and explanations given to us, the Company has not availed any loans or other borrowings from any lenders. Accordingly, paragraph 3 (ix) (a) of the order is not applicable to the Company.
  - (b) According to the information and explanations given to us, the Company has not been declared a willful defaulter by any bank or financial institution or other lenders.
  - (c) In our opinion and according to the information and explanations given to us, the Company has not availed any term loans during the year. Accordingly, paragraph 3 (ix) (c) of the order is not applicable to the Company.
  - (d) In our opinion and according to the information and explanations given to us, the Company has not raised any funds on short term basis. Accordingly, paragraph 3 (ix) (d) of the order is not applicable to the Company.
  - (e) In our opinion and according to the information and explanations given to us, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiary. The Company does not have any joint venture or associate companies.
  - (f) According to the information and explanations given to us, the Company has not raised loans during the year on the pledge of securities held in its subsidiary. The Company does not have any joint venture or associate companies.
- (x) (a) In our opinion and according to the information and explanations given to us, the Company has not raised money by way of initial public offer or further public offer (including debt instruments) during the year.
  - (b) According to the information and explanations given to us, the Company has not made any preferential allotment or private placement of shares or convertible debentures during the year.
- (xi) (a) According to the information and explanations given to us, no fraud by the Company or on the Company has been noticed or reported during the year.
  - (b) According to the information and explanations given to us, no report under sub-section (12) of Section 143 of the Act has been filed by the auditors in Form ADT-4 as prescribed under Rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) According to the information and explanations given to us, the Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion, the Company is not a Nidhi Company. Accordingly, paragraph 3 (xii) of the Order is not applicable to the Company.

# **BF Industrial Technology and Solutions Limited**

- (xiii) In our opinion and according to the information and explanations given to us, all the transactions with related parties are in compliance with section 188 of the Act and the details, as required by the applicable accounting standards, have been disclosed in the Ind AS financial statements. The provisions of Section 177 are not applicable to the Company.
- (xiv) (a) In our opinion and according to the information and explanations given to us, the Company has an adequate internal audit system commensurate with the size and nature of its business.
  - (b) We have reviewed the reports of the internal auditors for the period under audit, however we have not placed reliance on the work done by the internal auditor.
- (xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with directors or persons connected with him during the year. Accordingly, the provisions of section 192 of the act are not applicable to the Company.
- (xvi) (a) In our opinion and according to the information and explanations given to us, the Company is not required to register itself under section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3 (xvi) (a)(b) and (c) of the Order is not applicable to the Company.
  - (d) In our opinion and according to the information and explanations given to us, the Company does not have a CIC as a part of the Group.
- (xvii) In our opinion and according to the information and explanations given to us, the Company has not incurred cash losses in the current financial year. The Company had incurred cash losses of Rs. 45.69 million during the immediately preceding financial year.
- (xviii) There has been no resignation of statutory auditors during the year. Accordingly, paragraph 3(xviii) of the Order is not applicable to the Company.
- (xix) On the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and the management plans presented before us, we are of the opinion that no material uncertainty exists as on the date of the audit report that the Company is capable of meeting its liabilities existing at the date of Balance Sheet as and when they fall due within a period of one year from the Balance Sheet date.
- (xx) In our opinion and according to the information and explanations given to us, the provisions of section 135 relating to Corporate Social Responsibility are not applicable to the Company.
- (xxi) The paragraph 3 (xxi) of the Order is not applicable to the Ind AS financial statements of the Company.

Membership Number: 107739 UDIN: 23107739BGZMIJ8577

Place : Pune Date : 2 May 2023 (Referred to in paragraph 2(f) in Report on Other Legal and Regulatory Requirements of the Independent Auditors' Report to the members of BF Industrial Technology & Solutions Limited (formerly known as Sanghvi Forging & Engineering Limited) on the Ind AS financial statements for the year ended 31 March 2023)

# Report on the Internal Financial Controls under clause (i) of sub-section 3 of section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of BF Industrial Technology & Solutions Limited ("the Company") (formerly known as Sanghvi Forging & Engineering Limited) as of 31 March 2023 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

# **Management's Responsibility for Internal Financial Controls**

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting ("IFC-FR)" criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

## **Auditors' Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by ICAI and the Standards on Auditing as specified under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls over financial reporting with reference to Ind AS financial statements.

#### **Meaning of Internal Financial Controls over Financial Reporting**

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or

# **BF Industrial Technology and Solutions Limited**

timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Ind AS financial statements.

### **Inherent Limitations of Internal Financial Controls over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

#### **Opinion**

In our opinion, the Company has, in all material respects, adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# Notes to the financial statements for the year ended 31 March 2023

#### 1. Corporate Information

BF Industrial Technology & Solutions Limited (formerly known as Sanghvi Forging and Engineering Limited) ("the Company") is a public company domiciled in India and incorporated under the provisions of the Companies Act, 1956. Bharat Forge Limited is the ultimate holding Company and BF Industrial Solutions Limited is the holding Company of the Company. The Company is engaged in the manufacturing and selling of open and close forged products. The Company caters to both domestic and international markets. The registered office of the Company is located at GIDC Industrial Estate, Waghodia, District Vadodara. The Company's CIN is U28910GJ1989PLC012015. The financial statements were authorized for issue in accordance with a resolution of the Board of Directors passed on 2 May 2023.

#### 2. Significant Accounting Policies

#### 2.1 Basis of preparation

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable to the financial statements of the Company.

The financial statements are presented in INR and all values are rounded to the nearest million (INR 000,000), except when otherwise indicated.

The Company has prepared the financial statements on the basis that it will continue to operate as a going concern.

The financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

#### 2.2 Summary of significant accounting policies

#### a) Current and non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current / non-current classification. An asset is treated as current when it is:

- (i) Expected to be realized or intended to be sold or consumed in normal operating cycle;
- (ii) Held primarily for the purpose of trading;
- (iii) Expected to be realized within twelve months after the reporting period, or
- (iv) Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- (i) It is expected to be settled in normal operating cycle
- (ii) It is held primarily for the purpose of trading
- (iii) It is due to be settled within twelve months after the reporting period, or
- (iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

# b) Foreign currencies

The Company's financial statements are presented in Indian Rupees, which is also its functional currency.

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange difference that arise on settlement of monetary items or on reporting at each Balance Sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or Statement of Profit and Loss are also recognised in OCI or Statement of Profit and Loss, respectively).

#### c) Investment in subsidiaries, joint ventures and associates

The Company has accounted for its investment in subsidiaries at cost less accumulated impairment [Refer note 2.2(m)].

#### d) Fair value measurement

The Company measures financial instruments at fair value at each Balance Sheet date.

Fair value is the price that would be received on sell of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on

the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets. Involvement of external valuers is decided upon annually by the management. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

The management decides, after discussions with the Company's external valuers, which valuation techniques and inputs to use for each case.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarizes accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Disclosures for valuation methods, significant estimates and assumptions (note 43)
- Quantitative disclosures of fair value measurement hierarchy (note 43)
- Investment in unquoted equity shares (note 6)
- Financial instruments (including those carried at amortised cost) (note 43)

# e) Revenue

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer. The policy of recognizing the revenue is determined by the five-stage model proposed by Ind AS 115 "Revenue from contract with customers".

#### Sale of goods

Revenue from sale of goods is recognized at the point in time when control of the asset is transferred to the customer, generally on date of bill of lading for export sales and generally on delivery for domestic sales. The normal credit term is 15 to 180 days upon delivery.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company considers the effect of variable consideration, the existence of significant financing components, non-cash consideration and consideration payable to the customer, if any.

#### **Export incentives**

Income from export incentives are accounted for on export of goods if the entitlements can be estimated with reasonable assurance and conditions precedent to claim are fulfilled.

#### Sale of services

Revenue from sale of services is in nature of job work on customer product which normally takes 1-4 days for completion and accordingly, revenue is recognized when products are sent to customer on which job work is completed. The normal credit period is 60 days.

#### **Interest income**

For all debt instruments measured either at amortised cost interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected Cash Flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in "Other income" in the Statement of Profit and Loss.

#### **Dividends**

Dividend income is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

#### **Trade receivables**

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in Note 2.2 (p) Financial instruments – initial recognition and subsequent measurement.

#### **Contract liabilities**

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration in form of advance from customer (or an amount of consideration is due). If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognized when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Company performs the obligation as per the contract.

#### f) Government grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant or subsidy relates to revenue, it is recognized as income/netted off with expenses on a systematic basis in the Statement of Profit and Loss over the periods necessary to match them with the related costs, which they are intended to compensate. Where the grant relates to an asset, it is recognized as deferred income and is allocated to Statement of Profit and Loss over the periods and in the proportions in which depreciation on those assets is charged.

# g) Taxes

#### **Current income tax**

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside the Statement of Profit and Loss is recognised outside the Statement of Profit and Loss (either in other comprehensive income ("OCI") or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are

subject to interpretation and establishes provisions where appropriate.

#### **Deferred tax**

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the Statement of Profit and Loss is recognised outside the Statement of Profit and Loss (either in other comprehensive income ("OCI") or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

#### Indirect taxes paid on acquisition of assets or on incurring expense

Expenses and assets are recognised net of the amount of indirect taxes paid, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable;
- When receivables and payables are stated with the amount of tax included

The net amount of tax recoverable from or payable to, the taxation authority is included as part of receivables or payables in the Balance Sheet.

#### h) Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction net of accumulated depreciation and impairment loss (if any). Internally manufactured property, plant and equipment are capitalised at cost, including GST for which credit is not available, wherever applicable. All significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the property, plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met.

When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the Statement of Profit and Loss as incurred.

The present value of the expected cost for the decommissioning of an asset after its use

is included in the cost of the respective asset if the recognition criteria for a provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised.

The identified components are depreciated over their useful lives, the remaining asset is depreciated over the life of the principal asset.

Depreciation for identified components is computed on straight line method based on:

- useful lives determined based on internal technical evaluation,
- residual value of respective assets, which are not more than 5% of the original cost of the asset.

| Type of asset                                              | Schedule II life (years) | Useful lives estimated by the management (years) |
|------------------------------------------------------------|--------------------------|--------------------------------------------------|
| Building – factories                                       | 30                       | 30                                               |
| Buildings – others (including roads)                       | 5 to 60                  | 5 to 60                                          |
| Plant and machineries (including electrical installations) | 15                       | 1 to 24                                          |
| Plant and machineries – windmill                           | 25                       | 9                                                |
| Plant and machineries – computers                          | 3                        | 3                                                |
| Office equipment                                           | 5                        | 5                                                |
| Furniture and fixtures                                     | 10                       | 10                                               |
| Vehicles – Four wheelers                                   | 8                        | 8                                                |
| Vehicles – Two wheelers                                    | 10                       | 10                                               |

The Company, based on technical assessment made by a technical expert and management estimate, depreciates certain items of plant and equipment over estimated useful lives which are different from the useful life prescribed in Schedule II to the Act. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Freehold land is carried at cost.

An item of property, plant and equipment and any significant part initially recognised, is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

#### i) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in Statement of Profit and Loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite

useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Profit and Loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

Acquired intangible assets which comprise expenditure incurred on acquisition of user licenses for computer software's are amortised over the estimated useful life (say 3 years) on a straight-line basis. The useful life of intangible assets is reviewed by management at each Balance Sheet date.

## j) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

#### k) Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities representing obligations to make lease payments and right-of-use assets representing the right to use the underlying assets.

## (i) Right of use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses and adjusted for any remeasurement of lease liabilities.

The cost of right of use assets includes the amount of lease liabilities recognized, initial direct costs incurred and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets (say 99 years).

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (m) Impairment of non-financial assets.

## (ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an

index or a rate and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate, are recognized as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g. changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

#### (iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

## Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in other income in the Statement of Profit and Loss. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

## I) Inventories

Cost of inventories have been computed to include all cost of purchases, cost of conversion and other costs incurred in bringing the inventories to their present location and condition.

Raw materials and components, stores and spares and loose tools are valued at lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Costs are determined on weighted average basis.

Work-in-progress and finished goods are valued at lower of cost and net realisable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. Cost of work-in-progress and finished goods are determined on a weighted average basis.

Scrap is valued at net realizable value.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

## m) Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset

may be impaired. If any indication exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future Cash Flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future Cash Flows after the fifth year. To estimate Cash Flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates Cash Flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries or country or countries in which the entity operates or for the market in which the asset is used.

Intangible assets under development are tested for impairment annually.

Impairment losses of continuing operations including impairment on inventories, are recognised in the Statement of Profit and Loss.

For the assets, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased.

If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceeds the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss.

## n) Provisions and contingent liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements. A disclosure for a contingent liability is made where there is a possible obligation arising out of past event, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly

within the control of the Company or a present obligation arising out of a past event where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

#### **Onerous contracts**

A provision for onerous contracts is measured at the present value of the lower of expected costs of terminating the contract and the expected cost of continuing with the contract. Before a provision is established, the Company recognizes impairment on the assets with the contract.

## o) Post-employment and other employee benefits

#### **Provident fund**

The Company contributes regularly towards the provident fund of its employees to the Government administered pension fund which is a defined contribution scheme.

