## 30 Segment Reporting:

Information reported to the chief operating decision maker (CODM) for the purposes of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided. The company's activities involve predominantly in manufacturing of composite items, which is considered to be a single business segment since these are subject to similar risks and returns. The accounting policies of the reportable segments are the same as the accounting policies disclosed in Note 2. The revenues, total expenses and net profit as per the Statement of Profit and Loss represents the revenue, total expenses and the net profit of the sole reportable segment.

## 31 Capital commitments:

Significant capital expenditure contracted for at the end of the reporting period but not recognised as liabilities

## 36 Dues to micro and small enterprises:

As per the Micro, Small and Medium Enterprises Development Act, 2006, the Company is required to identify the Micro, Small and Medium suppliers and pay interest to micro and small enterprises on overdue beyond the specified period irrespective of the terms agreed with the suppliers. For the purpose of identification of such suppliers, the company has sent confirmations to all its suppliers. Based upon the confirmations received as of 30<sup>th</sup> April 2022 and the supplier profile available with the Company, the management believes that there are no dues to such suppliers.

## 37 Significant accounting judgements, estimates and assumptions:

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods

## **Judgements**

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements

## **Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

## Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable

amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Company.

#### **Taxes**

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon acertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availabliity of adquate taxable income within the time permissible as per the taxing legislations.

#### Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Contingent consideration, resulting from business combinations, is valued at fair value at the acquisition date as part of the business combination. When the contingent consideration meets the definition of a financial liability, it is subsequently remeasured to fair value at each reporting date. The determination of the fair value is based on discounted cash flows. The key assumptions take into consideration the probability of meeting each performance target and the discount factor.

## **Revenue recognition**

The Company's contracts with customers could include promises to transfer multiple products and services to a customer. The Company assesses the products / services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables.

Judgement is also required to determine the transaction price for the contract. The transaction price could be either a fixed amount of customer consideration or variable consideration with elements such as volume discounts, service level credits, performance bonuses, price concessions and incentives. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component. Any consideration payable to the customer is adjusted to the transaction price, unless it is a payment for a distinct product or service from the customer. The estimated amount of variable consideration is adjusted in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur and is reassessed at the end of each reporting period. The Company allocates the elements of variable considerations to all the performance obligations of the contract unless there is observable evidence that they pertain to one or more distinct performance obligations.

The Company uses judgement to determine an appropriate standalone selling price for a performance obligation. The Company allocates the transaction price to each performance obligation on the basis of the relative standalone selling price of each distinct product or service promised in the contract. Where standalone selling price is not observable, the Company uses the expected cost plus margin approach

to allocate the transaction price to each distinct performance obligation.

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

Revenue for fixed-price contract is recognised using percentage-of-completion method. The Company uses judgement to estimate the future cost-to-completion of the contracts which is used to determine the degree of completion of the performance obligation.

#### 38 Fair values:

Set out below, is a comparison by class of the carrying amounts and fair value of the Company's financial instruments, other than those with carrying amounts that are reasonable approximations of fair values:

|     |                                     | Carrying         | value            | Fair va          | alue             |

The management assessed that cash and cash equivalents, trade receivables, trade payables, cash credit and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

## 39 Fair value hierarchy:

| Total      | Significant<br>unobservable<br>inputs<br>(Level 3) | Significant<br>observable<br>inputs<br>(Level 2) | Quoted prices in active markets (Level 1) | Date of<br>Valuation |                                                        |
|------------|----------------------------------------------------|--------------------------------------------------|-------------------------------------------|----------------------|--------------------------------------------------------|
|            |                                                    |                                                  |                                           |                      | Assets for which fair value has been disclosed         |
|            |                                                    |                                                  |                                           |                      | Other financial assets (Non-current)                   |
| 124,000    | 124,000                                            | -                                                | -                                         | 31-Mar-23            | Security Deposits                                      |

## 40 Financial risk management disclosure :

The Company's principal financial liabilities, other than derivatives, comprise trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include Investments in equity instruments, loans, cash and cash equivalents and other bank balances that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a financial risk committee that advises on financial risks and the appropriate financial risk governance framework for the Company. The financial risk committee provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

## A) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

The sensitivity analysis in the following sections relate to the position as at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022.

The analysis exclude the impact of movements in market variables on: the carrying values of gratuity and other post retirement obligations, provisions.

The following assumptions have been made in calculating the sensitivity analysis:

The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31<sup>st</sup> March, 2022 and 31<sup>st</sup> March, 2021 including the effect of hedge accounting (if any)

## i) Intererst rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

## B) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities and from its financing activities, including deposits with banks and financial institutions, and other financial instruments.

#### i) Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company's management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

## C) Liquidity risk

The Company monitors its risk of a shortage of funds using a liquidity planning tool. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, preference shares, finance leases and hire purchase contracts. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The table below summarises the maturity profile of the Group's financial liabilities based on contractual undiscounted payments

## 41 Disclosure pursuant to Ind AS 115 on "Revenue from contracts with customers"

## a) Trade receivables and Contract balances:

The Company classifies the right to consideration in exchange for deliverables as either a receivable or as unbilled revenue.

A receivable is a right to consideration that is unconditional upon passage of time. Revenue for time and material contracts are recognized as related service are performed. Revenue for fixed price maintenance contracts is recognized on a straight line basis over the period of the contract. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset for these cases as right to consideration is unconditional upon passage of time.

Revenue recognition for fixed price contracts is based on percentage of completion method. Invoicing to the clients is based on completion of the contract. This would result in the timing of revenue recognition being different from the timing of billing the customers. Unbilled revenue for fixed price development contracts is classified as non financial asset as the contractual right to consideration is dependent on completion of contractual milestones.

Invoicing in excess of earnings are classified as unearned revenue.

Trade receivable and unbilled revenues are presented net of impairment in the Balance Sheet.

## d) Performance obligations and remaining performance obligations :

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognized as at the end of the reporting period and an explanation as to when the Company expects to recognize these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts where the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date, typically those contracts where invoicing is on time and material basis. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revalidations, adjustment for revenue that has not materialized and adjustments for currency.

The Company does not have any performance obligations that are completely or partially unsatisfied as at 31<sup>st</sup> March, 2022 and 31<sup>st</sup> March, 2021, other than those meeting the exclusion criteria mentioned above.

Reconciliation for revenue as per Statement of profit & loss and the contracted price arising on account of various adjustments:

## **Independent Auditor's Report**

To the Members of Ferrovia Transrail Solution Private Limited

## **Report on the Standalone Ind AS Financial Statements**

We have audited the accompanying standalone Ind AS financial statements of **Ferrovia Transrail Solution Private Limited** ("the Company"), which comprise the **Balance Sheet as at March 31, 2023**, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

## **Management's Responsibility for the Financial Statements**

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the state of affairs (financial position), profit or loss (financial performance including other comprehensive income), cash flows and changes in equity of the Company in accordance with accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act., read with Rule 7 of the Companies (Accounts) Amendment Rules, 2016 and the Companies (Indian Accounting Standards) Amendment Rules, 2016. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial control that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

#### **Auditor's Responsibility**

Our responsibility is to express an opinion on these standalone Ind AS financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made there under. We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing, issued by the Institute of Chartered Accountants of India, as specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the standalone Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances [but not for the purpose of expressing an opinion on whether the Company has in place an adequate internal financial controls system over financial reporting and the effectiveness of such controls]. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the standalone Ind AS financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone Ind AS financial statements.

#### **Opinion**

In our opinion and to the best of our information and according to the explanations given to us, the standalone Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs

of the Company as at March 31, 2023, its profit including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

## **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's report) Order, 2022 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the **Annexure A** statement on the matters specified in paragraphs 3 and 4 of the Order to the extent applicable.
- 2. As required by section 143 (3) of the Act, we report that:
  - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
  - (b) In our opinion, proper books of account, as required by law have been kept by the Company so far as it appears from our examination of those books;
  - (c) The Balance Sheet, Statement of Profit and Loss including the Statement of Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;
  - (d) In our opinion, the aforesaid standalone Ind AS financial statements comply with the Accounting Standards specified under section 133 of the Act, read with Rule 7 of the Companies (Accounts) Amendment Rules, 2016and the Companies (Indian Accounting Standards) Amendment Rules, 2016.
  - (e) On the basis of written representations received from the directors as on March 31, 2023, and taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2023, from being appointed as a director in terms of section 164 (2) of the Act;
  - (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B" to this report;
  - (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - The Company has disclosed the impact of pending litigations on its financial position in its standalone Ind AS financial statements to the standalone Ind AS financial statements, if any.
    - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. This clause is omitted
    - v. 1) The Management has represented that, to the best of its knowledge and belief, other than as disclosed in the notes to accounts, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the company to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company("ultimate beneficiary") or provide any guarantee, security or the like on behalf of the ultimate beneficiaries;
      - 2) The Management has represented that, to the best of its knowledge and belief, other than as disclosed in the notes to accounts, no funds have been received by the company from any person(s) or entity(ies), including foreign entities("Funding

## Ferrovia Transrail Solutions Pvt. Ltd.

Parties") with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company("ultimate beneficiary") or provide any guarantee, security or the like on behalf of the ultimate beneficiaries; and

- 3) Based on such audit procedures that we have considered reasonable and appropriate in the circumstances; nothing has come to our notice that has caused us to believe that the representations under sub clause (1) and (2) contain any material misstatement.
- vi. The company has not declared or paid any dividend during the year

## "Annexure B" to the Independent Auditor's Report of even date on the Standalone Financial Statements of Ferrovia Transrail Solution Private Limited

## Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Ferrovia Transrail Solution Private Limited as of 31th March, 2023 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

## **Management's Responsibility for Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

## **Auditors' Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

## **Meaning of Internal Financial Controls over Financial Reporting**

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Povide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **Opinion**

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31th March, 2023, based on our audit procedures.

## Notes to Financial statements for the year ended March 31, 2023

#### **1** Corporate information

Ferrovia Transrail Solutions Private Limited (FTSPL) is promoted by PNC Infratech Limited and BF Infrastructure Limited holding 51% and 49% stake respectively. FTSPL has emerged out of the cordial relations joint efforts of the abovementioned two companies.

FTSPL has been formed for the purpose of carrying out the Project of Design, Procurement, Construction of track and track related works and it's testing & commissioning for double track electrified railway line on a Design Build Lump Sum Basis from New Karwandiya (Rly. Km. 564) to Durgawati (Rly. Km. 630) approx. 66 KMs on Mughalsarai-Sonnagar Section of Eastern Dedicated Freight Corridor (Project) as floated by the Dedicated Freight Corridor Corporation of India Limited (DFCCIL).

BF Infrastructure Ltd. duly acquired the PNC Stake of 51% on 28.02.2023 and hence FTSPL is now 100% Subsidiary of BF Infrastructure Ltd. The company's CIN is U45300DL2012PTC239645.

## 2 Significant accounting policies

## 2.1 Basis of preparation

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended thereafter.

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

 Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

## 2.2 Summary of significant accounting policies

#### a. Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ noncurrent classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

## b. Foreign currencies

The Company's financial statements are presented in INR, which is also its functional currency.

#### **Transactions and balance**

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise except for differences pertaining to Long Term Foreign Currency Monetary Items as mentioned subsequently.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or statement of profit and loss are also recognised in OCI or statement of profit and loss, respectively).

Further, the Company does not differentiate between exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost and other exchange difference.

#### c. Investment in subsidiaries and joint ventures

The Company has accounted for its investment in subsidiaries and joint ventures at cost less accumulated impairment.

#### d. Fair value measurement

The Company measures financial instruments at fair value on initial recognition.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial

statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Disclosures for valuation methods, significant estimates and assumptions
- Financial instruments (including those carried at amortised cost)

#### e. Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government. The Company has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and is also exposed to inventory and credit risks.

Based on the Educational Material on Ind AS 18 issued by the ICAI, the Company has assumed that recovery of excise duty flows to the Company on its own account. This is for the reason that it is a liability of the manufacturer which forms part of the cost of production, irrespective of whether the goods are sold or not. Since the recovery of excise duty flows to the Company on its own account, revenue includes excise duty.

However, sales tax/ value added tax (VAT) is not received by the Company on its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.

The specific recognition criteria described below must also be met before revenue is recognised.

## f. Construction Contracts

Project Revenue is recognized by applying percentage of completion method only when the outcome of the construction activity can be estimated reliably. Project revenue and project cost associated to project related activity is recognized as revenue and expense respectively by reference to stage of completion. The stage of completion is either determined with reference to proportion of cost incurred for work performed to the estimated total cost respectively, or with respect to completion of physical proportion of the contract work. Project revenue is recognized when the stage of completion of the project reaches a significant level as compared to the total estimated cost of the project.

Revenue earned in excess of billing is reflected under "Other Current Assets". Billing to customer in excess of revenue earned is reflected under "Current Liabilities".

## g. Sale of goods

Revenue from the domestic sales is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

## h. Interest income

The Company recognizes the Interest income on accrual basis, Interest income is included in other income in the statement of profit and loss.

#### i. Dividends

Dividend income is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

#### j. Taxes

#### **Current income tax**

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside the statement of profit and loss is recognised outside the statement of profit and loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

#### **Deferred tax**

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the statement of profit and loss is recognised outside the statement of profit and loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the guidance note on "Accounting for Credit Available in respect of Minimum Alternative Tax" under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

## k. Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction net of accumulated depreciation and impairment loss (if any). Internally manufactured property, plant and equipment are capitalised at cost, including non- cenvatable excise duty, wherever applicable. All significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the property, plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the statement of profit and loss as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised.

The identified components are depreciated over their useful lives; the remaining asset is deprecated over the life of the principal asset.

Depreciation for identified components is computed on straight line method based on useful lives, determined based on internal technical evaluation as follows:

| Type of assets      | Estimated useful life |
|---------------------|-----------------------|
| Office Equipment    | 5 years               |
| Furniture & Fixture | 10 years              |
| Computer            | 3 years               |
| Software            | 3 years               |
| Website             | 3 years               |

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

## I. Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the net carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised.

#### m. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing cost.

#### n. Inventories

Cost of inventories have been computed to include all cost of purchases, cost of conversion and other costs incurred in bringing the inventories to their present location and condition.

Raw materials and components, stores and spares and loose tools are valued at lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Costs are determined on weighted average basis.

Work-in-progress and finished goods are valued at lower of cost and net realisable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. Cost of finished goods includes excise duty. Cost of work-in-progress and finished goods are determined on a weighted average basis.

Scrap is valued at net realizable value.

Dies are valued at cost or net realisable value. Cost includes direct material and labour and a proportion of manufacturing overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

## o. Provisions and contingent liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of

one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements. A disclosure for a contingent liability is made where there is a possible obligation arising out of past event, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation arising out of a past event where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

## p. Employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The company presents the leave as a current liability in the balance sheet; to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

## q. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### **Initial recognition and measurement**

All financial assets and liabilities are recognized at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, that are not at fair value through profit or loss, are added to the fair value on initial recognition. Regular way purchase and sale of financial assets are accounted for at trade date.

#### **Subsequent measurement**

Equity instruments measured at fair value through other comprehensive income (FVTOCI)

#### **Equity investments**

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

## **Derecognition**

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

#### **Financial liabilities**

## Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

#### **Subsequent measurement**

The measurement of financial liabilities depends on their classification, as described below:

## Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

## r. Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consists of cash and short-term deposits, as defined above, net of outstanding bank overdrafts and cash credit facilities as they are considered an integral part of the Company's cash management.

#### s. Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

# 25. Gratuity and other Post-employment benefits plans

The company has a defined gratuity plan. Under the gratuity plan every employee who has completed at least five years of service gets a gratuity on departure at 15 days last drawn basic salary for each completed year of service. The scheme is funded with an insurance in the form of a qualifying insurance poliy.

The following table summarizes the components of net benefit expense recognized in the statement of profit and loss and the funded status and amounts recognized in the balance sheet for respective plan.

# **Table Showing Change in Present Value of Obligation:**

(In ₹ Thousands)

| For the Period                                                  | As at<br>31st March 2023 | As at<br>March 31, 2022 |

## 28. Significant accounting estimates and assumptions

The preparation of the financial statements of the Company requires management to make estimates and assumptions that affect the reported amounts of expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur. The key estimates and assumptions used in the preparation of financial statements are as follows:

The Company has elected to use carrying amount of all its property, plant and equipment as deemed cost as measured in previous GAAP and use that as deemed cost on the date of transition. In respect of assets elected to as per the Ind AS 16. However, the management performed an impairment evaluation of the property, plant and equipment and observed the relisable value / value in use of the property, plant and equipment are more than the carrying value.

The accompanying notes are an integral part of these financial statements.

To the Members of

J S Auto Cast Foundry India Private Limited

## **Report on the Audit of the Ind AS Financial Statements**

# **Opinion**

We have audited the accompanying Ind AS financial statements of J S Auto Cast Foundry India Private Limited ("the Company"), which comprise the Balance Sheet as at 31 March 2023, the Statement of Profit and Loss, including Other Comprehensive Income, the Cash Flow Statement, the Statement of Changes in Equity for the year ended, and notes to the Ind AS financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2023, its profit including other comprehensive income, its cash flows and changes in equity for the year ended on that date.

#### **Basis for Opinion**

We conducted our audit of the Ind AS financial statements in accordance with the Standards on Auditing ("SAs"), as specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the 'Auditor's Responsibilities for the Audit of the Ind AS Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the Ind AS financial statements.

#### **Other Information**

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report but does not include the Ind AS financial statements and our auditor's report thereon. Our opinion on the Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### Management's responsibility for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy

and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, the management and the Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of Directors is also responsible for overseeing the Company's financial reporting process.

# **Auditor's Responsibilities for the Audit of the Ind AS Financial Statements**

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether
  due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
  evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
  a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
  involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to Ind AS financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

# **Report on Other Legal and Regulatory Requirements**

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure A" a statement

on the matters specified in paragraphs 3 and 4 of the order, to the extent applicable.

- 2. (A) As required by Section 143 (3) of the Act, we report that:
  - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
  - (c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
  - (d) In our opinion, the aforesaid Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - (e) On the basis of the written representations received from the directors as on 31 March 2023 taken on record by the Board of Directors, none of the directors are disqualified as on 31 March 2023 from being appointed as a director in terms of Section 164 (2) of the Act.
  - (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B" to this report.
  - (B) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company has disclosed the impact of pending litigations on its financial position in its Ind AS financial statements Refer Note 39 to the Ind AS financial statements;
    - ii. The Company did not have any long-term contracts, including derivative contracts, for which there were any material foreseeable losses.
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. (i) The management has represented that to the best of it's knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - (ii) The management has represented that to the best of it's knowledge and belief, no funds have been received by the Company from any persons or entities, including foreign entities ("Funding Parties"), with the understanding, recorded in writing or otherwise, that the Company shall, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
      - (iii) Based on such audit procedures which we have considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) contain any material misstatement.
    - v. The Company has not declared or paid any dividend during the year.

(C) In our opinion, the managerial remuneration for the year ended 31 March 2023 has been paid/ provided for by the Company to its directors in accordance with the provisions of section 197 read with Schedule V of the Act.

# **Annexure A to the Independent Auditors' Report**

(Referred to in paragraph 1 in Report on Other Legal and Regulatory Requirements of the Independent Auditors' Report to the members of J S Auto Cast Foundry India Private Limited on the Ind AS financial statements for the year ended 31 March 2023)

- (i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment.
  - (B) The Company has maintained proper records showing full particulars of intangible assets.
  - (b) The Company has a regular program of physical verification of its Property, Plant and Equipment, by which all the Property, Plant and Equipment are verified in a phased manner over a period of three years. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of the assets. No material discrepancies were noticed on such verification.
  - (c) The title deeds of the immovable properties disclosed in the Ind AS financial statements (other than those properties where the Company is the lessee and the lease agreements are executed in favour of the lessee) are held in the name of the Company.
  - (d) The Company has not revalued its Property, Plant and Equipment, Right of Use assets, or intangible assets during the year.
  - (e) In our opinion and according to the information and explanations given to us, no proceedings have been initiated or are pending against the Company for Holding any benami property under the Benami Transactions (Prohibition) Act, 1988 and rules made thereunder.
- (ii) (a) As explained to us, the inventory has been physically verified at reasonable intervals by the management during the year including the inventories lying with third parties. In our opinion, the frequency of verification by the management is reasonable and the coverage and procedure for such verification by the management is appropriate. There were no cases where the discrepancies exceeded 10% or more in aggregate for each class of inventory which were noticed during the year.
  - (b) In our opinion and according to the information and explanations given to us, the Company has been sanctioned fresh working capital limits in aggregate, exceeding five crore rupees from a bank on the basis of security of current assets of the Company. Based on the records examined by us in the normal course of audit of the Ind AS financial statements, the periodical statements filed by the Company with such bank are in agreement with books of accounts of the Company.
- (iii) In our opinion and according to the information and explanations given to us, the Company has not made any investments in, or provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured, to Companies, Firms, Limited Liability Partnerships or other parties during the year. Accordingly, paragraph 3 (iii) of the order is not applicable to the Company.
- (iv) In our opinion and according to the information and explanations given to us, the Company has not granted any loans or made investments in or provided guarantee or security to which the provisions of section 185 or section 186 of the Act apply. Accordingly, paragraph 3 (iv) of the Order is not applicable to the Company.
- (v) The Company has not accepted any deposits or amounts which are deemed to be deposits. Accordingly, the directives issued by the Reserve Bank of India and the provisions of section 73 to 76 or any other relevant provisions of the Act and rules made there under relating to the acceptance of deposits are not applicable to the Company.
- (vi) We have broadly reviewed the cost records maintained by the Company pursuant to the rules prescribed by the Central Government for the maintenance of cost records under Section 148(1) of the Act, in respect of the products manufactured by the Company and are of the opinion that prima facie, such accounts

and records have been made and maintained. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

- (vii) (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted / accrued in the books of account in respect of undisputed statutory dues including Goods and Services Tax, Provident Fund, Employees' State Insurance, Income Tax, Duty of Customs and other material statutory dues have generally been regularly deposited during the year by the Company with the appropriate authorities.
  - According to the information and explanations given to us, no undisputed amounts payable in respect of Goods and Services Tax, Provident Fund, Employees' State Insurance, Income Tax, Duty of Customs and other material statutory dues were in arrears as at 31 March 2023, for a period of more than six months from the date they became payable.
  - (b) In our opinion and according to the information and explanations given to us, there are no dues of Goods and Services Tax, Provident Fund, Employees' State Insurance, Income Tax, Duty of Customs and other material statutory dues which have not been deposited on account of any dispute.
- (viii) According to the information and explanations given to us, the Company has not surrendered or disclosed any transactions which were not recorded in the books of accounts as income during the year in the tax assessments under the Income Tax Act, 1961.
- (ix) (a) In our opinion and according to the information and explanations given to us, the Company has not defaulted in repayment of loans or other borrowings or in the payment of interest thereon to any lender.
  - (b) According to the information and explanations given to us, the Company has not been declared a willful defaulter by any bank or financial institution or other lenders.
  - (c) In our opinion and according to the information and explanations given to us, the term loans availed during the year were applied for the purpose for which the loans was obtained.
  - (d) In our opinion and according to the information and explanations given to us, the funds raised on short term basis were not utilized for long term purposes.
  - (e) In our opinion and according to the information and explanations given to us, the Company does not have any subsidiaries, joint venture or associate companies. Accordingly, paragraph 3 (ix) (e) of the Order is not applicable to the Company.
  - (f) According to the information and explanations given to us, the Company does not have any subsidiaries, joint venture or associate companies. Accordingly, paragraph 3 (ix) (f) of the Order is not applicable to the Company.
- (x) (a) In our opinion and according to the information and explanations given to us, the Company has not raised money by way of initial public offer or further public offer (including debt instruments) during the year.
  - (b) According to the information and explanations given to us, the Company has not made any preferential allotment or private placement of shares or convertible debentures during the year.
- (xi) (a) According to the information and explanations given to us, no fraud by the Company or on the Company has been noticed or reported during the year.
  - (b) According to the information and explanations given to us, no report under sub-section (12) of Section 143 of the Act has been filed by the auditors in Form ADT-4 as prescribed under Rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) According to the information and explanations given to us, the Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion, the Company is not a Nidhi Company. Accordingly, paragraph 3 (xii) of the Order is not applicable to the Company.

# **J S Auto Cast Foundry India Private Limited**

- (xiii) In our opinion and according to the information and explanations given to us, all the transactions with related parties are in compliance with section 188 of the Act and the details, as required by the applicable accounting standards, have been disclosed in the Ind AS financial statements. The provisions of Section 177 are not applicable to the Company.
- (xiv) (a) In our opinion and according to the information and explanations given to us, the Company has an adequate internal audit system commensurate with the size and nature of its business.
  - (b) We have reviewed the reports of the internal auditors for the period under audit, however we have not placed reliance on the work done by the internal auditor.
- (xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with directors or persons connected with him during the year. Accordingly, the provisions of section 192 of the act are not applicable to the Company.
- (xvi) (a) In our opinion and according to the information and explanations given to us, the Company is not required to register itself under section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3 (xvi) (a)(b) and (c) of the Order is not applicable to the Company.
  - (d) In our opinion and according to the information and explanations given to us, the Company does not have a CIC as a part of the Group.
- (xvii) In our opinion and according to the information and explanations given to us, the Company has not incurred cash losses in the current financial year and in the immediately preceding financial year.
- (xviii) During the year, the previous auditors have resigned during the year. The previous auditors have not raised any issues, concerns or objections in their communication with us.
- (xix) On the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and the management plans presented before us, we are of the opinion that no material uncertainty exists as on the date of the audit report that the Company is capable of meeting its liabilities existing at the date of Balance Sheet as and when they fall due within a period of one year from the Balance Sheet date.
- (xx) In our opinion and according to the information and explanations given to us, in respect of ongoing project, the Company has not transferred the amount remaining unspent in respect of other than ongoing projects, to a Fund specified in Schedule VII to the Companies Act, 2013 till the date of our report. However, the time period for such transfer i.e. six months of the expiry of the financial year as permitted under the second proviso to sub-section (5) of section 135 of the Act, has not elapsed till the date of our report.
- (xxi) The paragraph 3 (xxi) of the Order is not applicable to the standalone financial statements of the Company.

# **Annexure B to the Independent Auditors' Report**

(Referred to in paragraph 2(f) in Report on Other Legal and Regulatory Requirements of the Independent Auditors' Report to the members of J S Auto Cast Foundry India Private Limited on the Ind AS financial statements for the year ended 31 March 2023)

# Report on the Internal Financial Controls under clause (i) of sub-section 3 of section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of J S Auto Cast Foundry India Private Limited ("the Company") as of 31 March 2023 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

## **Management's Responsibility for Internal Financial Controls**

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting ("IFC-FR)" criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

# **Auditors' Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by ICAI and the Standards on Auditing as specified under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls over financial reporting with reference to Ind AS financial statements.

# **Meaning of Internal Financial Controls over Financial Reporting**

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or

# **J S Auto Cast Foundry India Private Limited**

timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Ind AS financial statements.

# **Inherent Limitations of Internal Financial Controls over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **Opinion**

In our opinion, the Company has, in all material respects, adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

#### 1. Corporate Information

J S Auto Cast Foundry India Private Limited ("the Company") is a private limited company domiciled in India and incorporated under the provisions of the Companies Act, 1956. Bharat Forge Limited is the ultimate holding Company and BF Industrial Solutions Limited is the holding Company of the Company. The Company is engaged in the manufacturing and selling of raw and machined castings. The Company caters to both domestic and international markets. The registered office of the Company is located at SF No. 165/1 Sembagounden Pudur, Kuppepalayam, Coimbatore 641107. The Company's CIN is U27310TZ2004PTC011284. The financial statements were authorized for issue in accordance with a resolution of the Board of Directors passed on 26 April 2023.

## 2. Significant Accounting Policies

# 2.1 Basis of preparation and transition to Ind AS

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable to the financial statements of the Company.

For all periods up to and including the year ended March 31, 2022, the Company prepared its financial statements in accordance accounting standards notified under the section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 and Companies (Accounting Standards) Amendment Rules, 2016 (Indian GAAP). These financial statements for the year ended March 31, 2023 are the first the Company has prepared in accordance with Ind AS. Refer to note 47 for information on how the Company adopted Ind AS.

The financial statements are presented in INR and all values are rounded to the nearest million (INR 000,000), except when otherwise indicated. The Company has prepared the financial statements on the basis that it will continue to operate as a going concern. The financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

### 2.2 Summary of significant accounting policies

## a) Current and non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current / non-current classification. An asset is treated as current when it is:

- (i) Expected to be realized or intended to be sold or consumed in normal operating cycle;
- (ii) Held primarily for the purpose of trading;
- (iii) Expected to be realized within twelve months after the reporting period, or
- (iv) Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- (i) It is expected to be settled in normal operating cycle
- (ii) It is held primarily for the purpose of trading
- (iii) It is due to be settled within twelve months after the reporting period, or
- (iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

# **J S Auto Cast Foundry India Private Limited**

The Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

## b) Foreign currencies

The Company's financial statements are presented in Indian Rupees, which is also its functional currency.

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange difference that arise on settlement of monetary items or on reporting at each Balance Sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or Statement of Profit and Loss are also recognised in OCI or Statement of Profit and Loss, respectively).

# c) Investment in subsidiaries, joint ventures and associates

The Company has accounted for its investment in subsidiaries at cost less accumulated impairment [Refer note 2.2(m)].

#### d) Fair value measurement

The Company measures financial instruments at fair value at each Balance Sheet date.

Fair value is the price that would be received on sell of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets. Involvement of external valuers is decided upon annually by the management. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

The management decides, after discussions with the Company's external valuers, which valuation techniques and inputs to use for each case.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarizes accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Disclosures for valuation methods, significant estimates and assumptions (note 46)
- Quantitative disclosures of fair value measurement hierarchy (note 46)
- Investment in unquoted equity shares (note 6)
- Financial instruments (including those carried at amortised cost) (note 46)

### e) Revenue

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer. The policy of recognizing the revenue is determined by the five-stage model proposed by Ind AS 115 "Revenue from contract with customers".

#### Sale of goods

Revenue from sale of goods is recognized at the point in time when control of the asset is transferred to the customer, generally on date of bill of lading for export sales and generally on delivery for domestic sales. The normal credit term is 15 to 180 days upon delivery.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company considers the effect of variable consideration, the existence of significant financing components, non-cash consideration and consideration payable to the customer, if any.

# **Export incentives**

Income from export incentives are accounted for on export of goods if the entitlements can be estimated with reasonable assurance and conditions precedent to claim are fulfilled.

#### Sale of services

Revenue from sale of services is in nature of job work on customer product which normally takes 1-4 days for completion and accordingly, revenue is recognized when products are sent to customer on which job work is completed. The normal credit period is 60 days.

#### Interest income

For all debt instruments measured either at amortised cost interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected Cash Flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in "Other income" in the Statement of Profit and Loss.

# **Dividends**

Dividend income is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

# **Trade receivables**

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in Note 2.2 (p) Financial instruments – initial recognition and subsequent measurement.

#### **Contract liabilities**

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration in form of advance from customer (or an amount of consideration is due). If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognized when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Company performs the obligation as per the contract.

# f) Government grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant or subsidy relates to revenue, it is recognized as income/netted off with expenses on a systematic basis in the Statement of Profit and Loss over the periods necessary to match them with the related costs, which they are intended to compensate. Where the grant relates to an asset, it is recognized as deferred income and is allocated to Statement of Profit and Loss over the periods and in the proportions in which depreciation on those assets is charged.

# g) Taxes

#### **Current income tax**

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside the Statement of Profit and Loss is

recognised outside the Statement of Profit and Loss (either in other comprehensive income ("OCI") or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

#### **Deferred tax**

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the Statement of Profit and Loss is recognised outside the Statement of Profit and Loss (either in other comprehensive income ("OCI") or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

#### Indirect taxes paid on acquisition of assets or on incurring expense

Expenses and assets are recognised net of the amount of indirect taxes paid, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable;
- When receivables and payables are stated with the amount of tax included

The net amount of tax recoverable from or payable to, the taxation authority is included as part of receivables or payables in the Balance Sheet.