The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as expenditure, when an employee renders the related service.

#### **Gratuity**

The Company operates a defined benefits plan for its employee's viz. gratuity scheme. Payment for present liability of future payment of gratuity is being made to approved gratuity funds. The cost of providing benefits under these plans is determined on the basis of actuarial valuation at each year end. Actuarial valuation is carried out for the plan using the project unit credit method.

Remeasurements, comprising of actuarial gains and losses, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the Balance Sheet as asset / liability with a corresponding debit or credit to retained earnings through OCI in the period in which they occur.

Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in Statement of Profit and Loss on the earlier of:

- The date of the plan amendment or curtailment
- The date that the Company recognizes related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset.

The Company recognizes the following changes in the net defined benefit obligation as an expense in the Statement of Profit and Loss:

- Service costs comprising of current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

#### Privilege leave benefits

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences

as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond 12 months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end.

Actuarial gains/losses are immediately taken to the Statement of Profit and Loss and are not deferred. The Company presents the leave as a current liability in the Balance Sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where the Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

## p) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### **Financial assets**

## **Initial recognition and measurement**

All financial assets except trade or other receivables that result from transactions within scope of IND AS 115, are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Trade and other receivables arising as a result of transactions within scope of IND AS 115 are initially recorded at transaction price.

Purchases or sales of financial assets that require delivery of assets within a timeframe established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e. the date that the Company commits to purchase or sell the asset.

## Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in three categories:

- Debt instruments at amortized cost
- Debt instruments, derivatives and equity instruments at fair value through Profit or Loss ('FVTPL')
- Equity instruments are measured at fair value through other comprehensive income ('FVTOCI') or fair value through profit or loss (FVTPL).

#### **Debt instruments at amortized cost**

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- a) The asset is held within a business model whose objective is to hold assets for collecting contractual Cash Flows, and
- b) Contractual terms of the asset give rise on specified dates to Cash Flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in other income in the Statement of Profit and Loss. The losses arising from

impairment are recognised in the Statement of Profit and Loss. This category generally applies to trade and other receivables.

#### **Debt instrument at FVTPL**

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as at FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or as at FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

#### **Equity investments**

All equity investments in scope of Ind AS 109 are measured at fair value. For all equity investments not held for trading, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity investment as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to the Statement of Profit and Loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity investment included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

## **Derecognition**

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the Company's Balance Sheet) when:

- The rights to receive Cash Flows from the asset have expired, or
- The Company has transferred its rights to receive Cash Flows from the asset or has assumed an obligation to pay the received Cash Flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive Cash Flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

## **Impairment of financial assets**

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- a) Financial assets that are debt instruments and are measured at amortised cost e.g. loans, debt securities, deposits, trade receivables and bank balance.
- b) Financial assets that are measured at FVTOCI
- c) Lease receivables under Ind AS 116
- d) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e. all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

As a practical expedient, the Company uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the Statement of Profit and Loss. This amount is reflected under the head 'other expenses' in the Statement of Profit and Loss.

The Balance Sheet presentation for various financial instruments is described below:

• Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables:

ECL is presented as an allowance, i.e. as an integral part of the measurement of those assets in the Balance Sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

Debt instruments measured at FVTOCI:

Since financial assets are already reflected at fair value, impairment allowance is not further reduced from its value. Rather, ECL amount is presented as 'accumulated impairment amount' in the OCI.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e. financial assets which are credit impaired on purchase / origination.

#### **Financial liabilities**

#### **Initial recognition and measurement**

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts.

#### **Subsequent measurement**

The measurement of financial liabilities depends on their classification, as described below:

#### Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities designated upon initial recognition as at fair value through profit or loss.

Gains or losses on liabilities held for trading are recognised in the Statement of Profit and Loss.

## **Loans and borrowings**

This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

#### **Derecognition**

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of

the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

## Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

## q) Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of Cash Flows, cash and cash equivalents consists of cash and short-term deposits, as defined above, net of outstanding bank overdrafts and cash credit facilities as they are considered an integral part of the Company's cash management.

## r) Dividend to equity holders of the Company

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

## s) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision-Maker. The Chief Operating Decision-Maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

## t) Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

## 2.3 Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures, including the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

#### **Judgements**

In the process of applying the Company's accounting policies, management has made the

following judgements, which have the most significant effect on the amounts recognised in the financial statements:

## 1) Revenue from contracts with customers

The Company has applied the following judgements that significantly affect the determination of the amount and timing of revenue from contracts with customers:

## a) Identifying contracts with customers

The management of the Company has exercised judgement to determine contract with customers for the purpose of Ind AS 115 and for identification of performance obligations and other associated terms.

## b) Identifying performance obligation

The Company enters into contract with customers for goods and services. The Company determined that both the goods and services are capable of being distinct. The Company also determined that the promises to transfer these goods and services are distinct within the context of the contract.

## c) Determination of timing of satisfaction of performance obligation

The Company concluded that revenue from sale of goods to be recognised at a point in time and revenue from sale of services to be recognised over a period of time. The Company has applied judgement in determining the point in time when the control of the goods are transferred based on the criteria mentioned in the standard read along with the contract with customers, applicable laws and considering the industry practices.

## **Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

## 1) Impairment of non-financial assets (tangible and intangible)

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Unit's (CGU's) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. In determining the fair value less costs to disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators.

## 2) Defined benefit plans

The cost of the defined benefit gratuity plan, other defined benefit plan and other postemployment plans are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, expected returns on plan assets and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The mortality rate is based on publicly available mortality tables for India. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases, discount rate and return on planned assets are based on expected future inflation rates for India. Further details about defined benefit plans are given in note 40.

## 3) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### 2.4 New amendments issued but not effective

The Ministry of Corporate Affairs has vide notification dated 31 March 2023 notified Companies (Indian Accounting Standards) Amendment Rules, 2023 (the 'Rules') which amends certain accounting standards and are effective 1 April 2023. These amendments are not expected to have a material impact on the Company in the current or future reporting periods and on foreseeable future transactions.

#### Title

#### **Key requirements**

Disclosure of Accounting Policies- Amendments to Ind AS 1, Presentation of financial statements The amendment requires entities to disclose their material rather than their significant accounting policies. The amendments define what is 'material accounting policy information' and explain how to identify when accounting policy information is material. They further clarify that immaterial accounting policy information does not need to be disclosed. If it is disclosed, it should not obscure material accounting information.

Definition of Accounting Estimates- Amendments to Ind AS 8, Accounting policies, changes in accounting estimates and errors The amendment clarifies how entities should distinguish changes in accounting policies from changes in accounting estimates. The distinction is important, because changes in accounting estimates are applied prospectively to future transactions and other future events, but changes in accounting policies are generally applied retrospectively to past transactions and other past events as well as the current period.

Deferred tax related to assets and liabilities arising from a single transaction-Amendments to Ind AS 12, Income taxes The amendment requires entities to recognise deferred tax on transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences. They will typically apply to transactions such as leases of lessees and decommissioning obligations and will require the recognition of additional deferred tax assets and liabilities.

The amendment should be applied to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, entities should recognise deferred tax assets (to the extent that it is probable that they can be utilised) and deferred tax liabilities at the beginning of the earliest comparative period for all deductible and taxable temporary differences associated with:

- right-of-use assets and lease liabilities, and
- decommissioning, restoration and similar liabilities, and the corresponding amounts recognised as part of the cost of the related assets.

The cumulative effect of recognising these adjustments is recognised in retained earnings, or another component of equity, as appropriate.

Property, plant and equipment

# Note:

- (a) During the previous year, the Company had re-dassified Leasehold land amounting to Rs. 23.87 millions to Right of Use assets (refer note 5). (b) During the previous year, the management of the Company made an assessment off and accounted for an impairment loss to the extent of Rs. (c)
- During the previous year, the management of the Company made an assessment off and accounted for an impairment loss to the extent of Rs. 629.05 millions against the carrying amount of its Plant and Equipments and Electrical Installations, since the recoverable amount of these Cash Generating Units ('CGU') was assessed to be lower than the carrying amount of the assets (refer note 28).
  - The recoverable amount was determined based on fair value less cost of disposal of the assets. The Company was considered as a single CGU. The fair value of the Property, Plant and Equipment was determined using level 3 basis of fair value measurement using the cost approach. Cost approach is a valuation technique that reflects the amount that would be required currently to replace the service capacity of an asset (often referred to as current replacement cost). (C)

## 14.1 Rights, preference and restrictions attached to the equity shares

The Company has a single class of equity shares having a par value of Rs. 10 each. Accordingly, all equity shares rank equally with regard to dividends and share in the Company's residual assets. The equity shares are entitled to receive dividend as declared from time to time. On winding up of the Company, the holders of the equity shares will be entitled to receive the residual assets of the Company, remaining after distribution of all preferential amounts in proportion to the number of equity shares held.

## 14.2 Reconciliation of equity shares outstanding at the beginning and at the end of the year:

#### 14.5 Details of terms of securities convertible into equity shares

During the previous year, the Company issued 110,000 Zero Coupon Optionally Convertible Debentures ('ZOCD') of face value of Rs. 1,000 each to BF Industrial Solutions Limited on 28 June 2021. On 7 September 2021, additional 7,50,000 Zero Coupon Optionally Convertible Debentures (ZOCD) of face value of Rs. 1,000 each were allotted to BF Industrial Solutions Limited on private placement basis.

The details of terms of securities of the abovementioned debentures are as follows:

- (a) ZOCDs are unsecured and ranks pari passu with other unsecured creditors without any preference or priority over other.
- (b) The debenture holder shall have a right to conversion or redemption at fair value at any time after the date of allotment.
- (c) The debenture holders shall be entitled to transfer these ZOCDs in accordance with the provisions of Articles of Association of the Company and provisions of the Companies Act, 2013.

The debenture holder exercised their rights to conversion during the previous year. Accordingly, 86,000,000 equity shares of the Company were allotted to the debenture holder in exchange of the ZOCDs.

- (a) During the previous financial year, the Company had written back certain dues payable to secured loans, unsecured loans, employee liabilities other than those settled as per NCLT order and operational creditors, which are no longer payable in accordance with the terms of the approved resolution plan.
- (b) The management of the Company made an assessment of and accounted for an impairment loss to the extent of Rs. 629.05 millions against the carrying amount of its Plant and Equipments and Electrical Installations, since the recoverable amount of these Cash Generating Units was assessed to be lower than the carrying amount of the assets (refer note 3).
- (c) Refer note 45 for additional details.

## (D) Deferred tax

Ind AS 12 - Accounting for taxes on income, states that where an enterprise has unused tax losses and unused tax credits, deferred tax assets should be recognised only to the extent it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised. Accordingly, the Company has not recognised deferred tax asset on unused tax losses and unused tax credits since it is not probable that future taxable profits will be available against which the unused tax losses and credits will be utilised.

## 33 Segment information

## **Reportable segments**

The Board of Directors have been identified as the Chief Operating Decision-Maker who examine the Company's performance both from a product and geographic perspective. The Chief Operating Decision Maker has identified only one reportable segment of "Forging and Fitting" comprising of forgings and machined components for different sectors/industries. Hence the revenue, expenses, results, assets and liabilities disclosed in the financial statements of the Company are allocable to one segment.

## 37 Corporate Social Responsibility ('CSR')

As per provisions of section 135 of the Act, the Company is not required to spend any amount towards Corporate Social Responsibility (31 March 2022: Nil).

#### 38 Provisions

| Particulars                              | 31 March 2023 | 31 March 2022 |
|------------------------------------------|---------------|---------------|
| Onerous contracts                        |               |               |
| Balance at the beginning of the year     | 20.63         | -             |
| Add: Provision made during the year      | 1.17          | 34.34         |
| Less: Provision reversed during the year | (13.41)       | (13.71)       |
| Balance at the end of the year           | 8.39          | 20.63         |

The erstwhile management of the Company had entered into contracts with various customers, which have been classified as Onerous on account of cost overruns and delays in timely execution. In accordance with Ind AS 37 - Provisions, Contingent liabilities and Contingent Assets, a provision for expected losses on such onerous contracts has been recognised to the extent of present obligation under the contract.

## 40 Details of employee benefits as required by the IND AS 19 Employee benefits :

## (A) Defined Contribution Plan

The Company makes provident fund contributions to defined contributions plans for qualifying employees. Under the scheme, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The Company recognised Rs. 3.49 million (31 March 2022: Rs. 2.92 million) for Provident Fund contribution in the Statement of Profit and Loss. The contributions payable to these plans by the Company are at rates specified in the rules of the scheme.

## (B) Defined Benefit Plan

Defined benefit plans comprises of Post-employment benefits plan mainly gratuity and other long term employee benefits mainly comprising of compensated absences. These are measured at each Balance Sheet date based on actuarial valuation carried out by an independent actuary using projected unit credit method. The breakup is as follows:

| Particulars          | 31 March 2023 | 31 March 2022 |
|----------------------|---------------|---------------|
| Non-current          | 3.07          | 0.24          |
| Current              | 0.26          | 0.01          |
| Compensated absences | 3.33          | 0.25          |
| Non-current          | 7.41          | 7.07          |
| Current              | -             | -             |
| Gratuity             | 7.41          | 7.07          |

A) The defined benefit plan comprise of gratuity plan under which an employee, who has rendered at least five years of continuous, service, to receive fifteen by twenty-six days salary for each year of completed service at the time of retirement/exit. The following tables summarise the components of net benefit expense recognised in the Statement of Profit and Loss, the funded status and amounts recognised in Balance Sheet for the plan:

|    |                                                                                    | 31 March 2023 | 31 March 2022 |

## 41 Financial Risk Management

The Company's principal financial liabilities comprises of loans, borrowings and trade payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include trade and other receivables, cash and bank balances that is derived directly from its operations.

The Company is exposed to market risks, credit risks and liquidity risks. The Company's management oversees the management of these risks. The management of the Company ensures that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's risk objectives. The Board of Directors review and agree policies for managing each of these risks, which are summarised below.

#### (A) Market risks

Market risk is the risk that the fair value of future cash flows of a financial instruments will fluctuate because of changes in market prices. Market risk comprises of three types of risk: interest rate risk, currency risk and other price risk, such as commodity risk. Financial instruments affected by market risks include loans and borrowings, deposits, investments in mutual funds and trade receivables.

#### (i) Interest rate risks

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

## (ii) Foreign currency risks

Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's export revenue and Company's net investment in foreign subsidiaries. The Company does not hedge its foreign currency exposures.

The Company's management frequently monitors the trade receivables in foreign currency on a regular basis. The credit period extended to the foreign customers is restricted to not

more than 180 days, thus ensuring that the exchange rate fluctuations does not materially affect the cash inflows in functional currency (INR).

The Company's exposure to the foreign currency risk is as follows:

| Particulars                        | Currency | 31 March 2023              |               | 31 March 2022              |                  |
|------------------------------------|----------|----------------------------|---------------|----------------------------|------------------|
|                                    |          | Amount in foreign currency | Amount in INR | Amount in foreign currency | Amount<br>in INR |
| Financial assets                   |          |                            |               |                            |                  |
| Foreign currency trade receivables | EUR      | 0.11                       | 9.51          | 0.09                       | 7.95             |
|                                    | USD      | 0.26                       | 21.47         | 0.17                       | 12.91            |

## Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD and EUR exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities. The Company's exposure to foreign currency changes for all other currencies is not material.

| Particulars                            | Currency | March 31, 2023   |                   | March 31, 2022    |                   |
|----------------------------------------|----------|------------------|-------------------|-------------------|-------------------|
|                                        |          | Impact on profit |                   | Impact on profit  |                   |
|                                        |          | Increase by 5%   | Decrease<br>by 5% | Increase<br>by 5% | Decrease<br>by 5% |
| Net exposure to foreign currency risks | EUR      | (0.48)           | 0.48              | (0.40)            | 0.40              |
|                                        | USD      | (1.07)           | 1.07              | (0.65)            | 0.65              |

#### Other price risks

The Company has a policy of investing its surplus funds in mutual funds, interest bearing term deposits and other highly marketable debt investments . The Company is exposed to price risk for investments that are classified as fair value through profit and loss. To manage its price risk, the Company diversifies its portfolio. Diversification and investment in the portfolio is done in accordance with Company's investment policy approved by the Board of Directors.

## (B) Credit risks

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, investment in mutual funds, other receivables and deposits, foreign exchange transactions and other financial instruments.

## (i) Trade receivables

Customer credit risk is managed by the Company's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored and reconciled. At 31 March 2023, receivable from Company's top 5 customers accounted for approximately 68.71 % (31 March 2022 : 48.27 %) of all the receivable outstanding. An impairment analysis is performed at each reporting date on an individual basis for major customers. The calculation is based on historical data and subsequent expectation of receipts. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and industries and operate in largely independent markets.

## (ii) Other receivables, deposits with banks, mutual funds and loans granted

Credit risk from balances with banks, financial institutions and mutual funds is managed in accordance with the Company's approved investment policy. Investments of surplus funds are made only with reputed banks and financial institutions were the counterparty risk is minimum.

The Company's maximum exposure to credit risk for the components of the Balance Sheet at 31 March 2023 and 31 March 2022 is the carrying amounts as illustrated in the respective notes.

## (C) Liquidity risks

Liquidity risk is the risk that the Company is unable to meet its existing or future obligations as they fall due, due to insufficient availability of cash or cash equivalents. The Company's approach to managing liquidity is to ensure, sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damages to Company's reputation.

The Company maintained a cautious liquidity strategy, with a positive cash balance throughout the year ended 31 March 2023 and 31 March 2022. Cash flow from operating activities provides the funds to service the financial liabilities on a day-to-day basis.

The Company regularly monitors the rolling forecasts to ensure it has sufficient cash on an ongoing basis to meet operational needs. Any short term surplus cash generated, over and above the amount required for working capital management and other operational requirements, is retained as cash and cash equivalents (to the extent required) and any excess is invested in liquid mutual funds, interest bearing term deposits and other highly marketable debt investments with appropriate maturities to optimise the cash returns on investments while ensuring sufficient liquidity to meet its liabilities.

The table below summarises the maturity profile of the Company's financial liabilities

| Particulars                 | Less than<br>1 year | 1 - 5 Years | More than<br>5 years | Total  |
|-----------------------------|---------------------|-------------|----------------------|--------|
| 31 March 2023               |                     |             |                      |        |
| Trade payables              | 219.45              | -           | -                    | 219.45 |
| Other financial liabilities | -                   | -           | -                    | -      |
| Total                       | 219.45              | -           | -                    | 219.45 |
| 31 March 2022               |                     |             |                      |        |

| Total                       | 222.76              | -           | -                    | 222.76 |

## 42 Capital management

For the purpose of the Company's capital management, capital includes issued equity share capital, securities premium and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

The Company has adopted the objectives, policies or processes of Bharat Forge Limited (the ultimate holding company) for managing capital during the years ended 31 March 2023.

#### (All amounts are in Indian Rupees millions, unless otherwise stated)

#### 43 Fair value measurement

## A Financial instruments by category

The financial instruments are measured at Amortised cost of Fair Value through Profit and Loss ("FVTPL")

| S.N | . Particulars                                      | 31 Marc | h 2023         | 31 March | n 2022         |

#### i) Fair value hierarchy

This section explains the judgments and estimates made in determining the fair values of the financial instruments that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

| Financial assets and liabilities measured at fair value - recurring fair value measurements | Level 1 | Level 2 | Level 3 | Total |
|---------------------------------------------------------------------------------------------|---------|---------|---------|-------|
| Total Financial assets                                                                      |         |         |         |       |
| 31 March 2023                                                                               | -       | 0.82    | -       | 0.82  |
| 31 March 2022                                                                               | -       | 10.76   | -       | 10.76 |

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

#### (All amounts are in Indian Rupees millions, unless otherwise stated)

#### ii) Fair value of financial assets and liabilities measured at amortised cost

The carrying amounts of trade receivables, cash and cash equivalents, trade payables, short term borrowings, and all other financial liabilities are considered to be the same as their fair values, due to their short-term nature.

### iii) Valuation technique used to determine fair value

Fair value of market linked investments is determined using Net Asset Value ('NAV') report issued by mutual fund house.

## 44 Additional regulatory information required by Schedule III of the Act

### (a) Title deeds of immovable property not held in name of the Company

The title deeds of all immovable properties (other than those properties where the Company is the lessee and the lease agreements are executed in favour of the lessee) are held in the name of the Company.

## (b) Valuation of Property, Plant and Equipment

The Company has not revalued its Property, Plant and Equipment during the current or previous financial year. The Company does not hold any investment property.

# (c) Loans or advances granted to promoters, directors, Key Managerial Personnel (KMPs) and the related parties

The Company has not granted any loans or advances in the nature of loans to promoters, directors, KMPs and the related parties either severally or jointly with any other person.

## (d) Details of benami property held

No proceedings have been initiated on or are pending against the Company for holding benami property under the Benami Transactions (Prohibition) Act, 1988 (45 of 1988) and Rules made thereunder.

## (e) Reconciliation of returns or statements submitted with banks or financial institution

The Company has availed borrowings from banks on the basis of security of current assets. The periodical statements of current assets filed by the Company with such banks are in agreement with books of accounts of the Company.

#### (f) Wilful defaulter

The Company has not been declared wilful defaulter by any bank or financial institution or Government or any Government authority.

#### (g) Relationship with struck off Companies

The transactions with Companies struck off under Companies Act, 2013 or Companies Act, 1956 are as follows:

| S.N. | Nature of<br>transactions<br>with struck off<br>Company | Name of struck off Company                                                 | Balance<br>outstanding<br>as at<br>31 March 2023 | Balance<br>outstanding<br>as at<br>31 March 2022 |
|------|---------------------------------------------------------|----------------------------------------------------------------------------|--------------------------------------------------|--------------------------------------------------|
| A    | Trade receivables                                       | Ultra Engineers Private Limited                                            | -                                                | 1,463,200                                        |

|      |                                                         | Unique Enterprises Private Limited                     | -                                                | 56,640                                           |
|      |                                                         | Unity Packers Private Limited                          | -                                                | 45,892                                           |
|      |                                                         | Vijay Hydrotech Private Limited                        | -                                                | 6,999                                            |
|      |                                                         | Yash Hydraulic Equipment Private Limited               | -                                                | 6,372                                            |

The Company does not have any relationship with the above mentioned parties.

## (h) Registration of charges or satisfaction with Registrar of Companies

The Company does not have any creation or satisfaction of charges to be registered with the Registrar of Companies during the current financial year. However, the Company has registered all creation and satisfaction of charges with the Registrar of Companies during previous financial year.

## (i) Compliance with number of layers of companies

The Company has complied with the number of layers of subsidiary prescribed under the Act.

#### (j) Accounting Ratios

| S.N. | Ratio                            | 31 March 2023 | 31 March 2022 | % Change in ratio | Reasons          |
|------|----------------------------------|---------------|---------------|-------------------|------------------|
| (a)  | Current ratio                    | 2.14          | 1.41          | 52%               | Refer Note (i)   |
| (b)  | Debt-equity ratio                | -             | -             | -                 | NA**             |
| (c)  | Debt service coverage ratio      | -             | -             | -                 | NA**             |
| (d)  | Return on equity ratio           | 0.23          | 4.24          | -95%              | Refer Note (ii)  |
| (e)  | Inventory turnover ratio         | 2.82          | 2.24          | 26%               | Refer Note (iii) |
| (f)  | Trade receivables turnover ratio | 4.17          | 4.58          | -9%               | NA*              |
| (g)  | Trade payables turnover ratio    | 2.08          | 1.63          | 28%               | Refer Note (iii) |
| (h)  | Net capital turnover ratio       | 4.71          | (0.92)        | -612%             | Refer Note (iv)  |
| (i)  | Net profit ratio                 | 0.16          | 0.38          | -57%              | Refer Note (ii)  |
| (j)  | Return on capital employed ratio | 0.21          | 0.40          | -48%              | Refer Note (ii)  |
| (k)  | Return on investment ratio       | 0.21          | 0.40          | -49%              | Refer Note (ii)  |

NA\* - variance in ratio is not more than 25%, accordingly no explanation for variance is detailed out.

NA\*\* - the Company does not have any debts accordingly the ratios are not applicale to the Company

### **Accounting Ratios formulas:**

- (a) Current Ratio = Current Assets / Current liabilities
- (b) Debt-Equity Ratio = Total Debt / Total equity
- (c) Debt Service Coverage Ratio = Earnings available for debt service / Debt service
- (d) Return on Equity Ratio = Profit for the year / Average equity
- (e) Inventory Turnover Ratio = Cost of Goods Sold / Average Inventory
- (f) Trade receivables turnover ratio = Revenue from operations / Average Trade receivables
- (g) Trade payables turnover ratio = Purchases / Average Trade payables
- (h) Net capital turnover ratio = Revenue from operations / Average Working Capital (Current assets current liabilities)
- (i) Net profit ratio = Profit for the year / Revenue from operations
- (j) Return on Capital employed = EBIT / (Tangible networth +Total debt)
- (k) Return on investment = Profit for the year / (Debt + Total equity)

## **Accounting Ratios explanations:**

- (i) During the year, the Company has generated cash surplus from its operations which is lying in its bank account. This has significantly improved the current ratio of the Company.
- (ii) In the previous financial year, the overall net profit of the Company increased significantly on account of exceptional items arising from write back of borrowings from banks, creditors and other erstwhile related party balances. Accordingly, the accounting ratios including return on equity ratio, net profit ratio, return on capital employed ratio and return on investment ratio of previous financial years were higher as compared to current financial year.
- (iii) The Trade payable turnover ratio and inventory turnover ratio has increased significantly on account of overall improvement in the operating activities of the Company.
- (iv) The working capital of the Company as at 31 March 2021 was negative, since the Company was undergoing Insolvency Resolution Process under Insolvency and Bankruptcy Code, 2016 in that year. This resulted in the average working capital of the Company as at 31 March 2022 to be lower as compared to the current financial year. Accordingly, the net capital turnover ratio of the Company has changed significantly.