### h) Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction net of accumulated depreciation and impairment loss (if any). Internally manufactured property, plant and equipment are capitalised at cost, including GST for which credit is not available, wherever applicable. All significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the property, plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met.

When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant

and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the Statement of Profit and Loss as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised.

The identified components are depreciated over their useful lives, the remaining asset is depreciated over the life of the principal asset.

Depreciation for identified components is computed on straight line method based on:

- useful lives determined based on internal technical evaluation,
- residual value of respective assets, which are not more than 5% of the original cost of the asset.

| Type of asset                                              | Schedule II life<br>(years) | Useful lives estimated by the management (years) |
|------------------------------------------------------------|-----------------------------|--------------------------------------------------|
| Building – factories                                       | 30                          | 30                                               |
| Buildings – others (including roads)                       | 5 to 60                     | 10 to 15                                         |
| Plant and machineries (including electrical installations) | 15                          | 8 to 25                                          |
| Plant and machineries – computers                          | 3                           | 3                                                |
| Office equipment                                           | 5                           | 10                                               |
| Furniture and fixtures                                     | 10                          | 10                                               |
| Vehicles – Four wheelers                                   | 8                           | 8                                                |

The Company, based on technical assessment made by a technical expert and management estimate, depreciates certain items of plant and equipment over estimated useful lives which are different from the useful life prescribed in Schedule II to the Act. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Freehold land is carried at cost.

An item of property, plant and equipment and any significant part initially recognised, is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

# i) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in Statement of Profit and Loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Profit and Loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

Acquired intangible assets which comprise expenditure incurred on acquisition of user licenses for computer software's are amortised over the estimated useful life (say 3 years) on a straight-line basis. The useful life of intangible assets is reviewed by management at each Balance Sheet date.

# j) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

## k) Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities representing obligations to make lease payments and right-of-use assets representing the right to use the underlying assets.

### (i) Right of use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses and adjusted for any remeasurement of lease liabilities. The cost of right of use assets includes the amount of lease liabilities recognized, initial direct costs incurred and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets (say 99 years).

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (m) Impairment of non-financial assets.

#### (ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate and amounts expected to be paid under residual value guarantees.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate, are recognized as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g. changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

### (iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

#### Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in other income in the Statement of Profit and Loss. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

#### I) Inventories

Cost of inventories have been computed to include all cost of purchases, cost of conversion and other costs incurred in bringing the inventories to their present location and condition.

Raw materials and components, stores and spares and loose tools are valued at lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Costs are determined on weighted average basis.

Work-in-progress and finished goods are valued at lower of cost and net realisable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. Cost of work-in-progress and finished goods are determined on a weighted average basis.

Scrap is valued at net realizable value.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

# m) Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, the Company estimates the asset's recoverable

amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future Cash Flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future Cash Flows after the fifth year. To estimate Cash Flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates Cash Flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries or country or countries in which the entity operates or for the market in which the asset is used.

Intangible assets under development are tested for impairment annually.

Impairment losses of continuing operations including impairment on inventories, are recognised in the Statement of Profit and Loss.

For the assets, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased.

If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceeds the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss.

#### n) Provisions and contingent liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements. A disclosure for a contingent liability is made where there is a possible obligation arising out of past event, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation arising out of a past event where

it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

#### **Onerous contracts**

A provision for onerous contracts is measured at the present value of the lower of expected costs of terminating the contract and the expected cost of continuing with the contract. Before a provision is established, the Company recognizes impairment on the assets with the contract.

## o) Post-employment and other employee benefits

#### **Provident fund**

The Company contributes regularly towards the provident fund of its employees to the Government administered pension fund which is a defined contribution scheme.

The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as expenditure, when an employee renders the related service.

### **Gratuity and other long term benefits**

The Company operates a defined benefits plan for its employee's viz. gratuity scheme and loyalty bonus scheme. Payment for present liability of future payment of gratuity and loyalty bonus is unfunded. The cost of providing benefits under these plans is determined on the basis of actuarial valuation at each year end. Actuarial valuation is carried out for the plan using the project unit credit method.

Remeasurements, comprising of actuarial gains and losses, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the Balance Sheet as asset / liability with a corresponding debit or credit to retained earnings through OCI in the period in which they occur.

Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in Statement of Profit and Loss on the earlier of:

- The date of the plan amendment or curtailment
- The date that the Company recognizes related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset.

The Company recognizes the following changes in the net defined benefit obligation as an expense in the Statement of Profit and Loss:

- Service costs comprising of current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

#### **Privilege leave benefits**

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond 12 months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end.

Actuarial gains/losses are immediately taken to the Statement of Profit and Loss and are not deferred. The Company presents the leave as a current liability in the Balance Sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where the Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

# p) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### **Financial assets**

# **Initial recognition and measurement**

All financial assets except trade or other receivables that result from transactions within scope of IND AS 115, are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Trade and other receivables arising as a result of transactions within scope of IND AS 115 are initially recorded at transaction price.

Purchases or sales of financial assets that require delivery of assets within a timeframe established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e. the date that the Company commits to purchase or sell the asset.

## <u>Subsequent measurement</u>

For purposes of subsequent measurement, financial assets are classified in three categories:

- Debt instruments at amortized cost
- Debt instruments, derivatives and equity instruments at fair value through Profit or Loss ('FVTPL')
- Equity instruments are measured at fair value through other comprehensive income ('FVTOCI') or fair value through profit or loss (FVTPL).

#### **Debt instruments at amortized cost**

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- a) The asset is held within a business model whose objective is to hold assets for collecting contractual Cash Flows, and
- b) Contractual terms of the asset give rise on specified dates to Cash Flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in other income in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss. This category generally applies to trade and other receivables.

#### **Debt instrument at FVTPL**

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as at FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or as at FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

#### **Equity investments**

All equity investments in scope of Ind AS 109 are measured at fair value. For all equity investments not held for trading, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity investment as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to the Statement of Profit and Loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity investment included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

#### **Derecognition**

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the Company's Balance Sheet) when:

- The rights to receive Cash Flows from the asset have expired, or
- The Company has transferred its rights to receive Cash Flows from the asset or has assumed an obligation to pay the received Cash Flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive Cash Flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

# Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and

credit risk exposure:

- a) Financial assets that are debt instruments and are measured at amortised cost e.g. loans, debt securities, deposits, trade receivables and bank balance.
- b) Financial assets that are measured at FVTOCI
- c) Lease receivables under Ind AS 116
- d) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e. all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

As a practical expedient, the Company uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the Statement of Profit and Loss. This amount is reflected under the head 'other expenses' in the Statement of Profit and Loss.

The Balance Sheet presentation for various financial instruments is described below:

• Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables:

ECL is presented as an allowance, i.e. as an integral part of the measurement of those assets in the Balance Sheet. The allowance reduces the net carrying amount.

Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

Debt instruments measured at FVTOCI:

Since financial assets are already reflected at fair value, impairment allowance is not further reduced from its value. Rather, ECL amount is presented as 'accumulated impairment amount' in the OCI.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e. financial assets which are credit impaired on purchase / origination.

#### **Financial liabilities**

#### **Initial recognition and measurement**

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts.

# **Subsequent measurement**

The measurement of financial liabilities depends on their classification, as described below:

#### Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities designated upon initial recognition as at fair value through profit or loss.

Gains or losses on liabilities held for trading are recognised in the Statement of Profit and Loss.

#### Loans and borrowings

This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

#### **Derecognition**

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

#### Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised

amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

# q) Derivative financial instruments and hedge accounting

#### Initial recognition and subsequent measurement

The Company uses derivative financial instruments, such as forward currency contracts, to hedge its foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to statement of profit and loss when the hedge item affects statement of profit and loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment.

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Company's risk management objective and strategy for undertaking hedge, the hedging / economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

#### Cash flow hedge

Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment.

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the statement of profit and loss.

The Company uses forward currency contracts and range forward contracts as hedges of its exposure to foreign currency risk in forecast transactions and firm commitments. The ineffective portion relating to foreign currency contracts is recognised in finance costs. (refer to note 44).

Amounts recognised as OCI are transferred to statement of profit and loss when the hedged transaction affects profit and loss, such as when the hedged financial income or financial expense is recognised or when a forecast sale occurs. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

## r) Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of Cash Flows, cash and cash equivalents consists of cash and short-term deposits, as defined above, net of outstanding bank overdrafts and cash credit facilities as they are considered an integral part of the Company's cash management.

# s) Dividend to equity holders of the Company

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

#### t) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision-Maker. The Chief Operating Decision-Maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

#### u) Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

## 2.3 Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures, including the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

#### <u>Judgements</u>

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

#### **Revenue from contracts with customers**

The Company has applied the following judgements that significantly affect the determination of the amount and timing of revenue from contracts with customers:

#### a) Identifying contracts with customers

The management of the Company has exercised judgement to determine contract with customers for the purpose of Ind AS 115 and for identification of performance obligations and other associated terms.

# b) Identifying performance obligation

The Company enters into contract with customers for goods and services. The Company determined that both the goods and services are capable of being distinct. The Company also determined that the promises to transfer these goods and services are distinct within the context of the contract.

# c) Determination of timing of satisfaction of performance obligation

The Company concluded that revenue from sale of goods to be recognised at a point in time and revenue from sale of services to be recognised over a period of time. The Company has applied judgement in determining the point in time when the control of the goods are transferred based on the criteria mentioned in the standard read along with the contract with customers, applicable laws and considering the industry practices.

#### **Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

#### 1) Impairment of non-financial assets (tangible and intangible)

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Unit's (CGU's) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. In determining the fair value less costs to disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators.

# 2) Defined benefit plans

The cost of the defined benefit gratuity plan, other defined benefit plan and other postemployment plans are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, expected returns on plan assets and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The mortality rate is based on publicly available mortality tables for India. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases, discount rate and return on planned assets are based on expected future inflation rates for India. Further details about defined benefit plans are given in note 43.

# 3) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### 2.4 New amendments issued but not effective

The Ministry of Corporate Affairs has vide notification dated 31 March 2023 notified Companies (Indian Accounting Standards) Amendment Rules, 2023 (the 'Rules') which amends certain accounting standards and are effective 1 April 2023. These amendments are not expected to have a material impact on the Company in the current or future reporting periods and on foreseeable future transactions.

| Title                                                                                                                                   | Key requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|-----------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Disclosure of Accounting<br>Policies- Amendments to Ind<br>AS 1, Presentation of financial<br>statements                                | The amendment requires entities to disclose their material rather than their significant accounting policies. The amendments define what is 'material accounting policy information' and explain how to identify when accounting policy information is material. They further clarify that immaterial accounting policy information does not need to be disclosed. If it is disclosed, it should not obscure material accounting information.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Definition of Accounting<br>Estimates- Amendments to<br>Ind AS 8, Accounting policies,<br>changes in accounting estimates<br>and errors | The amendment clarifies how entities should distinguish changes in accounting policies from changes in accounting estimates. The distinction is important, because changes in accounting estimates are applied prospectively to future transactions and other future events, but changes in accounting policies are generally applied retrospectively to past transactions and other past events as well as the current period.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Deferred tax related to assets and liabilities arising from a single transaction- Amendments to Ind AS 12, Income taxes                 | The amendment requires entities to recognise deferred tax on transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences. They will typically apply to transactions such as leases of lessees and decommissioning obligations and will require the recognition of additional deferred tax assets and liabilities.  The amendment should be applied to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, entities should recognise deferred tax assets (to the extent that it is probable that they can be utilised) and deferred tax liabilities at the beginning of the earliest comparative period for all deductible and taxable temporary differences associated with:  • right-of-use assets and lease liabilities, and  • decommissioning, restoration and similar liabilities, and the corresponding amounts recognised as part of the cost of the related assets.  The cumulative effect of recognising these adjustments is recognised in retained earnings, or another component of equity, as appropriate. |

# Statement of Changes in Equity for the year ended 31 March 2023

(All amounts are in indian Rupees millions, unless otherwise stated)

# A. Equity share capital:

Equity shares of Rs. 10 each issued, subscribed and paid up

#### (a) Rights, preference and restrictions attached to the equity shares

The Company has a single class of equity shares having a par value of Rs. 10 each. Accordingly, all equity shares rank equally with regard to dividends and share in the Company's residual assets. The equity shares are entitled to receive dividend as declared from time to time. On winding up of the Company, the holders of the equity shares will be entitled to receive the residual assets of the Company, remaining after distribution of all preferential amounts in proportion to the number of equity shares held.

# (b) Reconciliation of equity shares outstanding at the beginning and at the end of the reporting year

# Note:

The Company has designed a scheme of loyalty bonus to be paid to certain employees at the time of acquisition of the Company by BF Industrial Solutions Limited which was recognised as per the provisions of Ind AS 19 - Employee Benefits.

# 36 Earnings per share ('EPS')

Earnings per share has been computed as under:

| Particulars |                                                                      |             | 31 March 2023 | 31 March 2022 |
|-------------|----------------------------------------------------------------------|-------------|---------------|---------------|
| Α           | Profit after tax                                                     | INR million | 104.76        | 65.87         |
| В           | Weighted average number of equity shares outstanding during the year | Nos.        | 3,968,330     | 3,968,330     |
| С           | Nominal value of each share                                          | in Rs.      | 10.00         | 10.00         |
| D           | Basic and diluted earning / (loss) per share (A/B)                   | INR         | 26.40         | 16.60         |

# 37 Segment information

# **Reportable segments**

The Board of Directors have been identified as the Chief Operating Decision-Maker who examine the Company's performance both from a product and geographic perspective. The Chief Operating Decision Maker has identified only one reportable segment of "Foundry and Castings" comprising of castings and machined components for different sectors/industries. Hence the revenue, expenses, results, assets and liabilities disclosed in the financial statements of the Company are allocable to one segment.

## **Geographical information**

# 43 Details of employee benefits as required by the IND AS 19 Employee benefits :

#### (A) Defined Contribution Plan

The Company makes provident fund contributions to defined contributions plans for qualifying employees. Under the scheme, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The Company recognised Rs. 24.01 million (31 March 2022: Rs. 20.08 million) for Provident Fund contribution in the Statement of Profit and Loss. The contributions payable to these plans by the Company are at rates specified in the rules of the scheme.

# (B) Defined Benefit Plan

Defined benefit plans comprises of Post-employment benefits plan mainly gratuity and other long term employee benefits mainly comprising of compensated absences. These are measured at each Balance Sheet date based on actuarial valuation carried out by an independent actuary using projected unit credit method. The breakup is as follows:

| Particulars   | 31 March 2023 | 31 March 2022 | 01 April 2021 |
|---------------|---------------|---------------|---------------|
| Non-current   | 53.70         | 42.24         | 29.11         |
| Current       | 4.76          | 3.36          | 1.57          |
| Gratuity      | 58.46         | 45.60         | 30.68         |
| Non-current   | 131.21        | 123.44        | -             |
| Current       | 12.15         | 49.84         | -             |

# h) Expected cash flows

| Particulars | 31 March 2023 | 31 March 2022 | 01 April 2021 |
|-------------|---------------|---------------|---------------|
| Year 1      | 4.66          | 3.36          | 1.57          |
| Year 2      | 4.11          | 2.61          | 2.04          |
| Year 3      | 3.23          | 3.00          | 1.51          |
| Year 4      | 2.80          | 2.31          | 1.83          |
| Year 5      | 2.46          | 1.98          | 1.24          |
| Year 6 - 10 | 9.98          | 7.63          | -             |

# B) Other long term employee benefits

Other long term employee benefits mainly comprises of loyalty bonus payable to employees in future years. They are measured at each Balance Sheet date based on actuarial valuation carried out by an independent actuary using projected unit credit method. Following amount has been charged to the Consolidated Statement of Profit and Loss on account of the same:

| Particulars   | 31 March 2023 | 31 March 2022 |
|---------------|---------------|---------------|
| Loyalty bonus | 19.92         | 173.28        |
| Total         | 19.92         | 173.28        |

# 44 Financial Risk Management

The Company's principal financial liabilities comprises of loans, borrowings and trade payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include trade and other receivables, cash and bank balances that is derived directly from its operations.

The Company is exposed to market risks, credit risks and liquidity risks. The Company's management oversees the management of these risks. The management of the Company ensures that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's risk objectives. The Board of Directors review and agree policies for managing each of these risks, which are summarised below.

#### (A) Market risks

Market risk is the risk that the fair value of future cash flows of a financial instruments will fluctuate because of changes in market prices. Market risk comprises of three types of risk: interest rate risk, currency risk and other price risk, such as commodity risk. Financial instruments affected by market risks include loans and borrowings, deposits, investments in mutual funds and trade receivables.

# (i) Interest rate risks

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

|                     | 31 M                                 | larch 2023                   |                        | 31 /  | March 2022                   | 2                | 1 /                                  | April 2021                   |                  |
|---------------------|--------------------------------------|------------------------------|------------------------|-------|------------------------------|------------------|--------------------------------------|------------------------------|------------------|

| Term loan from bank | 7.75%                                | 1,377.77                     | 100%                   | 7.75% | 1,028.34                     | 100%             | 7.75%                                | 1,247.94                     | 100%             |

## **Sensitivity**

Profit/loss is sensitive to higher/lower interest expense from borrowings as a result of change interest rates

| Impact on profit after tax                     | 31 March 2023 | 31 March 2022 | 1 April 2021 |
|------------------------------------------------|---------------|---------------|--------------|
| Interest rates - increase by 50 basis points * | 68.89         | 5.14          | 62.40        |
| Interest rates - decrease by 50 basis points * | (68.89)       | (5.14)        | (62.40)      |

<sup>\*</sup> Holding all other variables constant.

# (ii) Foreign currency risks

Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's export revenue and Company's net investment in foreign subsidiaries. The Company does not hedge its foreign currency exposures.

The Company's management frequently monitors the trade receivables in foreign currency on a regular basis. The credit period extended to the foreign customers is restricted to not more than 180 days, thus ensuring that the exchange rate fluctuations does not materially affect the cash inflows in functional currency (INR).

The Company's exposure to the foreign currency risk is as follows:

| Particulars                            | Currency | 31 March 2023              |               | 31 March                   | 31 March 2022 |                            | 1 April 2021     |  |
|----------------------------------------|----------|----------------------------|---------------|----------------------------|---------------|----------------------------|------------------|--|

# Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD and EUR exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities. The Company's exposure to foreign currency changes for all other currencies is not material.

# Other price risks

The Company has a policy of investing its surplus funds in mutual funds, interest bearing term deposits and other highly marketable debt investments . The Company is exposed to price risk for investments that are classified as fair value through profit and loss. To manage its price risk, the Company diversifies its portfolio. Diversification and investment in the portfolio is done in accordance with Company's investment policy approved by the Board of Directors.

#### Cash flow hedges

To effectively manage the foreign currency risk, the Company has entered into foreign exchange forward contracts that are measured at fair value through OCI (i.e) forward contracts are designated as hedging instruments in cash flow hedges against highly probable forecast sales transactons in US Dollar and Euro.

The foreign exchange forward contract balances vary with the level of expected foreign currency sales and changes in foreign exchange forward rates.

| <b>Particulars</b>                               | March 31, 2023 |             | March 31, | March 31, 2022 |        | 1 April 2021 |  |
|--------------------------------------------------|----------------|-------------|-----------|----------------|--------|--------------|--|
|                                                  | Assets         | Liabilities | Assets    | Liabilities    | Assets | Liabilities  |  |
| Fair value of foreign currency forward contracts | -              | 4.58        | -         | -              | -      | -            |  |

The terms of the foreign currency forward contracts match the terms of the expected highly probable forecast transactions. As a result, no hedge ineffectiveness arises requiring recognition through profit and loss. Amounts of outstanding forward contracts are as follows:

| Nature of instrument | Purpose                          | Currency | March 31, 2023                      |                     | March 31, 2022                      |                     | 1 April 2021                        |                     |
|----------------------|----------------------------------|----------|-------------------------------------|---------------------|-------------------------------------|---------------------|-------------------------------------|---------------------|
|                      |                                  |          | Foreign<br>Currency In<br>Million * | In Rs.<br>Million * | Foreign<br>Currency In<br>Million * | In Rs.<br>Million * | Foreign<br>Currency In<br>Million * | In Rs.<br>Million * |
| Forward Contracts    | Hedging<br>of highly<br>probable | USD      | (1.20)                              | (99.05)             | -                                   | -                   | -                                   | -                   |
| Forward Contracts    | forecast sales                   | EURO     | (1.50)                              | (133.28)            | -                                   | -                   | -                                   |                     |

<sup>\*</sup>Amount in INR and foreign currency represents the amount of forward contracts purchased.

The cash flow hedges of the expected future sales during the year ended 31 March 2023 had a net unrealised loss of Rs. 4.58 millions (31 March 2022: Rs. Nil), with a deferred tax charge/credit of Rs. 1.15 millions (31 March 2022: Rs. Nil) relating to the hedging instruments, is included in other comprehensive income.

### (B) Credit risks

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, investment in mutual funds, other receivables and deposits, foreign exchange transactions and other financial instruments.

# (i) Trade receivables

Customer credit risk is managed by the Company's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored and reconciled. At 31 March 2023, receivable from Company's top 5 customers accounted for approximately 40.67 % (31 March 2022 : 48.11 %, 1 April 2021: 54.56%) of all the receivable outstanding. An impairment analysis is performed at each reporting date on an individual basis for major customers. The calculation is based on historical data and subsequent expectation of receipts. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and industries and operate in largely independent markets.

# (ii) Other receivables, deposits with banks, mutual funds and loans granted

Credit risk from balances with banks, financial institutions and mutual funds is managed in accordance with the Company's approved investment policy. Investments of surplus funds are made only with reputed banks and financial institutions were the counterparty risk is minimum.

The Company's maximum exposure to credit risk for the components of the Balance Sheet at 31 March 2023, 31 March 2022 and 1 April 2021 is the carrying amounts as illustrated in the respective notes.

# (C) Liquidity risks

Liquidity risk is the risk that the Company is unable to meet its existing or future obligations as they fall due, due to insufficient availability of cash or cash equivalents. The Company's approach to managing liquidity is to ensure, sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damages to Company's reputation.

The Company maintained a cautious liquidity strategy, with a positive cash balance throughout the year ended 31 March 2023, 31 March 2022 and 1 April 2021. Cash flow from operating activities provides the funds to service the financial liabilities on a day-to-day basis.

The Company regularly monitors the rolling forecasts to ensure it has sufficient cash on an ongoing basis to meet operational needs. Any short term surplus cash generated, over and above the amount required for working capital management and other operational requirements, is retained as cash and cash equivalents (to the extent required) and any excess is invested in liquid mutual funds, interest bearing term deposits and other highly marketable debt investments with appropriate maturities to optimise the cash returns on investments while ensuring sufficient liquidity to meet its liabilities.

The table below summarises the maturity profile of the Company's financial liabilities

(All amounts are in indian Rupees millions, unless otherwise stated)

| Particulars            | Less than 1 year | 1 - 5 Years | More than 5 years | Total    |
|------------------------|------------------|-------------|-------------------|----------|
| 31 March 2023          |                  |             |                   |          |

# 45 Capital management

For the purpose of the Company's capital management, capital includes issued equity share capital and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

The Company has adopted the objectives, policies or processes of Bharat Forge Limited (the ultimate holding company) for managing capital during the years ended 31 March 2023, 31 March 2022 and 1 April 2021

(All amounts are in indian Rupees millions, unless otherwise stated)

| Particulars              | 31 March 2023 | 31 March 2022 | 01 April 2021 |
|--------------------------|---------------|---------------|---------------|
| Equity share capital     | 39.68         | 39.68         | 39.68         |

# i) Fair value hierarchy

This section explains the judgments and estimates made in determining the fair values of the financial instruments that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

| Financial assets and liabilities measured at fair value - recurring fair value measurements | Level 1 | Level 2 | Level 3 | Total |
|---------------------------------------------------------------------------------------------|---------|---------|---------|-------|
| Total financial assets                                                                      |         |         |         |       |
| 31 March 2023                                                                               | 0.01    | -       | -       | 0.01  |
| 31 March 2022                                                                               | 19.40   | -       | -       | 19.40 |
| 1 April 2021                                                                                | 18.85   | -       | -       | 18.85 |
| Total financial liabilities                                                                 |         |         |         |       |
| 31 March 2023                                                                               | 4.58    | -       | -       | 4.58  |
| 31 March 2022                                                                               | -       | -       | -       | -     |
| 1 April 2021                                                                                | -       | -       | -       | -     |

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

#### ii) Fair value of financial assets and liabilities measured at amortised cost

The carrying amounts of trade receivables, cash and cash equivalents, lease liabilities, trade payables, long term borrowings, short term borrowings and all other financial assets and liabilities are considered to be the same as their fair values, due to their short-term nature.

### iii) Valuation technique used to determine fair value

Fair value of forward contracts outstanding as at the balance sheet date is determined using marked to market valuation received from bank.

#### iv) Valuation technique used to determine fair value

Fair value of market linked investments is determined using Net Asset Value ('NAV') report issued by mutual fund house.

# 47 First time adoption of Indian Accouting Standards

These financial statements, for the year ended 31 March 2023, are the first the Company has prepared in accordance with Ind AS. For periods up to and including the year ended 1 April 2021, the Company has prepared its financial statements in accordance with accounting standards notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 ('Indian GAAP').

Accordingly, the Company has prepared financial statements which comply with Ind AS applicable for periods ending on 31 March 2023, together with the comparative period data as at and for the year ended 31 March 2022, as described in the summary of significant accounting policies. In preparing these financial statements, the Company's opening balance sheet was prepared as at 1 April 2021, the Company's date of transition to Ind AS. This note explains the principal adjustments made by the Company in restating its Indian GAAP financial statements, including the balance sheet as at 1 April 2021 and the financial statements as at and for the year ended 31 March 2021.

# A. Exceptions applied

Ind AS 101 allows first time adopters certain exemptions and certain optional exceptions from the retrospective application of certain requirements under Ind AS as follows:

# 1) Estimates

The estimates at 1 April 2021 and at 31 March 2022 are consistent with those made for the same dates in accordance with Indian GAAP (after adjustments to reflect any differences in accounting policies) apart from the following items where application of Indian GAAP did not require estimation:

FVTOCI – unquoted and quoted equity shares

FVTPL - debt securities

Impairment of financial assets based on expected credit loss model

The estimates used by the Company to present these amounts in accordance with Ind AS reflect conditions at 1 April 2021, the date of transition to Ind AS and as of 31 March 2022.

## 2) Classification and measurement of financial assets

The Company has classified financial assets on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

# 3) Derecognition of financial assets and financial liabilities

The Company has elected to apply derecognition requirements for financial assets and financial liabilities as per Ind AS 109 prospectively for transactions occurring on or after the date of transition to Ind AS.

#### **Exemptions applied**

Ind AS 101 allows first-time adopters certain exemptions from the retrospective application of certain requirements under Ind AS. The Company has applied the following exemptions:

# 1) Deemed cost for Property, plant and equipment and Intangible assets

The Company has elected to continue with the carrying value for all of its property, plant and equipment and Intangible assets as recognised in the financial statements as at the date of transition to Ind ASs, measured as per the Indian GAAP and use that as its deemed cost as at the date of transition.

# **B** Reconciliations between previous GAAP and Ind AS

The following reconciliations provide the effect of transition to Ind AS from I GAAP in accordance with Ind AS 101

- 1 Balance sheet as at 1 April 2021 and 31 March 2022
- 2 Statement of profit and loss for the year ended 31 March 2022
- 3 Reconciliation of total equity as at 1 April 2021 and 31 March 2022
- 4 Reconciliation of total comprehensive income for the year ended 31 March 2022
- 5 Total comprehensive income for the year ended 31 March 2022
- 6 Cash flow statement for the year ended 31 March 2022

# (i) Reconciliation of assets, liabilities and equity as previously reported under IGAAP to Ind AS

| Opening Cash and cash equivalents                                              | 5    | 26.95         | 0.00                                 | 26.95    |
| Effect of exchange rate change on the balance of cash held in foreign currency |      |               | -                                    |          |
| Closing Cash and cash equivalents                                              |      | 23.76         | 0.00                                 | 23.77    |

### 1. Financials Instrument

#### a. Trade receivables

Under Indian GAAP, the Company has created provision for impairment of receivables which consists only in respect of specific amount for probable losses. Under Ind AS, impairment allowance has been determined based on Expected Credit Loss (ECL) model. Due to ECL model, the Company impaired its trade receivable by INR 9 million (net of related deferred tax) on 1 April 2021 which has been eliminated against other equity.

#### b. Mutual fund

Under Previous GAAP, current investments in instruments such as mutual funds are recognised at cost or net realisable value, whichever is lower. Under Ind AS, these investments are required to be measured at fair value. The resulting fair value changes of these investments have been recognised in retained earnings as at the date of transition and subsequently in Statement of profit and loss for the year ended 31 March 2023, 31 March 2022 and 1 April 20221.

#### 2. Leases

Under Previous GAAP, lease rentals were recognised as an expense after giving straight lining impact. Under Ind AS 116, the lessee shall recognise right of use assets and lease liabilities at the inception of lease. Right of use asset shall be depreciated over the lease period and lease liability shall be classified as financial liability and finance cost shall be charged on it for each reporting period. The above calculated amount is cumulative of depreciation on right-of-use assets, finance cost element and reversal of lease rent expenses. The Company recognised present value of lease payments as lease liability with corresponding recognition of right of use of assets (except for low value and short term leases).

#### 3. Defined benefit liabilities

- a. Both under Indian GAAP and Ind AS, the Company recognised costs related to its postemployment defined benefit plan on an actuarial basis. Under Indian GAAP, the entire cost, including actuarial gains and losses, are charged to the statement of profit and loss. Under Ind AS, remeasurements i.e. actuarial gains and losses and the return on plan assets, excluding amounts included in the net interest expense on the net defined benefit liability are recognised in other comprehensive income instead of Statement of Profit and Loss. There is no impact on total equity.
- b. Loyalty Bonus: In Indian GAAP, the provision of loyalty bonus is recognsied as at the balance sheet date. Under Ind AS, the Company has discounted the present value of future cash flows for certain components of loyalty bonus and obtained based on actuarial valuation report for other components to recognise the loyalty bonus payable accrual at each balance sheet date.

#### 4. Deferred Tax

Indian GAAP requires deferred tax accounting using the income statement approach, which focuses on differences between taxable profits and accounting profits for the period. Ind AS 12 requires entities to account for deferred taxes using the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base. This has resulted in recognition of deferred tax on new temporary differences which was not required under Indian GAAP.

In addition, the various transitional adjustments lead to temporary differences. According to the accounting policies, the Company has to account for such differences. Deferred tax adjustments are recognised in correlation to the underlying transaction either in other equity or a separate component of equity.

#### 5. Impact on cash flow

The transition from Previous GAAP to Ind AS has no material impact on the statement of cash flow except term loans and lease liabilities.

#### 6. Borrowings

The Company recognized the transaction costs pertaining to the borrowings immediately in the statement of profit and loss under Indian GAAP. The unamortized portion of such cost was recognized as part of 'prepaid expense' on the date of transition to Ind AS. As per Ind AS 109, borrowings are measured at amortized cost and hence, unamortized portion of transaction costs

has been adjusted against the amount of borrowings and not shown separately as part of assets and all the transaction costs are amortised over the period of loan.

# 48 Additional regulatory information required by Schedule III of the Act

# (a) Title deeds of immovable property not held in name of the Company

The title deeds of all immovable properties (other than those properties where the Company is the lessee and the lease agreements are executed in favour of the lessee) are held in the name of the Company.

# (b) Valuation of Property, plant and equipment

The Company has not revalued its Property, Plant and Equipment during the current or previous financial year. The Company does not hold any investment property.

# (c) Loans or advances granted to promoters, directors, Key Managerial Personnel (KMPs) and the related parties

The Company has not granted any loans or advances in the nature of loans to promoters, directors, KMPs and the related parties either severally or jointly with any other person.