#### (k) Compliance with approved scheme(s) of arrangements

The Company has not entered into any scheme of arrangement which has an accounting impact on current year or previous year.

## (I) Utilisation of borrowed funds and share premium

The Company has not advanced or granted any loan or invested funds to any other person(s) or entity(is), including foreign entities (Intermediaries) with the understanding that the Intermediary shall:

- a. directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company (Ultimate Beneficiaries) or
- b. provide any guarantee, security or the like to or on behalf of the ultimate beneficiaries

The Company has not received any fund from any person(s) or entity(is), including foreign entities (Funding Party) with the understanding (whether recorded in writing or otherwise) that the Company shall:

a. directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (Ultimate Beneficiaries) or

b. provide any guarantee, security or the like on behalf of the ultimate beneficiaries

#### (m) Undisclosed income

There is no income surrendered or disclosed as income, which is not recorded in books of accounts during the current or previous year in the tax assessments under the Income Tax Act, 1961.

## (n) Details of crypto currency or virtual currency

The Company has not traded or invested in crypto currency or virtual currency during the current or previous year.

# 45 Compliance with Order of National Company Law Tribunal (NCLT) issued during the previous financial year

One of the erstwhile financial creditor of the Company, Bank of Baroda had filed an application under the Insolvency and Bankruptcy Code, 2016 (hereinafter referred as IBC, 2016) seeking appointment of Resolution Professional and initiation of the Corporate Insolvency Resolution Process (hereinafter referred as CIRP process) against the Company, which was admitted by the National Company Law Tribunal (hereinafter referred as NCLT) on 30 August 2019.

On 20 September 2019, the honourable National Company Law Appeallate Tribunal (hereinafter referred as NCLAT) ordered a stay the CIRP process on the application of the erstwhile management of the Company. The NCLAT vacated the stay order with effect from 4 January 2020, since the erstwhile management failed to act upon the One Time Settlement proposed in its appeal.

Thereafter, the Resolution Professional through the Monitoring Committee (appointed in accordance with the provisions of IBC, 2016), superseded the erstwhile management of the Company with immediate effect and commenced the first meeting of Committee of Creditors (hereinafter referred as COC) in accordance with the provisions of the IBC, 2016. The Resolution Professional gathered the claims made by the financial and operational creditors and invited Expression of Interest for submitting a Resolution plan in accordance with the provisions of IBC, 2016. The Resolution Professional appraised in the 10th meeting of the COC that four resolution plans were received and put them before the COC for its evaluation and examination.

In the 13th meeting of the COC, the resolution plan submitted by Bharat Forge Limited was approved and submitted to the NCLT for its approval. The NCLT pronounced its approval on 26 April 2021 for the resolution.

Accordingly, the resolution plan including the amended plans from time to time submitted by Bharat Forge Limited was implemented through an intermediary investment company 'BF Industrial Solutions Limited'. The impact of the resolution plan on the outstanding liabilities including share capital of the Company is detailed out below.

## Note A: Equity share capital

Pursuant to the above mentioned resolution plan, the monitoring committee of the Company had resolved on 18 June 2021 to issue 50,000 equity shares of face value of Rs. 10 each to BF Industrial Solutions Limited and its nominees at par.

Subsequently, the issued, subscribed and paid up equity share capital of the Company was reduced by cancelling and extinguishing 1,48,92,267 equity shares (except 50,000 equity shares issued to BF Industrial Solutions Limited) of face value of Rs. 10 each outstanding as on 18 June 2021 without payment of any consideration to the shareholders.

## Note B: Long term borrowings, Short term borrowings and interest occurred thereon

#### (i) Borrowings from banks

The resolution plan approved by the COC and NCLT provided for a One time settlement of all its term loans, working capital facilities and interest accrued thereon (together referred to as Claims) upon payment of Rs. 750.00 million to the banks in full settlement of its claims and balance amount of Rs. 804.57 million claims stood to be waived off.

Accordingly, Bharat Forge Limited subscribed to the zero coupon optionally convertible debentures of the intermediary investment Company "BF Industrial Solutions Limited" which simultaneously invested in the zero coupon optionally convertible debentures of the Company and a payment of Rs. 750 millions was made by the BF Industrial Solutions Limited directly to the bankers of the Company. The balance amount of loans was waived off and hence were written back in the books of the Company.

## (ii) Loans from erstwhile related parties and inter-corporate deposit

The approved resolution plan provided for a complete waiver of the unsecured loans from related parties and inter-corporate deposits of the Company. Accordingly, the balance amount of loans from related parties and inter-corporate deposits outstanding in the books of the Company was written back.

## **Note C: Other payables**

The resolution professional had issued a public notice for consolidating the claims of its creditors (other than banks), employees and statutory dues in accordance with the provisions of IBC, 2016. The claims consolidated by the resolution professional were settled in the following manner:

### (i) Employee related liabilities

The approved resolution plan provided for a full settlement of outstanding dues towards employees of the Company in accordance with the provision of IBC, 2016. These claims were fully settled by the Company during the previous year.

# (ii) Statutory dues (excluding provident fund, professional tax and employee state insurance)

The approved resolution plan provided for a full waiver of statutory dues including disputed statutory dues. Accordingly, the disputes pending at various forums against the Company were deemed to be withdrawn and liabilities extinguished.

## (iii) Other payables

The approved resolution plan provided for a proportionate settlement of consolidated claims of its creditors. Accordingly, proportionate amounts were paid to the creditors and the balance outstanding (if any) were deemed to be non payable and written back in the books of the Company.

## 46 Prior period comparatives

Prior year comparatives have been regrouped/ reclassified where necessary, to confirm with current year's presentation.

### **Independent Auditor's Report**

#### To the Members of BF Infrastructure Limited

## **Report on the Audit of the Financial Statements**

### **Opinion**

We have audited the accompanying financial statements of **BF Infrastructure Limited** ("the Company") which comprises the Balance Sheet as at 31<sup>st</sup> March, 2023, the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its loss including other comprehensive income, changes in equity and its cash flows for the year ended on that date.

#### **Basis for Opinion**

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules made thereunder, and We have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion the financial statements.

## Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including Annexures to Board's Report, but does not include the financial statements and our auditor's report thereon. The Board's Report including Annexures to Board's Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Board's Report including Annexures to Board's Report if we conclude that there is a material misstatement therein, We are required to communicate the matter to those charged with governance and take such actions as are required under the provisions of the Companies Act, 2013.

## Responsibility of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility

also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

## **Auditor's Responsibilities for Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, We are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that We identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

## **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "**Annexure A**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company, so far as appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
  - d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - e) On the basis of written representations received from the directors as on 31<sup>st</sup> March, 2023, taken on record by the Board of Directors, none of the directors is disqualified as on 31<sup>st</sup> March, 2023, from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "**Annexure B**".
  - g) The Company has not paid any managerial remuneration during the financial year covered by this report to its directors. Accordingly, reporting requirements under section 197(16) of the Act do not apply to the Company.
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements Refer Note 35 to the financial statements;
    - ii. The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts. The Company did not have any long-term derivative contracts.
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on

- behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
- c. Based on such audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) as provided under (a) and (b) above, contain any material misstatement.
- v. The Company has neither declared nor paid any dividend during the year.

# "ANNEXURE A" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF BF INFRASTRUCTURE LIMITED FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2023.

In terms of the information and explanations sought by us and given by the Company and the books and records examined by us in the normal course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company has maintained proper records showing full particulars including quantitative details and situation of Property, Plant and Equipment and relevant details of right-of-use assets.
  - (B) The Company has maintained proper records showing full particulars of intangible assets.
  - (b) As explained to us, the Property, Plant and Equipment and relevant details of right-of-use assets have been physically verified by the Management at reasonable intervals, during the financial year. According to the information and explanations given to us, no discrepancies were noticed on physical verification of the Property, Plant and Equipment and relevant details of right-of-use assets.
  - (c) The Company does not own any immovable properties.
  - (d) The Company has not revalued any of its Property, Plant and Equipment (including right-of-use assets) and intangible assets during the year.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at 31<sup>st</sup> March, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) The inventory comprising raw material, work in progress and finished goods was physically verified by the management during the year. In our opinion, the frequency of verification by the management is reasonable and the coverage and procedure for such verification is appropriate. Discrepancies of 10% or more in aggregate for each class of inventory were not noticed on such physical verification.
  - (b) According to the information and explanations given to us, the Company has not been sanctioned working capital limits in excess of ₹ 5 crore, in aggregate, at any point of time during the year, from banks or financial institutions on the basis of security of current assets and hence reporting under clause 3(ii)(b) of the Order is not applicable.
- (iii) (a) In respect of the loans or advances in the nature of loans, secured or unsecured, granted by the Company during the year to companies, firms, limited liability partnerships or any other parties, we report as under.

(In ₹ Thousands)

(b) The terms and conditions of the grant of the above loans were not found prima facie prejudicial to the Company's interest.

- (c) In respect of the loans or advances in the nature of loans which are repayable on demand, no schedules of repayment of the principal and payment of interest have been stipulated.
- (d) There were no amounts overdue in respect of the principal and payment of interest.
- (e) No loan or advance in the nature of loan granted and which has fallen due during the year has been renewed or extended or fresh loans have been granted to settle the overdues of existing loans given to the same parties.
- (f) Details of loans granted which are repayable on demand or without specifying any terms of repayment are as under.

- (iv) In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of sections 185 and 186 of the Companies Act, 2013 in respect of the loans and investments made. The Company has not given any guarantee or provided security in connection with a loan to any other body corporate or person.
- (v) The Company has not accepted deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules framed, there under. Hence, reporting under clause (v) of the Order is not applicable.
- (vi) Requirement to maintain cost records under sub-section (1) of section 148 of the Companies Act, 2013 does not apply to the Company. Hence, reporting under clause (vi) of the Order is not applicable.
- (vii) (a) According to the records of the Company, the Company was generally found to be regular in depositing undisputed statutory dues including goods and services tax, provident fund, incometax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities. As explained to us by the Management, the provisions of the Employees' State Insurance Act, 1948 do not apply to the Company. According to the information and explanations given to us, no undisputed statutory dues were outstanding as at 31st March, 2023 for a period of more than six months from the date those became payable.
  - (b) According to the records of the Company, there are no statutory dues which have not been deposited on account of any dispute, save and except the following:

<sup>#</sup> Excludes interest and penalty

- (viii) According to the information and explanations given to us, there were no transactions relating to previously unrecorded income that were surrendered or disclosed as income in the tax assessments under the Income Tax Act, 1961 (43 of 1961) during the year. Accordingly, the requirement to report on clause 3(viii) of the Order is not applicable to the Company.
- (ix) (a) In our opinion and according to the information and explanation given to us, the Company has not defaulted in repayment of loans or other borrowings or in the payment of interest, thereon, to any lender.
  - (b) According to the information and explanation given to us, the Company has not been declared as willful defaulter by any bank or financial institution or government or any government authority.
  - (c) According to the information and explanation given to us and on the basis of our examination, The Company has not availed any term loan during the year. Hence, reporting under clause 3(ix) (c) of the Order is not applicable.
  - (d) On an overall examination of the financial statements of the Company, funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.
  - (e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
  - (f) The Company has not raised any loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies. Hence reporting under clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company did not raise any money by way of initial public offer or further public offer (including debt instruments) during the year. Accordingly, reporting under clause 3(x) of the Order is not applicable.
  - (b) The Company has not made any preferential allotment or private placement of shares /fully or partially or optionally convertible debentures during the year under audit and hence, the requirement to report on clause 3(x)(b) of the Order is not applicable to the Company.
- (xi) (a) Based upon the audit procedures performed and the information and explanations given to us by the Management, we report that no fraud by the Company or no fraud on the Company has been noticed or reported during the period.
  - (b) During the year, no report under subsection (12) of section 143 of the Companies Act, 2013 was required to be filed by the auditors in Form ADT-4 as prescribed under rule 13 of the Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) As represented to us by the management, the Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a nidhi Company as per the provisions of the Companies Act, 2013. Accordingly, reporting under clause 3(xii) of the Order is not applicable.
- (xiii) According to the records of the Company and according to the information and explanations given to us, the Company has not entered into any transactions with the related parties in contravention of the provisions of section 177 and 188 of the Companies Act, 2013. The details of the related party transactions have been disclosed in the financial statements as required by the Ind AS.
- (xiv) (a) The Company has an internal audit system commensurate with the size and nature of its business.
  - (b) The internal audit reports of the Company issued till the date of the audit report, for the period under audit have been considered by us.
- (xv) According to the information and explanations given to us, The Company has not entered into any non cash transactions with its directors or persons connected with its directors and hence requirement to report on clause 3(xv) of the Order is not applicable to the Company.

- (xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, the requirement to report on clause 3(xvi)(a) of the Order is not applicable to the Company.
  - (b) According to the information and explanations given to us, the Company is not engaged in any Non Banking Financial or Housing Finance activities. Accordingly, the requirement to report on clause 3(xvi)(b) of the Order is not applicable to the Company
  - (c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India. Accordingly, the requirement to report on clause 3(xvi)(c) of the Order is not applicable to the Company.
  - (d) In our opinion and according to the information and explanations given to us, there is no core investment company as part of the Group. Hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.
- (xvii) The Company has incurred the following amounts of cash losses during the financial year covered by this report and incurred no cash losses in the preceding financial year.