# (d) Details of benami property held

No proceedings have been initiated on or are pending against the Company for holding benami property under the Benami Transactions (Prohibition) Act, 1988 (45 of 1988) and Rules made thereunder.

# (e) Reconciliation of returns or statements submitted with banks or financial institution

The Company has availed borrowings from banks on the basis of security of current assets. The periodical statements of current assets filed by the Company with such banks are in agreement with books of accounts of the Company.

### (f) Wilful defaulter

The Company has not been declared wilful defaulter by any bank or financial institution or other lenders.

#### (g) Relationship with struck off Companies

The Company has no transactions with companies struck off under the Companies Act, 2013 or the Companies Act, 1956.

# (h) Registration of charges or satisfaction with Registrar of Companies

The Company does not have any charge which is yet to be registered or satisfied with Registrar of Companies beyond the statutory period.

#### (i) Compliance with number of layers of companies

The Company has complied with the rules related to the number of layers of subsidiary prescribed under the Act.

# (j) Accounting ratios

|     | Ratio                            | 31 March 2023 | 31 March 2022 | % Change in ratio | Reasons          |
|-----|----------------------------------|---------------|---------------|-------------------|------------------|
| (a) | Current ratio                    | 1.08          | 0.85          | 27%               | Refer note (i)   |
| (b) | Debt-Equity ratio                | 1.91          | 1.35          | 41%               | Refer note (ii)  |
| (c) | Debt Service Coverage ratio      | 0.24          | 0.36          | -33%              | Refer note (ii)  |
| (d) | Return on equity ratio           | 0.13          | 0.09          | 43%               | Refer note (iii) |
| (e) | Inventory turnover ratio         | 3.52          | 3.79          | -7%               | NA*              |
| (f) | Trade receivables turnover ratio | 5.30          | 6.54          | -19%              | NA*              |
| (g) | Trade payables turnover ratio    | 7.68          | 9.24          | -17%              | NA*              |
| (h) | Net Capital turnover ratio       | 2.63          | 2.65          | -1%               | NA*              |
| (i) | Net Profit ratio                 | 0.02          | 0.02          | 0%                | NA*              |
| (j) | Return on Capital employed ratio | 0.13          | 0.17          | -27%              | Refer note (iii) |
| (k) | Return on investment ratio       | 0.04          | 0.04          | 14%               | NA*              |

NA\* - variance in ratio is not more than 25%, accordingly no explanation for variance is detailed out.

NA\*\* - the Company neither holds any inventories nor has any debts, accordingly the ratios are not aplicable.

- (a) Current Ratio = Current Assets / Current liabilities
- (b) Debt-Equity Ratio = Total Debt / Total equity
- (c) Debt Service Coverage Ratio = Earnings available for debt service / Debt service
- (d) Return on Equity Ratio = Profit for the year / Average equity
- (e) Inventory Turnover Ratio = Cost of Goods Sold / Average Inventory
- (f) Trade receivables turnover ratio = Revenue from operations / Average Trade receivables (including unbilled revenue)
- (g) Trade payables turnover ratio = Other expenses / Average Trade payables
- (h) Net capital turnover ratio = Revenue from operations / Average Working Capital (Current assets current liabilities)
- (i) Net profit ratio = Profit for the year / Revenue from operations
- (j) Return on Capital employed = EBIT / (Tangible networth +Total debt)
- (k) Return on investment = Profit for the year / (Debt + Total equity)

#### Ratios explanation:

- (i) During the current financial year, Bharat Forge Limited acquired all the issued, subscribed and paid up capital of the Company from the erstwhile shareholders and obtained control w.e.f 01 July 2022. After the acquisition, the overall working capital positions and cash flows arising from operations improved on account of many factors including but not limited to: availability of working capital funding at reduced rates (compared to previous years), funds infused by Bharat Forge Limited byt way of Inter-corporate deposits, improved product margins and contribution. Accordingly, the current ratio improved significantly.
- (ii) The management of the Company has planned future expansion programs and capital expenditure that will be mainly funded through debts. Accordingly, an additional term loan facility of Rs. 700.00 millions from InduInd bank was also sanctioned. This has resulted in an overall increase in debt equity ratio and simultaneous reduction in debt service coverage ratio.
- (iii) During the previous financial year, a loyalty bonus scheme for certain employees was formulated and an exceptional items of Rs. 173.28 million was accounted for. Accordingly,

the overall profitability of the Company was lower in the previous financial year as compared to the current financial year accordingly, the return on equity ratio of previous year was reduced.

(iv) The return on capital ratio has reduced significantly on account of simultaneous impacts of items mentioned in point (iii) and point (iv).

# (k) Compliance with approved scheme(s) of arrangements

The Company has not entered into any scheme of arrangement which has an accounting impact on current year or previous year.

# (I) Utilisation of borrowed funds and share premium

The Company has not advanced or granted any loan or invested funds to any other person(s) or entity(is), including foreign entities (Intermediaries) with the understanding that the Intermediary shall:

- a. directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company (Ultimate Beneficiaries) or
- b. provide any guarantee, security or the like to or on behalf of the ultimate beneficiaries.

The Company has not received any fund from any person(s) or entity(is), including foreign entities (Funding Party) with the understanding (whether recorded in writing or otherwise) that the Company shall:

- a. directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (Ultimate Beneficiaries) or
- b. provide any guarantee, security or the like on behalf of the ultimate beneficiaries.

#### (m) Undisclosed income

There is no income surrendered or disclosed as income, which is not recorded in books of accounts during the current or previous year in the tax assessments under the Income Tax Act, 1961.

# (n) Details of crypto currency or virtual currency

The Company has not traded or invested in crypto currency or virtual currency during the current or previous year.

- During the year, the Company has entered into a Business Transfer Agreement with Indo Shell Mould Limited for acquisition of its SEZ unit situated at SIPCOT Engineering SEZ for a total consideration of INR 600.50 million, subject to fulfilment of certain conditions as set forth in the agreement. As at the end of the year, the transaction is not yet concluded as the transferee is in the process of completing the conditions set out in the agreement.
- **50** The audit of previous year was conducted by a firm other than ANRK & Associates LLP.

#### 51 Prior year comparatives

Previous year figures have been regrouped / reclassified wherever necessary to correspond with the current year classification / disclosure.

#### **Report on the Audit of the Financial Statements**

# **Opinion**

We have audited the accompanying financial statements of **Kalyani Centre for Precision Technology Limited** ("the Company") which comprise the Balance Sheet as at 31<sup>st</sup> March, 2023, the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of changes in equity and the Statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its profit including other comprehensive income, the changes in equity and its cash flows for the year ended on that date.

# **Basis for Opinion**

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and We have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including Annexures to Board's Report, but does not include the financial statements and our auditor's report thereon. The Board's Report including Annexures to Board's Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and We will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Board's Report including Annexures to Board's Report if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take such actions as are required under the provisions of the Companies Act, 2013.

### Responsibility of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities;

selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

#### **Auditor's Responsibilities for Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
  or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
  is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
  collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If We conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

# **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, We give in the "**Annexure A**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company, so far as appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss including other comprehensive income, the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
  - d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - e) On the basis of written representations received from the directors as on 31<sup>st</sup> March, 2023, taken on record by the Board of Directors, none of the directors is disqualified as on 31<sup>st</sup> March, 2023, from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "**Annexure B**".
  - g) The Company has not paid any managerial remuneration during the financial year covered by this report. Accordingly, reporting requirements under section 197(16) of the Act do not apply to the Company.
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company does not have any pending litigations which would impact its financial position;
    - ii. The Company did not have any long-term contracts including derivatives contracts for which there were any material foreseeable losses;
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- c. Based on such audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) as provided under (a) and (b) above, contain any material misstatement.
- v. The Company has neither declared nor paid any dividend during the year.

"ANNEXURE A" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF KALYANI CENTRE FOR PRECISION TECHNOLOGY LIMITED FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2023.

In terms of the information and explanations sought by us and given by the Company and the books and records examined by us in the course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company has maintained proper records showing full particulars including quantitative details and situation of Property, Plant and Equipment and relevant details of right-of-use assets.
  - (B) The Company does not carry any intangible assets.
  - (b) The Company has a program of physical verification of Property, Plant and Equipment and rightof-use assets so to cover all the assets once every three years which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to the program, certain Property, Plant and Equipment were due for verification during the year and were physically verified by the Management during the year. According to the information and explanations given to us, no material discrepancies were noticed on such verification.
  - (c) The Company does not own any immovable properties.
  - (d) The Company has not revalued any of its Property, Plant and Equipment (including right-of-use assets) and intangible assets during the year.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at 31<sup>st</sup> March, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) The inventory comprising stock of Stores, spares, loose tools, scrap and work in progress was physically verified by the management during the year. In our opinion, the frequency of verification by the management is reasonable and the coverage and procedure for such verification is appropriate. Discrepancies of 10% or more in aggregate for each class of inventory were not noticed on such physical verification.
  - (b) According to the information and explanations given to us, the Company has been sanctioned working capital limits in excess of ₹ 5 crore, in aggregate, during the year, The Company is required to submit bi-monthly budgeted cash flow statements to the bank. Since the statements are filed on budgeted basis, the figures mentioned in the statements do not necessarily agree with the books of account.
- (iii) The Company has not made any investments in, provided any guarantee or security during the year to companies, firms, limited liability partnerships or any other parties. In respect of the loans or advances in the nature of loans, secured or unsecured, no amount has been granted by the Company during the year to companies, firms, limited liability partnerships or any other parties.
- (iv) In our opinion and according to the information and explanations given to us, the Company has not granted any loans in contravention of sections 185 and 186 of the Companies Act, 2013. The Company has not given any guarantee or provided security in connection with a loan to any other body corporate or person.
- (v) The Company has not accepted deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules framed, there under.
- (vi) Requirement to maintain cost records under sub-section (1) of section 148 of the Companies Act, 2013 does not apply to the Company.
- (vii) (a) According to the records of the Company, the Company was found to be regular in depositing undisputed statutory dues including Goods and Services Tax, provident fund, employees' state insurance, income-tax, duty of customs, duty of excise, goods and service tax, cess and any other statutory dues to the appropriate authorities. According to the information and explanations given

- to us, no undisputed amounts payable in respect of provident fund, employees' state insurance, income-tax, duty of customs, duty of excise, goods and service tax, cess and any other statutory dues were outstanding as at 31st March, 2023 for a period of more than six months from the date those became payable.
- (b) According to the records of the Company, there are no statutory dues which have not been deposited on account of any dispute.
- (viii) There were no transactions relating to previously unrecorded income that have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961.
- (ix) (a) In our opinion and according to the information and explanation given to us, the Company has not defaulted in repayment of loans or other borrowings or in the payment of interest, thereon, to any lender.
  - (b) According to the information and explanation given to us, the Company has not been declared as willful defaulter by any bank or financial institution or other lender.
  - (c) The Company has not taken any term loan during the year and there are no outstanding term loans at the beginning of the year. Hence, reporting under clause 3(ix)(c) of the Order is not applicable.
  - (d) On an overall examination of the financial statements of the Company, funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.
  - (e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
  - (f) The Company has not raised any loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies. Hence reporting under clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company did not raise any money by way of initial public offer or further public offer (including debt instruments) during the year. Accordingly, reporting under clause 3(x)(a) of the Order is not applicable.
  - (b) The Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) during the year. Hence reporting under clause 3(x)(b) of the Order is not applicable.
- (xi) (a) Based upon the audit procedures performed and the information and explanations given to us by the Management, we report that no fraud by the Company or no fraud on the Company has been noticed or reported during the year.
  - (b) No report under subsection (12) of section 143 of the Companies Act, 2013 was required to be filed by the auditors in Form ADT-4 as prescribed under rule 13 of the Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) According to the information and explanation given to us, the Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, reporting under clause 3(xii) of the Order is not applicable.
- (xiii) According to the records of the Company and according to the information and explanations given to us, the Company has not entered into any transactions with the related parties in contravention of the provisions of section 188 of the Companies Act, 2013. The details of related party transactions have been disclosed in the financial statements as required by the applicable accounting standards. Provisions of section 177 of the Act do not apply to the Company.
- (xiv) (a) In our opinion the Company has an adequate internal audit system commensurate with the size and the nature of its business.

# **Kalyani Centre for Precision Technology Limited**

- (b) We have considered, the internal audit reports for the year under audit, issued to the Company during the year and till date, in determining the nature, timing and extent of our audit procedures.
- (xv) According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with them. Accordingly, paragraph 3(xv) of the Order is not applicable.
- (xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.
  - (b) The Company has not conducted any Non-Banking Financial or Housing Finance activities requiring a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.
  - (c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India.
  - (d) In our opinion and according to the information and explanations given to us, there is no core investment company as part of the Group. Hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.
- (xvii) The Company has not incurred any cash losses during the financial year covered by this report and also in the preceding financial year.
- (xviii) There has been no resignation by the statutory auditors of the Company during the year.
- (xix) On the basis of the verification of the financial ratios, ageing and expected dates of the realization of financial assets and payment of financial liabilities and other information accompanying financial statements, and information and explanation given to us, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) Provisions of 135 of the Companies Act, 2013 do not apply to the Company. Hence, reporting under clause 3(xx) of the Order is not applicable.

"ANNEXURE B" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF KALYANI CENTRE FOR PRECISION TECHNOLOGY LIMITED FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2023.

We have audited the internal financial controls over financial reporting of **Kalyani Centre For Precision Technology Limited** ("the Company") as of 31<sup>st</sup> March, 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

# Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

# **Auditor's Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

# **Meaning of Internal Financial Controls over Financial Reporting**

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the Financial Statements.

# **Kalyani Centre for Precision Technology Limited**

# **Inherent Limitations of Internal Financial Controls over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

# **Opinion**

In our opinion, the Company has, in all material respects, internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31st March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# Notes forming part of the financial statements for the year ended 31st March, 2023

# **1** Corporate information:

Kalyani Centre For Precision Technology Limited ("the Company") is a public limited company incorporated on 25th December, 2019 under the provisions of Companies Act, 2013. The Company is engaged in the business of manufacturing of machined components.

The Company is a wholly owned subsidiary of Bharat Forge Limited.

Operating Cycle of the Company is considered to be of 12 months.

These Financial statements were authorised for issue in accordance with resolution of the Board of Directors on 24<sup>th</sup> April, 2023.

# 2 Significant accounting policies:

# 2.1 Basis of accounting and preparation of financial statements:

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013 (to the extent notified).

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- i Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The financial statements are presented in INR and all values are rounded to the thousand rupee.

#### 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or
- iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

## 2.3 Foreign currency transactions and translations:

The Company's financial statements are presented in INR, which is also the Company's functional currency. Items included in the financial statements are measured using functional currency.

#### a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

#### b) Exchange differences

Gains/losses arising out of fluctuations in the exchange rates are dealt with in the statement of profit and loss in the period in which they arise. In respect of assets and liabilities, the overall net loss or gain, if any, on conversion at the exchange rates prevailing on the date of balance sheet is charged to revenue.

#### 2.4 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- i Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

iii Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets, and significant liabilities, such as contingent consideration. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. Valuers are normally rotated every three years.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

## 2.5 Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

#### a) Sale of Goods:

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer.

The control of the goods manufactured in case of export sales is transferred usually on the date of issue of Bill of Lading while in case of domestic sales, the control is transferred usually on delivery of goods.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company considers the effect of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer, if any.

#### b) Sale of Services:

Revenue from sale of services is in nature of job work on customer product which normally takes 1-4 days for completion and accordingly revenue is recognised when products are sent to customer on which job work is completed. The normal credit period is 60 days.

## c) Contract assets:

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

#### d) Trade receivables:

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in note no. 2.13.

#### e) Contract liabilities:

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

#### f) Interest income:

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instruments (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

g) Profit / Loss on sale of investments:

Profit / Loss on sale of investments is recognised when all the significant risk and rewards of ownership in investment is transferred.

#### 2.6 Taxes:

Tax expense comprises current and deferred tax.

Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognized for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realized.

## Indirect taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of Indirect taxes paid, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

## 2.7 Property, plant and equipment:

Property, plant and equipment, capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including GST for which credit is not available. All the significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the profit or loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Assets under improvement to leased premises are fully depreciated over the lease period of the asset.

Depreciation for Property, plant and equipment is computed on straight line method based on useful lives, determined based on internal technical evaluation as follows:

| Type of Asset                                               | Useful lives estimated by the management |
|-------------------------------------------------------------|------------------------------------------|
| i) Plant and Machinery (including spares of capital nature) | 7 to 10 years                            |
| ii) Plant and Machinery - Computer                          | 3 years                                  |
| iii) Furniture and Fixtures                                 | 10 years                                 |
| iv) Office Equipments                                       | 5 years                                  |
| v) Power line                                               | 7 years                                  |

The Company, based on technical assessment made by a technical expert and management estimate, depreciates certain items of building, plant and equipment over estimated useful lives which are different from the useful life prescribed in Schedule II to the Companies Act, 2013. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Losses arising from the retirement of, and gains and losses arising from disposal of property plant and equipment which are carried at cost are recognised in the Statement of Profit and Loss.

An item of property, plant and equipment or any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

## 2.8 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is disposed.

## 2.9 **Leases**:

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Company as a lessee

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for

leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

#### i) Right of use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the Underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

| Type of Asset           |          |
|-------------------------|----------|
| i) Land and Building    | 10 Years |
| ii) Plant and equipment | 7 Years  |

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

#### ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liability and Right-of-use asset have been separately presented in the balance sheet and lease payments have been classified as financing cash flows.

#### iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

## The Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

#### 2.10 Inventories:

#### a) Raw Materials:

Raw materials and components, stores and spares and loose tools are valued at lower of cost and net realizable value. The costs are determined using the weighted average method.

## b) Work-in-progress:

Work-in-progress are valued at the lower of cost and net realisable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. The costs are determined using the weighted average method.

## 2.11 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable

amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or Group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

## 2.12 Provisions, Contingent Liabilities:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

#### 2.13 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

- A Financial Asset:
- a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

i Debt instruments at amortised cost

- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)

#### c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

#### d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

#### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

## f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes

such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

## g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

## h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- i Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each

reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument
- ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected under the head 'other expenses' in the P&L.

The balance sheet presentation for various financial instruments is described below:

- i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables.

#### b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

#### ii Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

## iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

## c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

#### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract — with the effect that some of the cash flows of

the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

#### D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                                                                                                                                             |
|----------------------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised Cost             | FVTPL                     | Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.                                                                                                                                 |
| FVTPL                      | Amortised Cost            | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.                                                                                                                             |
| Amortised Cost             | FVTOCI                    | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                                       |
| FVTOCI                     | Amortised Cost            | Fair value at reclassification date becomes its<br>new amortised cost carrying amount. However,<br>cumulative gain or loss in OCI is adjusted against<br>fair value. Consequently, the asset is measured as<br>if it had always been measured at amortised cost. |
| FVTPL                      | FVTOCI                    | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                            |

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                                    |  |  |  |
|----------------------------|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|
| FVTOCI                     | FVTPL                     | Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date. |  |  |  |

## **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

## 2.14 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

## 2.15 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

#### 2.16 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

## 2.17 Earnings per share:

Basic earnings per share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit attributable to the equity holders of the Company as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

#### 2.18 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

## 2.19 Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting

principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

|                          | Total: | 540.00 | 500.00 |

<sup>#</sup>Miscellaneous expenses includes, travelling expenses, printing, stationery, postage, telephone, etc.

## 28 Disclosure pursuant to Ind AS 19 on "Employee Benefits"

#### (a) Defined contribution plans:

The Company makes Provident Fund contributions to defined contribution retirement benefit plans for qualifying employees. Under the schemes, the Company is required to contribute a specified percentage of the payroll costs to the funds. The Company recognized ₹ 1,090.25 thousands (Previous Year:₹ 523.23 thousands) for the provident fund contributions in the statement of profit and loss. The contributions payable to this plan by the Company are at the rates specified in respective legislations.

#### (b) Gratuity plan:

The present value of defined benefit obligation and the related current service costs are measured using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date.

The gratuity benefits are governed by the Payment of Gratuity Act, 1972. Under the Act, every employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age. Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn) for each completed year of service as per the provisions of the Payment of Gratuity Act, 1972. The Plan is funded as on the valuation date.

Provision of a defined benefit scheme poses certain risks, some of which are detailed hereunder, as companies take on uncertain long term obligations to make future benefit payments.

#### 1) Liability Risks

#### a) Asset-Liability Mismatch risk-

Risk which arises if there is a mismatch in the duration of the assets relative to the liabilities. By matching duration with the defined benefit liabilities, the company is successfully able to neutralize valuation swings caused by interest rate movements. Hence companies are encouraged to adopt asset-liability management.

#### b) Discount Rate Risk

Variations in the discount rate used to compute the present value of the liabilities may seem small, but in practise can have a significant impact on the defined benefit liabilities.

## c) Future Salary Escalation and Inflation Risk

Since price inflation and salary growth are linked economically, they are combined for disclosure purposes. Rising salaries will often result in higher future defined benefit payments resulting in a higher present value of liabilities especially unexpected salary increases provided at management's discretion may lead to uncertainties in estimating this increasing risk.

## 2) Asset Risks

#### Unfunded Plan Risk

This represents unmanaged risk and a growing liability. The reisaninherent risk herethat the Company may default on paying the benefits in adverse circumstances. Funding the plan removes volatility in Company's financials and also benefit risk through return on the funds made available for the plan.

The following table summarises the components of net benefit expense recognised in the statement of profit and loss and the funded status and amounts recognised in the balance sheet for the gratuity plan.

# The principal assumptions used in determining gratuity for the Company's plan is shown below:

## Sensitivity analysis

Impact of change in discount rate when base assumption is decreased/increased by 100 basis points (In ₹ Thousands)

| Discount rate                                 | Present value of obligation                |                                            |
|-----------------------------------------------|--------------------------------------------|--------------------------------------------|
|                                               | Year ended<br>31 <sup>st</sup> March, 2023 | Year ended<br>31 <sup>st</sup> March, 2022 |
|                                               |                                            |                                            |
| Increase in discount rate by 100 basis points | 148.02                                     | 56.43                                      |
| Decrease in discount rate by 100 basis points | 190.37                                     | 72.61                                      |

Impact of change in salary growth rate when base assumption is decreased/increased by 100 basis points

#### Salary growth rate

| Increase in salary growth rate by 100 basis points | 188.49 | 71.88 |
|----------------------------------------------------|--------|-------|
| Decrease in salary growth rate by 100 basis points | 149.16 | 56.88 |

Impact of change in withdrawal rate when base assumption is decreased/increased by 100 basis points

#### Withdrawal rate

| Increase in withdrawal rate by 100 basis points | 168.13 | 63.95 |
|-------------------------------------------------|--------|-------|
| Decrease in withdrawal rate by 100 basis points | 165.89 | 63.45 |

The estimates of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The sensitivity analyses above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

# The followings are the expected contributions to the defined benefit plan in future years to the extent certified by the actuary:

|                                                          |                  | (In ₹ Thousands)             |
|----------------------------------------------------------|------------------|------------------------------|
| Year Ending                                              | 31st March, 2023 | 31 <sup>st</sup> March, 2022 |
| Within the next 12 months (next annual reporting period) | -                | -                            |

#### (c) Other Long Term Employee Benefits:

The table below gives summary of the Company's obligations for other long term employee benefits in the form of compensated absences.

|                                                       | As at 31 <sup>st</sup> March, 2023 | As at 31st March, 2022 |
|-------------------------------------------------------|------------------------------------|------------------------|
| Present Value of Obligation                           | 142.77                             | 48.66                  |
| Fair Value of Plan Assets                             | -                                  | -                      |
| Net asset/(liability) recognized in the Balance Sheet | (142.77)                           | (48.66)                |

## 29 Segment reporting

Information reported to the chief operating decision maker (CODM) for the purposes of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided. The Company is engaged in the business of manufacturing of machined components; which in the context of Indian Accounting Standard 108 'Segment Information' represent single reportable business segment. The accounting policies of the reportable segments are the same as the accounting policies disclosed in Note 2. The revenues, total expenses and net profit as per the Statement of Profit and Loss represents the revenue, total expenses and the net profit of the sole reportable segment.

The information has been given in respect of such vendors to the extent they could be identified as "Micro and Small" enterprises on the basis of information available with the Company

## 35 Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. These estimates are reviewed regularly and any change in estimates are adjusted prospectively.

## a) Revenue recognition

The Company's contracts with customers could include promises to transfer multiple services to a customer. The Company assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables.

Judgement is also required to determine the transaction price for the contract. The transaction price could be either a fixed amount of customer consideration or variable consideration with elements such as volume discounts, service level credits, performance bonuses, price concessions and incentives. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component. Any consideration payable to the customer is adjusted to the transaction price, unless it is a payment for a distinct product or service from the customer. The estimated amount of variable consideration is adjusted in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur and is reassessed at the end of each reporting period. The Company allocates the elements of variable considerations to all the performance obligations of the contract unless there is observable evidence that they pertain to one or more distinct performance obligations.

The Company uses judgement to determine an appropriate standalone selling price for a performance obligation. The Company allocates the transaction price to each performance obligation on the basis of the relative standalone selling price of each distinct product or service promised in the contract. Where standalone selling price is not observable, the Company uses the expected cost plus margin approach to allocate the transaction price to each distinct performance obligation.

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

Revenue for fixed-price contract is recognised using percentage-of-completion method. The Company uses judgement to estimate the future cost-to-completion of the contracts which is used to determine the degree of completion of the performance obligation.

#### b) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer note 37 and 38 for further disclosures.

## c) Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Company.

## d) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### e) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon acertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availabliity of adquate taxable income within the time permissible as per the taxing legislations.

#### f) Current / Non-Current Classification

The Company evaluates funds requirement on the basis of internal budgets and forecasts and believes that on the basis of current scale of operations and cash realisation cycle, it would be able to generate sufficient funds from operations in order to meet such requirement in the foreseeable future of upto one year.

#### **36** Financial instruments by category

The following table presents the carrying amounts and fair value of each category of financial assets and liabilities:

(In ₹ Thousands)

|                                                    | Carrying         | value            | Fair va          | alue             |

| Financial liabilities  Measured at amortised costs |                  |                  |                  |                  |
| Lease liabilities                                  | 266,952.37       | 98,505.28        | 266,952.37       | 98,505.28        |
| Current Borrowings                                 | -                | 50,009.25        | -                | 50,009.25        |
| Trade payables                                     | 64,545.18        | 56,469.44        | 64,545.18        | 56,469.44        |
| Other current financial liabilities                | 149.50           | 88.50            | 149.50           | 88.50            |
| Total :                                            | 331,647.05       | 205,072.47       | 331,647.05       | 205,072.47       |

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

#### **37** Fair Value Hierarchy

There are no financial instruments that are measured subsequent to initial recognition at fair value. Hence, disclosure of the fair value hierarchy of assets and liabilities measured at fair value is not applicable.

#### 38 Financial risk management disclosure

The Company's principal financial liabilities, other than derivatives, comprise trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include deposits, trade and other receivables and cash and cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management that advises on financial risks and the appropriate financial risk governance framework for the Company. The Company's senior management provides assurance for the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

#### a) Market risk:

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

The sensitivity analyses in the following sections relate to the position as at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022.

The analyses exclude the impact of movements in market variables on: the carrying values of gratuity and other post retirement obligations; provisions.

The following assumptions have been made in calculating the sensitivity analyses:

The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022 including the effect of hedge accounting (if any).

#### i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

#### ii) Foreign Currency Risk:

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency).

The Company does not hedges its exposure to fluctuations on the translation into INR of its foreign operations.

#### iii) Foreign Currency Sensitivity:

The Company does not have exposure to foreign currency changes as at the end of the financial year.

## b) Credit risk:

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, and other financial instruments.

## i) Trade Receivables:

Customer credit risk is managed by the Company's established policy, procedures and control relating to customer credit risk management. Further, currently Company's customers mainly includes its, Holding Company. Outstanding customer receivables are regularly monitored and reconciled. An impairment analysis is performed at each reporting date on an individual basis for major customers. The Company does not hold collateral as security. The Company evaluates the concentration of risk with respect to trade receivables as low.

#### ii) Financial instruments and cash deposits:

Credit risk from balances with banks and financial institutions is managed by the Company's management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

## c) Liquidity risk:

The Company monitors its risk of a shortage of funds using a liquidity planning tool. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, preference shares, finance leases and hire purchase contracts. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

a) Due to the increse in the turnove and also due to increased profitability current assests are improved and also the company has paid verious liabilities during the year. This has resulted in the improved ratio.

b) The has achieved growth in the revenue as well as in the profitability of during the year. Hence the ratio related to the same has improved significantly.

#### 40 Disclosure pursuant to Ind AS 115 on "Revenue from contracts with customers"

#### a) Trade receivables and Contract balances:

The company classifies the right to consideration in exchange for deliverables as either a receivable or as unbilled revenue.

A receivable is a right to consideration that is unconditional upon passage of time. Revenue for time and material contracts are recognized as related service are performed. Revenue for fixed price maintenance contracts is recognized on a straight line basis over the period of the contract. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset for these cases as right to consideration is unconditional upon passage of time.

Revenue recognition for fixed price contracts is based on percentage of completion method. Invoicing to the clients is based on completion of the contract. This would result in the timing of revenue recognition being different from the timing of billing the customers. Unbilled revenue for fixed price development contracts is classified as non financial asset as the contractual right to consideration is dependent on completion of contractual milestones.

Invoicing in excess of earnings are classified as unearned revenue.

Trade receivable and unbilled revenues are presented net of impairment in the Balance Sheet.

During the year ended 31st March, 2023 Rs. NIL (Previous Year: Rs. NIL) of unbilled revenue pertaining to fixed price development contracts has been reclassified to Trade receivables upon billing to customers on completion of contracts.

- b) Changes in Contract Assets during the year ended 31st March, 2023 Rs. NIL (Previous Year : Rs. NIL)
- c) Changes in Contract Liabilities during the year ended 31<sup>st</sup> March, 2023 Rs. NIL (Previous Year : Rs. NIL)

## d) Performance obligations and remaining performance obligations :

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognized as at the end of the reporting period and an explanation as to when the Company expects to recognize these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts where the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date, typically those contracts where invoicing is on time and material basis. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revalidations, adjustment for revenue that has not materialized and adjustments for currency.

Reconciliation for revenue as per Statement of profit & loss and the contracted price arising on account of various adjustments:

#### **Independent Auditor's Report**

## To the Members of Kalyani Lightweighting Technology Solutions Limited

#### **Report on the Audit of the Financial Statements**

#### **Opinion**

We have audited the accompanying financial statements of **Kalyani Lightweighting Technology Solutions Limited** ("the Company") which comprises the Balance Sheet as at 31<sup>st</sup> March, 2023, the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of changes in equity and the Statement of cash flows for the period ended to 31<sup>st</sup> March, 2023, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its loss including other comprehensive income, the changes in equity and its cash flows for the period ended on that date.

## **Basis for opinion**

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Information other than the financial statements and auditor's report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including annexures to Board's Report, but does not include the financial statements and our auditor's report thereon. The Board's Report including annexures to Board's Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Board's Report including annexures to Board's Report if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take such actions as are required under the provisions of the Companies Act, 2013.

#### Responsibility of management and those charged with governance for the financial statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities;

selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

#### Auditor's responsibilities for audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

## **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "**Annexure A**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company, so far as appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss including other comprehensive income, the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
  - d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - e) On the basis of written representations received from the directors as on 31<sup>st</sup> March, 2023, taken on record by the Board of Directors, none of the directors is disqualified as on 31<sup>st</sup> March, 2023, from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "**Annexure B**".
  - g) The Company has not paid any managerial remuneration during the financial year covered by this report. Accordingly, reporting requirements under section 197(16) of the Act do not apply to the Company.
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company does not have any pending litigations which would impact its financial position;
    - ii. The Company did not have any long-term contracts including derivatives contracts for which there were any material foreseeable losses;
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- c. Based on such audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) as provided under (a) and (b) above, contain any material misstatement.
- v. The Company has neither declared nor paid any dividend during the year.

"ANNEXURE A" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF KALYANI LIGHTWEIGHTING TECHNOLOGY SOLUTIONS LIMITED FOR THE PERIOD ENDED 31st MARCH, 2023.

In terms of the information and explanations sought by us and given by the Company and the books and records examined by us in the course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company does not have any Property, Plant and Equipment as on 31st March, 2023. Hence, paragraph 3(i)(a)(A) of the Order is not applicable to the Company.
  - (B) The Company does not have any Intangible Assets as on 31<sup>st</sup> March, 2023. Hence, paragraph 3(i)(a)(B) of the Order is not applicable to the Company.
  - (b) The Company does not have any Property, Plant and Equipment as on 31<sup>st</sup> March, 2023. Hence, paragraph 3(i)(b) of the Order is not applicable to the Company.
  - (c) The Company does not own any immovable properties.
  - (d) The Company does not have any Property, Plant and Equipment (including right-of-use assets) and intangible assets. Hence, paragraph 3(i)(d) of the Order is not applicable to the Company.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at 31<sup>st</sup> March, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) As explained to us, the Company was not required to hold any inventories during the period covered by this report. Hence, paragraph 3(ii)(a) of the Order is not applicable to the Company.
  - (b) The Company has not been sanctioned working capital limits in excess of ₹ 5 crore, in aggregate, at any point of time during the year, from banks or financial institutions on the basis of security of current assets and hence reporting under clause 3(ii)(b) of the Order is not applicable.
- (iii) The Company has not made any investment, provided guarantee or security, granted any loans or advances in the nature of loan, secured or unsecured to companies, firms, limited liability partnerships or other parties.
- (iv) The Company has neither given any loan to any person or other body corporate nor given any guarantee or provided security in connection with a loan to any other body corporate or person. Similarly, the Company has also not acquired by way of subscription, purchase or otherwise, the securities of any other body corporate.
- (v) The Company has not accepted deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules framed, there under.
- (vi) The requirement to maintain cost records under sub-section (1) of section 148 of the Companies Act, 2013 does not apply to the Company.
- (vii) (a) According to the records of the Company, the Company does not have any undisputed statutory dues including Goods and Services Tax, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities. As explained to us by the Management, the provisions of the Employees' State Insurance Act, 1948 and the Employees' Provident Fund and Miscellaneous Provisions Act 1952 do not apply to the Company. According to the information and explanations given to us, no undisputed amounts payable in respect of income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax and any other statutory dues were outstanding as at 31st March, 2023 for a period of more than six months from the date those became payable.
  - (b) According to the records of the Company, there are no statutory dues which have not been deposited on account of any dispute.
- (viii) As this is the first year after incorporation, there were no transactions relating to previously unrecorded income that have been surrendered or disclosed as income during the year in the tax assessments under

the Income Tax Act, 1961. Hence reporting under clause 3(viii) of the Order is not applicable.

- (ix) (a) In our opinion and according to the information and explanation given to us, the Company has not taken any loans or other borrowing Hence, reporting under clause 3(ix)(a) of the Order is not applicable.
  - (b) According to the information and explanation given to us, the Company has not been declared as willful defaulter by any bank or financial institution or other lender.
  - (c) The Company has not taken any term loan during the year and there are no outstanding term loans at the beginning of the year. Hence, reporting under clause 3(ix)(c) of the Order is not applicable.
  - (d) On an overall examination of the financial statements of the Company, funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.
  - (e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
  - (f) The Company has not raised any loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies. Hence reporting under clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company did not raise any money by way of initial public offer or further public offer (including debt instruments) during the year. Accordingly, paragraph 3(x) (a) of the Order is not applicable.
  - (b) The Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) during the year. Hence reporting under clause 3(x)(b) of the Order is not applicable.
- (xi) (a) Based upon the audit procedures performed and the information and explanations given to us by the Management, we report that no fraud by the Company or no fraud on the Company has been noticed or reported during the period.
  - (b) No report under subsection (12) of section 143 of the Companies Act, 2013 was required to be filed by the auditors in Form ADT-4 as prescribed under rule 13 of the Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) The Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, paragraph 3(xii) of the Order is not applicable.
- (xiii) According to the records of the Company and according to the information and explanations given to us, the Company has not entered into any transactions with the related parties in contravention of the provisions of section 188 of the Companies Act, 2013. The details of related party transactions have been disclosed in the financial statements as required by the applicable accounting standards. Provisions of section 177 of the Act do not apply to the Company.
- (xiv) The provisions of section 138 of the Companies Act, 2013 do not apply to the Company and no internal audit was carried out during the year. Hence, reporting under clause 3(xiv) of the Order is not applicable.
- (xv) According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with them. Accordingly, paragraph 3(xv) of the Order is not applicable.
- (xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.
  - (b) The Company has not conducted any Non-Banking Financial or Housing Finance activities requiring a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.

## Kalyani Lightweighting Technology Solutions Limited

- (c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India.
- (d) In our opinion and according to the information and explanations given to us, there is no core investment company as part of the Group. Hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.
- (xvii) The Company has incurred the following amounts of cash losses during the financial year covered by this report.

|                      | Current Financial Year<br>(₹ in Hundreds) |
|----------------------|-------------------------------------------|
| Cash losses incurred | 1,027.41                                  |

- (xviii) There has been no resignation by the statutory auditors of the Company during the year.
- (xix) On the basis of the verification of the financial ratios, ageing and expected dates of the realization of financial assets and payment of financial liabilities and other information accompanying financial statements, and information and explanation given to us nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) Provisions of 135 of the Companies Act, 2013 do not apply to the Company. Hence, reporting under clause 3(xx) of the Order is not applicable.

Date: 2<sup>nd</sup> May, 2023

"Annexure B" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF KALYANI LIGHTWEIGHTING TECHNOLOGY SOLUTIONS LIMITED FOR THE PERIOD ENDED 31<sup>ST</sup> MARCH, 2023.

We have audited the internal financial controls over financial reporting of **Kalyani Lightweighting Technology Solutions Limited** ("the Company") as of 31<sup>st</sup> March, 2023 in conjunction with our audit of the financial statements of the Company for the period ended on that date.

## Management's responsibility for internal financial controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

## **Auditor's responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### Meaning of internal financial controls over financial reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

## Kalyani Lightweighting Technology Solutions Limited

## Inherent limitations of internal financial controls over financial reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **Opinion**

In our opinion, the Company has, in all material respects, internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31st March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

## Notes forming part of the financial statements for the period ended 31st March, 2023

## 1 Corporate information:

Kalyani Lightweighting Technology Solutions Limited was incorporated on 12<sup>th</sup> July, 2022, as a public limited company under the Companies Act, 2013. The Company is a 100% subsidiary of Bharat Forge Limited.

During the period covered by these financial statements, the Company was engaged in setting up the business of aluminum components and other components , its machining, designing and development for automotive and industrial applications. Also undertake the business of assembly, testing, integration, fabricating, forging, casting, trading, marketing, sales, providing services, spares support, aftersales support, R&D for aluminium components and other components for automotive and industrial applications.

These financial statements have been prepared for the period from the date of incorporation, i.e. 12<sup>th</sup> July, 2022 to 31<sup>st</sup> March, 2023. This being the first year, the question of providing previous year's figures does not arise.

These financial statements were authorised for issue in accordance with resolution of the Board of Directors on 2<sup>nd</sup> May, 2023

#### 2 Significant accounting policies:

#### 2.1 Basis of accounting and preparation of financial statements:

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013 (to the extent notified).

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The financial statements are presented in INR and all values are rounded to the nearest Hundred.

## 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or

## Kalyani Lightweighting Technology Solutions Limited

iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

## 2.3 Foreign currency transactions and translations:

The Company's financial statements are presented in INR, which is also the Company's functional currency. Items included in the financial statements are measured using functional currency.

a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

### 2.4 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- i Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

iii Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets, and significant liabilities, such as contingent consideration. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. Valuers are normally rotated every three years.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

#### 2.5 Taxes:

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognized for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realized.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the guidance note on "Accounting for Credit Available in respect of Minimum Alternative Tax" under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

#### Indirect taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of Indirect taxes paid, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

#### 2.6 Property, plant and equipment:

Property, plant and equipment, capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including GST for which credit is not available. All the significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the profit or loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the

date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Assets under improvement to leased premises are fully depreciated over the lease period of the asset.

Losses arising from the retirement of, and gains and losses arising from disposal of property plant and equipment which are carried at cost are recognised in the Statement of Profit and Loss.

An item of property, plant and equipment or any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

## 2.7 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is disposed.

#### 2.8 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations,

which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or Group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

## 2.9 Provisions, Contingent Liabilities:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

#### 2.10 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial Asset:

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

## b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)

#### c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

#### d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

## Kalyani Lightweighting Technology Solutions Limited

#### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

## h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and

#### credit risk exposure:

- i Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- iv Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument
- ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected under the head 'other expenses' in the P&L.

The balance sheet presentation for various financial instruments is described below:

- i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

## Kalyani Lightweighting Technology Solutions Limited

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

## a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables.

#### b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

#### i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

#### ii Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

#### iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a

liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

#### c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

#### **C** Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

#### D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                                                                                                                                 |
|----------------------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised Cost             | FVTPL                     | Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.                                                                                                                     |
| FVTPL                      | Amortised Cost            | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.                                                                                                                 |
| Amortised Cost             | FVTOCI                    | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                           |
| FVTOCI                     | Amortised Cost            | Fair value at reclassification date becomes its new amortised cost carrying amount. However, cumulative gain or loss in OCI is adjusted against fair value. Consequently, the asset is measured as if it had always been measured at amortised cost. |
| FVTPL                      | FVTOCI                    | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                |
| FVTOCI                     | FVTPL                     | Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date.                                                                                              |

#### **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

## 2.11 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

#### 2.12 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

#### 2.13 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

#### 2.14 Earnings per share:

Basic earnings per share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit attributable to the equity holders

of the Company as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

#### 2.15 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

#### 2.16 Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

# 10 Segment reporting

Information reported to the chief operating decision maker (CODM) for the purposes of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided. The Company was engaged in setting up the business of manufacturing of aluminum components and other components , its machining, designing and development for automotive and industrial applications; which in the context of Indian Accounting Standard 108 'Segment Information' represents single reportable business segment. The accounting policies of the reportable segments are the same as the accounting policies disclosed in Note 2. The revenues, total expenses and net profit/(loss) as per the Statement of Profit and Loss represents the revenue, total expenses and the net profit/(Loss) of the sole reportable segment.

## 13 Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. These estimates are reviewed regularly and any change in estimates are adjusted prospectively.

In the process of applying the Company's accounting policies, management has made the following significant judgements, estimates and assumptions which have the most significant effect on the amounts recognised in the financial statements.

#### a) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer note 14 and 15 for further disclosures.

## b) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### c) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon ascertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availability of adequate taxable income within the time permissible as per the taxing legislations.

#### d) Current / Non-Current Classification

The Company evaluates funds requirement on the basis of internal budgets and forecasts and believes that on the basis of current scale of operations and cash realisation cycle, it would be able to generate sufficient funds from operations in order to meet such requirement in the foreseeable future of upto one year.

## 14 Financial instruments by category

Set out below, is a comparison by class of the carrying amounts and fair value of the Company's financial instruments:

(In ₹ Hundreds)

|     |                             | (=::::::::::::::::::::::::::::::::::::: |            |  |
|-----|-----------------------------|-----------------------------------------|------------|--|
|     |                             | As at 31st March, 2023                  |            |  |
|     |                             | Carrying value                          | Fair value |  |
| I)  | Financial assets            |                                         |            |  |
|     | Measured at amortised costs |                                         |            |  |
|     | Cash and cash equivalents   | 100.00                                  | 100.00     |  |
|     | Total                       | 100.00                                  | 100.00     |  |
| II) | Financial liabilities       |                                         |            |  |
|     | Measured at amortised costs |                                         |            |  |
|     | Trade Payables              | 1,025.73                                | 1,025.73   |  |
|     | Total                       | 1,025.73                                | 1,025.73   |  |

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

#### **15** Fair value hierarchy

There are no financial instruments that are measured subsequent to initial recognition at fair value. Hence, disclosure of the fair value hierarchy of assets and liabilities measured at fair value is not applicable.

## 16 Financial risk management disclosure

The Company's principal financial liabilities, other than derivatives, comprise trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include Cash and cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a financial risk committee that advises on financial risks and the appropriate financial risk governance framework for the Company. The financial risk committee provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

## a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

#### i) Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating

activities (when revenue or expense is denominated in a foreign currency).

The Company does not hedges its exposure to fluctuations on the translation into INR of its foreign operations.

## b) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities and from its financing activities, including deposits with banks and financial institutions, and other financial instruments.

## i) Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company's management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

## c) Liquidity risk

The Company monitors its risk of a shortage of funds using a liquidity planning tool. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, preference shares, finance leases and hire purchase contracts. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

(In ₹ Hundreds)

|                        | Less than 1 year | 1 year to 5 years | > 5 years | Total    |
|------------------------|------------------|-------------------|-----------|----------|
| As at 31st March, 2023 |                  |                   |           |          |
| Trade payables         | 1,025.73         | -                 | -         | 1,025.73 |
|                        | 1,025.73         | -                 | -         | 1,025.73 |

#### 17 Income tax

Reconciliation of tax expense and the accounting profit multiplied by India's domestic tax rate for 31st March, 2023:

|                                                                 | As at            |
|-----------------------------------------------------------------|------------------|
|                                                                 | 31st March, 2023 |
| Accounting loss before tax                                      | (1,027.41)       |
| At India's enacted tax rate of 26.00%                           | -                |
| Deferred tax savings on current year accounting loss            | -                |
| Tax effect of non-deductible expenses                           | -                |
| Deferred tax not recognised on prudence basis                   | -                |
| At the effective income tax rate of 26%                         | -                |
| Income tax expense reported in the statement of profit and loss |                  |
|                                                                 |                  |

#### 18 Ratio analysis

|                                   | Numerator                  | Denominator            | 31st March, 2023 |
|-----------------------------------|----------------------------|------------------------|------------------|
| (a) Current ratio                 | Current Assets             | Current Liabilities    | 0.15             |
| (b) Trade payables turnover ratio | Purchases + Other expenses | Average trade payables | 2.00             |

#### Notes:

(i) Since there is a negative net worth and losses during the current financial year following rations can not be derived.

Return on equity ratio

Net profit ratio

Net capital turnover ratio

Return on capital employed

- (ii) The Company does not hold any Inventrory form the date of incorporation till year end hence inventory Turnover Ratio can not be derived
- (iii) Since this is the first year after incorporation the Company, the variance analysis of ratios is not applicable.

## 19 Other Statutory Information

- a) In the opinion of the Directors, all the current assets have been stated in the balance sheet at least at a value at which those are expected to be realised in the ordinary course of business. The Directors also have to state that adequate provisions have been made in the accounts, in respect of all known, quantified and ascertained liabilities and none of the liabilities or provisions are in the nature of reserve.
- b) No Proceedings have been initiated or pending against the company for holding any Benami Property under the Benami Transactions (Prohibition) Act, 1988.
- c) The company did not have any transactions with companies struck off under section 248 or section 560 of the Companies Act, 2013.
- d) The Company has not traded or invested in Crypto currency or Virtual Currency during the financial year.

## **Independent Auditor's Report**

## To the Members of Kalyani Powertrain Limited

# **Report on the Audit of the Standalone Financial Statements**

## **Opinion**

We have audited the accompanying standalone financial statements of **Kalyani Powertrain Limited** ("the Company") which comprises the Standalone Balance Sheet as at 31st March, 2023, the Standalone Statement of Profit and Loss, including the Standalone Statement of Other Comprehensive Income, the Standalone Statement of changes in equity and the Standalone Statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its loss including other comprehensive income, the changes in equity and its cash flows for the year ended on that date.

## **Basis for Opinion**

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and We have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Information Other than the Standalone Financial Statements and Auditor's Report Thereon**

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including Annexures to Board's Report, but does not include the standalone financial statements and our auditor's report thereon. The Board's Report including Annexures to Board's Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the standalone financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Board's Report including Annexures to Board's Report if we conclude that there is a material misstatement therein, We are required to communicate the matter to those charged with governance and take such actions as are required under the provisions of the Companies Act, 2013.

# Responsibility of Management and Those Charged with Governance for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in

India. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

## **Auditor's Responsibilities for Audit of the Standalone Financial Statements**

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, We are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that We identify during our audit.

# **Kalyani Powertrain Limited**

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

# **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "**Annexure A**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company, so far as appears from our examination of those books.
  - c) The Standalone Balance Sheet, the Standalone Statement of Profit and Loss including other comprehensive income, the standalone Statement of Changes in Equity and the Standalone Cash Flow Statement dealt with by this Report are in agreement with the books of account.
  - d) In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - e) On the basis of written representations received from the directors as on 31<sup>st</sup> March, 2023, taken on record by the Board of Directors, none of the directors is disqualified as on 31<sup>st</sup> March, 2023, from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the internal financial controls with reference to standalone financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".
  - g) In our opinion the managerial remuneration for the year ended 31<sup>st</sup> March, 2023 has been paid / provided by the Company to its directors in accordance with the provisions of section 197 read with Schedule V to the Act.
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2020, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company does not have any pending litigations which would impact its financial position;
    - ii. The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts. The Company did not have any long-term derivative contracts;
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any quarantee, security or the like on behalf of the Ultimate Beneficiaries;

- b. The management has represented, that, to the best of its knowledge and belief, other than as disclosed in Note 46 no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
- c. Based on such audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) as provided under (a) and (b) above, contain any material misstatement.
- v. The Company has neither declared nor paid any dividend during the year.

Date: 2<sup>nd</sup> May, 2023

"ANNEXURE A" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE STANDALONE FINANCIAL STATEMENTS OF KALYANI POWERTRAIN LIMITED FOR THE YEAR ENDED 31st MARCH, 2023.

In terms of the information and explanations sought by us and given by the Company and the books and records examined by us in the normal course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company has maintained proper records showing full particulars including quantitative details and situation of Property, Plant and Equipment and relevant details of right-of-use assets.
  - (B) The Company has maintained proper records showing full particulars of intangible assets.
  - (b) As explained to us, the Property, Plant and Equipment and relevant details of right-of-use assets have been physically verified by the Management at reasonable intervals, during the financial year. According to the information and explanations given to us, no discrepancies were noticed on physical verification of the Property, Plant and Equipment and relevant details of right-of-use assets.
  - (c) The Company does not own any immovable properties.
  - (d) The Company has not revalued any of its Property, Plant and Equipment (including right-of-use assets) and intangible assets during the year.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at 31<sup>st</sup> March, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) The inventory comprising raw material, work in progress and other material for R & D activity was physically verified by the management during the year. In our opinion, the frequency of verification by the management is reasonable and the coverage and procedure for such verification is appropriate. Discrepancies of 10% or more in aggregate for each class of inventory were not noticed on such physical verification.
  - (b) According to the information and explanations given to us, the Company has been sanctioned working capital limits in excess of ₹ 5 crore, in aggregate, at any point of time during the year, from banks on the basis of security of current assets of the Company. Based on the records examined by us in the normal course of audit of the standalone financial statements, the quarterly returns/statements filed by the Company with such banks are in agreement with the books of accounts of the Company.
- (iii) (a) In respect of the loans or advances in the nature of loans, secured or unsecured, granted by the Company during the year to companies, firms, limited liability partnerships or any other parties, we report as under.

(In ₹ Million)

- (b) The terms and conditions of the grant of the above loans were not found prima facie prejudicial to the Company's interest.
- (c) In respect of the loans or advances in the nature of loans which are repayable on demand, no schedules of repayment of the principal and payment of interest have been stipulated. For other loans or advances in the nature of loans, schedules of repayment of the principal and payment of interest have been stipulated. The repayment or receipts are regular.
- (d) There were no amounts overdue in respect of the principal and payment of interest.
- (e) During the year, the Company had extended loans to a company to settle the loan granted to this party which had fallen due during the year. The aggregate amount of such dues extended and the percentage of the aggregate to the total loans or advances in the nature of loans granted during the year are as follows:

(In ₹ Millions)

| Name of Party         | Aggregate amount of<br>overdues of existing loans<br>extended | Percentage of the aggregate to the total<br>loans or advances in the nature of loans<br>granted during the |
|-----------------------|---------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| Kalyani Mobility Inc. | 149.98                                                        | 44.07%                                                                                                     |

- (f) According to the information and explanations given to us, The Company has not granted any loans which are repayable on demand or without specifying any terms of repayment
- (iv) In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of sections 185 and 186 of the Companies Act, 2013 in respect of the loans and investments made. The Company has not given any guarantee or provided security in connection with a loan to any other body corporate or person.
- (v) The Company has not accepted deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules framed, there under. Hence, reporting under clause (v) of the Order is not applicable.
- (vi) Requirement to maintain cost records under sub-section (1) of section 148 of the Companies Act, 2013 does not apply to the Company. Hence, reporting under clause (vi) of the Order is not applicable.
- (vii) (a) Undisputed statutory dues including provident fund, employees' state insurance, income-tax, duty of custom, goods and service tax, cess and other material statutory dues have generally been regularly deposited with the appropriate authorities though there has been a slight delay in a few cases. According to the information and explanations given to us and based on audit procedures performed by us, undisputed dues in respect of provident fund, employees' state insurance, income tax, duty of custom, goods and service tax, cess and other statutory dues which were outstanding, at the year end, for a period of more than six months from the date they became payable, are as follows:

Statement of Arrears of Statutory dues outstanding for more than six months.

(In ₹ Millions)

| Name of the statute                       | Nature of dues                     | Amount | Period to which<br>the amount<br>relates | Due<br>date      | Date of<br>Payment | Remark,<br>if any |
|-------------------------------------------|------------------------------------|--------|------------------------------------------|------------------|--------------------|-------------------|
| Employee's<br>Provident Fund<br>Act, 1952 | Employee's Share of Provident Fund | 0.05   | FY 2022-23                               | Various<br>dates | Not Paid           | -                 |

- (b) According to the information and explanations given to us and the records of the Company, there are no statutory dues which have not been deposited on account of any dispute.
- (viii) According to the information and explanations given to us, there were no transactions relating to previously unrecorded income that were surrendered or disclosed as income in the tax assessments

under the Income Tax Act, 1961 (43 of 1961) during the year. Accordingly, the requirement to report on clause 3(viii) of the Order is not applicable to the Company.

- (ix) (a) In our opinion and according to the information and explanation given to us, the Company has not defaulted in repayment of loans or other borrowings or in the payment of interest, thereon, to any lender.
  - (b) According to the information and explanation given to us, the Company has not been declared as willful defaulter by any bank or financial institution or government or any government authority.
  - (c) According to the information and explanation given to us and on the basis of our examination, The Company has not availed any term loan during the year. Hence, reporting under clause 3(ix) (c) of the Order is not applicable.
  - (d) On an overall examination of the financial statements of the Company, funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.
  - (e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
  - (f) The Company has not raised any loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies. Hence reporting under clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company did not raise any money by way of initial public offer or further public offer (including debt instruments) during the year. Accordingly, reporting under clause 3(x) (a) of the Order is not applicable.
  - (b) The Company has not made any preferential allotment or private placement of shares /fully or partially or optionally convertible debentures during the year under audit and hence, the requirement to report on clause 3(x)(b) of the Order is not applicable to the Company.
- (xi) (a) Based upon the audit procedures performed and the information and explanations given to us by the Management, we report that no fraud by the Company or no fraud on the Company has been noticed or reported during the period.
  - (b) During the year, no report under subsection (12) of section 143 of the Companies Act, 2013 was required to be filed by the auditors in Form ADT-4 as prescribed under rule 13 of the Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) As represented to us by the management, The Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a nidhi Company as per the provisions of the Companies Act, 2013. Accordingly, reporting under clause 3(xii) of the Order is not applicable.
- (xiii) According to the records of the Company and according to the information and explanations given to us, the Company has not entered into any transactions with the related parties in contravention of the provisions of section 177 and 188 of the Companies Act, 2013. The details of the related party transactions have been disclosed in the standalone financial statements as required by the Ind AS.
- (xiv) (a) The Company has an internal audit system commensurate with the size and nature of its business.
  - (b) The internal audit reports of the Company issued till the date of the audit report, for the period under audit have been considered by us.
- (xv) According to the information and explanations given to us, The Company has not entered into any non-cash transactions with its directors or persons connected with its directors and hence requirement to report on clause 3(xv) of the Order is not applicable to the Company.

- (xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, the requirement to report on clause 3(xvi)(a) of the Order is not applicable to the Company.
  - (b) According to the information and explanations given to us, The Company is not engaged in any Non-Banking Financial or Housing Finance activities. Accordingly, the requirement to report on clause 3(xvi)(b) of the Order is not applicable to the Company
  - (c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India. Accordingly, the requirement to report on clause 3(xvi)(c) of the Order is not applicable to the Company.
  - (d) In our opinion and according to the information and explanations given to us, there is no core investment company as part of the Group. Hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.
- (xvii) The Company has incurred the following amounts of cash losses during the financial year covered by this report and incurred cash losses in the preceding financial year.

(In ₹ Million)

|                      | Current Financial Year | Preceding Financial Year |
|----------------------|------------------------|--------------------------|
| Cash losses incurred | 712.75                 | 158.33                   |

- (xviii) There has been no resignation by the statutory auditors of the Company during the year.
- (xix) On the basis of the verification of the financial ratios, ageing and expected dates of the realization of financial assets and payment of financial liabilities and other information accompanying financial statements, and information and explanation given to us, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) Provisions of 135 of the Companies Act, 2013 do not apply to the Company. Hence, reporting under clause 3(xx) of the Order is not applicable.

"Annexure B" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE STANDALONE FINANCIAL STATEMENTS OF KALYANI POWERTRAIN LIMITED FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2023.

We have audited the internal financial controls over financial reporting of **Kalyani Powertrain Limited** ("the Company") as of 31<sup>st</sup> March, 2023 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

## **Management's Responsibility for Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

#### **Auditor's Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that We comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### **Meaning of Internal Financial Controls over Financial Reporting**

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of standalone financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of standalone financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the Standalone Financial Statements.

# **Inherent Limitations of Internal Financial Controls over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **Opinion**

In our opinion, the Company has, in all material respects, internal financial controls with reference to standalone financial statements and such internal financial controls were operating effectively as at 31<sup>st</sup> March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# Notes forming part of the standalone financial statements for the year ended 31st March, 2023

#### **1** Corporate information:

Kalyani Powertrain Limited ("the Company") was incorporated on 26th September, 2020 as a private limited company under the provisions of the Companies Act, 2013. The Company has subsequently converted into a public limited company with effect from 20th July,2021. The Company is a wholly owned subsidiary of Bharat Forge Limited.

During the period covered by these standalone financial statements, the Company was engaged in the business of power electronics, development of sub-systems, electric powertrain transmission systems for automotive sector and related research and development.

These standalone financial statements have been prepared in accordance with Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India.

These financial statements were authorised for issue in accordance with resolution of the Board of Directors on 2<sup>nd</sup> May, 2023

# 2 Significant accounting policies:

## 2.1 Basis of accounting and preparation of standalone financial statements:

The standalone financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013 (to the extent notified).

The standalone financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- i Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The standalone financial statements are presented in INR and all values are rounded to the nearest million.

#### 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or

iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

## 2.3 Foreign currency transactions and translations:

The Company's standalone financial statements are presented in INR, which is also the Company's functional currency. Items included in the financial statements are measured using functional currency.

## a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognised as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or statement of profit and loss are also recognised in OCI or statement of profit and loss, respectively).

#### b) Exchange differences

Gains/losses arising out of fluctuations in the exchange rates are dealt with in the statement of profit and loss in the period in which they arise. In respect of assets and liabilities, the overall net loss or gain, if any, on conversion at the exchange rates prevailing on the date of balance sheet is charged to revenue.

## 2.4 Investment in subsidiaries, joint ventures and associates

The Company has accounted for its investment in subsidiaries, joint ventures and associates at cost less accumulated impairment. (Refer note 2.12).

#### 2.5 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic

best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the standalone financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the standalone financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets. Involvement of external valuers is decided upon annually by the management. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The management decides, after discussions with the Company's external valuers, which valuation techniques and inputs to use for each case.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

#### 2.6 Revenue from contracts with customers:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

The disclosures of significant accounting judgments, estimates and assumptions relating to revenue from contracts with customers are provided in Note 35(a).

### a) Sale of goods:

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer. The control of the goods manufactured in case of export sales is transferred usually on the date of issue of Bill of Lading while in case of domestic sales, the control is transferred usually on delivery of goods.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company considers the effect of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer, if any.

## b) Sale of Services:

Sales of services include certain performance obligations that are satisfied over a period of time. Any amount received in advance in respect of such performance obligations that are satisfied over a period of time is recorded as a contract liability and recorded as revenue when service is rendered to customers.

#### c) Interest income:

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instruments (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in "other income" in the statement of profit and loss.

## d) Profit / Loss on sale of investments:

Profit / Loss on sale of investments is recognised when all the significant risk and rewards of ownership in investment is transferred.

#### e) Contract assets:

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

#### f) Trade receivables:

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in note no.2.14.

#### g) Contract liabilities:

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

#### 2.7 Taxes:

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognised outside the statement of profit and loss is recognised outside the statement of profit and loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognised amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognised for deductible temporary differences, the carry forward of

unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the statement of profit and loss is recognised outside the statement of profit and loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognised in respect of temporary differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognised in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realised.

### Indirect taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of indirect taxes paid, except:

- i When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

## 2.8 Property, plant and equipment:

Property, plant and equipment, capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including GST for which credit is not available. All the significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the statement of profit and loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the statement of profit and loss during the financial period in which they are incurred.

Depreciation is computed on a straight-line method based on the useful lives, determined based on internal technical evaluation by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Assets under improvement to leased premises are fully depreciated over the lease period of the asset.

The Management's estimate of the useful lives of various property, plant and equipment is given below

| Type of asset                                   | Estimated useful life |
|-------------------------------------------------|-----------------------|
| i) Buildings - Other                            | 3 years to 6 years    |
| ii) Plant and machineries (including test jigs) | 2 years to 15 years   |
| iii) Computer and data processing equipments    |                       |
| (a) Servers and networks                        | 6 years               |
| (b) Other end user devices                      | 3 years               |
| iv) Furniture and fixtures                      | 10 years              |
| v) Office equipment                             | 5 years               |

Losses arising from the retirement of, and gains and losses arising from disposal of property, plant and equipment which are carried at cost are recognised in the statement of profit and loss.

An item of property, plant and equipment or any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

## 2.9 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in the statement of profit and loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying

value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised.

The summary of amortization policy applied to the Company's intangible assets is as below:

| Type of asset              | Estimated useful life |
|----------------------------|-----------------------|
| i) Computer software       | 3 years               |
| ii) Other intangible asset | 5 years               |

## Research and development costs

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Company can demonstrate:

- i. The technical feasibility of completing the intangible asset so that the asset will be available for use or sale
- ii. Its intention to complete and its ability and intention to use or sell the asset
- iii. How the asset will generate future economic benefits
- iv. The availability of resources to complete the asset
- v. The ability to measure reliably the expenditure during development

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation expense is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset. During the period of development, the asset is tested for impairment annually.

## 2.10 Leases:

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Company as a lessee:

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

#### i) Right of use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the Underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

| Type of asset     | Estimated useful life |
|-------------------|-----------------------|
| Land and building | 5-10 years            |

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

## ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liability and Right-of-use asset have been separately presented in the balance sheet and lease payments have been classified as financing cash flows.

#### iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

#### The Company as a lessor:

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit and loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

#### 2.11 Inventories:

Cost of inventories have been computed to include all cost of purchases, cost of conversion and other costs incurred in bringing the inventories to their present location and condition.

Raw materials and components, stores and spares and loose tools are valued at lower of cost and net realizable value. However, materials and other items held for use in the production

of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Costs are determined on weighted average basis.

Work-in-progress and finished goods are valued at lower of cost and net realisable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. Cost of work-in-progress and finished goods are determined on a weighted average basis.