(In ₹ Thousands)

|                      | Current Financial Year<br>₹ | Preceding Financial Year<br>₹ |
|----------------------|-----------------------------|-------------------------------|
| Cash losses incurred | 51,412.73                   | NIL                           |

- (xviii) There has been no resignation by the statutory auditors of the Company during the year.
- (xix) On the basis of the verification of the financial ratios, ageing and expected dates of the realization of financial assets and payment of financial liabilities and other information accompanying financial statements, and information and explanation given to us, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) Provisions of 135 of the Companies Act, 2013 do not apply to the Company. Hence, reporting under clause 3(xx) of the Order is not applicable.

Membership No. 142953 UDIN: 23142953BGYHPC1286

Place : Pune Date : 03-05-2023 "Annexure B" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF BF INFRASTRUCTURE LIMITED FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2023.

We have audited the internal financial controls over financial reporting of **BF Infrastructure Limited** ("the Company") as of 31<sup>st</sup> March, 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

## **Management's Responsibility for Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

## **Auditor's Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that We comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### **Meaning of Internal Financial Controls over Financial Reporting**

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the Financial Statements.

#### Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility

of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **Opinion**

In our opinion, the Company has, in all material respects, internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31<sup>st</sup> March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# Notes forming part of the standalone financial statements for the year ended 31st March, 2023

### 1. Corporate information:

BF Infrastructure Limited is a public limited company incorporated on 5<sup>th</sup> July, 2010. The Company is engaged in the business of scientific, technical and other research and development, particularly in the field of advanced defense, aerospace and other strategic areas and also in the business of Engineering, Procurement and Construction (EPC) contractors and infrastructure projects.

The Company is a wholly owned subsidiary of Bharat Forge Limited.

Operating Cycle of the Company is considered to be of 12 months.

In view of Rule 6 of the Companies (Accounts) Rules, 2014, the Company has decided not to present consolidated financial statements for the year ended 31<sup>st</sup> March 2023, since its Holding Company, Bharat Forge Limited is going to present the consolidated financial statements and the conditions prescribed said rule have been complied with.

These financial statements were authorised for issue in accordance with resolution of the Board of Directors on 3<sup>rd</sup> May, 2023.

### 2 Significant accounting policies:

## 2.1 Basis of accounting and preparation of financial statements:

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013.

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- i Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The financial statements are presented in INR and all values are rounded to the nearest Thousand.

#### 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or
- iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

## 2.3 Foreign currency transactions and translations :

The Company's financial statements are presented in INR, which is also the Company's functional currency. Items included in the financial statements are measured using functional currency.

#### a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

#### b) Exchange differences

Gains/losses arising out of fluctuations in the exchange rates are dealt with in the statement of profit and loss in the period in which they arise. In respect of assets and liabilities, the overall net loss or gain, if any, on conversion at the exchange rates prevailing on the date of balance sheet is charged to revenue.

#### 2.4 Investment in subsidiaries, associats and joint ventures:

The Company has accounted for its investment in subsidiaries, associats and joint ventures at cost, less accumulated impairment. (Refer to note 2.15).

#### 2.5 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets. Involvement of external valuers is decided upon annually by the management. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The management decides, after discussions with the Company's external valuers, which valuation techniques and inputs to use for each case.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

#### 2.6 Revenue from contracts with customers:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

The disclosures of significant accounting judgements, estimates and assumptions relating to revenue from contracts with customers are provided in Note no. 44.

#### a) Sale of Goods:

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer.

The control of the goods manufactured in case of export sales is transferred usually on the date of issue of Bill of Lading while in case of domestic sales, the control is transferred usually on delivery of goods.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company considers the effect of variable consideration.

## b) Sale of Services:

Revenue on time and material contracts are recognized as the related services are performed and control of the services are transferred to the customer and revenue from the end of the last invoicing to there porting date is recognized as unbilled revenue. Revenue from fixed-price, fixed-time frame contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such

uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion.

#### c) Contract assets:

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

#### d) Trade receivables:

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in note no. 2.16.

### e) Contract liabilities:

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

#### f) Interest income:

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instruments (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

## g) Profit / Loss on sale of investments:

Profit / Loss on sale of investments is recognised when all the significant risk and rewards of ownership in investment is transferred.

## 2.7 Taxes:

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognized for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realized.

#### Indirect taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of indirect taxes paid, except:

- i When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

## 2.8 Property, plant and equipment:

Property, plant and equipment, capital work in progress and investment property are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including GST for which credit is not available. All the significant costs relating to the acquisition and installation of property, plant and equipment or investment property are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the profit or loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Assets under improvement to leased premises are fully depreciated over the lease period of the asset.

The Management's estimate of the useful lives of various Property, Plant and Equipment which is in line with the provision of Schedule II to the Companies Act, 2013 is given below.

| Type of Asset Estima |                                        | Estimated useful life |
|----------------------|----------------------------------------|-----------------------|
| i)                   | Plant and Machinery                    | 15 years              |
| ii)                  | Computer and Data Processing Equipment |                       |
|                      | (a) Servers and networks               | 6 years               |
|                      | (b) Other end user devices             | 3 years               |
| iii)                 | Furnitures and Fixtures                | 10 years              |
| iv)                  | Office Equipment                       | 5 years               |

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

#### 2.9 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

The Management's estimate of the useful lives of various intangible assets, which is in line with the provision of Schedule II to the Companies Act, 2013 is given below.

| Type of Asset |                    | Estimated useful life |
|---------------|--------------------|-----------------------|
| i)            | Software           | 3 years               |
| ii)           | Customer Contracts | 18 months approx.     |
| ii)           | Technical Knowhow  | 34 months approx.     |

#### 2.10 Leases:

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

## Company as a lessee

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

## i) Right of use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the Underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

| Type of Asset | Estimated useful life                            |
|---------------|--------------------------------------------------|
| Building      | amortised over the period of lease deed executed |

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

#### ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liability and Right-of-use asset have been separately presented in the balance sheet and lease payments have been classified as financing cash flows.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

#### Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

#### 2.11 Inventories:

a) Raw Materials:

Raw materials and components, stores and spares and loose tools are valued at lower of cost and net realizable value. The costs are determined using the weighted average method.

b) Work-in-progress and Finished Goods:

Work-in-progress and finished goods are valued at the lower of cost and net realisable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. The costs are determined using the weighted average method.

## 2.12 Borrowing costs:

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

## 2.13 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and

its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or Group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31<sup>st</sup> March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

## 2.14 Provisions, Contingent Liabilities:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under

an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

## 2.15 Retirement and other employee benefits:

#### a) Gratuity:

The Company operates a defined benefits plan for its employees. Payment for present liability of future payment of gratuity is being made to approved gratuity funds, which fully cover the same under cash accumulation policy of the Life Insurance Corporation of India. The cost of providing benefits under these plans is determined on the basis of actuarial valuation at each year end. Actuarial valuation is carried out using the project unit credit method.

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- i The date of the plan amendment or curtailment, and
- ii The date that the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- i Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- ii Net interest expense or income

## b) Privilege leave benefits:

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end.

Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The Company presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where the Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

#### 2.16 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial Asset:

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

## b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)

#### c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

#### d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to

P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

#### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

## h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- iv Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected under the head 'other expenses' in the P&L.

The balance sheet presentation for various financial instruments is described below:

i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not

reduce impairment allowance from the gross carrying amount.

ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

### a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

### b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the profit or loss.

#### ii Loans and borrowings

This is the category most relevant to the Company. After initial recognition, interestbearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

## iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher

of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

# c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

### D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                 |
|----------------------------|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Amortised Cost             | FVTPL                     | Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.     |
| FVTPL                      | Amortised Cost            | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount. |

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                                                                                                                                             |
|----------------------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised Cost             | FVTOCI                    | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                                       |
| FVTOCI                     | Amortised Cost            | Fair value at reclassification date becomes its<br>new amortised cost carrying amount. However,<br>cumulative gain or loss in OCI is adjusted against<br>fair value. Consequently, the asset is measured as if<br>it had always been measured at amortised cost. |
| FVTPL                      | FVTOCI                    | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                            |
| FVTOCI                     | FVTPL                     | Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date.                                                                                                          |

# **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

### 2.17 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

### 2.18 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

### 2.19 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

### 2.20 Earnings per share:

Basic earnings per share is computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

### 2.21 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

### 2.22 Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

# Goodwill and CGU's impairment testing:

The Company has identified its Defense Business as the Cash Generating Unit (CGU), to which goodwill has been allocated. The goodwill generated through business combination has been entirely allocated to CGU 'Defense Business'. The carrying amount of goodwill as at March 31, 2023 is Rs 51,897.03/-(March 31, 2022 : Rs 51,897.03/-) net of impairment, if any.

The Company tests whether goodwill has suffered any impairment on an annual basis as at 31st March. The recoverable amount of a CGU is determined based on value-in-use calculations which require the use of assumptions. The Company considers the discounted cash flows, among other factors, when reviewing for indicators of impairment. The calculations use pre-tax cash flow projections based on financial budgets/forecasts approved by the management.

Key assumption used are mentioned below.

|                                                                      | 31st March, 2023 | 31 <sup>st</sup> March, 2023 |
|----------------------------------------------------------------------|------------------|------------------------------|
| Weighted Average Cost of Capital % (WACC) before tax (discount rate) | 24.93%           | 21.55%                       |
| Terminal growth rate                                                 | 5%               | 5%                           |

The management has performed sensitivity analysis around the base assumptions and have concluded that no reasonable changes in key assumptions would cause the recoverable amount of the CGU to be less than the carrying value.

Based on the above assessment, there has been no impairment of goodwill.

1,233.96

5,025.98

4,117.65

(a) During the current year, the Company has made further investment in Ferrovia Transrail Solutions Private Limited of ₹ 2,100 thousands by aquiring 5,100 equity shares of ₹ 10/- each, consequent to which it has become a wholly owned subsidiary of the Company.

The Company determines the cost of its investment in the subsidiary as the sum of the fair value of the previously held equity interest at the date of obtaining control of the subsidiary plus consideration paid for the additional interest (fair value as deemed cost approach). Accordingly, The Company has recognised gain of ₹ 1,968.65 thousand on re-measurement of its previously held equity interest in Ferrovia Transrail Solutions Private Limited in its statements of profit and loss as an exceptional item.

(b) The Company has only one class of shares referred to as equity shares having a par value of ₹ 10/-. Each holder of equity shares is entitled to one vote per share. The company declares and pays dividend in Indian rupees.

In the event of liquidation of the Company, the holders of equity shares will be entitled to receive surplus assets of the Company, remaining after distribution of all preferential amounts. However, no such preferential amounts exist currently. The distribution will be in proportion to the number of equity shares held by the shareholders.

| Gratuity                          |        | 406.96                 | 342.06                 |
| Compensated absences              |        | 41.43                  | 165.04                 |
| Other provisions :                |        |                        |                        |
| Liquidated damages(a)(b)          |        | 2,977.51               | 2,836.85               |
|                                   | TOTAL: | 3,425.90               | 3,343.95               |

(a) In pursuance of Ind AS-37 'Provisions, contingent liabilities and contingent assets', the details of the provisions are as under:

Provision for liquidated damages represents the expected claims not in the nature of variable consideration which the Company may need to pay for non-fulfilment of certain commitments as per the terms of the respective sales contracts. These are determined on a case to case basis considering the dynamics of each contract and the factors relevant to that sale.

| Opening Balance          | 2,836.85 | 4,148.05   |
|--------------------------|----------|------------|
| Arising during the year  | 1,337.14 | 198.00     |
| Utilised during the year | (998.48) | (1,509.20) |
| Provision Written Back   | (198.00) | -          |
| Closing balance          | 2,977.51 | 2,836.85   |

(b) Provision for liquidated damages represents the expected claims not in the nature of variable consideration which the Company may need to pay for non-fulfilment of certain commitments as per the terms of the respective sales contracts. These are determined on a case to case basis considering the dynamics of each contract and the factors relevant to that sale.

- (a) Includes of advance from related parties (Refer note 34).
- (b) The contract liabilities primarily relate to the advance consideration received on contracts entered with customers for which performance obligations are yet to be performed, therefore, revenue will be recognized when the goods are passed on to the customers.
- (c) Company provides warranty to the customers as per the contract. The warranty is accounted for as a separate performance obligation and a portion of the transaction price is allocated. The performance obligation for the warranty service is satisfied based on time elapsed.

- (a) Contingent consideration payable for acquisition of business crystallized during the year and fair value loss on contingent consideration has been recorded an exceptional item.
- (b) The Company determines the cost of its investment in the subsidiary as the sum of the fair value of the previously held equity interest at the date of obtaining control of the subsidiary plus consideration paid for the additional interest (fair value as deemed cost approach). Accordingly, The Company has recognised gain of ₹ 1,968.65 thousands on re-measurement of its previously held equity interest in Ferrovia Transrail Solutions Private Limited in its statements of profit and loss as an exceptional item.

# 32 Disclosure pursuant to Ind AS 19 on "Employee Benefits"

# (a) Defined contribution plans:

The Company makes Provident Fund contributions to defined contribution retirement benefit plans for qualifying employees. Under the schemes, the Company is required to contribute a specified percentage of the payroll costs to the funds. The Company recognized ₹ 959.98 thousands (Previous Year: ₹ 1,062.50 thousands) for the provident fund contributions in the statement of profit and loss. The contributions payable to this plan by the Company are at the rates specified in respective legislations.

# (b) Gratuity plan:

The present value of defined benefit obligation and the related current service costs are measured using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date.

The gratuity benefits are governed by the Payment of Gratuity Act, 1972. Under the Act, every employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age. Every employee who has completed five years or more of service gets a gratuity on departure at 15 day's salary (last drawn) for each completed year of service as per the provisions of the Payment of Gratuity Act, 1972. The Plan is funded as on the valuation date.

Risk exposure and asset liability matching

Provision of a defined benefit scheme poses certain risks, some of which are detailed hereunder, as companies take on uncertain long term obligations to make future benefit payments.

- 1) Liability risks:
- a) Asset-Liability mismatch risk:

Risk which arises if there is a mismatch in the duration of the assets relative to the liabilities. By matching duration with the defined benefit liabilities, the company is successfully able to neutralize valuation swings caused by interest rate movements. Hence companies are encouraged to adopt asset-liability management.

### b) Discount rate risk:

Variations in the discount rate used to compute the present value of the liabilities may seem small, but in practise can have a significant impact on the defined benefit liabilities.

# c) Future salary escalation and inflation risk:

Since price inflation and salary growth are linked economically, they are combined for disclosure purposes. Rising salaries will often result in higher future defined benefit payments resulting in a higher present value of liabilities especially unexpected salary increases provided at management's discretion may lead to uncertainties in estimating this increasing risk.

### 2) Asset risks:

All plan assets are maintained in a trust fund managed by a public sector insurer viz; LIC of India. LIC has a sovereign guarantee and has been providing consistent and competitive returns over the years.

The company has opted for a traditional fund wherein all assets are invested primarily in risk averse markets. The company has no control over the management of funds but this option provides a high level of safety for the total corpus. A single account is maintained for both the investment and claim settlement and hence 100% liquidity is ensured. Also interest rate and inflation risk are taken care of.

The following table summarises the components of net benefit expense recognised in the statement of profit and loss and the funded status and amounts recognised in the balance sheet for the gratuity plan.

# The principal assumptions used in determining gratuity for the Company's plan is shown below:

| Increase in withdrawal rate by 100 basis points | 1,685.57                       | 2,438.21                                   |
| Decrease in withdrawal rate by 100 basis points | 1,660.51                       | 2,415.57                                   |

The estimates of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The sensitivity analyses above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

# The followings are the expected contributions to the defined benefit plan in future years to the extent certified by the actuary:

|                                                          |                  | (In ₹ Thousands)             |
|----------------------------------------------------------|------------------|------------------------------|
| Year Ending                                              | 31st March, 2023 | 31 <sup>st</sup> March, 2022 |
| Within the next 12 months (next annual reporting period) | 410.00           | 1,000.00                     |

# (c) Other Long Term Employee Benefits :

The table below gives summary of the Company's obligations for other long term employee benefits in the form of compensated absences.

# 33 Segment Reporting:

The Company's business is divided into two reporting segments which comprises of "Advance Defense Business" and "Others". The Chief operating decision maker monitors the operating results of the business units seperately for the purpose of making decisions about resource allocation and performance assessment based on an analysis of various performance indicators.

The Advance Defenses segment includes the business of scientific, technical and other research and development, particularly in the field of advanced defense, aerospace and other strategic areas. Others primarily includes the business of Engineering, Procurement and Construction (EPC) contractors and infrastructure projects.

|    | TOTAL:                                                          | 910,775.27             | 966,006.24             |

<sup>#</sup> Excludes interest and penalty

- (i) The Company is contesting the demands and the management, including its tax/legal advisors, believe that its position will likely be upheld in the appeallate process. No tax expense has been accrued in the financial statements for the tax demand raised.
- (ii) The Company is contesting the demands and the management, including its tax/legal advisors, believe that its position will likely be upheld in the appeallate process. No tax expense has been accrued in the financial statements for the tax demand raised. The management based on its internal assessment and advice by its legal counsel believes that the likelihood of any outflow in the future is remote accordingly the same has not been accounted in the books.
- (iii) The amount of claim is the Arbitral award passed by the Arbitrator against the Company on 10th May, 2019 in the matter of arbitration proceedings concerning termination of Share Purchase Agreement dated 18th December, 2010 by the Company, directing the Company to pay Rs 77 crores to the Claimant. In the opinion of the directors, the said award is biased and perverse. The Company has filed an appeal against the said Award before the Delhi High Court. Based on the legal advice obtained by the Company, the directors are of the view that the Company stands a good chance to win the appeal and hence no provision has been considered in this financial statements.
- (iv) The Company has received demand notice u/s 28 of Customs Act, 1962. The Company is contesting the demands and the management, including its tax/legal advisors, believe that its position will likely be upheld in the appeallate process. No tax expense has been accrued in the financial statements for the tax demand raised. The management based on its internal assessment and advice by its legal counsel believes that the likelihood of any outflow in the future is remote accordingly the same has not been accounted in the books.
- (v) Management has assessed the conditions associated with the payment of contingent consideration. Since the conditions w.r.t. the revenue and profit milestones has not been met the the Company is not obliged to pay any additional sum on account of this business combination. Management believes that the likelihood of any outflow in the future is remote accordingly the same has not been accounted in the books.

Note: In cases where the amounts have been accrued, it has not been included above.

### 36 Leases:

### Company as lessee:

The Company has a lease contracts for building used in its operations. The Company's obligations under its leases are secured by the lessor's title to the leased assets. Generally, the Company is restricted from assigning and subleasing the leased assets. The Company applies the 'short-term lease' recognition exemptions for this lease.

Dues to Micro and Small Enterprises have been identified by the Company from available information.

# 40 Significant accounting judgements, estimates and assumptions:

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. These estimates are reviewed regularly and any change in estimates are adjusted prospectively.

### a) Revenue recognition

The Company's contracts with customers could include promises to transfer multiple services to a customer. The Company assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables.

Judgement is also required to determine the transaction price for the contract. The transaction price could be either a fixed amount of customer consideration or variable consideration with elements such as volume discounts, service level credits, performance bonuses, price concessions and incentives. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component. Any consideration payable to the customer is adjusted to the transaction price, unless it is a payment for a distinct product or service from the customer. The estimated amount of variable consideration is adjusted in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur and is reassessed at the end of each reporting period. The Company allocates the elements of variable considerations to all the performance obligations of the contract unless there is observable evidence that they pertain to one or more distinct performance obligations.

The Company uses judgement to determine an appropriate standalone selling price for a performance obligation. The Company allocates the transaction price to each performance

obligation on the basis of the relative standalone selling price of each distinct product or service promised in the contract. Where standalone selling price is not observable, the Company uses the expected cost plus margin approach to allocate the transaction price to each distinct performance obligation.

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

Revenue for fixed-price contract is recognised using percentage-of-completion method. The Company uses judgement to estimate the future cost-to-completion of the contracts which is used to determine the degree of completion of the performance obligation.

# b) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer note 41 and 42 for further disclosures.

### c) Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Company.

### d) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

### e) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon acertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availabliity of adquate taxable income within the time permissible as per the taxing legislations.

## f) Provision for inventories

Management reviews the inventory age listing on a periodic basis. This review involves comparison of the carrying value of the aged inventory items with the respective net realizable value. The purpose is to ascertain whether an allowance is required to be made in the financial statements for any obsolete slow-moving items and net realisable value. Management is satisfied that adequate allowance for obsolete and slow-moving inventories has been made in the financial statements.

## g) Litigations

The Company has various ongoing litigations, the outcome of which may have a material effect on the financial position, results of operations or cashflows. The Company's legal team regularly analyses current information about these matters and assesses the requirement for provision for probable losses including estimates of legal expense to resolve such matters. In making the decision regarding the need for loss provision, the management considers the degree of probability of an unfavourable outcome and the ability to make sufficiently reliable estimate of the amount of loss. The filing of a law suit or formal assertion of a claim against the Company or the disclosure of any such suit or assertions, does not automatically indicate that a provision of a loss may be appropriate.

Considering the facts on hand and the current stage of certain ongoing litigations the Company foresees a remote risk of any material claim arising from claims against the Company. The Management has exercised significant judgement in assessing the impact, if any, on the disclosures in respect of litigations in relation to the Company.

Investments in subsidiaries, joint ventures and associates which are carried at cost and hence are not required to be disclosed as per Ind AS 107 "Financial Instruments Disclosures".

For trade receivables and trade payables and other assets and payables maturing within one year from the Balance Sheet date, the carrying amounts approximate the fair value due to the short maturity of these instruments.

# 42 Fair value hierarchy:

There are no financial instruments that are measured subsequent to initial recognition at fair value. Hence, disclosure of the fair value hierarchy of assets and liabilities measured at fair value is not applicable.

# 43 Financial risk management disclosure :

The Company's principal financial liabilities, comprise short term borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include loans, cash and cash equivalents and other bank balances that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a financial risk committee that advises on financial risks and the appropriate financial risk governance framework for the Company. The financial risk committee provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

### A) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

The sensitivity analysis in the following sections relate to the position as at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022.

The analysis exclude the impact of movements in market variables on: the carrying values of gratuity and other post retirement obligations, provisions.

The following assumptions have been made in calculating the sensitivity analysis:

The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022 including the effect of hedge accounting (if any)

### i) Equity price risk

The Company's investment in equity instruments comprise mainly of investments in Subsidiaries, Associates and Joint Ventures which are strategic long term investments. Reports on the equity portfolio are submitted to the Company's management on a regular basis. The Company's Board of Directors reviews and approves all equity investment decisions.

At the reporting date, the exposure to unlisted equity securities at carrying value was ₹ 4,117.65 thousands (Previous Year : ₹ 49 thousands).

### ii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

### iii) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency).

The Company does not hedges its exposure to fluctuations on the translation into INR of its foreign operations.

# Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD and EUR exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives. The Company's exposure to foreign currency changes for all other currencies is not material.

### B) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities and from its financing activities, including deposits with banks and financial institutions, and other financial instruments.

### i) Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company's management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

# C) Liquidity risk

The Company monitors its risk of a shortage of funds using a liquidity planning tool. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, preference shares, finance leases and hire purchase contracts. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments :

# 44 Disclosure pursuant to Ind AS 115 on "Revenue from contracts with customers"

## a) Trade receivables and Contract balances:

The company classifies the right to consideration in exchange for deliverables as either a receivable or as unbilled revenue.

A receivable is a right to consideration that is unconditional upon passage of time. Revenue for time and material contracts are recognized as related service are performed. Revenue for fixed price maintenance contracts is recognized on a straight line basis over the period of the contract. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset for these cases as right to consideration is unconditional upon passage of time.

Revenue recognition for fixed price contracts is based on percentage of completion method. Invoicing to the clients is based on completion of the contract. This would result in the timing of revenue recognition being different from the timing of billing the customers. Unbilled revenue for fixed price development contracts is classified as non financial asset as the contractual right to consideration is dependent on completion of contractual milestones.

Invoicing in excess of earnings are classified as unearned revenue.

Trade receivable and unbilled revenues are presented net of impairment in the Balance Sheet.

During the year ended 31<sup>st</sup> March, 2023 ₹ NIL (Previous Year : ₹ NIL) of unbilled revenue pertaining to fixed price development contracts has been reclassified to Trade receivables upon billing to customers on completion of contracts.

|                                                                                                  | Balance at the beginning of the year Revenue recognised during the year Invoices raised during the year Balance at the end of the year Changes in Contract Liabilities are as under: Balance at the beginning of the year Revenue recognised from unearned revenue and advance from | As at 31st March 2023  Balance at the beginning of the year - Revenue recognised during the year - Invoices raised during the year - Balance at the end of the year -  Changes in Contract Liabilities are as under: Balance at the beginning of the year 6,012.45  Revenue recognised from unearned revenue and advance from |

### d) Performance obligations and remaining performance obligations :

Increased due to invoicing during the year excluding the amounts recognised as revenue during the year and advance

Decreased due to refund of advance received

Balance at the end of the year

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognized as at the end of the reporting period and an explanation as to when the Company expects to recognize these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts where the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date, typically those contracts where invoicing is on time and material basis. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revalidations, adjustment for revenue that has not materialized and adjustments for currency.

2,200.00

6,012.45

(2,200.00) 3,721.95

The aggregate value of performance obligations that are completely or partially unsatisfied as at  $31^{st}$  March, 2023, other than those meeting the exclusion criteria mentioned above, is ₹ Nil (Previous year ₹ 90.50 thousands). Out of this, the Company expects to recognize revenue of ₹ Nil (Previous year ₹ 90.50 thousands) within the next one year and the remaining thereafter. This includes contracts that can be terminated for convenience without a substantive penalty since, based on current assessment, the occurrence of the same is expected to be remote.