Scrap is valued at net realisable value.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

#### 2.12 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Intangible assets under development are tested for impairment annually.

For the assets, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

## 2.13 Provisions and contingent liabilities:

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

## 2.14 Retirement and other employee benefits:

#### a) Gratuity:

The Company operates a defined benefits plan for its employees. Payment for present liability of future payment of gratuity is being made to approved gratuity funds, which fully cover the same under cash accumulation policy of the Life Insurance Corporation of India. The cost of providing benefits under these plans is determined on the basis of actuarial valuation at each year end. Actuarial valuation is carried out using the project unit credit method.

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- i The date of the plan amendment or curtailment, and
- ii The date that the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- i Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- ii Net interest expense or income

#### b) Privilege leave benefits:

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end.

Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The Company presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where the Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

## 2.15 Borrowing costs:

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

#### 2.16 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial asset:

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

## b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)

## c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on

acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the statement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss. This category generally applies to trade and other receivables.

#### d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognised in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the statement of profit and loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to the statement of profit and loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

#### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorisation as at amortised cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

## f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to the statement of profit and loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

#### g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- ii The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has

transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

#### h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- iv Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

i All contractual terms of the financial instrument (including prepayment, extension,

call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.

ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECL impairment loss allowance (or reversal) recognised during the period is recognised as income/ expense in the statement of profit and loss. This amount is reflected under the head 'other expenses' in the statement of profit and loss.

The balance sheet presentation for various financial instruments is described below:

i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables:

ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables.

b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the statement of profit and loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognised in OCI. These gains/ loss are not subsequently transferred to the statement of profit and loss. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit and loss.

The Company has not designated any financial liability as at fair value through statement of profit and loss.

#### ii Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in the statement of profit and loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

#### iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

#### c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

#### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through statement of profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair

value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in the statement of profit and loss, unless designated as effective hedging instruments.

#### D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original classification | Revised classification | Accounting treatment                                                                                                                                                                                                                                 |
|-------------------------|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised cost          | FVTPL                  | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in P&L.                                                                                                                     |
| FVTPL                   | Amortised cost         | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.                                                                                                                 |
| Amortised cost          | FVTOCI                 | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                           |
| FVTOCI                  | Amortised cost         | Fair value at reclassification date becomes its new amortised cost carrying amount. However, cumulative gain or loss in OCI is adjusted against fair value. Consequently, the asset is measured as if it had always been measured at amortised cost. |
| FVTPL                   | FVTOCI                 | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                |
| FVTOCI                  | FVTPL                  | Assets continue to be measured at fair value. Cumulative gain or loss previously recognised in OCI is reclassified to P&L at the reclassification date.                                                                                              |

## **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

### 2.17 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and

short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

## 2.18 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

#### 2.19 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

## 2.20 Earnings per share:

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

## 2.21 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) after tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

#### 2.22 Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

| ·                                                                         |                                    |                                    |

Performance obligations in respect of amount received in respect of warranty will be fulfilled over a period of 3 years.

#### Performance obligations and remaining performance obligations:

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognized as at the end of the reporting period and an explanation as to when the Company expects to recognize these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts where the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date, typically those contracts where invoicing is on time and material basis. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revalidations, adjustment for revenue that has not materialized and adjustments for currency.

The aggregate value of performance obligations that are completely or partially unsatisfied as at  $31^{\text{st}}$  March, 2023, other than those meeting the exclusion criteria mentioned above, is  $\stackrel{?}{\underset{?}{?}}$  0.28 million (Previous year : NIL). Out of this, the Company expects to recognize revenue of  $\stackrel{?}{\underset{?}{?}}$  0.09 million (Previous year : NIL) within the next one year and the remaining thereafter. This includes contracts that can be terminated for convenience without a substantive penalty since, based on current assessment, the occurrence of the same is expected to be remote.

### Reconciliation of contracted price with revenue during the year

## 31 Segment reporting

Information reported to the chief operating decision maker (CODM) for the purposes of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided. the Company was engaged in the business of manufacturing of electric powered battery operated vehicles, power electronics, development of sub-systems, electric powertrain transmission systems for automotive sector and related research and development; which in the context of Indian Accounting Standard 108 'Segment Information' represents single reportable business segment. The accounting policies of the reportable segments are the same as the accounting policies disclosed in Note 2. The revenues, total expenses and net loss as per the statement of profit and loss represents the revenue, total expenses and the net loss of the sole reportable segment.

### 32 Disclosure pursuant to Ind AS 19 on "Employee Benefits"

#### (a) Defined contribution plans:

The Company makes provident fund contributions to defined contribution retirement benefit plans for qualifying employees. Under the schemes, the Company is required to contribute a specified percentage of the payroll costs to the funds. The Company recognized ₹ 7.88 millions (Previous Year : ₹ 3.18 millions) for the provident fund contributions in the statement of profit and loss. The contributions payable to this plan by the Company are at the rates specified in respective legislations.

## (b) Gratuity plan:

The present value of defined benefit obligation and the related current service costs are measured using the projected unit credit method, with actuarial valuations being carried out on half yearly basis.

The gratuity benefits are governed by the Payment of Gratuity Act, 1972. Under the Act, every employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age. Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn) for each completed year of service as per the provisions of the Payment of Gratuity Act, 1972.

Risk exposure and asset liability matching

Provision of a defined benefit scheme poses certain risks, some of which are detailed hereunder, as companies take on uncertain long term obligations to make future benefit payments.

- 1) Liability risks
- a) Asset-liability mismatch risk-

Risk which arises if there is a mismatch in the duration of the assets relative to the liabilities. By matching duration with the defined benefit liabilities, the Company is successfully able to neutralize valuation swings caused by interest rate movements. Hence companies are encouraged to adopt asset-liability management

#### b) Discount rate risk

Variations in the discount rate used to compute the present value of the liabilities may seem small, but in practise can have a significant impact on the defined benefit liabilities.

c) Future salary escalation and inflation risk

Since price inflation and salary growth are linked economically, they are combined for disclosure purposes. Rising salaries will often result in higher future defined benefit payments resulting in a higher present value of liabilities especially unexpected salary increases provided at management's discretion may lead to uncertainities in estimating this increasing risk.

## 2) Asset risks

All plan assets are maintained in a trust fund managed by a public sector insurer viz; LIC of India. LIC has a sovereign guarantee and has been providing consistent and competitive returns over the years.

The company has opted for a traditional fund where in a II assets are invested primarily in risk averse markets. The company has no control over the management of funds but this option provides a high level of safety for the total corpus. A single account is maintained for both the investment and claim settlement and hence 100% liquidity is ensured. Also interest rate and inflation risk are taken care of.

The following table summarises the components of net benefit expense recognised in the

statement of profit and loss and the funded status and amounts recognised in the balance sheet for the gratuity plan.

## The principal assumptions used in determining gratuity for the Company's plan is shown below

#### Sensitivity analysis

Impact of change in discount rate when base assumption is decreased/increased by 100 basis point

(In ₹ Millions)

| Discount rate                                 | Year ended<br>31st March, 2023 | Year ended<br>31 <sup>st</sup> March, 2022 |
|-----------------------------------------------|--------------------------------|--------------------------------------------|
| Increase in discount rate by 100 basis points | 3.37                           | 0.70                                       |
| Decrease in discount rate by 100 basis points | 3.95                           | 0.90                                       |

Impact of change in salary growth rate when base assumption is decreased/increased by 100 basis point

(In ₹ Millions)

| Colour quanth nata                                 | Year ended       | Year ended                   |
|----------------------------------------------------|------------------|------------------------------|
| Salary growth rate                                 | 31st March, 2023 | 31 <sup>st</sup> March, 2022 |
| Increase in salary growth rate by 100 basis points | 3.90             | 0.90                         |
| Decrease in salary growth rate by 100 basis points | 3.41             | 0.71                         |

Impact of change in withdrawal rate when base assumption is decreased/increased by 100 basis point

(In ₹ Millions)

| Withdrawal rate                                 | Year ended       | Year ended       |
|-------------------------------------------------|------------------|------------------|
|                                                 | 31st March, 2023 | 31st March, 2022 |
| Increase in withdrawal rate by 100 basis points | 3.53             | 0.78             |
| Decrease in withdrawal rate by 100 basis points | 3.69             | 0.81             |

The estimates of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The sensitivity analyses above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

## (c) Other long term employee benefits:

The table below gives summary of the Company's obligations for other long term employee benefits in the form of compensated absences.

|                                                       |                  | (In ₹ Millions)              |

## 35 Significant accounting judgements, estimates and assumptions

The preparation of the Company's standalone financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. These estimates are reviewed regularly and any change in estimates are adjusted prospectively.

In the process of applying the Company's accounting policies, management has made the following judgements, estmates and assumptions which have the most significant effect on the amounts recognised in the financial statements.

#### a) Revenue recognition

The Company's contracts with customers could include promises to transfer multiple services to a customer. The Company assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables.

Judgement is also required to determine the transaction price for the contract. The transaction price could be either a fixed amount of customer consideration or variable consideration with elements such as volume discounts, service level credits, performance bonuses, price concessions and incentives. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component. Any consideration payable to the customer is adjusted to the transaction price, unless it is a payment for a distinct product or service from the customer. The estimated amount of variable consideration is adjusted in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur and is reassessed at the end of each reporting period. The Company allocates the elements of variable considerations to all the performance obligations of the contract unless there is observable evidence that they pertain to one or more distinct performance obligations.

The Company uses judgement to determine an appropriate standalone selling price for a performance obligation. The Company allocates the transaction price to each performance obligation on the basis of the relative standalone selling price of each distinct product or service promised in the contract. Where standalone selling price is not observable, the Company uses the expected cost plus margin approach to allocate the transaction price to each distinct performance obligation.

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

#### b) Leases

# Determining the lease term of contracts with renewal and termination options — Company as lessee

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Company has several lease contracts that include extension and termination options. The Company applies judgement in evaluating whether it is reasonably certain whether or not to

exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customisation to the leased asset).

#### c) Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Unit's (CGU's) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. In determining the fair value less costs to disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators.

## d) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### e) Deferred Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon acertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availabliity of adquate taxable income within the time permissible as per the taxing legislations.

## f) Defined benefit plan

The cost of defined benefit gratuity plan and present value of such obligation are determined using actuarial valuation. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, expected returns on plan assets and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The mortality rate is based on publicly available mortality tables for India. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases, discount rate and return on planned assets are based on expected future inflation rates for India. Further details about defined benefit plans are given in note 32.

#### g) Inventories

Management reviews the inventory age listing on a periodic basis. This review involves comparison

of the carrying value of the aged inventory items with the respective net realizable value. The purpose is to ascertain whether an allowance is required to be made in the financial statements for any obsolete, slow-moving and items where net realizable value is below cost. Management is satisfied that adequate allowance for obsolete and slow-moving inventories has been made in the financial statements.

#### 36 Financial instruments by category

The following table presents the carrying amounts and fair value of each category of financial assets and liabilities:

(In ₹ Millions)

|                             | Carryin          | g value                      | Fair value       |                  |  |
|-----------------------------|------------------|------------------------------|------------------|------------------|--|
|                             | As at            | As at                        | As at            | As at            |  |

| Other financial liabilities | 68.48            | -                            | 68.48            | -                |  |
| Tota                        | ıl: 1,844.24     | 100.98                       | 471.89           | 100.98           |  |

Investments in subsidiaries, joint ventures and associates which are carried at cost and hence are not required to be disclosed as per Ind AS 107 "Financial Instruments Disclosures".

For trade receivables and trade payables and other assets and payables maturing within one year from the Balance Sheet date, the carrying amounts approximate the fair value due to the short maturity of these instruments.

## 37 Fair value hierarchy

There are no financial instruments that are measured subsequent to initial recognition at fair value. Hence, disclosure of the fair value hierarchy of assets and liabilities measured at fair value is not applicable.

#### 38 Financial risk management disclosure

The Company's principal financial liabilities comprise short term borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include trade and other receivables, cash and cash equivalents and other bank balances that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

## a) Market risk:

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits.

# i) Equity price risk

The Company's investment in equity instruments comprise of investments in subsidiaries which is strategic long term investments. Reports on the equity portfolio are submitted to the Company's management on a regular basis. The Company's Board of Directors reviews and approves all equity investment decisions.

## ii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company does not have exposure to the risk of changes in market interest rates as the Company's long-term debt obligations with fixed interest rates.

## iii) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency). The Company does not hedge its forein currency exposures.

## Foreign currency sensitivity:

The following tables demonstrate the sensitivity to a reasonably possible change in USD and EUR exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives. The Company's exposure to foreign currency changes for all other currencies is not material.

| 31st March, 2022 | 5.00%              | 0.02                           | 0.02                     |
|                  | -5.00%             | (0.02)                         | (0.02)                   |

## b) Credit risk:

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, investment in mutual funds, other receivables and deposits, foreign exchange transactions and other financial instruments.

The Company's maximum exposure to credit risk for the components of the balance sheet at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022 is the carrying amounts as illustrated in the respective notes.

## i) Trade receivables:

Customer credit risk is managed by the Company's established policy, procedures and control relating to customer credit risk management. Further, Company's customers includes group companies and marquee auto component manufacturers. Outstanding customer receivables are regularly monitored and reconciled. Wherever the Company assesses the credit risk as high the exposure is backed by either bank guarantee/letter of credit or security deposits.

An impairment analysis is performed at each reporting date on an individual basis for major customers. In addition, a large number of minor receivables are grouped in to homogeneous groups and assessed for impairment collectively. The calculation is based on historical data and subsequent expectation of receipts.

## ii) Other receivables, deposits with banks, mutual funds and loans given :

Credit risk from balances with banks, financial institutions and mutual funds is managed in accordance with the Company's approved investment policy. Investments of surplus funds are made only with reputed banks and financial institutions were the counterparty risk is minimum.

## c) Liquidity risk:

Liquidity risk is the risk that the Company is unable to meet its existing or future obligations as they fall due, due to insufficient availability of cash or cash equivalents. The Company's approach to managing liquidity is to ensure, sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damages to Company's reputation.

The Company regularly monitors the rolling forecasts to ensure it has sufficient cash on an ongoing basis to meet operational needs. Any short term surplus cash generated, over and above the amount required for working capital management and other operational requirements, is retained as cash and cash equivalents (to the extent required) and any excess is invested in mutual funds, interest bearing term deposits and other highly marketable debt investments with appropriate maturities to optimise the cash returns on investments while ensuring sufficient liquidity to meet its liabilities.

The table below summarises the maturity profile of the Company's financial liabilities

## 40 Lease

# A Company as lessee

The Company has lease contracts for various items of building and leasehold land, etc. used in its operations. These leases generally have lease terms between 7 to 10 years. The Company's obligations under its leases are secured by the lessor's title to the leased assets. Generally, the Company is restricted from assigning and subleasing the leased assets.

The Company also has certain leases of various assets with lease terms of 12 months or less and leases with low value. The Company applies the 'short-term lease' and 'lease of low-value assets' recognition exemptions for these leases.

# i) The carrying amount of right-of-use assets recognised and the movements during the period:

|                                                                                                           | For the year ended 31st March, 2023 | For the year ended 31st March, 2022 |
|-----------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|
| Gain on re-measurement of its previously held equity interest in Tork Motors Private Limited $^{\rm (a)}$ | -                                   | 149.65                              |
| Impairment of loan given to Kalyani Mobility, Inc. (b)                                                    | (373.57)                            | -                                   |
| Total                                                                                                     | : (373.57)                          | 149.65                              |

<sup>(</sup>a) The Company determines the cost of its investment in the subsidiary as the sum of the fair value of the previously held equity interest at the date of obtaining control of the subsidiary plus consideration paid for the additional interest (fair value as deemed cost approach). Accordingly, The Company has recognised gain of ₹149.65 millions on re-measurement of its previously held equity interest in Tork Motors Private Limited in its statements of profit and loss as an exceptional item during previous year.

<sup>(</sup>b) Considering the financial position of Kalyani Mobility, Inc., the Company has assessed that there has been a significant increase in the credit risk on the loan receivable from Kalyani Mobility, Inc. Accordingly, the Company has recognised impairment of ₹ 373.57 millions.

# 47 Capital management

The Capital management objective of the Company is to (a) maximise shareholder value and provide benefits to other stakeholders and (b) maintain an optimal capital structure to reduce the cost of capital. For the purposes of the Company's capital management, capital includes issued equity share capital, share premium and all other equity reserves attributable to the equity holders of the Company.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants attached to the interest -bearing loans and borrowings. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

The Company has adopted the objectives, policies or processes of Bharat Forge Limited, the Holding Company for managing capital during the year ended 31 March 2023.

#### INDEPENDENT AUDITOR'S REPORT

# To The Members of Kalyani Rafael Advanced Systems Private Limited

## **Report on the Audit of the Financial Statements**

## **Opinion**

We have audited the accompanying financial statements of **Kalyani Rafael Advanced Systems Private Limited** ("the Company"), which comprise the Balance Sheet as at March 31, 2023, and the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2023, and its profit, total comprehensive Income, its cash flows and the changes in equity for the year ended on that date.

# **Basis for Opinion**

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

## Information Other than the Financial Statements and Auditor's Report Thereon

- The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Director's report, but does not include the financial statements and our auditor's report thereon. the Director's report is expected to be made available to us after the date of this auditor's report.
- Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.
- In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.
- When we read the Director's report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance as required under SA 720 'The Auditor's responsibilities Relating to Other Information'.

## Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities;

selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Company's Board of Directors are also responsible for overseeing the Company's financial reporting process.

## **Auditor's Responsibility for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

# **Kalyani Rafael Advanced Systems Private Limited**

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

# **Report on Other Legal and Regulatory Requirements**

- 1. As required by Section 143(3) of the Act, based on our audit we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the relevant books of account.
  - d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under Section 133 of the Act.
  - e) On the basis of the written representations received from the directors as on March 31, 2023 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2023 from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls with reference to financial statements.
  - g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended, in our opinion and to the best of our information and according to the explanations given to us, the Company being a private company, section 197 of the Act related to the managerial remuneration is not applicable.
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company does not have any pending litigations which would impact its financial position.
    - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. (a) The Management has represented that, to the best of it's knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.
      - (b) The Management has represented, that, to the best of it's knowledge and belief, as disclosed in the notes to accounts, no funds have been received by the Company

from any person(s) or entity(ies), including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

- (c) Based on the audit procedures performed that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e), as provided under (a) and (b) above, contain any material misstatement.
- v. The Company has not declared or paid any dividend during the year and has not proposed final dividend for the year.
- vi. Proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 for maintaining books of account using accounting software which has a feature of recording audit trail (edit log) facility is applicable to the Company w.e.f. April 1, 2023, and accordingly, reporting under Rule 11(g) of Companies (Audit and Auditors) Rules, 2014 is not applicable for the financial year ended March 31, 2023.
- 2. As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order.

## ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

# Report on the Internal Financial Controls with reference to financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to financial statements of **Kalyani Rafael Advanced Systems Private Limited** ("the Company") as of March 31, 2023 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

## **Management's Responsibility for Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls with reference to financial statements based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

## **Auditor's Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

# Meaning of Internal Financial Controls with reference to financial statements

A company's internal financial control with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention

or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## Inherent Limitations of Internal Financial Controls with reference to financial statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **Opinion**

In our opinion, to the best of our information and according to the explanations given to us the Company has, in all material respects, an adequate internal financial controls with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2023, based on the criteria for internal financial control with reference to financial statements established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

## ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment and relevant details of right-of-use assets.
  - (B) The Company has maintained proper records showing full particulars of intangible assets.
  - (b) The Property, Plant and Equipment and right-of-use assets were physically verified during the year by the Management which, in our opinion, provides for physical verification at reasonable intervals. No material discrepancies were noticed on such verification.
  - (c) The Company does not have any immovable properties and hence reporting under clause (i)(c) of the Order is not applicable.
  - (d) The Company has not revalued any of its property, plant and equipment and intangible assets during the year.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at March 31, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) The inventories were physically verified during the year by the Management at reasonable intervals. In our opinion and based on information and explanations given to us, the coverage and procedure of such verification by the Management is appropriate having regard to the size of the Company and the nature of its operations. No discrepancies of 10% or more in the aggregate for each class of inventories were noticed on such physical verification of inventories/alternate procedures performed as applicable, when compared with the books of account.
  - (b) According to the information and explanations given to us, at any point of time of the year, the Company has been sanctioned working capital limits in excess of Rs. 5 crores, in aggregate, from banks on the basis of security of current assets of the Company. In our opinion and according to the information and explanations given to us, the quarterly returns or statements comprising stock statements, book debt statements and other stipulated financial information filed by the Company with such banks till the date of this report are in agreement with unaudited books of account of the Company of the respective quarters ended i.e. June 30, 2022, September 30, 2022 and December 31, 2022. The Company is yet to submit the return/ statement for the quarter ended March 31, 2023 with the banks.
- (iii) The Company has not made any investments in, provided any guarantee or security, and granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or any other parties during the year, and hence reporting under clause (iii) of the Order is not applicable.
- (iv) The Company has not granted any loans, made investments or provided guarantees or securities and hence reporting under clause (iv) of the Order is not applicable.
- (v) The Company has not accepted any deposit or amounts which are deemed to be deposits. Hence, reporting under clause (v) of the Order is not applicable.
- (vi) The maintenance of cost records has been specified by the Central Government under Section 148(1) of the Companies Act, 2013. We have broadly reviewed the cost records maintained by the Company pursuant to the Companies (Cost Records and Audit) Rules, 2014, as amended, prescribed by the Central Government under Section 148(1) of the Companies Act, 2013, and are of the opinion that, prima facie,

the prescribed cost records have been made and maintained. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

- (vii) According to the information and explanations given to us, In respect of statutory dues:
  - (a) Undisputed statutory dues, including Goods and Services Tax, Provident Fund, Income-tax, Sales Tax, duty of Custom, duty of Excise, Value Added Tax, cess and other material statutory dues applicable to the Company have generally been regularly deposited by it with the appropriate authorities in all cases during the year. We have been informed that the provisions of the Employees' State Insurance Act, 1948 ('the Act') are not applicable to the Company since the Company is contributing towards the Medical Insurance coverage and other benefits for all its employees as required by the Act. The Company is in process of obtaining a clarification/ exemption to that effect from the Employees' State Insurance Corporation, pending which no deductions/contributions have been made in respect of certain employees.

There were no undisputed amounts payable in respect of Goods and Service Tax, Provident Fund, Employees State Insurance, Income-tax, Sales Tax, Service Tax, duty of Custom, duty of Excise, Value Added Tax, cess and other material statutory dues in arrears as at March 31, 2023 for a period of more than six months from the date they became payable.

- (b) There are no statutory dues referred in sub-clause (a) above which have not been deposited as on March 31, 2023 on account of disputes:
- (viii) According to the information and explanations given to us, there were no transactions relating to previously unrecorded income that were surrendered or disclosed as income in the tax assessments under the Income Tax Act, 1961 (43 of 1961) during the year.
- (ix) (a) The Company has not taken any loans or other borrowings from any lender. Hence reporting under clause (ix)(a) of the Order is not applicable to the Company.
  - (b) The Company has not been declared wilful defaulter by any bank or financial institution or Government or any Government authority.
  - (c) The Company has not taken any term loan during the year and there are no unutilised term loans at the beginning of the year and hence, reporting under clause (ix)(c) of the Order is not applicable.
  - (d) The Company has not raised funds on short-term basis, hence reporting under clause (ix)(d) of the Order is not applicable.
  - (e) The Company did not have any subsidiary or associate or joint venture during the year and hence, reporting under clause (ix)(e) of the Order is not applicable.
  - (f) The Company has not raised any loan during the year and hence reporting on clause (ix)(f) of the Order is not applicable.
- (x) (a) The Company has not issued any of its securities (including debt instruments) during the year and hence reporting under clause (x)(a) of the Order is not applicable.
  - (b) During the year the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) and hence reporting under clause (x)(b) of the Order is not applicable to the Company.
- (xi) (a) To the best of our knowledge, no fraud by the Company and no material fraud on the Company has been noticed or reported during the year.
  - (b) To the best of our knowledge, no report under sub-section (12) of Section 143 of the Companies Act has been filed in Form ADT-4 as prescribed under Rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government, during the year.
  - (c) As represented to us by the Management, there were no whistle blower complaints received by the Company during the year.

# **Kalyani Rafael Advanced Systems Private Limited**

- (xii) The Company is not a Nidhi Company and hence reporting under clause (xii) of the Order is not applicable.
- (xiii) In our opinion, the Company is in compliance with section 188 of the Companies Act for all transactions with the related parties and the details of related party transactions have been disclosed in the financial statements etc. as required by the applicable accounting standards. The Company is a private company and hence the provisions of section 177 of the Companies Act, 2013 are not applicable to the Company.
- (xiv) In our opinion, the Company is not required to appoint internal auditors under Section 138 of the Companies Act, 2013 and the Company does not have an internal audit system. Hence reporting under clause (xiv)(a) and (b) of the Order is not applicable.
- (xv) In our opinion, during the year the Company has not entered into any non-cash transactions with any of its directors or directors of it's holding company or persons connected with such directors and hence provisions of Section 192 of the Companies Act, 2013 are not applicable to the Company.
- (xvi) (a,b,c)The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, reporting under clause (xvi)(a), (b) and (c) of the Order are not applicable.
  - (d) As represented to us by the Management, the Group does not have any CIC as part of the group and accordingly reporting under clause (xvi)(d) of the Order is not applicable.
- (xvii) The Company has not incurred cash losses during the financial year covered by our audit and the immediately preceding financial year.
- (xviii) There has been no resignation of the statutory auditors of the Company during the year.
- (xix) On the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities and our knowledge of the Board of Directors and Management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) The Company was not having net worth of rupees five hundred crore or more, or turnover of rupees one thousand crore or more or a net profit of rupees five crore of more during the immediately preceding financial year and hence, provisions of Section 135 of the Act are not applicable to the Company during the year. Accordingly, reporting under clause 3(xx) of the Order is not applicable for the year.
- (xxi) The Company does not have any subsidiaries, associates and joint ventures requiring it to prepare consolidated financial statements. Accordingly, reporting under clause (xxi) of the Order is not applicable.

# Notes forming part of the financial statements

## 1. CORPORATE INFORMATION

Kalyani Rafael Advanced Systems Private Limited was incorporated on August 21, 2015, as a private limited company under the Companies Act, 2013.

The Company has been formed as a joint venture between Kalyani Group and Rafael Advanced Defense Systems Limited, Israel, with the object to engage in business of defence and aerospace that will include activities of conceptualization, research, design, development, production, integration, manufacture, assembly, modification, upgrade overhaul, engineering support, marketing, sales, after sales /product life cycle support and related activities of such programs and to act as off-set partner and/or to undertake off-set activities for original equipment manufacturers in defence, aerospace and other sectors.

To engage in projects and programs floated or to be floated by the Government of India or its instrumentalities or other entities based in India or abroad.

To Carry on the business of and to act as manufacturer, importer, marketer, agent, distributors, collaborators, or otherwise to deal in all types of automatic, semi-automatic, digital, electronic instruments, equipments, apparatus, machineries, tools and their parts, fittings, components and accessories used in health care treatment, diagnosis, research test cure, operation and for saving life or human-being and other allied products.

The Company had set up its manufacturing facilities at Raviryala, Ranga Reddy District, in the state of Telangana, which has been commissioned on August 3, 2017. The Company has commenced its commercial operations thereafter.

## 2. SIGNIFICANT ACCOUNTING POLICIES

## 2.01 Statement of Compliance:

The financial statements which comprise the Balance sheet, the Statement of Profit and Loss, the Cash flow statement and the Statement of changes in Equity ("Financial Statements") have been prepared in accordance with Indian Accounting Standards (Ind ASs) notified under Section 133 of the Companies Act, 2013, read together with the Companies (Indian Accounting Standards) Rules, 2015 and relevant amendment rules issued thereafter. The Company adopted Ind AS from April 1, 2016. The financial statements are presented in Indian Rupees (INR) which is also the Company's functional currency. The Company has consistently applied accounting policies to all periods.

# 2.02 Basis of preparation and presentation

These financial statements have been prepared on the historical cost basis, except for certain financial instruments which are measured at fair values at the end of each reporting period, as explained in the accounting policy 2.18. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

## 2.03 Use of estimates and judgements

The preparation of these financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of income and expense for the periods presented.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected. The management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and differences between actual results and estimates are recognized in the periods in which the results are known/materialize.

Key source of estimation of uncertainty at the date of the financial statements, which may cause a

material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of useful lives of property, plant and equipment, valuation of deferred tax liabilities, Leases and provisions and contingent liabilities.

## Useful lives of Property, plant and equipment

The company reviews the useful life of property, plant and equipment at the end of the reporting period. This reassessment may results in change in depreciation expenses in future periods.

## **Provisions and contingent liabilities**

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount can be reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money (if the impact of discounting is significant) and the risks specific to the obligation. The increase in the provision due to unwinding of discount over passage of time is recognized as finance cost. Provisions are reviewed at the each reporting date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of economic resources will be required to settle the obligation, the provision is reversed.

A disclosure for a contingent liability is made where there is a possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from the past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

## **Defined benefit obligations**

The Company uses actuarial assumptions viz., discount rate, mortality rates, salary escalation rate etc., to determine such employee benefit obligations.

# 2.04 Revenue Recognition / Cost Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

#### a) Sale of Goods:

The Company is in the business of defence and aerospace. Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements, except for the agency services, because it typically controls the goods or services before transferring them to the customer.

**Sale of Products/Goods:** Revenue from sale of Products/Goods is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the Products/Goods. The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated (e.g., warranties, customer loyalty points). In determining the transaction price for the sale of Products/Goods, the Company considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer (if any).

**Sale of Service:** Revenue from sale of services is in nature of MRO services for defense equipments on customer product which normally takes 1 – 4 days for completion and MRO

services revenue recognized is measured based on the fixed input method, agreed with the recipient of service, and therefore the services transferred to date.

## c) Interest Income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

## 2.05 Foreign Currency

The functional currency of the Company is Indian rupee.

## **Initial Recognition**

Income and expenses in foreign currencies are recorded at exchange rates prevailing on the date of the transaction.

#### Conversion

Foreign currency monetary assets and liabilities are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses arising on settlement and restatement are recognised in the statement of profit and loss.

## 2.06 Employee benefits

# a) Short-term Employee Benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange of services rendered by the employees is recognised during the year when the employees render the service.

## b) Post Employment Benefits

## (1) Defined Contribution Plan:

Payments to defined contribution retirement benefit schemes viz. Company's Provident Fund Scheme is recognised as an expense when the employees have rendered the service entitling them to the contribution.

## (2) Defined Benefit Plan:

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the statement of financial position with a charge or credit recognised in other comprehensive income in the period in which they occur.

Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement.

- (i) **Gratuity:** The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15/26 days salary payable for each completed year of service. Vesting occurs upon completion of five years of service. The Company accounts for the liability for gratuity benefits payable in future based on an independent actuarial valuation. The Company has taken a cash accumulation policy with LIC of India for future payment of gratuity to the eligible employees.
- **(ii) Compensated Absences**: The Company provides for the encashment of compensated absences with pay subject to certain rules. The employees are entitled to accumulate compensated absences subject to certain limits, for future encashment. Such benefits are provided based on the number of days of un utilised compensated absence on the basis of an independent actuarial valuation.

## 2.07 Taxation

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity, respectively. Income tax expense represents the sum of the tax currently payable and deferred tax.

#### **Current income tax**

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit or loss and other comprehensive income/ statement of profit or loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction and where the relevant tax paying units intends to settle the asset and liability on a net basis.

## **Deferred income taxes**

Deferred income tax is recognised using the balance sheet approach. Deferred income tax assets and liabilities are recognised for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount, except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of the transaction.

Deferred income tax asset are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Deferred tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be received or settled.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on

a net basis.

Deferred tax assets include Minimum Alternate Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognised as deferred tax asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realised.

The Company recognises interest levied and penalties related to income tax assessments in income tax expenses.

## 2.08 Property, Plant and Equipment

Property plant & equipment are stated at cost of acquisition or construction where cost includes amount added/deducted on revaluation less accumulated depreciation / amortization and impairment loss, if any. All costs relating to the acquisition and installation of assets are capitalised and include borrowing costs relating to funds attributable to construction or acquisition of qualifying assets, up to the date the asset / plant is ready for intended use. The cost of replacing a part of an item of property, plant and equipment is recognized in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodies within the part will flow to the Company and its cost can be measured reliably with the carrying amount of the replaced part getting derecognized. The cost for day-to-day servicing of property, plant and equipment are recognized in Statement of Profit and Loss as and when incurred.

Depreciation on tangible property plant & equipment has been provided on straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013 except in respect of plant and machinery, in whose case the life of the assets has been assessed based on the technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc.

- i) Plant & Machinery 10 Years
- ii) Tools & Equipments 10 Years
- iii) Lease improvement costs are amortised over the period of the lease term.

Assets individually costing ₹ 5,000 or less are depreciated fully in the year of acquisition. Depreciation on assets acquired/purchased, sold/discarded during the year is provided on a prorata basis from the date of each addition / till the date of sale/discard.

The estimated useful life and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

# 2.09 Intangible Assets

# Intangible assets acquired separately:

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on written down value method over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

# 2.10 Impairment

# i) Financial assets (other than at fair value)

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired.

IND AS 109 requires expected credit losses to be measured through a loss allowance. Company performs credit assessment for customers on an annual basis. Company recognizes credit risk, on the basis of lifetime expected losses and where receivables are due for more than six months.

For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

## ii) Non-financial assets

## Tangible and intangible assets

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognized in the statement of profit and loss.

## 2.11 Inventories

Inventories of raw materials and components, work-in-progress, stock-in-trade, stores & spares and tools & instruments are valued at the lower of cost and net realizable value after providing for obsolescence and other losses, where considered necessary. Cost is ascertained on a weighted average basis. The cost of work-in-progress and finished goods is determined on absorption cost basis.

## 2.12 Financial instruments

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

## Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

## Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

# Financial assets at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on

specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

## Financial assets at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in profit or loss.

## **Financial liabilities**

Financial liabilities are measured at amortised cost using the effective interest method.

#### **Effective Interest Method**

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

## **Equity instruments**

An equity instrument is a contract that evidences residual interest in the assets of the company after deducting all of its liabilities. Company recognises equity instrument at proceeds received net of direct issue costs.

#### **Reclassification of Financial Assets**

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the company's operations. Such changes are evident to external parties. A change in the business model occurs when a company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognized gains, losses (including impairment gains and losses) or interest.

# Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

## **Derivatives financial instruments and hedge accounting**

## Initial recognition and subsequent measurement

The company uses derivative financial instruments, such as forward currency contracts, to hedge its foreign currency risk.such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequent re-measurement at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gain or loss arising from changes in the fair value of the derivatives are taken directly to statement of profit and loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to statement of profit and loss when the hedge items

affects statement of profit and loss or treated as basic adjustment if a hedged forecast transaction subsequently results in the recognition of an non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment.
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk is an unrecognised firm commitment.

At the inception of a hedge relationship, the company formally designates and documents the hedge relationship to which the company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the company's risk management objective and strategy for undertaking the hedge, the hedging/ economic relationship, the hedge item or transaction, the nature of the risk being hedged, hedged ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

# Fair value hedges:

The change in the fair value of a hedging instrument is recognised in the statement of profit and loss as finance costs. The change in the fair value of the hedged item attributable to the risk hedged is recorded as part of the carrying value of the hedged item and is also recognised in the statement of profit and loss as finance costs.

For fair value hedges relating to items carried at amortised cost, any adjustment to carrying value is amortised through the statement of profit and loss over the remaining term of the hedge using the EIR method. EIR amortisation may being as soon as an adjustment exists and no later than when the hedged item ceases to be adjusted for the changes in its fair value attributable to the risk being hedged.

The company uses forward currency contracts as hedges of its exposure to foreign currency risk in trade receivables. The change in fair value is recognised as on asset or liability with a corresponding gain or loss recognised in the statement of profit and loss.

If the hedge item is derecognised, the unamortised fair value is recognised immediately in statement of profit and loss. When an unrecognised firm commitment is designated as hedged item, the subsequent cumulative change in the fair value of the firm commitment attributable to the hedged risk is recognised as an asset or liability with a corresponding gain or loss recognised in statement of profit and loss.

## Cash flow hedges:

Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment.

The effective portion of the gain or loss on the hedging instruments is recognised in OCI in the cash flow hedge reserve, while an ineffective portion is recognised immediately in the statement of profit and loss.

The company uses forward currency contracts as hedges of its exposure to foreign currency risk in forecast transactions and firm commitments. The ineffective portion relating to foreign currency contracts is recognised in finance cost.

Amounts recognised as OCI are transferred to statement of profit and loss when the hedged transaction affects profit or loss, such as when the hedged financial income or financial expense is recognised or when a forecast sale occurs. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

# 2.13 Earnings Per Share (EPS)

The Company reports basic and diluted earnings per share in accordance with IND AS 33 on Earnings per share. Basic earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of equity shares outstanding during the period as adjusted for the effects of all diluted potential equity shares except where the results are anti-dilutive.

## 2.14 Critical Accounting Judgments and key sources of estimation, uncertainty

The preparation of financial statements and related notes in accordance with IND AS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the balance sheet date, and revenues and expenses.

Actual results could differ from those estimates due to those uncertainties on which assumptions are based. Estimates and assumptions are reviewed annually in order to verify they still reflect the best available knowledge of the Company's operations and of other factors deriving from actual circumstances. Changes, if any, are immediately accounted for in the income statement.

The present economic context, whose effects are spread into some businesses in which the company operates, determined the need to make assumptions related to future development with a high degree of uncertainty. For this reason, it is not possible to exclude that, in the next or in subsequent financial years, actual results may differ from estimated results. These differences, at present unforeseeable and unpredictable, may require adjustments to book values. Estimates are used in many areas, including accounting for non-current assets, deferred tax assets, bad debt provisions on accounts receivable, inventory obsolescence, employee benefits, contingent liabilities and provisions for risks and contingencies.

## 2.15 Cash flow statement

The Cash Flow Statement is prepared by the indirect method set out in IND AS 7 on Cash Flow Statements and presents cash flows by operating, investing and financing activities of the Company.

## 2.16 Current/Non-Current Classification

The Company presents assets and liabilities in the balance sheet based on current/non-current classification. An asset is classified as current when it satisfies any of the following criteria:

- It is expected to be realized or intended to be sold or consumed in normal operating cycle
- It is held primarily for the purpose of trading
- It is expected to be realized within 12 months after the date of reporting period, or
- Cash and cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after reporting period.

Current assets include the current portion of non-current financial assets.

All other assets are classified as non-current.

A liability is current when it satisfies any of the following criteria:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within 12 months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period Current liabilities include the current portion of long term financial liabilities.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities (including of MAT) are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets and their realization in cash and cash equivalents. The Company has identified 12 months as its operating cycle.

# 2.17 Share Capital

## **Ordinary Shares**

Ordinary shares are classified as equity. Incremental costs, if any, directly attributable to the issue of ordinary shares are recognized as a deduction from other equity, net of any tax effects.

## 2.18 Fair Value Measurement

Fair value is the price that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell an asset or transfer the liability takes place either:

- in the principle market for the asset or liability
- in the absence of principle market, in the most advantageous market for the asset or liability.

The principle or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (Unadjusted) Market prices in active markets for incidental assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation Techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers that have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

## **Determination of Fair Value**

## 1) Financial Assets

The fair value of financial assets is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. This fair value is determined for disclosure purpose

## 2) Non-Derivative financial liabilities

Fair Value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date.

#### 2.19 Dividend

Dividend on share is recorded as liability on the date of approval by the shareholders.

## 2.20 Revenue from Contract with Customers

## a. Disaggregation of revenue from contracts with customers

Set out below is the disaggregation of the Company's revenue from contracts with customers :

## [In Indian Rupees (Lakhs), unless otherwise stated]

| Particulars                                 | For the year ended<br>March 31, 2023 | For the year ended<br>March 31, 2022 |
|---------------------------------------------|--------------------------------------|--------------------------------------|
| Sale of products                            |                                      |                                      |

# Transaction price allocated to the remaining performance obligations <u>Description of performance obligations:</u>

#### Sale of goods:

The performance obligation is satisfied upon removal of goods from factory and payment is generally due within 30 to 45 days from the date of Invoice. The Company enters into a agreement with customer for products which are to be manufactured. The control of the product manufactured is transferred on the date of removal of goods from factory.

#### Sale of services:

The performance obligation is satisfied upon the completion of services in the place of service informed by the recipient with in India and payment is generally due with in 60 days from the date of invoice. The company enters into an agreement with customer for services which are to be performed as obliged. The completion of services confirms by the customer itself.

#### e. Accounting policy:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

The disclosures of significant accounting judgements relating to revenue from contracts with customers are provided in Note no. f in below:

#### **Revenue for sale of Goods**

Refer Note 2.04 (a) & (b) for accounting policies relating to Sale of products/goods and sale of services.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company does not considers the effect of variable consideration.

#### **Contract assets**

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

#### **Trade receivables**

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in Note No. 32 and 33 (Financial instruments – initial recognition and subsequent measurement and Fair value).

#### **Contract liabilities**

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

#### **Bill-and-Hold arrangements**

A bill-and-hold arrangements is a contract under which an entity bills a customer for a goods but the entity retains physical possession of the goods until it is transferred to the customer at a point of time in future.

An entity shall determine when it has satisfied its performance obligation to transfer a product by evaluating when a customer obtains control of the goods.

#### f. Judgments

The Company applied the following judgments that significantly affect the determination of the amount and timing of revenue from contracts with customers:

#### **Identifying contract with customers**

Company enters into agreements with its customers which define the key terms of the contract with customers. However, the rates and quantity for the supplies are separately agreed through purchase orders. Management has exercised judgement to determine that contract with customer for the purpose of Ind AS 115 is agreement is ready along with customer POs for the purpose of identification of performance obligations and other associated terms.

#### **Identifying performance obligation**

Company enters into a contract with customer for sale of products & services which are to be produced using the Sub assemblies and various mechanical parts and provided the services. The Company also determined that the promises to transfer the product and service within the context of the contract.

# <u>Determination of timing of satisfaction of performance obligation for sale of products & services</u>

The Company concluded that revenue for sale of products & services is to be recognised at point in time because it does not meet the criteria for recognising revenue over a period of time. The Company has applied judgment in determining the point when the control of the products & services are transferred based on the criteria's mentioned in the standard read along with the contract with customers, applicable laws and considering the industry practices. Accordingly, the Company has exercised following judgments:

#### Finished goods

The goods manufactured are "make to print" or "Integration and Testing" as per specific customer designs for which the sub assembly, Harness, Mechanical Parts before commercial production commences. Further, the dispatch of goods is made on the basis of the specific production schedules obtained from the customer. The Company has made judgement in determining the point of time when the control is passed on to the customer considering the terms of contract with customers along with application of various commercial laws and industry practices.

#### **Services**

The instructions for services are provided by customer to the Company. Company can perform the service obligations in the plant. Once service is done by the Company the

customer confirms the services. The Company has made judgement in determining the point of time when the performance is completed is passed on to the customer considering the terms of contract with customers along with application of various commercial laws and industry practices.

#### **Determination of revenue in case of Bill-and-hold transaction**

#### i) Reason for the bill-and-hold arrangement

The company completes its performance obligation to transfer the control of the goods to the customer in accordance with the agreed -upon specifications in the contract for which customer has accepted the control and confirmed to the Company. However, due to the non-availability of international cargo and aircrafts, the physical movement of goods did not happen. Hence, company recognised the revenue of goods on these goods in the current year.

- ii) The company identified the goods and stored separately in the factory premises until goods are cleared from the factory premises.
- iii) The goods are ready for physical transfer to the customer from the factory premises of the company.
- iv) The company cannot use the goods for any other purpose and direct it to another customer.

#### **2.21. Leases**

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116 Leases. Identification of a lease requires significant judgment. The Company uses significant judgment in assessing the lease term (including anticipated renewals) and the applicable discount rate. The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Company revises the lease term if there is a change in the non-cancellable period of a lease. The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

#### i) The following is the movement in lease liabilities during the year ended March 31, 2023

#### [In Indian Rupees (Lakhs), unless otherwise stated]

| Total discounted lease liabilities as at March 31, 2023 | 254.16                  | 285.43                  |

#### 2.22 Recent accounting pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On March 31, 2023, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2023, as below:

#### **Ind AS 1-Presentation of Financial Statements:**

This amendment requires the entities to disclose their material accounting policies rather than their significant accounting policies. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and the impact of the amendment is insignificant in the financial statements.

#### Ind AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors:

This amendment has introduced a definition of accounting estimates' and included amendments to Ind AS 8 to help entities distinguish changes in accounting policies from changes in accounting estimates. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and there is no impact on its financial statements.

#### Ind AS 12 - Income Taxes:

This amendment has narrowed the scope of the initial recognition exemption so that it does not apply to transactions that give rise to equal and off setting temporary differences. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and there is no impact on its financial statement.

#### 32 Financial Instruments and Risk Review

#### **Capital Management**

For the purpose of the Company's capital management, capital includes issued equity capital, share premium and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure,

the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt.

#### Financial Risk Management objectives and policies:

The company's principal financial liabilities other than derivatives comprise loan and borrowings, trade payables. The main purpose of these financial liabilities is to finance the company's operations. The company's principal financial assets including loans, trade and other receivables and cash and cash equivalent that derive directly from its operations. The company FVTOCI and FVTPL investments and enters into a derivative transactions.

The company is exposed to market risk, credit risk and liquidity risk. The company's senior management oversees the management of these risks. The company's senior management is supported by a Finance and Risk Management Committee (FRMC) that advises on financial risks and the appropriate financial risk governance framework for the company. The FRMC provides assurance that the company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the company's policies and risk objectives. Further, all the derivative activities for risk management purposes are carried out by experienced members from the senior management who have relevant expertise, appropriate skills and supervision. It is the company's policy that no trading in activities for speculative purposes may be undertaken. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised as below:

#### i) Credit Risk

Credit risk is the risk of financial loss arising from counterparty failure to repay or service debt according to the contractual terms or obligations. Credit risk encompasses of both, the direct risk of default and the risk of deterioration of creditworthiness as well as concentration of risks. Credit risk is controlled by analysing credit limits and creditworthiness of customers on a continuous basis to whom the credit has been granted after obtaining necessary approvals for credit.

Financial instruments that are subject to concentrations of credit risk principally consist of trade payables and borrowings. None of the financial instruments of the Company result in material concentration of credit risk.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk was  $\stackrel{?}{\sim}$  4,576.76 Lakhs and  $\stackrel{?}{\sim}$  3,513.00 Lakhs as of March 31, 2023 and March 31, 2022 respectively, being the total of the carrying amount of balances with trade receivables.

#### Trade receivables

Ind AS requires expected credit losses to be measured through a loss allowance. The Company assesses at each date of statements of financial position whether a financial asset or a group of financial assets is impaired. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

#### ii) Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: Interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits and derivative financial instruments.

The sensitivity analysis in the following sections relate to the position as at March 31, 2023 and March 31, 2022.

The analysis excludes the impact of movements in market variables on the carrying values of gratuity and other post-retirement obligations and provisions.

#### Foreign Currency exchange rate risk

The fluctuation in foreign currency exchange rates may have potential impact on the statement of profit or loss and other comprehensive income and equity, where any transaction references more than one currency or where assets / liabilities are denominated in a currency other than the functional currency of the respective entities. Considering the countries and economic environment in which the Company operates, its operations are subject to risks arising from fluctuations in exchange rates in those countries. The risks primarily relate to fluctuations in US Dollar, Euro, Singapore Dollar, Great Britain Pound, Japanese Yen against the respective functional currencies of the Company. The Company, as per its risk management policy, uses derivative instruments primarily to hedge foreign exchange.

The company manages its foreign currency risk by hedging its forecasted sales for next 1 year to the extent of 40% to 50% on rolling basis.

When a derivative is entered into for the purpose of being a hedge, the Company negotiates the terms of those derivatives to match the terms of the hedged exposure. For hedges of forecast transactions, the derivatives cover the period of exposure from the point the cash flows of the transactions are forecasted upto the point of settlement of the resulting receivable or payable that is denominated in the foreign currency. The company discloses fair value of the outstanding derivative in the financial statements. The impact on the company's pre-tax equity due to change in fair value of the outstanding forward contracts as follows:

# 1) Details of foreign currency exposures that are not hedged by a derivative instrument or otherwise

#### Sensitivity analysis

The following table demonstrates the sensitivity to a reasonable possible change in USD exchange rates, with all other variables held constant, the impact on the Company's profit before tax due to changes in the fair value of monetary assets and liabilities. The Company's exposure to foreign currency changes for all other currencies is not material.

| For the year ended | Currency | Change in rate | Effect on pre-tax equity |
|--------------------|----------|----------------|--------------------------|
| March 31, 2023     | USD      | +10%           | 74.37                    |
|                    | USD      | -10%           | (74.37)                  |
| March 31, 2022     | USD      | +10%           | (131.83)                 |
|                    | USD      | -10%           | 131.83                   |

#### iii) Liquidity Risk

#### a) Liquidity risk management

Liquidity risk refers to the risk that the Company cannot meet its financial obligations. The objective of liquidity risk management is to maintain sufficient liquidity and ensure that funds are available for use as per requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

#### b) Maturities of financial liabilities

The following tables detail the Group's remaining contractual maturity for its financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

| TO          | TAL FINANCIAL LIABILITIES                          |             | 13,052.08      | 5,242.11       | 13,052.08      | 5,242.11       |

The management assessed that the fair values of short term financial assets and liabilities significantly approximate their carrying amounts largely due to the short - term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The Company determines fair values of financial assets and financial liabilities by discounting the contractual cash inflows/outflows using prevailing interest rates of financials instruments with similar terms. The initial measurement of financial assets and financial liabilities is at fair value. The fair value of investment is determined using quoted net assets value from the fund. Further, the subsequent measurement of all financial assets and liabilities (other than investment in mutual funds) is at amortised cost, using the effective interest method.

#### Discount rates used in determining fair value

The interest rate used to discount estimated future cash flows, where applicable, are based on the incremental borrowing rate of the borrower which in case of financial liabilities is the weighted average cost of borrowing of the Company and in case of financial assets is the average market rate of similar credit rated instrument.

The Company maintain policies and procedure to value financial assets or financial liabilities using the best and most relevant data available. In addition, the Company internally reviews valuation, including independent price validation for certain instruments.

Fair value of financial assets and liabilities is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

The following methods and assumptions were used to estimate fair value:

- (a) Fair value of short term financial assets and liabilities significantly approximate their carrying amounts largely due to the short term maturities of these instruments.
- (b) Security deposit paid are evaluated by the Company based on parameters such as interest rate non performance risk of the customer. The fair value of the Company's security deposit paid are determined by estimating the incremental borrowing rate of the borrower (primarily the landlords). Such rate has been determined using discount rate that reflects the average interest rate of borrowing taken by similar credit rate companies where the risk of non performance risk is more than significant.
- (c) The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lessor, If not readily determinable, using the incremental borrowing rates. Lease liabilities are remeasured with a corresponding adjustment to the related right-o-fuse asset if the Company changes its assessment if whether it will exercise an extension or a termination option.

#### 34 Employee benefits

#### (a) Defined Contribution Plan

The Company makes Provident Fund contributions to defined contribution plan administered by the Regional Provident Fund Commissioner. Under this scheme, the Company is required to contribute a specified percentage of payroll cost to fund the benefits. The Company has recognized ₹ 12.08 Lakhs for Provident Fund contributions (March 31, 2022: ₹ 8.72 Lakhs) in the Statement of Profit and Loss. The provident fund payable by the Company are in accordance with rules framed by the Government from time to time.

#### (b) Defined Benefit Plans:

#### **Gratuity**

The present value of defined benefit obligation and the related current service costs are measured using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date.

The gratuity benefits are governed by the Payment of Gratuity Act, 1972. Under the Act, every employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age. Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn) for each completed year of service as per the provisions of the Payment of Gratuity Act, 1972. The Plan is funded as on the valuation date.

#### Defined benefit plans – as per actuarial valuation on March 31, 2023

The expected rate of return on plan assets is based on the average long term rate of return expected on investments of the fund during the estimated term of obligation.

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The Indian Parliament has approved the Code on Social Security, 2020 which would impact the contributions by the company towards Provident Fund and Gratuity. The Ministry of Labour and Employment had released draft rules for the Code on Social Security, 2020 on November 13, 2020, and invited suggestions from stakeholders which are under consideration by the Ministry. The Company will assess the impact and its evaluation once the subject rules are notified. The Company will give appropriate impact in its financial statements in the period in which, the Code becomes effective and the related rules to determine the financial impact are published.

Ratios

(1) Debt represents only lease liabilities

(2) Net Profit after taxes + Non-cash operating expenses + Interest + other adjustments like loss on sale of Fixed assets etc.
(3) Lease payments for the current year
(4) Tangible net worth + deferred tax liabilities + Lease Liabilities
Explanations:
Note 1: Due to increase in the profit for the current year
Note 2: Due to increase in sales and the closing inventory

Note 3: Due to increase in sales in current year

Note 4: Due to increase in sales in current year Note 5: Due to increase in the sales and profit for the current year Note 6: Due to Increase in the earnings before interest and taxes in current year

- The Company has considered the possible effects that may result from the pandemic while assessing the recoverability of receivables, inventory, and other financial assets. The Company has also considered the impacts on Deferred Tax Assets. In developing the assumptions relating to the possible future uncertainties in the global and domestic economic conditions because of this pandemic, the Company, as at the date of approval of these financial statements has used internal and external sources of information. The impact of the global health pandemic may be different from that estimated as at the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions

#### **Independent Auditor's Report**

#### To the Members of Kalyani Strategic Systems Limited

#### **Report on the Audit of the Financial Statements**

#### **Opinion**

We have audited the accompanying financial statements of **Kalyani Strategic Systems Limited** ("the Company") which comprises the Balance Sheet as at 31<sup>st</sup> March, 2023, the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of changes in equity and the Statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its profit including other comprehensive income, the changes in equity and its cash flows for the year ended on that date.

#### **Basis for Opinion**

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including annexures to Board's Report, but does not include the financial statements and our auditor's report thereon. The Board's Report including annexures to Board's Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Board's Report including annexures to Board's Report if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take such actions as are required under the provisions of the Companies Act, 2013.

#### Responsibility of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities;

selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

#### **Auditor's Responsibilities for Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
  or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
  is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
  collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

#### **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "**Annexure A**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company, so far as appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss including other comprehensive income, the Statement of Changes in Equity and the Cash Flow Statement dealt with by this report are in agreement with the books of account.
  - d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - e) On the basis of written representations received from the directors as on 31<sup>st</sup> March, 2022, taken on record by the Board of Directors, none of the directors is disqualified as on 31<sup>st</sup> March, 2022, from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate report in **Annexure B**.
  - g) The Company has not paid any managerial remuneration during the financial year covered by this report. Accordingly, reporting requirements under section 197(16) of the Act do not apply to the Company.
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company does not have any pending litigations which would impact its financial position;
    - ii. The Company did not have any long-term contracts including derivatives contracts for which there were any material foreseeable losses;
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- c. Based on such audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) as provided under (a) and (b) above, contain any material misstatement.
- v. The Company has neither declared nor paid any dividend during the year.

"ANNEXURE A" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF KALYANI STRATEGIC SYSTEMS LIMITED FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2023.

In terms of the information and explanations sought by us and given by the Company and the books and records examined by us in the course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company has maintained proper records showing full particulars including quantitative details and situation of property, plant and equipment.
  - (B) The Company has maintained proper records showing full particulars of intangible assets.
  - (b) As explained to us, the property, plant and equipment have been physically verified by the management at reasonable intervals, during the financial year. According to the information and explanations given to us, no discrepancies were noticed on physical verification of the property, plant and equipment.
  - (c) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties are held in the name of the Company.
  - (d) The Company has not revalued any of its property, plant and equipment (including right-of-use assets) and intangible assets during the year.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at 31<sup>st</sup> March, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) The inventory comprising stock of raw materials, work in progress, finished goods and stock in trade was physically verified by the management during the year. In our opinion, the frequency of verification by the management is reasonable and the coverage and procedure for such verification is appropriate. Discrepancies of 10% or more in aggregate for each class of inventory were not noticed on such physical verification.
  - (b) According to the information and explanations given to us, the Company has been sanctioned working capital limits in excess of ₹ 5 crore, in aggregate, by banks on the basis of security of current assets of the Company. Based on the records examined by us in the course of audit of the financial statements, the quarterly returns/statements filed by the Company with such banks are in agreement with the books of accounts of the Company. The Company is also required to submit bi-monthly budgeted cash flow statements to the bank. Since the statements are filed on budgeted basis, the figures mentioned in the statements do not necessarily agree with the books of account.]
- (iii) (a) The Company has not made any investments in, provided any guarantee or security during the year to companies, firms, limited liability partnerships or any other parties. In respect of the loans or advances in the nature of loans, secured or unsecured, granted by the Company during the year to companies, firms, limited liability partnerships or any other parties, we report as under.

- (iv) In our opinion and according to the information and explanations given to us, the Company has not granted any loans in contravention of sections 185 and 186 of the Companies Act, 2013. The Company has complied with the provisions of section 186 of the Act, with respect to the investments made and loans given. The Company has not given any guarantee or provided security in connection with a loan to any other body corporate or person.
- (v) The Company has not accepted deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules framed, thereunder.
- (vi) Requirement to maintain cost records under sub-section (1) of section 148 of the Companies Act, 2013 does not apply to the Company.

## Kalyani Strategic Systems Limited

- (vii) (a) According to the records of the Company, the Company was generally found to be regular in depositing undisputed statutory dues including goods and services tax, provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities. According to the information and explanations given to us, no undisputed statutory dues were outstanding as at 31st March, 2023 for a period of more than six months from the date those became payable.
  - (b) According to the records of the Company, there are no statutory dues which have not been deposited on account of any dispute.
- (viii) There were no transactions relating to previously unrecorded income that have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961.
- (ix) (a) In our opinion and according to the information and explanation given to us, the Company has not defaulted in repayment of loans or other borrowings or in the payment of interest, thereon, to any lender.
  - (b) According to the information and explanation given to us, the Company has not been declared as willful defaulter by any bank or financial institution or other lender.
  - (c) The Company has not taken any term loan during the year and there are no outstanding term loans at the beginning of the year. Hence, reporting under clause 3(ix)(c) of the Order is not applicable.
  - (d) On an overall examination of the financial statements of the Company, funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.
  - (e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
  - (f) The Company has not raised any loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies. Hence reporting under clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company did not raise any money by way of initial public offer or further public offer (including debt instruments) during the year. Accordingly, reporting under clause 3(x)(a) of the Order is not applicable.
  - (b) In our opinion and according to the information and explanations given to us, the company has utilized funds raised by way of preferential allotment or private placement of shares for the purposes for which they were raised.
- (xi) (a) Based upon the audit procedures performed and the information and explanations given to us by the Management, we report that no fraud by the Company or no fraud on the Company has been noticed or reported during the period.
  - (b) No report under subsection (12) of section 143 of the Companies Act, 2013 was required to be filed by the auditors in Form ADT-4 as prescribed under rule 13 of the Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) The Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, reporting under clause 3(xii) of the Order is not applicable.
- (xiii) According to the records of the Company and according to the information and explanations given to us, the Company has not entered into any transactions with the related parties in contravention of the provisions of section 188 of the Companies Act, 2013. The details of related party transactions have been disclosed in the financial statements as required by the applicable accounting standards. Provisions of section 177 of the Act do not apply to the Company.

- (xiv) In our opinion and based on our examination, the Company does not have an internal audit system and is not required to have an internal audit system as per provisions of the Companies Act, 2013.
- (xv) According to the information and explanations given to us, in our opinion during the year the company has not entered into any non-cash transactions with its directors or persons connected with its directors and hence provisions of section 192 of the Companies Act, 2013 are not applicable to the company.
- (xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.
  - (b) The Company has not conducted any Non-Banking Financial or Housing Finance activities requiring a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.
  - (c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India.
  - (d) In our opinion and according to the information and explanations given to us, there is no core investment company as part of the Group. Hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.
- (xvii) The Company has not incurred any cash losses during the current financial year covered by this report but Company has incurred cash losses in the preceding financial year.

In ₹ Lakhs

|                      | Current Financial Year | Preceding Financial Year |
|----------------------|------------------------|--------------------------|
| Cash losses incurred | NIL                    | 134.55                   |

- (xviii) There has been no resignation by the statutory auditors of the Company during the year.
- (xix On the basis of the verification of the financial ratios, ageing and expected dates of the realization of financial assets and payment of financial liabilities and other information accompanying financial statements, and information and explanation given to us, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) Provisions of 135 of the Companies Act, 2013 do not apply to the Company. Hence, reporting under clause 3(xx) of the Order is not applicable.

"ANNEXURE B" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF KALYANI STRATEGIC SYSTEMS LIMITED FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2023.

We have audited the internal financial controls over financial reporting of **Kalyani Strategic Systems Limited** ("the Company") as of 31<sup>st</sup> March, 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

# **Management's Responsibility For Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

## **Auditor's Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

### **Meaning Of Internal Financial Controls Over Financial Reporting**

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

# **Inherent Limitations Of Internal Financial Controls Over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

#### **Opinion**

In our opinion, the Company has, in all material respects, internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31<sup>st</sup> March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# Notes forming part of financial statements for the year ended 31st March, 2023

# 1. Corporate information:

Kalyani Strategic Systems Limited was incorporated on 20<sup>th</sup> December, 2010, as a public limited company under the erstwhile Companies Act, 1956. The Company is a subsidiary of Bharat Forge Limited, which holds 100% of the issued and subscribed equity share capital of the Company. The Company's CIN is U31902PN2010PLC138025.

The Company has been formed with the object to engage in the business of scientific, technical and other research and development in the field of developing/ deploying advance defence, aerospace and other strategic areas. During the financial year covered by these statements, the Company was engaged in trading activities and in carrying out trial runs of its products.

The Company has identified 12 months as its operating cycle.

These Financial statements were authorised for issue in accordance with resolution of the Board of Directors on 02<sup>nd</sup> May, 2023.

In view of Rule 6 of the Companies (Accounts) Rules, 2014, the Company has decided not to present consolidated financial statements for the year ended 31st March 2023, since its Holding Company namely Bharat Forge Limited is going to present the consolidated financial statements and the conditions prescribed said rule have been complied with.

## The Scheme of Amalgamation:

In a Scheme of Amalgamation approved by the Ministry of Corporate Affairs through Regional Director (W.R), as per Order dated 24th February, 2023, Analogic Controls India Limited (the Transferor Company), a wholly owned subsidiary of the Company merged with the Company with retrospective effect from the Appointed Date being 1st April, 2022. The entire business and undertakings of the Transferor Company were transferred to and vested in the Company, on a going concern basis with retrospective effect from the respective Appointed Date. The business and undertakings so transferred comprised all the assets and properties, whether movable or immovable, real or personal, including all the debts, liabilities and obligations as specified in the Scheme.

The said scheme became effective from 2nd March, 2023 (the Effective Date) upon which the entire business and undertaking together with all the related assets and liabilities as stated above were deemed to have been transferred to and vested in the Company with retrospective effect from 1st April, 2022.

The business of the Transferred Undertaking was deemed to have been carried out by the Transferor Company in Trust for the Company from the respective Appointed Dates till the Effective Date. Any income or profit arising to the Transferor Company in relation to the transferred business and undertaking and all costs, charges, expenses and losses incurred by the Transferor Company in relation to the transferred business and undertaking, are for all purposes treated as the income, profits, costs, charges, expenses and losses, as the case may be, of the Company in accordance with the Scheme. Accordingly, these Financial Statements incorporate the result of the activities carried out by Analogic Controls India Limited in trust for the Company from 1st April, 2022 till 2nd March, 2023. The effect of the said scheme is recorded in the books of the Company and Transferor Company as stated in the scheme and in accordance with the provisions of Appedix 'C' of Ind AS 103 - Business Combinations. Accordingly the comparitive figures in this financial statement have been restated.