# Reconciliation for revenue as per Statement of profit & loss and the contracted price arising on account of various adjustments:

## **Independent Auditor's Report**

#### To the Members of Electroforge Limited

#### **Report on the Audit of the Financial Statements**

#### **Opinion**

We have audited the accompanying financial statements of **Electroforge Limited** ("the Company") which comprises the Balance Sheet as at 31<sup>st</sup> March, 2023, the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of changes in equity and the Statement of cash flows for the period ended 31<sup>st</sup> March, 2023, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its loss including other comprehensive income, the changes in equity and its cash flows for the period ended on that date.

#### **Basis for opinion**

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Information other than the financial statements and auditor's report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including annexures to Board's Report, but does not include the financial statements and our auditor's report thereon. The Board's Report including annexures to Board's Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Board's Report including annexures to Board's Report if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take such actions as are required under the provisions of the Companies Act, 2013.

#### Responsibility of management and those charged with governance for the financial statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities;

selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

#### Auditor's responsibilities for audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
  or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
  is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
  collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

#### **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "**Annexure A**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company, so far as appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss including other comprehensive income, the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
  - d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - e) On the basis of written representations received from the directors as on 31<sup>st</sup> March, 2023, taken on record by the Board of Directors, none of the directors is disqualified as on 31<sup>st</sup> March, 2023, from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "**Annexure B**".
  - g) The Company has not paid any managerial remuneration during the financial year covered by this report. Accordingly, reporting requirements under section 197(16) of the Act do not apply to the Company.
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company does not have any pending litigations which would impact its financial position;
    - ii. The Company did not have any long-term contracts including derivatives contracts for which there were any material foreseeable losses;
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- c. Based on such audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) as provided under (a) and (b) above, contain any material misstatement.
- v. The Company has neither declared nor paid any dividend during the year.

# "ANNEXURE A" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF ELECTROFORGE LIMITED FOR THE PERIOD ENDED 31st MARCH, 2023.

In terms of the information and explanations sought by us and given by the Company and the books and records examined by us in the course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company does not have any Property, Plant and Equipment as on 31st March, 2023. Hence, paragraph 3(i)(a)(A) of the Order is not applicable to the Company.
  - (B) The Company does not have any Intangible Assets as on  $31^{st}$  March, 2023. Hence, paragraph 3(i)(a)(B) of the Order is not applicable to the Company.
  - (b) The Company does not have any Property, Plant and Equipment as on 31<sup>st</sup> March, 2023. Hence, paragraph 3(i)(b) of the Order is not applicable to the Company.
  - (c) The Company does not own any immovable properties.
  - (d) The Company does not have any Property, Plant and Equipment (including right-of-use assets) and intangible assets. Hence, paragraph 3(i)(d) of the Order is not applicable to the Company.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at 31<sup>st</sup> March, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) As explained to us, the Company was not required to hold any inventories during the period covered by this report. Hence, paragraph 3(ii)(a)of the Order is not applicable to the Company.
  - (b) The Company has not been sanctioned working capital limits in excess of ₹ 5 crore, in aggregate, at any point of time during the year, from banks or financial institutions on the basis of security of current assets and hence reporting under clause 3(ii)(b) of the Order is not applicable.
- (iii) The Company has not made any investment, provided guarantee or security, granted any loans or advances in the nature of loan, secured or unsecured to companies, firms, limited liability partnerships or other parties.
- (iv) The Company has neither given any loan to any person or other body corporate nor given any guarantee or provided security in connection with a loan to any other body corporate or person. Similarly, the Company has also not acquired by way of subscription, purchase or otherwise, the securities of any other body corporate.
- (v) The Company has not accepted deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules framed, there under.
- (vi) The requirement to maintain cost records under sub-section (1) of section 148 of the Companies Act, 2013 does not apply to the Company.
- (vii) (a) According to the records of the Company, the Company does not have any undisputed statutory dues including Goods and Services Tax, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities. As explained to us by the Management, the provisions of the Employees' State Insurance Act, 1948 and the Employees' Provident Fund and Miscellaneous Provisions Act 1952 do not apply to the Company. According to the information and explanations given to us, no undisputed amounts payable in respect of income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax and any other statutory dues were outstanding as at 31st March, 2023 for a period of more than six months from the date those became payable.
  - (b) According to the records of the Company, there are no statutory dues which have not been deposited on account of any dispute.
- (viii) As this is the first year after incorporation, there were no transactions relating to previously unrecorded income that have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961. Hence reporting under clause 3(viii) of the Order is not applicable.

- (ix) (a) In our opinion and according to the information and explanation given to us, the Company has not taken any loans or other borrowing. Hence, reporting under clause 3(ix)(a) of the Order is not applicable.
  - (b) According to the information and explanation given to us, the Company has not been declared as willful defaulter by any bank or financial institution or other lender.
  - (c) The Company has not taken any term loan during the year and there are no outstanding term loans at the beginning of the year. Hence, reporting under clause 3(ix)(c) of the Order is not applicable.
  - (d) On an overall examination of the financial statements of the Company, funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.
  - (e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
  - (f) The Company has not raised any loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies. Hence reporting under clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company did not raise any money by way of initial public offer or further public offer (including debt instruments) during the year. Accordingly, paragraph 3(x) (a) of the Order is not applicable.
  - (b) The Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) during the year. Hence reporting under clause 3(x)(b) of the Order is not applicable.
- (xi) (a) Based upon the audit procedures performed and the information and explanations given to us by the Management, we report that no fraud by the Company or no fraud on the Company has been noticed or reported during the period.
  - (b) No report under subsection (12) of section 143 of the Companies Act, 2013 was required to be filed by the auditors in Form ADT-4 as prescribed under rule 13 of the Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) The Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, paragraph 3(xii) of the Order is not applicable.
- (xiii) According to the records of the Company and according to the information and explanations given to us, the Company has not entered into any transactions with the related parties in contravention of the provisions of section 188 of the Companies Act, 2013. The details of related party transactions have been disclosed in the financial statements as required by the applicable accounting standards. Provisions of section 177 of the Act do not apply to the Company.
- (xiv) The provisions of section 138 of the Companies Act, 2013 do not apply to the Company and no internal audit was carried out during the year. Hence, reporting under clause 3(xiv) of the Order is not applicable.
- (xv) ccording to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with them. Accordingly, paragraph 3(xv) of the Order is not applicable.
- (xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.
  - (b) The Company has not conducted any Non-Banking Financial or Housing Finance activities requiring a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.
  - (c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India.

## **Electroforge Limited**

- (d) In our opinion and according to the information and explanations given to us, there is no core investment company as part of the Group. Hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.
- (xvii) The Company has incurred the following amounts of cash losses during the financial year covered by this report.

|                      | Current Financial Year ₹ in Hundreds |
|----------------------|--------------------------------------|
| Cash losses incurred | 903.39                               |

- (xviii) There has been no resignation by the statutory auditors of the Company during the year.
- (xix) On the basis of the verification of the financial ratios, ageing and expected dates of the realization of financial assets and payment of financial liabilities and other information accompanying financial statements, and information and explanation given to us nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) Provisions of 135 of the Companies Act, 2013 do not apply to the Company. Hence, reporting under clause 3(xx) of the Order is not applicable.

# "ANNEXURE B" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF ELECTROFORGE LIMITED FOR THE PERIOD ENDED 31<sup>ST</sup> MARCH, 2023.

We have audited the internal financial controls over financial reporting of **Electroforge Limited** ("the Company") as of  $31^{st}$  March, 2023 in conjunction with our audit of the financial statements of the Company for the period ended on that date.

#### Management's responsibility for internal financial controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

#### **Auditor's responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### Meaning of internal financial controls over financial reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

## **Electroforge Limited**

#### Inherent limitations of internal financial controls over financial reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **Opinion**

In our opinion, the Company has, in all material respects, internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31st March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

## Notes forming part of the financial statements for the period ended 31st March, 2023

## 1 Corporate information:

Electroforge Limited was incorporated on 25<sup>th</sup> July, 2022, as a public limited company under the Companies Act, 2013. The Company is a subsidiary of Kalyani Powertrain Limited.

During the period covered by these financial statements, the Company is engaged in setting up the business of e-mobility including design, development, manufacture, sales and distribution of electric drive units, electric motors, electric vehicles and certain forged components in the e-mobility sector.

These financial statements have been prepared for the period from the date of incorporation, i.e. 25<sup>th</sup> July, 2022 to 31<sup>st</sup> March, 2023. This being the first year after incorporation, previous year's figures are not applicable.

These financial statements were authorised for issue in accordance with resolution of the Board of Directors on 2<sup>nd</sup> May, 2023

## 2 Significant accounting policies:

#### 2.1 Basis of accounting and preparation of financial statements:

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013 (to the extent notified).

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- i Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The financial statements are presented in INR and all values are rounded to the nearest Hundred.

#### 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or
- iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

#### 2.3 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- i Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets, and significant liabilities, such as contingent consideration. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. Valuers are normally rotated every three years.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

#### 2.4 Taxes:

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically

evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognized for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realized.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the guidance note on "Accounting for Credit Available in respect of Minimum Alternative Tax" under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

## Indirect taxs paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of Indirect taxes paid, except:

When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition

of the asset or as part of the expense item, as applicable

ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

## 2.5 Property, plant and equipment:

Property, plant and equipment, capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including GST for which credit is not available. All the significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the profit or loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Assets under improvement to leased premises are fully depreciated over the lease period of the asset.

Losses arising from the retirement of, and gains and losses arising from disposal of property plant and equipment which are carried at cost are recognised in the Statement of Profit and Loss.

An item of property, plant and equipment or any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

## 2.6 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is disposed.

#### 2.7 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or Group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

## 2.8 Provisions, Contingent Liabilities:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

#### 2.9 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial Asset:

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

#### b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)

#### c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

#### d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

#### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

## f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

## g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

#### h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- i Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to

recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument
- ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected under the head 'other expenses' in the P&L.

The balance sheet presentation for various financial instruments is described below:

- i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables.

b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

#### ii Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

## iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

#### c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

#### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

#### D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original Classification | Revised<br>Classification | Accounting Treatment                                                                                                                                                                                                                                 |  |
|-------------------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Amortised Cost          | FVTPL                     | Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.                                                                                                                     |  |
| FVTPL                   | Amortised Cost            | Fair value at reclassification date becomes its ne gross carrying amount. EIR is calculated based of the new gross carrying amount.                                                                                                                  |  |
| Amortised Cost          | FVTOCI                    | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                           |  |
| FVTOCI                  | Amortised Cost            | Fair value at reclassification date becomes its new amortised cost carrying amount. However, cumulative gain or loss in OCI is adjusted against fair value. Consequently, the asset is measured as if it had always been measured at amortised cost. |  |
| FVTPL                   | FVTOCI                    | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                |  |
| FVTOCI                  | FVTPL                     | Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date.                                                                                              |  |

#### **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

## 2.10 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

## 2.11 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

#### 2.12 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

#### 2.13 Earnings per share:

Basic earnings per share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit attributable to the equity holders of the Company as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

#### 2.14 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

#### 2.15 Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

#### (b) Terms/rights attached to equity shares

The Company has only one class of shares referred to as equity shares having a par value of  $\stackrel{?}{\sim}$  10/-. Each holder of equity shares is entitled to one vote per share.

In the event of liquidation of the Company, the holders of equity shares will be entitled to receive surplus assets of the Company, remaining after distribution of all preferential amounts. The distribution will be in proportion to the number of equity shares held by the shareholders.

## 9 Segment reporting

Information reported to the chief operating decision maker (CODM) for the purposes of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided. The Company was engaged in setting up the business of e-mobility including design, development, manufacture, sales and distribution of electric drive units, electric motors, electric vehicles and certain forged components in the e-mobility sector; which in the context of Indian Accounting Standard 108 'Segment Information' represents single reportable business segment. The accounting policies of the reportable segments are the same as the accounting policies disclosed in Note 2. The revenues, total expenses and net profit as per the Statement of Profit and Loss represents the revenue, total expenses and the net profit of the sole reportable segment.

## 12 Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the Company's accounting policies, management has made the following significant judgements, estimates and assumptions which have the most significant effect on the amounts recognised in the financial statements.

#### a) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer note 13 and 14 for further disclosures.

#### b) Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Company.

#### c) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### d) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon ascertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availability of adequate taxable income within the time permissible as per the taxing legislations.

#### e) Current / Non-Current Classification

The Company evaluates funds requirement on the basis of internal budgets and forecasts and believes that on the basis of current scale of operations and cash realisation cycle, it would

be able to generate sufficient funds from operations in order to meet such requirement in the foreseeable future of upto one year.

#### 13 Financial instruments by category

Set out below, is a comparison by class of the carrying amounts and fair value of the Company's financial instruments:

(In ₹ Hundreds)

|     |                             | As at 31st Marcl | As at 31st March, 2023 |  |
|-----|-----------------------------|------------------|------------------------|--|
|     |                             | Carrying value   | Fair value             |  |
| I)  | Financial assets            |                  |                        |  |
|     | Measured at amortised costs |                  |                        |  |
|     | Cash and cash equivalents   | 989.92           | 989.92                 |  |
|     | Total                       | 989.92           | 989.92                 |  |
| II) | Financial liabilities       |                  |                        |  |
|     | Measured at amortised costs |                  |                        |  |
|     | Trade Payables              | 833.31           | 833.31                 |  |
|     | Total                       | 833.31           | 833.31                 |  |

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

#### 14 Fair value hierarchy

There are no financial instruments that are measured subsequent to initial recognition at fair value. Hence, disclosure of the fair value hierarchy of assets and liabilities measured at fair value is not applicable.

#### 15 Financial risk management disclosure

The Company's principal financial liabilities, other than derivatives, comprise trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include cash and cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a financial risk committee that advises on financial risks and the appropriate financial risk governance framework for the Company. The financial risk committee provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

#### a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

## i) Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency).

The Company does not hedges its exposure to fluctuations on the translation into INR of its foreign operations.

## b) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities and from its financing activities, including deposits with banks and financial institutions, and other financial instruments.

## i) Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company's management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

#### c) Liquidity risk

The Company monitors its risk of a shortage of funds using a liquidity planning tool. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, preference shares, finance leases and hire purchase contracts. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

(In ₹ Hundreds)

|                        | Less than 1 year | 1 year to 5 years | > 5 years | Total  |
|------------------------|------------------|-------------------|-----------|--------|
| As at 31st March, 2023 |                  |                   |           |        |
| Trade payables         | 833.31           | -                 | -         | 833.31 |
|                        | 833.31           | -                 | -         | 833.31 |

#### 16 Income tax

a) Reconciliation of tax expense and the accounting profit multiplied by India's domestic tax rate for 31st March, 2023:

|                                                                  | As at 31st March, 2023 |
|------------------------------------------------------------------|------------------------|
| Accounting loss before tax                                       | (903.39)               |
| At India's enacted tax rate of 26.00%                            | -                      |
| Deferred tax savings on current year accounting loss             | -                      |
| Tax effect of non-deductible expenses                            | -                      |
| Deferred tax not recognised on prudence basis                    | -                      |
| At the effective income tax rate of 26%                          | -                      |

## **Independent Auditors' Report**

To

The Members of,

M/s. Eternus Performance Materials Private Limited

#### Report on the audit of the financial statements

#### **Opinion**

We have audited the accompanying financial statements of **M/s. Eternus Performance Materials Private Limited** ("the Company"), which comprise the balance sheet as at March 31, 2023, and the Statement of Profit and Loss, Statement of Change in Equity, and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ('Act') in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2023, its profit (or Loss)\*and Statement of Change in Equity and cash flows for the year ended on that date.

#### **Basis for opinion**

We conducted our audit in accordance with the standards on auditing specified under section 143 (10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the code of ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the code of ethics.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Key audit matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Reporting of key audit matters as per SA 701, Key Audit Matters are not applicable to the Company as it is an unlisted company.

#### Information other than the financial statements and auditors' report thereon

The Company's board of directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, Business Responsibility Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

#### Management's responsibility for the financial statements

The Company's board of directors are responsible for the matters stated in section 134 (5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting standards specified under section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The board of directors is also responsible for overseeing the Company's financial reporting process.

#### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
  or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
  is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
  collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

#### **Eternus Performance Materials Private Limited**

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### Report on other legal and regulatory requirements

Report on Other Legal and Regulatory Requirements

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the 'Annexure A', a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by Section 143 (3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss and the Cash Flow Statement and statement of change in equity dealt with by this Report are in agreement with the books of account.
  - d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
  - e) On the basis of the written representations received from the directors as on 31st March, 2023 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2023 from being appointed as a director in terms of Section 164 (2) of the Act.
  - f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in 'Annexure B'.
  - g) With respect to the matter to be included in the Auditor's Report under section 197(16), In our opinion and according to the information and explanations given to us, the remuneration paid by the Company to its directors during the current year is in accordance with the provisions of section 197 of the Act. The remuneration paid to any director is not in excess of the limit laid down under section 197 of the Act. The Ministry of Corporate Affairs has not prescribed other details under section 197(16) which are required to be commented upon by us
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company does not have any pending litigations which would impact its financial position.
    - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

### Annexure "B" to the Independent Auditor's Report

# Report on the Internal Financial Controls under Clause (i) of sub section 3 of section 143 of the Act.

We have audited the internal financial controls over financial reporting of **M/s. Eternus Performance Materials Private Limited** (the Company) as of March 31,2023, in conjunction with our audit of the financial statements of the company for the year ended on that date.

#### **Managements Responsibility for Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria by the company considering the essential components of internal control stated in the guidance note on audit of internal financial controls over financial reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets the prevention and detection of frauds and errors the accuracy and completeness of the accounting records and the timely preparation of reliable financial information, as required under the act.

#### **Auditors Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### **Meaning of Internal Financial Controls over Financial Reporting**

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

#### **Inherent Limitations of Internal Financial Controls over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### **Opinion**

According to the information and explanations given to us, the company have documented framework of internal financial control over financial reporting on criteria based on or considering the essential components of internal control stated in the Guidance Note on Audit of internal Financial Controls over Financial Reporting issued by the institute of Chartered Accountants of India. On an overall examination of accounting procedure and financial reporting it is observed that the information system used by the company have sufficient checks and controls with regard to internal financial control over financial reporting. Because of this reason, we have obtained sufficient appropriate audit evidence to provide a basis for our opinion whether the Company had adequate internal financial controls over financial reporting and whether such internal financial controls were operating effectively as at March 31, 2023.

We have considered the disclaimer reported above in determining the nature, timing, and extent of audit tests applied in our audit of the financial statements of the Company, and the disclaimer does not opinion on the financial statements of the Company.

#### Notes forming part of the financial statements for the year ended 31st March, 2023.

#### 1 Corporate information:

Eternus Performance Materials Private Limited is a private limited company incorporated on 18<sup>th</sup> July, 2012. The Company is engaged in the business of manufacturing composite materials. The Company is deemed to be a public limited company within the meaning of section 2(71) of the Companies, Act, 2013.

#### 2 Significant accounting policies:

#### 2.1 Basis of accounting and preparation of financial statements :

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013.

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The financial statements are presented in INR and all values are rounded to the nearest Rupee.

#### 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or
- iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

#### 2.3 Foreign currency transactions and translations :

The Company's financial statements are presented in INR, which is also the Company's functional currency. Items included in the financial statements are measured using functional currency.

#### a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

#### b) Exchange differences

Gains/losses arising out of fluctuations in the exchange rates are dealt with in the statement of profit and loss in the period in which they arise. In respect of assets and liabilities, the overall net loss or gain, if any, on conversion at the exchange rates prevailing on the date of balance sheet is charged to revenue.

#### 2.4 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets, and significant liabilities, such as contingent consideration. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. Valuers are normally rotated every three years.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

#### 2.5 Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

The disclosures of significant accounting judgements, estimates and assumptions relating to revenue from contracts with customers are provided in Note no. 37.

#### a) Sale of Goods:

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer.

The control of the goods manufactured in case of export sales is transferred usually on the date of issue of Bill of Lading while in case of domestic sales, the control is transferred usually on delivery of goods.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company considers the effect of variable consideration.

#### b) Sale of Services:

Revenue on time and material contracts are recognized as the related services are performed and revenue from the end of the last invoicing to there porting date is recognized as unbilled revenue. Revenue from fixed-price, fixed-time frame contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage of completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion.

#### c) Contract Assets:

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

#### d) Trade receivables:

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in Note no. 2.15.

#### e) Contract liabilities:

A contract liability is the obligation to transfer goods or services to a customer for which

the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

#### f) Interest income:

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instruments (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

#### g) Profit / Loss on sale of investments:

Profit / Loss on sale of investments is recognised when all the significant risk and rewards of ownership in investment is transferred.

#### 2.6 Government Grants:

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant or subsidy relates to revenue, it is recognized as income on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs, which they are intended to compensate. Where the grant relates to an asset, it is recognized as deferred income and is allocated to statement of profit and loss over the periods and in the proportions in which depreciation on those assets is charged.

When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favorable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

#### 2.7 Taxes:

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognized for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realized.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the guidance note on "Accounting for Credit Available in respect of Minimum Alternative Tax" under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

#### Sales/ value added taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of sales/ value added taxes paid, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

#### 2.8 Property, plant and equipment:

Property, plant and equipment, capital work in progress and investment property are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory

cost, including excise duty, wherever applicable. All the significant costs relating to the acquisition and installation of property, plant and equipment or investment proerty are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the profit or loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Assets under improvement to leased premises are fully depreciated over the lease period of the asset.

The Management's estimate of the useful lives of various fixed assets, which is in line with the provision of Schedule II to the Companies Act, 2013 is given below.

| Type of Asset Estimated user |     | Estimated useful life                   |          |
|------------------------------|-----|-----------------------------------------|----------|
| i)                           |     | Factory buildings                       |          |
| ii)                          |     | Computer and data processing equipments | 30 years |
|                              | (a) | Servers and networks                    | 6 years  |
|                              | (b) | Other end user devices                  | 3 years  |
| iii)                         |     | Furnitures and fixtures                 | 10 years |
| iv)                          |     | Office equipment                        | 5 years  |
| v)                           |     | Plant and machinery                     | 15 years |

Losses arising from the retirement of, and gains and losses arising from disposal of property plant and equipment which are carried at cost are recognised in the Statement of Profit and Loss.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

#### 2.9 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised

development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

The Management's estimate of the useful lives of various intangible assets, which is in line with the provision of Schedule II to the Companies Act, 2013 is given below.

| Type of Asset | Estimated useful life |
|---------------|-----------------------|
| i) Software   | 3 years               |

#### 2.10 Inventories:

#### a) Raw Materials:

Raw materials and components, stores and spares and loose tools are valued at lower of cost and net realizable value. The costs are determined using the weighted average method.

### b) Finished goods:

Finished goods are valued at lower of cost and net realizable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. The costs are determined using the weighted average method.

#### 2.11 Leases:

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Company as a Lessee

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

#### i) Right of use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the Underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are

depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

| Type of Asset     | Estimated useful life |
|-------------------|-----------------------|
| i) Leasehold land | 95 Years              |

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

#### ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liability and Right-of-use asset have been separately presented in the balance sheet and lease payments have been classified as financing cash flows.

#### iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

#### Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

#### 2.12 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount

is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or Group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 October at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

#### 2.13 Provisions, Contingent Liabilities:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

#### 2.14 Retirement and other employee benefits :

a) Short-term Employee Benefits:

The undiscounted amount of short-term employee benefits expected to be paid in exchange of services rendered by the employees is recognised during the year when the employees render the service.

b) Post Employment Benefits:

No separate provisions of retirement benefits or privilege leave benefits of such employees are recognized in the books of the Company.

#### 2.15 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial Asset:

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)
- c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

#### d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

#### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

i The rights to receive cash flows from the asset have expired, or

The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

#### h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- i Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- iv Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an

entity is required to consider:

- i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected under the head 'other expenses' in the P&L.

The balance sheet presentation for various financial instruments is described below:

- i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the profit or loss.

#### ii Loans and borrowings

This is the category most relevant to the Company. After initial recognition, interestbearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

#### iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

#### c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

#### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

#### D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those

assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                                                                                                                                             |
|----------------------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised Cost             | FVTPL                     | Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.                                                                                                                                 |
| FVTPL                      | Amortised Cost            | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.                                                                                                                             |
| Amortised Cost             | FVTOCI                    | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                                       |
| FVTOCI                     | Amortised Cost            | Fair value at reclassification date becomes its<br>new amortised cost carrying amount. However,<br>cumulative gain or loss in OCI is adjusted against<br>fair value. Consequently, the asset is measured as<br>if it had always been measured at amortised cost. |
| FVTPL                      | FVTOCI                    | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                            |
| FVTOCI                     | FVTPL                     | Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date.                                                                                                          |

#### **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

#### 2.16 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term investments with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

#### 2.17 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

#### 2.18 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

#### 2.19 Earnings per share:

Basic earnings per share is computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

#### 2.20 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

#### 2.21 Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

#### 2.22 Estimation of uncertainties relating to the global health pandemic from COVID-19

The spread of COVID-19 has severely impacted business and there have been severe disruption to regular business operations due to lockdown and other emergency measures. This may impact the Company's operations. As at the date of approval of these financial statements the Company has made assessment of liquidity, recoverable values of its financial and non-financial assets, financial and non-financial liabilities, carrying value of its assets and liabilities including possible obligations arising from any ongoing negotiations with customers, vendors and has concluded that there are no material adjustments required in the financial statements. The management believes that it has assessed and taken all the possible impacts known from these events wherever possible outcome is known. However, the impact assessment of COVID-19 is a continuous process, given the significant estimation and uncertainties associated with its nature, duration and outcome of any negotiations. The impact of global health pandemic might be different from that estimated as at the date of approval of these financial statements. The Company will continue to closely monitor any material changes to future economic conditions and its consequential impact on its financial statements.

## 3 Property, plant and equipment :

#### FIXED ASSET MOVEMENT CHART AS ON 31-03-2023