These Financial Statements include necessary disclosures at appropriate places in respect of Property, Plant & Equipment, Accumulated Depreciation, Cash and Cash Equivalents and Reserves including surplus in the Statement of Profit and Loss deemed to have been transferred from the Transferor Company on the respective Appointed Dates.

# 2. Significant accounting policies:

# 2.1 Basis of accounting and preparation of financial statements:

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013.

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- i Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

#### 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or
- iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

#### 2.3 Foreign currency transactions and translations:

The Company's financial statements are presented in INR, which is also the Company's functional currency. Items included in the financial statements are measured using functional currency.

### a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date, continuing the policy adopted for accounting for exchange difference arising from translation of long term foreign currency monetary items recognised in the financial statements for the year ended 31st March, 2016. Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate

are recognized as income or expenses in the period in which they arise except for differences pertaining to Long Term Foreign Currency Monetary Items as mentioned subsequently.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

# b) Exchange differences

The Company has availed the option available under Ind AS 101 Para D13 AA pertaining to long term foreign currency translation difference account (FCMITDA). Hence, the Company has continued the policy adopted for accounting for exchange differences arising from translation of long term foreign currency monetary items recognised in the financial statements for the year ended 31st March, 2016 as per previous GAAP. Accordingly, the exchange differences are accounted for as under

- i Exchange differences arising on long-term foreign currency monetary items recognised in the financial statements for the year ended 31<sup>st</sup> March, 2016 related to acquisition of a fixed asset are capitalized and depreciated over the remaining useful life of the asset.
- ii Exchange differences arising on other long-term foreign currency monetary items recognised in the financial statements for the year ended 31<sup>st</sup> March, 2016 are accumulated in the "Foreign Currency Monetary Item Translation Difference Account" and amortized over the remaining life of the concerned monetary item.
- iii All other exchange differences are recognized as income or as expenses in the period in which they arise.

For the purpose of a and b above, the Company treats a foreign currency monetary item as "long-term foreign currency monetary item", if it has a term of 12 months or more at the date of its origination. In accordance with MCA circular dated August 9, 2012, exchange differences for this purpose, are total differences arising on long-term foreign currency monetary items for the period. In other words, the Company does not differentiate between exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost and other exchange difference.

# 2.4 Investment in subsidiaries, associates and joint ventures:

The Company has accounted for its investment in subsidiaries, associates and joint ventures at cost, less accumulated impairment (Refer to note 2.16).

### 2.5 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would

use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets, and significant liabilities, such as contingent consideration. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. Valuers are normally rotated every three years.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

# 2.6 Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

The policy of recognizing the revenue is determined by the five stage model proposed by Ind AS 115 "Revenue from contract with customers". The disclosures of significant accounting judgements, estimates and assumptions relating to revenue from contracts with customers are provided in Note no. 43.

#### a) Revenue from sale of goods:

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer.

The control of the goods manufactured in case of export sales is transferred usually on the date of issue of Bill of Lading while in case of domestic sales, the control is transferred usually on delivery of goods.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company considers the effect of variable consideration the existence of significant financing components, noncash consideration, and consideration payable to the customer, if any.

# b) Sale of Services:

Revenue on time and material contracts are recognized as the related services are performed and revenue from the end of the last invoicing to there porting date is recognized as unbilled revenue. Revenue from fixed-price, fixed-time frame contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion.

## c) Contract assets:

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

#### d) Trade receivables:

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in note no. 2.16.

### e) Contract liabilities:

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

### f) Interest Income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instruments (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

# g) Dividend Income

Revenue is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

#### h) Profit / Loss on sale of investments

Profit / Loss on sale of investments is recognised when all the significant risk and rewards of ownership in investment is transferred.

# i) Significant Financing Component

For the majority of the contracts, advance payments are received, prior to commencement of work and milestone payments are paid in accordance with the terms of the contract.

Payments received from customers in advance are not considered to be a significant financing component as they are given with the objective to protect the interest of the contracting parties.

# j) Billed and hold sales

Bill and hold sales is recognised when the following criteria are met:

- i the reson for the bill and hold sales is substantive
- ii the product is identified separately as belonging to the customer
- iii the product is currently ready for physical transfer to the customer
- iv the company does not have ability to use the product or direct it to other customer

# 2.7 Government grants:

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant or subsidy relates to revenue, it is recognized as income on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs, which they are intended to compensate. Where the grant relates to an asset, it is recognized as deferred income and is allocated to statement of profit and loss over the periods and in the proportions in which depreciation on those assets is charged.

When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favourable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

#### 2.8 Taxes:

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognized for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realized. For recognition of deferred taxes, the timing differences which originate first are considered to reverse first.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the guidance note on "Accounting for Credit Available in respect of Minimum Alternative Tax" under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

# Indirect taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of Indirect taxes paid, except:

- i When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable.
- ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

### 2.9 Property, plant and equipment:

Property, plant and equipment, capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including GST, wherever applicable. All the significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the profit or loss as incurred. The present value of the

expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Assets under improvement to leased premises are fully depreciated over the lease period of the asset.

The Management's estimate of the useful lives of various fixed assets, which is in line with the provisions of Schedule II to the Companies Act, 2013 is given below.

| Type of Asset           | Estimated useful life |  |
|-------------------------|-----------------------|--|
| i) Factory Building     | 30 years              |  |
| ii) Plant and Machinery | 15 years              |  |
| iii) Furniture          | 10 years              |  |
| iv) Office equipment    | 5 years               |  |

Losses arising from the retirement of, and gains and losses arising from disposal of property plant and equipment which are carried at cost are recognised in the Statement of Profit and Loss.

An item of property, plant and equipment or any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

### 2.10 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is disposed.

#### 2.11 Leases:

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Company as a Lessee

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

## i) Right of use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the Underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

| Type of Asset     | Useful life of asset               |
|-------------------|------------------------------------|
| i) Leasehold Land | Over the period of lease agreement |

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

# ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a

modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liability and Right-of-use asset have been separately presented in the balance sheet and lease payments have been classified as financing cash flows.

#### iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

#### Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

#### 2.12 Inventories:

Inventories are stated at the lower of cost and net realisable value.

Inventories of research and development (R & D) activity are valued at cost or estimated realisable value whichever is lower.

# 2.13 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or Group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

### 2.14 Provisions, Contingent Liabilities:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

#### 2.15 Retirement and other employee benefits:

# a) Provident Fund:

The Company operates a defined contribution plan.

For all the employees of the Company, portion of provident fund is contributed to the Government administered pension fund which is a defined contribution scheme.

The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution

already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

## b) Gratuity:

The Company operates a defined benefits plan for its employees. The plan is at present unfunded. The cost of providing benefits under these plans is determined on the basis of actuarial valuation at each year end. Actuarial valuation is carried out using the project unit credit method. Actuarial valuation is carried out for the plan using the project unit credit method.

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- i The date of the plan amendment or curtailment, and
- ii The date that the Company recognises related restructuring costs
  - Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss
- i Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- ii Net interest expense or income

### c) Privilege leave benefits:

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end.

Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The Company presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where the Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

#### 2.16 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial Asset:

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

The Company's investments in its subsidiary, associate and joint venture are carried at cost in accordance with Ind AS 27.

## b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)

#### c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

# d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

# e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

The Company has chosen to account for investments in subsidiaries, joint ventures and associates at cost determined in accordance with IND AS -27.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

## g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- iv Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms
  - ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected under the head 'other expenses' in the P&L.
  - The balance sheet presentation for various financial instruments is described below:
- i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the

net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

#### a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables.

### b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

# ii Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

### iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

#### c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

#### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

# D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                                                                                                                                 |
|----------------------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised Cost             | FVTPL                     | Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.                                                                                                                     |
| FVTPL                      | Amortised Cost            | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.                                                                                                                 |
| Amortised Cost             | FVTOCI                    | Fair value is measured at reclassification date.  Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                          |
| FVTOCI                     | Amortised Cost            | Fair value at reclassification date becomes its new amortised cost carrying amount. However, cumulative gain or loss in OCI is adjusted against fair value. Consequently, the asset is measured as if it had always been measured at amortised cost. |
| FVTPL                      | FVTOCI                    | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                |
| FVTOCI                     | FVTPL                     | Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date.                                                                                              |

# **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

### 2.17 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

# 2.18 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

### 2.19 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

### 2.20 Earnings per share:

Basic earnings per share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit attributable to the equity holders

# **Kalyani Strategic Systems Limited**

of the Company as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

#### 2.21 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

#### 2.22 Use of estimates

The preparation of Financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying standalone financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

|--------------------------------------|--------|------------------|------------------------------|
|                                      |        | 31st March, 2023 | 31 <sup>st</sup> March, 2022 |
| Provisions for employee benefits :   |        |                  |                              |
| Gratuity                             |        | 2.00             | -                            |
| Compensated absences                 |        | 0.59             | 0.14                         |
| Other provisions :                   |        |                  |                              |
| Liquidated damages <sup>(a)(b)</sup> |        | 29.00            | -                            |
|                                      | TOTAL: | 31.59            | 0.14                         |

(a) In pursuance of Ind AS-37 'Provisions, contingent liabilities and contingent assets', the provisions required for liquidated damages have been incorporated in the books of account in the following manner:

| Opening Balance          | -       | - |
|--------------------------|---------|---|
| Arising during the year  | 28.27   | - |
| Utilised during the year | (28.06) | - |
| Provision Written Back   | (4.84)  | - |
| Closing balance          | (4.63)  | - |
|                          |         |   |

(b) Provision for liquidated damages represents the expected claims not in the nature of variable consideration which the Company may need to pay for non-fulfilment of certain commitments as per the terms of the respective sales contracts. These are determined on a case to case basis considering the dynamics of each contract and the factors relevant to that sale.

# 37 Disclosure pursuant to Ind AS 19 on "Employee Benefits"

#### (a) Defined contribution plans:

The Company makes Provident Fund contributions to defined contribution retirement benefit plans for qualifying employees. Under the schemes, the Company is required to contribute a specified percentage of the payroll costs to the funds. The Company recognized ₹ 8.98 lakhs (Previous Year: ₹ 3.83 lakhs) for the provident fund contributions in the statement of profit and loss. The contributions payable to this plan by the Company are at the rates specified in respective legislations.

#### (b) Gratuity plan:

During the current financial year the Company has amalgamated the Analogic Controls India Limited (transfer Company) the Kalyani Strategic Systems Limited. The note relate to accounting policy has been stated in the Note No. 2.15. On the basis of accounting policy stated the information presented below represents the combined position of the merged entity.

The present value of defined benefit obligation and the related current service costs are measured using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date.

The gratuity benefits are governed by the Payment of Gratuity Act, 1972. Under the Act, every employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age. Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn) for each completed year of service as per the provisions of the Payment of Gratuity Act, 1972 subject to a cap of Rs. 20 lakhs.

With effect from 1st April, 2022, in case of normal retirement of employees who have completed 10 years of services, gratuity is calculated based on 30 days salary (last drawn) for each completed year of service and cap of gratuity is 20 years. In case of early retirement of employees who have completed 15 years of services, gratuity is calculated based on 30 days salary (last drawn) for each completed year of service and cap of gratuity is 20 years. In case of death in service employees, gratuity is calculated based on 30 days salary (last drawn) for each completed year of service and cap of gratuity is 20 years.

The Plan is funded as on the valuation date.

Risk exposure and asset liability matching

Provision of a defined benefit scheme poses certain risks, some of which are detailed hereunder, as companies take on uncertain long term obligations to make future benefit payments.

### 1) Liability Risks

a) Asset-Liability Mismatch risk-

Risk which arises if there is a mismatch in the duration of the assets relative to the liabilities. By matching duration with the defined benefit liabilities, the company is successfully able to neutralize valuation swings caused by interest rate movements. Hence companies are encouraged to adopt asset-liability management.

b) Discount Rate Risk

Variations in the discount rate used to compute the present value of the liabilities may seem small, but in practice can have a significant impact on the defined benefit liabilities.

c) Future Salary Escalation and Inflation Risk

Since price inflation and salary growth are linked economically, they are combined for disclosure purposes. Rising salaries will often result in higher future defined benefit payments resulting in a higher present value of liabilities especially unexpected

salary increases provided at management's discretion may lead to uncertainties in estimating this increasing risk.

#### 2) Asset Risks

All plan assets are maintained in a trust fund managed by a public sector insurer viz; LIC of India. LIC has a sovereign guarantee and has been providing consistent and competitive returns over the years.

The company has opted for a traditional fund wherein all assets are invested primarily in risk averse markets. The company has no control over the management of funds but this option provides a high level of safety for the total corpus. A single account is maintained for both the investment and claim settlement and hence 100% liquidity is ensured. Also interest rate and inflation risk are taken care of.

The following table summarises the components of net benefit expense recognised in the statement of profit and loss and the funded status and amounts recognised in the balance sheet for the gratuity plan.

# The principal assumptions used in determining gratuity for the Company's plan is shown below:

#### 43 Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. These estimates are reviewed regularly and any change in estimates are adjusted prospectively.

In the process of applying the Company's accounting policies, management has made the following significant judgements, estimates and assumptions which have the most significant effect on the amounts recognised in the financial statements.

# a) Revenue recognition

The Company's contracts with customers could include promises to transfer multiple products and services to a customer. The Company assesses the products or services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables.

Judgement is also required to determine the transaction price for the contract. The transaction price could be either a fixed amount of customer consideration or variable consideration with elements such as volume discounts, service level credits, performance bonuses, price concessions and incentives. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component. Any consideration payable to the customer is adjusted to the transaction price, unless it is a payment for a distinct product or service from the customer. The estimated amount of variable consideration is adjusted in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur and is reassessed at the end of each reporting period. The Company allocates the elements of variable considerations to all the performance obligations of the contract unless there is observable evidence that they pertain to one or more distinct performance obligations.

The Company uses judgement to determine an appropriate standalone selling price for a performance obligation. The Company allocates the transaction price to each performance obligation on the basis of the relative standalone selling price of each distinct product or service promised in the contract. Where standalone selling price is not observable, the Company uses the expected cost plus margin approach to allocate the transaction price to each distinct performance obligation.

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

Revenue for fixed-price contract is recognised using percentage-of-completion method. The Company uses judgement to estimate the future cost-to-completion of the contracts which is used to determine the degree of completion of the performance obligation.

#### b) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer note 44 and 45 for further disclosures.

#### c) Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Company.

#### d) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### e) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon acertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availabliity of adquate taxable income within the time permissible as per the taxing legislations.

# f) Current / Non-Current Classification

The Company evaluates funds requirement on the basis of internal budgets and forecasts and believes that on the basis of current scale of operations and cash realisation cycle, it would be able to generate sufficient funds from operations in order to meet such requirement in the foreseeable future of upto one year.

# 44 Financial instruments by category

Set out below, is a comparison by class of the carrying amounts and fair value of the Company's financial instruments.

#### 46 Financial risk management disclosure

The Company's principal financial liabilities, other than derivatives, comprise trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include Investments in equity instruments, loans, cash and cash equivalents and other bank balances that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management advises on financial risks and the appropriate financial risk governance framework for the Company. The senior management provides assurance for the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

#### a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

The sensitivity analysis in the following sections relate to the position as at 31st March, 2023 and 31st March, 2022.

The analysis exclude the impact of movements in market variables on: the carrying values of gratuity and other post retirement obligations, provisions.

The following assumptions have been made in calculating the sensitivity analysis:

The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31st March, 2023, 31st March, 2022 including the effect of hedge accounting (if any).

#### i) Equity price risk

The Company's investment in equity instruments comprise mainly of investments in subsidiaries and Joint Ventures which are strategic long term investments. Reports on the equity portfolio are submitted to the Company's management on a regular basis. The Company's Board of Directors reviews and approves all equity investment decisions.

At the reporting date, the exposure to unlisted equity securities at carrying value was ₹ 3,366.46 Lakhs/- (for previous year ended 31st March, 2022 - ₹ 2,000.15/- Lakhs)

#### ii) Foreign Currency Sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities.

(In ₹ Lakhs)

|                              | Currency | Change in FC Rate | Effect on profit before tax | Effect on equity pre-tax |

#### b) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities and from its financing activities, including deposits with banks and financial institutions, and other financial instruments.

#### i) Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company's management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

The Company's maximum exposure to credit risk for the components of the balance sheet at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022 is the carrying amounts as illustrated in Note 14.

#### c) Liquidity risk

The Company monitors its risk of a shortage of funds using a liquidity planning tool. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, preference shares, finance leases and hire purchase contracts. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

# 52 Capital management

For the purpose of the Company's capital management, capital includes issued equity share capital, securities premium and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a net debt equity ratio, which is net debt divided by equity. The Company's policy is to keep the net debt equity ratio below 1.00. The Company includes within its borrowings net debt and interest-bearing loans-less cash and cash equivalents.

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call back loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period and in the year ended 31st March, 2023 and 31st March, 2022.

No changes were made in the objectives, policies or processes for managing capital during the years ended  $31^{st}$  March, 2023 and  $31^{st}$  March, 2022.

#### **53** Accounting Effects of the Business Combinations

As per the Scheme of Amalgamation approved by the Ministry of Corporate Affairs through Regional Director (W.R.) as stated hereinbefore, the business and undertakings of Analogic Controls India Limited ("Transferror Company") which were entities under common control with the Company, were transferred to and vested in the Company on going concern basis with retrospective effect from 1<sup>st</sup> April, 2022. Consequently, the business and undertakings of the Transferor Company along with the undermentioned Assets and Liabilities stood transferred in favor of the Company, which have been accounted for as per the method and in the manner prescribed in the said Scheme, in accordance with Appendix 'C' of IND AS 103 - Business Combinations. The Scheme became effective on 2<sup>nd</sup>, March, 2023.

The Transferror Company was engaged in the business of designing, developing and manufacturing of reliable electronic systems and sub-systems for mission critical applications. The Transferror Company offers products and services for mission critical technologies of national importance in Defence, Aerospace, Communications and Industrial Electronics.

#### 54 Disclosure pursuant to Ind AS 115 on "Revenue from contracts with customers"

#### a) Trade receivables and Contract balances:

The company classifies the right to consideration in exchange for deliverables as either a receivable or as unbilled revenue.

A receivable is a right to consideration that is unconditional upon passage of time. Revenue for time and material contracts are recognized as related service are performed. Revenue for fixed price maintenance contracts is recognized on a straight line basis over the period of the contract. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset for these cases as right to consideration is unconditional upon passage of time.

Revenue recognition for fixed price contracts is based on percentage of completion method. Invoicing to the clients is based on completion of the contract. This would result in the timing of revenue recognition being different from the timing of billing the customers. Unbilled revenue for fixed price development contracts is classified as non financial asset as the contractual right to consideration is dependent on completion of contractual milestones.

Invoicing in excess of earnings are classified as unearned revenue.

Trade receivable and unbilled revenues are presented net of impairment in the Balance Sheet.

During the year ended 31<sup>st</sup> March, 2023 ₹ NIL (Previous Year : ₹ NIL) of unbilled revenue pertaining to fixed price development contracts has been reclassified to Trade receivables upon billing to customers on completion of contracts.

#### b) Changes in Contract Assets are as under:

#### c) Changes in Contract Liabilities are as under:

|                                                                                                        | As at            | As at                        |
|--------------------------------------------------------------------------------------------------------|------------------|------------------------------|
|                                                                                                        | 31st March, 2023 | 31 <sup>st</sup> March, 2022 |
| Balance at the beginning of the year                                                                   | -                | -                            |
| Changes due to business combinations                                                                   | 2.35             | -                            |
| Revenue recognised from unearned revenue/advance from customers at the beginning of the year           | (1.39)           | -                            |
| Increased due to invoicing during the year excluding the amounts recognised as revenue during the year | 80,691.31        | -                            |
| Decreased due to adjustment against revenue out of advance received during the year                    | (7.07)           | -                            |
| Balance at the end of the year                                                                         | 80,685.20        | -                            |

# d) Performance obligations and remaining performance obligations :

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognized as at the end of the reporting period and an explanation as to when the Company expects to recognize these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts where the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date, typically those contracts where invoicing is on time and material basis. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revalidations, adjustment for revenue that has not materialized and adjustments for currency.

The aggregate value of performance obligations that are completely or partially unsatisfied as at 31st March, 2023, other than those meeting the exclusion criteria mentioned above, is ₹ 80,685.18 lakhs (Previous year : NIL). Out of this, the Company expects to recognize revenue of ₹ 26,846.66 lakhs (Previous year : NIL) within the next one year and the remaining thereafter. This includes contracts that can be terminated for convenience without a substantive penalty since, based on current assessment, the occurrence of the same is expected to be remote.

# Reconciliation for revenue as per Statement of profit & loss and the contracted price arising on account of various adjustments:

|                                                      |                  | (In ₹ Lakhs)     |
|------------------------------------------------------|------------------|------------------|
|                                                      | As at            | As at            |
|                                                      | 31st March, 2023 | 31st March, 2022 |
| Revenue recognised as per Statement of Profit & loss |                  |                  |

## **Independent Auditor's Report**

## To the Members of Lycan Electric Private Limited

## **Report on the Audit of the Financial Statements**

## **Opinion**

We have audited the accompanying financial statements of **Lycan Electric Private Limited** ("the Company") which comprises the Balance Sheet as at 31<sup>st</sup> March, 2023, the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of changes in equity and the Statement of cash flows for the year ended 31<sup>st</sup> March, 2023, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its loss including other comprehensive income, the changes in equity and its cash flows for the year ended on that date.

## **Basis for opinion**

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Information other than the financial statements and auditor's report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including annexures to Board's Report, but does not include the financial statements and our auditor's report thereon. The Board's Report including annexures to Board's Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Board's Report including annexures to Board's Report if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take such actions as are required under the provisions of the Companies Act, 2013.

## Responsibility of management and those charged with governance for the financial statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities;

selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

### Auditor's responsibilities for audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

## **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "**Annexure A**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company, so far as appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss including other comprehensive income, the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
  - d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - e) On the basis of written representations received from the directors as on 31<sup>st</sup> March, 2023, taken on record by the Board of Directors, none of the directors is disqualified as on 31<sup>st</sup> March, 2023, from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "**Annexure B**".
  - g) The Company has not paid any managerial remuneration during the financial year covered by this report. Accordingly, reporting requirements under section 197(16) of the Act do not apply to the Company.
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company does not have any pending litigations which would impact its financial position;
    - ii. The Company did not have any long-term contracts including derivatives contracts for which there were any material foreseeable losses;
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- c. Based on such audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) as provided under (a) and (b) above, contain any material misstatement.
- v. The Company has neither declared nor paid any dividend during the year.

# "ANNEXURE A" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF LYCAN ELECTRIC PRIVATE LIMITED FOR THE PERIOD ENDED 31st MARCH, 2023.

In terms of the information and explanations sought by us and given by the Company and the books and records examined by us in the course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company has maintained proper records showing full particulars including quantitative details and situation of Property, Plant and Equipment and relevant details of right-of-use assets.
  - (B) The Company has maintained proper records showing full particulars of intangible assets.
  - (b) As explained to us, the Property, Plant and Equipment and relevant details of right-of-use assets have been physically verified by the Management at reasonable intervals, during the financial year. According to the information and explanations given to us, no material discrepancies were noticed on physical verification of the Property, Plant and Equipment and relevant details of rightof-use assets.
  - (c) The Company does not own any immovable properties.
  - (d) The Company has not revalued any of its Property, Plant and Equipment (including right-of-use assets) and intangible assets during the year.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at 31st March, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) The inventory comprising stock in trade and spares & components was physically verified by the management during the year. In our opinion, the frequency of verification by the management is reasonable and the coverage and procedure for such verification is appropriate. Discrepancies of 10% or more in aggregate for each class of inventory were not noticed on such physical verification.
  - (b) The Company has not been sanctioned working capital limits in excess of ₹ 5 crore, in aggregate, at any point of time during the year, from banks or financial institutions on the basis of security of current assets and hence reporting under clause 3(ii)(b) of the Order is not applicable.
- (iii) The Company has not made any investment, provided guarantee or security, granted any loans or advances in the nature of loan, secured or unsecured to companies, firms, limited liability partnerships or other parties.
- (iv) The Company has neither given any loan to any person or other body corporate nor given any guarantee or provided security in connection with a loan to any other body corporate or person. Similarly, the Company has also not acquired by way of subscription, purchase or otherwise, the securities of any other body corporate.
- (v) The Company has not accepted deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules framed, there under.
- (vii) The requirement to maintain cost records under sub-section (1) of section 148 of the Companies Act, 2013 does not apply to the Company.
- (viii) (a) According to the records of the Company, the Company does not have any undisputed statutory dues including Goods and Services Tax, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities. As explained to us by the Management, the provisions of the Employees' State Insurance Act, 1948 and the Employees' Provident Fund and Miscellaneous Provisions Act 1952 do not apply to the Company. According to the information and explanations given to us, no undisputed amounts payable in respect of income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax and any other statutory dues were outstanding as at 31st March, 2023 for a period of more than six months from the date those became payable.

- (b) According to the records of the Company, there are no statutory dues which have not been deposited on account of any dispute.
- (viii) According to the information and explanations given to us, there were no transactions relating to previously unrecorded income that were surrendered or disclosed as income in the tax assessments under the Income Tax Act, 1961 (43 of 1961) during the year.
- (ix) (a) In our opinion and according to the information and explanation given to us, the Company has not taken any loans or other borrowing Hence, reporting under clause 3(ix)(a) of the Order is not applicable.
  - (b) According to the information and explanation given to us, the Company has not been declared as willful defaulter by any bank or financial institution or other lender.
  - (c) The Company has not taken any term loan during the year and there are no outstanding term loans at the beginning of the year. Hence, reporting under clause 3(ix)(c) of the Order is not applicable.
  - (d) On an overall examination of the financial statements of the Company, funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.
  - (e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
  - (f) The Company has not raised any loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies. Hence reporting under clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company did not raise any money by way of initial public offer or further public offer (including debt instruments) during the year. Accordingly, paragraph 3(x) (a) of the Order is not applicable.
  - (b) The Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) during the year. Hence reporting under clause 3(x)(b) of the Order is not applicable.
- (xi) (a) Based upon the audit procedures performed and the information and explanations given to us by the Management, we report that no fraud by the Company or no fraud on the Company has been noticed or reported during the period.
  - (b) No report under subsection (12) of section 143 of the Companies Act, 2013 was required to be filed by the auditors in Form ADT-4 as prescribed under rule 13 of the Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) The Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, paragraph 3(xii) of the Order is not applicable.
- (xiii) According to the records of the Company and according to the information and explanations given to us, the Company has not entered into any transactions with the related parties in contravention of the provisions of section 188 of the Companies Act, 2013. The details of related party transactions have been disclosed in the financial statements as required by the applicable accounting standards. Provisions of section 177 of the Act do not apply to the Company.
- (xiv) The provisions of section 138 of the Companies Act, 2013 do not apply to the Company and no internal audit was carried out during the year. Hence, reporting under clause 3(xiv) of the Order is not applicable.
- (xv) According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with them. Accordingly, paragraph 3(xv) of the Order is not applicable.
- (xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.

## **Lycan Electric Private Limited**

- (b) The Company has not conducted any Non-Banking Financial or Housing Finance activities requiring a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.
- (c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India.
- (d) In our opinion and according to the information and explanations given to us, there is no core investment company as part of the Group. Hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.
- (xvii) The Company has incurred the following amounts of cash losses during the financial year and preceding financial year covered by this report.

(₹ in millions)

|                      | Current Financial Year<br>₹ | Preceding Financial Year ₹ |
|----------------------|-----------------------------|----------------------------|
| Cash losses incurred | 10.73                       | 0.04                       |

- (xviii) There has been resignation of the statutory auditors during the year on account of preoccupations. No issues, objections or concerns were found raised by the outgoing auditors.
- (xix) On the basis of the verification of the financial ratios, ageing and expected dates of the realization of financial assets and payment of financial liabilities and other information accompanying financial statements, and information and explanation given to us nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) Provisions of 135 of the Companies Act, 2013 do not apply to the Company. Hence, reporting under clause 3(xx) of the Order is not applicable.

# "ANNEXURE B" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF LYCAN ELECTRIC PRIVATE LIMITED FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2023.

We have audited the internal financial controls over financial reporting of **Lycan Electric Private Limited** ("the Company") as of 31<sup>st</sup> March, 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

## Management's responsibility for internal financial controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

## **Auditor's responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### Meaning of internal financial controls over financial reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

## **Lycan Electric Private Limited**

## Inherent limitations of internal financial controls over financial reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **Opinion**

In our opinion, the Company has, in all material respects, internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31st March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# Notes forming part of the standalone financial statements for the year ended 31st March, 2023

## 1 Corporate information:

Lycan Electric Private Limited was incorporated as a private company incorporated on 31st July , 2015 under the provisions of Companies Act, 2013. The Company is engaged in the business of designing, manufacturing and distribution of electric operated vehicles

The Company is a wholly owned subsidiary of Tork Motors Private Limited.

Operating Cycle of the Company is considered to be of 12 months.

These Financial statements were authorised for issue in accordance with resolution of the Board of Directors on 24th April, 2023.

## 2 Significant accounting policies:

## 2.1 Basis of accounting and preparation of standalone financial statements:

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013 (to the extent notified).

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- i Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The financial statements are presented in INR and all values are rounded to the Million rupee.

## 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or
- iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

## 2.3 Foreign currency transactions and translations :

The Company's financial statements are presented in INR, which is also the Company's functional currency. Items included in the financial statements are measured using functional currency.

#### a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognised as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or statement of profit and loss are also recognised in OCI or statement of profit and loss, respectively).

## b) Exchange differences

Gains/losses arising out of fluctuations in the exchange rates are dealt with in the statement of profit and loss in the period in which they arise. In respect of assets and liabilities, the overall net loss or gain, if any, on conversion at the exchange rates prevailing on the date of balance sheet is charged to revenue.

#### 2.4 Fair value measurement :

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the standalone financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

iii Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the standalone financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets. Involvement of external valuers is decided upon annually by the management. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

The management decides, after discussions with the Company's external valuers, which valuation techniques and inputs to use for each case.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

## 2.5 Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

## a) Sale of goods:

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer. The control of the goods manufactured in case of export sales is transferred usually on the date of issue of Bill of Lading while in case of domestic sales, the control is transferred usually on delivery of goods.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company considers the effect of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer, if any.

#### b) Sale of Services:

Revenue on time and material contracts are recognised as the related services are performed and control of the services are transferred to the customer and revenue from the end of the last invoicing to there porting date is recognised as unbilled revenue. Revenue from fixed-price, fixed-time frame contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognised as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion.

#### c) Contract assets:

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

#### d) Trade receivables:

A receivable represents the Company's right to an amount of consideration that is

unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in note no. 2.13.

## e) Contract liabilities:

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

#### f) Interest income:

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instruments (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in "other income" in the statement of profit and loss.

g) Profit / Loss on sale of investments:

Profit / Loss on sale of investments is recognised when all the significant risk and rewards of ownership in investment is transferred.

#### 2.6 Taxes:

Tax expense comprises current and deferred tax.

Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognised outside the statement of profit and loss is recognised outside the statement of profit and loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognised amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognised for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent it has become probable that future taxable

profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the statement of profit and loss is recognised outside the statement of profit and loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognised in respect of temporary differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognised in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realised.

## Indirect taxs paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of indirect taxes paid, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

## 2.7 Property, plant and equipment:

Property, plant and equipment, capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including GST for which credit is not available. All the significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the statement of profit and loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the statement of profit and loss during the financial period in which they are incurred.

Depreciation is computed on a straight-line method based on the useful lives, determined based on internal technical evaluation by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Depreciation for Property, plant and equipment is computed on straight line method based on useful lives, determined based on internal technical evaluation as follows:

| Тур  | e of | asset                                     | Estimated useful life |
|------|------|-------------------------------------------|-----------------------|
| i)   |      | Computer and data processing equipments   |                       |
|      | (a)  | Servers and networks                      | 6 years               |
|      | (b)  | Other end user devices                    | 3 years               |
| ii)  |      | Furniture and fixtures                    | 10 years              |
| iii) |      | Office equipment's                        | 5 years               |
| iv)  |      | Plant and machinery (including test jigs) | 2 years to 15 years   |

The Company, based on technical assessment made by a technical expert and management estimate, depreciates certain items of building, plant and equipment over estimated useful lives which are different from the useful life prescribed in Schedule II to the Companies Act, 2013. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Losses arising from the retirement of, and gains and losses arising from disposal of property, plant and equipment which are carried at cost are recognised in the statement of profit and loss.

An item of property, plant and equipment or any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

## 2.8 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in the statement of profit and loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised. The summary of amortization policy applied to the Company's intangible assets is as below:

| Type of asset        | Estimated useful life |
|----------------------|-----------------------|
| i) Computer software | 3 years               |

#### Research and development costs

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Company can demonstrate:

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale
- ii. Its intention to complete and its ability and intention to use or sell the asset
- iii. How the asset will generate future economic benefits
- iv. The availability of resources to complete the asset
- v. The ability to measure reliably the expenditure during development

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation expense is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset. During the period of development, the asset is tested for impairment annually.

#### 2.9 Leases:

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

## Company as a lessee:

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

## i) Right of use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the Underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

| Type of asset | Estimated useful life |
|---------------|-----------------------|
| Building      | 4 years               |

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

#### ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liability and Right-of-use asset have been separately presented in the balance sheet and lease payments have been classified as financing cash flows.

#### iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

### The Company as a lessor:

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit and loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

## 2.10 Inventories:

Cost of inventories have been computed to include all cost of purchases, cost of conversion and other costs incurred in bringing the inventories to their present location and condition.

Inventories of research and development (R & D) activity are valued at cost or estimated realisable value whichever is lower.

a) Stock in Trade and Stores and Spares

Stock in Trade components, stores and spares and loose tools are valued at lower of cost and net realizable value. The costs are determined using the weighted average method.

#### 2.11 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset

may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Intangible assets under development are tested for impairment annually.

For the assets, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

## 2.12 Provisions and contingent liabilities:

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond

the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

#### 2.13 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial asset:

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)
- c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the statement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss. This category generally applies to trade and other receivables.

## d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognised in

the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the statement of profit and loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to the statement of profit and loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

#### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorisation as at amortised cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPI

Debt instruments included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

## f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to the statement of profit and loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

## g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

## h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- i Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- iv Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECL impairment loss allowance (or reversal) recognised during the period is recognised as income/ expense in the statement of profit and loss. This amount is reflected under the head 'other expenses' in the statement of profit and loss.

The balance sheet presentation for various financial instruments is described below:

i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables:

ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables.

b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the statement of profit and loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognised in OCI. These gains/ loss are not subsequently transferred to the statement of profit and loss. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit and loss.

The Company has not designated any financial liability as at fair value through statement of profit and loss.

## ii Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in the statement of profit and loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

#### iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

## c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

#### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through statement of profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in the statement of profit and loss, unless designated as effective hedging instruments.

#### D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a

reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original classification | Revised classification | Accounting treatment                                                                                                                                                                                                                                             |
|-------------------------|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised cost          | FVTPL                  | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in P&L.                                                                                                                                 |
| FVTPL                   | Amortised cost         | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.                                                                                                                             |
| Amortised cost          | FVTOCI                 | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                                       |
| FVTOCI                  | Amortised cost         | Fair value at reclassification date becomes its<br>new amortised cost carrying amount. However,<br>cumulative gain or loss in OCI is adjusted against<br>fair value. Consequently, the asset is measured as<br>if it had always been measured at amortised cost. |
| FVTPL                   | FVTOCI                 | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                            |
| FVTOCI                  | FVTPL                  | Assets continue to be measured at fair value. Cumulative gain or loss previously recognised in OCI is reclassified to P&L at the reclassification date.                                                                                                          |

## **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

## 2.14 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

## 2.15 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of

the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

## 2.16 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

## 2.17 Earnings per share:

Basic earnings per share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit attributable to the equity holders of the Company as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

#### 2.18 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) after tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

#### 2.19 Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

# (a) Terms / rights attached to equity shares

The Company has only one class of equity shares having a par value of Rs. 10 per share. Each holder of equity shares is entitled to one vote per share.

In the event of liquidation of the Company, the holders of equity shares will be entitled to receive remaining assets of the Company, after distribution of all preferential amounts. The distribution will be in proportion to the number of equity shares held by the shareholders.

# (b) Reconciliation of the shares outstanding at the beginning and at the end of the reporting period

#### 32 Lease

# **Company as lessee**

The Company has lease contracts for building used in its operations. This lease term of 2 years. The Company's obligations under its leases are secured by the lessor's title to the leased assets.

The Company applies the 'short-term lease' and 'lease of low-value assets' recognition exemptions for these leases.

# i) Below are the carrying amounts of right-of-use assets recognised and the movements during the period:

|                       | Building | Total  |
|-----------------------|----------|--------|
| As at 31st March 2021 | -        | -      |
| Additions             | -        | -      |
| Depreciation          | -        | -      |
| As at 31st March 2022 | -        | _      |
| Additions             | 2.96     | 2.96   |
| Depreciation          | (0.07)   | (0.07) |
| As at 31st March 2023 | 2.89     | 2.89   |

# ii) Below are the carrying amounts of lease liability and the movements during the period:

|                               | Building | Total  |
|-------------------------------|----------|--------|
| As at 31st March 2021         | -        | -      |
| Additions                     | -        | -      |
| Accretion of interest         | -        | -      |
| Payments                      |          |        |
| Balance as at 31st March 2022 | -        | _      |
| Additions                     | 2.83     | 2.83   |
| Accretion of interest         | 0.01     | 0.01   |
| Payments                      | (0.13)   | (0.13) |
| Balance as at 31st March 2023 | 2.71     | 2.71   |
| Current                       | 1.31     | 1.31   |
| Non - current                 | 1.40     | 1.40   |

# iii) The following are the amounts recognised in profit or loss:

|                                             | As at 31 <sup>st</sup> March, 2023 | As at 31st March, 2022 |
|---------------------------------------------|------------------------------------|------------------------|
| Building                                    |                                    |                        |
| Depreciation expense of right-of-use assets | 0.07                               | -                      |
| Interest expense on lease liabilities       | 0.01                               | -                      |
| Payments towards short term leases          | 0.13                               | -                      |
|                                             | 0.21                               | -                      |
|                                             |                                    |                        |

The Company had total cash outflows for leases of ₹ 0.13 (31st March, 2022: Nil). The Company had non-cash addition of ₹ 2.83 (31st March, 2022: Nil) to right-of-use assets and lease liabilities.

#### 34 Disclosure pursuant to Ind AS 115 on "Revenue from contracts with customers"

#### a) Trade receivables and Contract balances:

The Company classifies the right to consideration in exchange for deliverables as either a receivable or as unbilled revenue.

A receivable is a right to consideration that is unconditional upon passage of time. Revenue for time and material contracts are recognized as related service are performed. Revenue for fixed price maintenance contracts is recognized on a straight line basis over the period of the contract. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset for these cases as right to consideration is unconditional upon passage of time.

Revenue recognition for fixed price contracts is based on percentage of completion method. Invoicing to the clients is based on completion of the contract. This would result in the timing of revenue recognition being different from the timing of billing the customers. Unbilled revenue for fixed price development contracts is classified as non financial asset as the contractual right to consideration is dependent on completion of contractual milestones.

Invoicing in excess of earnings are classified as unearned revenue.

Trade receivable and unbilled revenues are presented net of impairment in the Balance Sheet.

- b) Changes in Contract Assets during the year ended 31st March, 2023 Rs. NIL (Previous Year : Rs. NIL)
- c) Changes in Contract Liabilities during the year ended 31st March, 2023 Rs. 65.20 Million (Previous Year : Rs. NIL)

# d) Performance obligations and remaining performance obligations :

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognized as at the end of the reporting period and an explanation as to when the Company expects to recognize these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts where the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date, typically those contracts where invoicing is on time and material basis. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revalidations, adjustment for revenue that has not materialized and adjustments for currency.

The Company does not have any performance obligations that are completely or partially unsatisfied as at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022, other than those meeting the exclusion criteria mentioned above.

# 35 Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. These estimates are reviewed regularly and any change in estimates are adjusted prospectively.

#### a) Revenue recognition

The Company's contracts with customers could include promises to transfer multiple services to a customer. The Company assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables.

Judgement is also required to determine the transaction price for the contract. The transaction price could be either a fixed amount of customer consideration or variable consideration with elements such as volume discounts, service level credits, performance bonuses, price concessions and incentives. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component. Any consideration payable to the customer is adjusted to the transaction price, unless it is a payment for a distinct product or service from the customer. The estimated amount of variable consideration is adjusted in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur and is reassessed at the end of each reporting period. The Company allocates the elements of variable considerations to all the performance obligations of the contract unless there is observable evidence that they pertain to one or more distinct performance obligations.

The Company uses judgement to determine an appropriate standalone selling price for a performance obligation. The Company allocates the transaction price to each performance obligation on the basis of the relative standalone selling price of each distinct product or service promised in the contract. Where standalone selling price is not observable, the Company uses the expected cost plus margin approach to allocate the transaction price to each distinct performance obligation.

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance

of delivery by the customer, etc.

Revenue for fixed-price contract is recognised using percentage-of-completion method. The Company uses judgement to estimate the future cost-to-completion of the contracts which is used to determine the degree of completion of the performance obligation.

#### b) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer note 36 and 37 for further disclosures.

#### c) Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Company.

## d) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

## e) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon acertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availabliity of adquate taxable income within the time permissible as per the taxing legislations.

#### f) Current / Non-Current Classification

The Company evaluates funds requirement on the basis of internal budgets and forecasts and believes that on the basis of current scale of operations and cash realisation cycle, it would be able to generate sufficient funds from operations in order to meet such requirement in the foreseeable future of upto one year.

#### 36 Financial instruments by category

Set out below, is a comparison by class of the carrying amounts and fair value of the Company's financial instruments.

|                             | Carrying value   |                  | Fair va          | lue              |  |
|-----------------------------|------------------|------------------|------------------|------------------|--|

| Security deposits           | 0.75             | -                | 0.75             | -                |  |
| Cash and cash equivalents   | 4.24             | 0.05             | 4.24             | 0.05             |  |
| Trade receivables           | 0.46             | -                | 0.46             | -                |  |
| Total                       | 5.45             | 0.05             | 5.45             | 0.05             |  |
| Financial liabilities       |                  |                  |                  |                  |  |
| Measured at amortised costs |                  |                  |                  |                  |  |
| Loan form Related Party     | -                | 3.58             | -                | 3.58             |  |
| Lease liabilities           | 2.71             |                  | 2.71             | -                |  |
| Trade payables              | 3.96             | 0.02             | 3.96             | 0.02             |  |
| Total                       | 6.67             | 3.60             | 6.67             | 3.60             |  |

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

#### 37 Fair value hierarchy

There are no financial instruments that are measured subsequent to initial recognition at fair value. Hence, disclosure of the fair value hierarchy of assets and liabilities measured at fair value is not applicable.

#### 38 Financial risk management disclosure

The Company's principal financial liabilities comprises trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include trade receivables, security deposits, cash and cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

#### a) Market risk:

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

The sensitivity analyses in the following sections relate to the position as at 31st March, 2023 and 31st March, 2022.

The analyses exclude the impact of movements in market variables on: the carrying values of gratuity and other post retirement obligations; provisions.

The following assumptions have been made in calculating the sensitivity analyses:

The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022 including the effect of hedge accounting (if any).

#### i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

#### ii) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency).

The Company does not hedges its exposure to fluctuations on the translation into INR of its foreign operations.

#### iii) Foreign currency sensitivity

The Company does not have exposure to foreign currency changes as at the end of the financial year.

#### b) Credit risk:

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, investment in mutual funds, other receivables and deposits, foreign exchange transactions and other financial instruments.

#### i) Trade Receivables:

Customer credit risk is managed by the Company's established policy, procedures and control relating to customer credit risk management. Further, currently Company's customers mainly includes its, Holding Company. Outstanding customer receivables are regularly monitored and reconciled. An impairment analysis is performed at each reporting date on an individual basis for major customers. The Company does not hold collateral as security. The Company evaluates the concentration of risk with respect to trade receivables as low.

#### ii) Financial instruments and cash deposits:

Credit risk from balances with banks and financial institutions is managed by the Company's management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

# c) Liquidity risk:

The Company monitors its risk of a shortage of funds using a liquidity planning tool. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, preference shares, finance leases and hire purchase contracts.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments:

(All amounts are in rupees millions unless otherwise stated)

| Less than 1 year | 1 year to 5 years | > 5 years                                      | Total                                   |
|------------------|-------------------|------------------------------------------------|-----------------------------------------|
|                  |                   |                                                |                                         |

#### **Independent Auditor's Report**

#### To the Members of Sagar-Manas Technologies Limited

#### **Report on the Audit of the Financial Statements**

#### **Opinion**

We have audited the accompanying financial statements of **Sagar-Manas Technologies Limited** ("the Company") which comprises the Balance Sheet as at 31<sup>st</sup> March, 2023, the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of changes in equity and the Statement of cash flows for the period from 7<sup>th</sup> March, 2022 to 31<sup>st</sup> March, 2023, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its loss including other comprehensive income, the changes in equity and its cash flows for the period ended on that date.

## **Basis for opinion**

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Information other than the financial statements and auditor's report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including annexures to Board's Report, but does not include the financial statements and our auditor's report thereon. The Board's Report including annexures to Board's Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Board's Report including annexures to Board's Report if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take such actions as are required under the provisions of the Companies Act, 2013.

#### Responsibility of management and those charged with governance for the financial statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities;

selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

#### Auditor's responsibilities for audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
  or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
  is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
  collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

# **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "**Annexure A**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company, so far as appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss including other comprehensive income, the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
  - d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - e) On the basis of written representations received from the directors as on 31<sup>st</sup> March, 2023, taken on record by the Board of Directors, none of the directors is disqualified as on 31<sup>st</sup> March, 2023, from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in **"Annexure B"**.
  - g) The Company has not paid any managerial remuneration during the financial year covered by this report. Accordingly, reporting requirements under section 197(16) of the Act do not apply to the Company.
  - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company does not have any pending litigations which would impact its financial position;
    - ii. The Company did not have any long-term contracts including derivatives contracts for which there were any material foreseeable losses;
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- c. Based on such audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) as provided under (a) and (b) above, contain any material misstatement.
- v. The Company has neither declared nor paid any dividend during the year.

"ANNEXURE A" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF SAGAR-MANAS TECHNOLOGIES LIMITED FOR THE PERIOD ENDED 31st MARCH, 2023.

In terms of the information and explanations sought by us and given by the Company and the books and records examined by us in the course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company does not have any Property, Plant and Equipment as on 31st March, 2023. Hence, paragraph 3(i)(a)(A) of the Order is not applicable to the Company.
  - (B) The Company does not have any Intangible Assets as on  $31^{st}$  March, 2023. Hence, paragraph 3(i)(a)(B) of the Order is not applicable to the Company.
  - (b) The Company does not have any Property, Plant and Equipment as on 31<sup>st</sup> March, 2023. Hence, paragraph 3(i)(b) of the Order is not applicable to the Company.
  - (c) The Company does not own any immovable properties.
  - (d) The Company does not have any Property, Plant and Equipment (including right-of-use assets) and intangible assets. Hence, paragraph 3(i)(d) of the Order is not applicable to the Company.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at 31<sup>st</sup> March, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) As explained to us, the Company was not required to hold any inventories during the period covered by this report. Hence, paragraph 3(ii)(a) of the Order is not applicable to the Company.
  - (b) The Company has not been sanctioned working capital limits in excess of ₹ 5 crore, in aggregate, at any point of time during the year, from banks or financial institutions on the basis of security of current assets and hence reporting under clause 3(ii)(b) of the Order is not applicable.
- (iii) The Company has not made any investment, provided guarantee or security, granted any loans or advances in the nature of loan, secured or unsecured to companies, firms, limited liability partnerships or other parties.
- (iv) The Company has neither given any loan to any person or other body corporate nor given any guarantee or provided security in connection with a loan to any other body corporate or person. Similarly, the Company has also not acquired by way of subscription, purchase or otherwise, the securities of any other body corporate.
- (v) The Company has not accepted deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules framed, there under.
- (vi) The requirement to maintain cost records under sub-section (1) of section 148 of the Companies Act, 2013 does not apply to the Company.
- (vii) (a) According to the records of the Company, the Company does not have any undisputed statutory dues including Goods and Services Tax, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities. As explained to us by the Management, the provisions of the Employees' State Insurance Act, 1948 and the Employees' Provident Fund and Miscellaneous Provisions Act 1952 do not apply to the Company. According to the information and explanations given to us, no undisputed amounts payable in respect of income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax and any other statutory dues were outstanding as at 31st March, 2023 for a period of more than six months from the date those became payable.
  - (b) According to the records of the Company, there are no statutory dues which have not been deposited on account of any dispute.

- (viii) As this is the first year after incorporation, there were no transactions relating to previously unrecorded income that have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961. Hence reporting under clause 3(viii) of the Order is not applicable.
- (ix) (a) In our opinion and according to the information and explanation given to us, the Company has not taken any loans or other borrowing. Hence, reporting under clause 3(ix)(a) of the Order is not applicable.
  - (b) According to the information and explanation given to us, the Company has not been declared as willful defaulter by any bank or financial institution or other lender.
  - (c) The Company has not taken any term loan during the year and there are no outstanding term loans at the beginning of the year. Hence, reporting under clause 3(ix)(c) of the Order is not applicable.
  - (d) On an overall examination of the financial statements of the Company, funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.
  - (e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
  - (f) The Company has not raised any loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies. Hence reporting under clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company did not raise any money by way of initial public offer or further public offer (including debt instruments) during the year. Accordingly, paragraph 3(x) (a) of the Order is not applicable.
  - (b) The Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) during the year. Hence reporting under clause 3(x)(b) of the Order is not applicable.
- (xi) (a) Based upon the audit procedures performed and the information and explanations given to us by the Management, we report that no fraud by the Company or no fraud on the Company has been noticed or reported during the period.
  - (b) No report under subsection (12) of section 143 of the Companies Act, 2013 was required to be filed by the auditors in Form ADT-4 as prescribed under rule 13 of the Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) The Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, paragraph 3(xii) of the Order is not applicable.
- (xiii) According to the records of the Company and according to the information and explanations given to us, the Company has not entered into any transactions with the related parties in contravention of the provisions of section 188 of the Companies Act, 2013. The details of related party transactions have been disclosed in the financial statements as required by the applicable accounting standards. Provisions of section 177 of the Act do not apply to the Company.
- (xiv) The provisions of section 138 of the Companies Act, 2013 do not apply to the Company and no internal audit was carried out during the year. Hence, reporting under clause 3(xiv) of the Order is not applicable.
- (xv) According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with them. Accordingly, paragraph 3(xv) of the Order is not applicable.
- (xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.

# **Sagar-Manas Technologies Limited**

- (b) The Company has not conducted any Non-Banking Financial or Housing Finance activities requiring a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.
- (c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India.
- (d) In our opinion and according to the information and explanations given to us, there is no core investment company as part of the Group. Hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.
- (xvii) The Company has incurred the following amounts of cash losses during the financial year covered by this report.

|                      | Current Financial Year<br>₹ in Hundreds |
|----------------------|-----------------------------------------|
| Cash losses incurred | 1,108.96                                |

- (xviii) There has been no resignation by the statutory auditors of the Company during the year.
- (xix) On the basis of the verification of the financial ratios, ageing and expected dates of the realization of financial assets and payment of financial liabilities and other information accompanying financial statements, and information and explanation given to us nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) Provisions of 135 of the Companies Act, 2013 do not apply to the Company. Hence, reporting under clause 3(xx) of the Order is not applicable.

"ANNEXURE B" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF SAGAR-MANAS TECHNOLOGIES LIMITED FOR THE PERIOD ENDED 31<sup>ST</sup> MARCH, 2023.

We have audited the internal financial controls over financial reporting of **Sagar-Manas Technologies Limited** ("the Company") as of 31<sup>st</sup> March, 2023 in conjunction with our audit of the financial statements of the Company for the period ended on that date.

# Management's responsibility for internal financial controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

#### **Auditor's responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### Meaning of internal financial controls over financial reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

# **Sagar-Manas Technologies Limited**

# Inherent limitations of internal financial controls over financial reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

# **Opinion**

In our opinion, the Company has, in all material respects, internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31st March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# Notes forming part of the financial statements for the period ended 31st March, 2023

## **1** Corporate information:

Sagar-Manas Technologies Limited was incorporated on 7<sup>th</sup> March, 2022, as a public limited company under the Companies Act, 2013. The Company is a subsidiary of Kalyani Strategic Systems Limited. The Company is a 51:49 Joint Venture between Kalyani Strategic Systems Limited and Open Joint Stock Company Dastan Transnational Corporation Limited, Kyrgyz Republic. Kalyani Strategic Systems Limited is the Holding Company.

During the period covered by these financial statements, the Company was engaged in setting up the business of design, development, manufacturing, assembly, testing, integration, sales and providing services, spares support, after-sales support R&D for various marine and defense product and solutions.

These financial statements have been prepared for the period from the date of incorporation, i.e. 7<sup>th</sup> March, 2022 to 31<sup>st</sup> March, 2023. This being the first year, the question of providing previous year's figures does not arise.

These financial statements were authorised for issue in accordance with resolution of the Board of Directors on 2<sup>nd</sup> May, 2023

#### 2 Significant accounting policies:

#### 2.1 Basis of accounting and preparation of financial statements:

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013 (to the extent notified).

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- i Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The financial statements are presented in INR and all values are rounded to the nearest Hundred

#### 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or
- iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

#### 2.3 Foreign currency transactions and translations:

The Company's financial statements are presented in INR, which is also the Company's functional currency. Items included in the financial statements are measured using functional currency.

#### a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognized as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

#### 2.4 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets, and significant liabilities, such as contingent consideration. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. Valuers are normally rotated every three years.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

#### 2.5 Taxes:

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognized for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse

during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realized.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the guidance note on "Accounting for Credit Available in respect of Minimum Alternative Tax" under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

#### Indirect taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of Indirect taxes paid, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

#### 2.6 Property, plant and equipment:

Property, plant and equipment, capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including GST for which credit is not available. All the significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the profit or loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

Assets under improvement to leased premises are fully depreciated over the lease period of the asset.

Losses arising from the retirement of, and gains and losses arising from disposal of property plant and equipment which are carried at cost are recognised in the Statement of Profit and Loss.

An item of property, plant and equipment or any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

## 2.7 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is disposed.

## 2.8 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows

after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or Group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

#### 2.9 Provisions, Contingent Liabilities:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

#### 2.10 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial Asset:

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

#### b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)

#### c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

#### d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- i The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

#### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

## f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

#### g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

#### h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI

- iii Lease receivables under Ind AS 116
- iv Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument
- ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected under the head 'other expenses' in the P&L.

The balance sheet presentation for various financial instruments is described below:

- i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

#### **B** Financial liabilities:

## a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables.

## b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

#### ii Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

## iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

## c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

#### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

## D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                 |
|----------------------------|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Amortised Cost             | FVTPL                     | Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.     |
| FVTPL                      | Amortised Cost            | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount. |

| Original<br>Classification | Revised<br>Classification | Accounting Treatment                                                                                                                                                                                                                                             |
|----------------------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised Cost             | FVTOCI                    | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                                       |
| FVTOCI                     | Amortised Cost            | Fair value at reclassification date becomes its<br>new amortised cost carrying amount. However,<br>cumulative gain or loss in OCI is adjusted against<br>fair value. Consequently, the asset is measured as<br>if it had always been measured at amortised cost. |
| FVTPL                      | FVTOCI                    | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                            |
| FVTOCI                     | FVTPL                     | Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date.                                                                                                          |

## **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

## 2.11 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

#### 2.12 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

### 2.13 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

## 2.14 Earnings per share:

Basic earnings per share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit attributable to the equity holders of the Company as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

#### 2.15 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

#### 2.16 Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

## 12 Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the Company's accounting policies, management has made the following significant judgements, estimates and assumptions which have the most significant effect on the amounts recognised in the financial statements.

#### a) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer note 13 and 14 for further disclosures.

## b) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### c) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon acertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availabliity of adquate taxable income within the time permissible as per the taxing legislations.

### d) Current / Non-Current Classification

The Company evaluates funds requirement on the basis of internal budgets and forecasts and believes that on the basis of current scale of operations and cash realisation cycle, it would be able to generate sufficient funds from operations in order to meet such requirement in the foreseeable future of upto one year.

## 13 Financial instruments by category

Set out below, is a comparison by class of the carrying amounts and fair value of the Company's financial instruments:

(In ₹ Hundreds)

|     |                             | As at 31st Mai | As at 31st March, 2023 |  |  |
|-----|-----------------------------|----------------|------------------------|--|--|
|     |                             | Carrying value | Fair value             |  |  |
| I)  | Financial assets            |                |                        |  |  |
|     | Measured at amortised costs |                |                        |  |  |
|     | Cash and cash equivalents   | 46.56          | 46.56                  |  |  |
|     | Total                       | 46.56          | 46.56                  |  |  |
| II) | Financial liabilities       |                |                        |  |  |
|     | Measured at amortised costs |                |                        |  |  |
|     | Trade payables              | 1,020.52       | 1,020.52               |  |  |
|     | Total                       | 1,020.52       | 1,020.52               |  |  |

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

## 14 Fair value hierarchy

There are no financial instruments that are measured subsequent to initial recognition at fair value. Hence, disclosure of the fair value hierarchy of assets and liabilities measured at fair value is not applicable.

## 15 Financial risk management disclosure

The Company's principal financial liabilities, other than derivatives, comprise trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include Cash and cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a financial risk committee that advises on financial risks and the appropriate financial risk governance framework for the Company. The financial risk committee provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

#### a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

## i) Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency).

The Company does not hedges its exposure to fluctuations on the translation into INR of its foreign operations.

## b) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities and from its financing activities, including deposits with banks and financial institutions, and other financial instruments.

## i) Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company's management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

## c) Liquidity risk

The Company monitors its risk of a shortage of funds using a liquidity planning tool. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, preference shares, finance leases and hire purchase contracts. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

(In ₹ Hundreds)

|                        | Less than 1 year | 1 year to 5 years |   | > 5 years | Total    |
|------------------------|------------------|-------------------|---|-----------|----------|
| As at 31st March, 2023 |                  |                   |   |           |          |
| Trade payables         | 1,020.52         |                   | - | -         | 1,020.52 |
|                        | 1,020.52         |                   | - | -         | 1,020.52 |

#### 16 Income tax

# a) Reconciliation of tax expense and the accounting profit multiplied by India's domestic tax rate for 31st March, 2023:

(In ₹ Hundreds)

|                                                                 | As at            |
|-----------------------------------------------------------------|------------------|
|                                                                 | 31st March, 2023 |
| Accounting loss before tax                                      | (1,108.96)       |
| At India's enacted tax rate of 26.00%                           | -                |
| Deferred tax savings on current year accounting loss            | -                |
| Tax effect of non-deductible expenses                           | -                |
| Deferred tax not recognised on prudence basis                   | -                |
| At the effective income tax rate of 26%                         |                  |
| Income tax expense reported in the statement of profit and loss | -                |
|                                                                 |                  |

#### 17 Ratio analysis

|                                   | Numerator                  | Denominator            | 31st March, 2023 |
|-----------------------------------|----------------------------|------------------------|------------------|
| (a) Current ratio                 | Current Assets             | Current Liabilities    | 0.04             |
| (b) Trade payables turnover ratio | Purchases + Other expenses | Average trade payables | 1.09             |

#### Notes:

## **Independent Auditors' Report**

#### To the Members of Tork Motors Private Limited

## Report on the Audit of the Standalone Financial Statements

## **Opinion**

We have audited the accompanying financial statements of **Tork Motors Private Limited** ("the Company") which comprise the standalone balance sheet as at 31<sup>st</sup> March, 2023, the standalone statement of profit and loss, including the standalone statement of other comprehensive income, the standalone statement of changes in equity and standalone statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements, give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its loss including other comprehensive income, the changes in equity and its cash flows for the year ended on that date.

#### **Basis for Opinion**

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the standalone financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Companies Act, 2013 and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Information Other Than the Standalone Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including annexures to Board's Report, but does not include the standalone financial statements and our auditors' report thereon. The Board's Report including annexures to Board's Reports expected to be made available to us after the date of this auditors' report.

Our opinion on the standalone financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Board's Report including annexures to Board's Report if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take such actions as are required under the provisions of the Companies Act, 2013.

# Responsibilities of Management and Those Charged with Governance For The Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes the maintenance of adequate accounting records in accordance with

the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

#### **Auditor's Responsibilities for Audit of The Standalone Financial Statements**

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether
  due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
  evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
  a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
  involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act 2013, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls systems in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

## **Report on Other Legal and Regulatory Requirements**

- 1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "**Annexure A**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company, so far as appears from our examination of those books.
  - c) The standalone Balance Sheet, the standalone Statement of Profit and Loss including other comprehensive income, the standalone Statement of Changes in Equity and the standalone Cash Flow Statement dealt with by this report are in agreement with the books of account.
  - d) In our opinion, the aforesaid standalone financial statements comply with the accounting standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
  - e) On the basis of written representations received from the directors as on 31<sup>st</sup> March, 2023, taken on record by the Board of Directors, none of the directors is disqualified as on 31<sup>st</sup> March, 2023, from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in **"Annexure B"**.
  - g) In our opinion the managerial remuneration for the year ended 31<sup>st</sup> March, 2023 has been paid / provided by the Company to its directors in accordance with the provisions of section 197 read with Schedule V to the Act.
  - h) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    - i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements Refer Note 45 to the financial statements;
    - ii. The Company did not have any long-term contracts including derivatives contracts for which there were any material foreseeable losses;
    - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
    - iv. a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
      - b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- c. Based on such audit procedures that the have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) as provided under (a) and (b) above, contain any material mis-statement.
- v. The Company has neither declared nor paid any dividend during the year.

# "ANNEXURE A" REFERRED TO IN THE INDEPENDENT AUDITORS' REPORT ON THE FINANCIAL STATEMENTS OF TORK MOTORS PRIVATE LIMITED FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2023.

In terms of the information and explanations sought by us and given by the Company and the books and records examined by us in the course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company has maintained proper records showing full particulars including quantitative details and situation of property, plant and equipment.
  - (B) The Company has maintained proper records showing full particulars of intangible assets;
  - (b) As explained to us, the property, plant and equipment have been physically verified by the management at reasonable intervals, during the financial year. According to the information and explanations given to us, material discrepancies were noticed on physical verification of the Property, Plant and Equipment and those have been properly dealt with in the books of accounts.
  - (c) The Company does not own any immovable properties.
  - (d) The Company has not revalued any of its property, plant and equipment (including right-of-use assets) and intangible assets during the year.
  - (e) No proceedings have been initiated during the year or are pending against the Company as at 31<sup>st</sup> March, 2023 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) The inventory comprising raw material & components and finished goods was physically verified by the management during the year. In our opinion, the frequency of verification by the management is reasonable and the coverage and procedure for such verification is appropriate. Discrepancies of 10% or more in aggregate for each class of inventory were not noticed on such physical verification.
  - (b) According to the information and explanations given to us, the Company has been sanctioned working capital limits in excess of ₹ 5 crore, in aggregate, by banks on the basis of security of current assets of the Company. Based on the records examined by us in the course of audit of the standalone financial statements, the quarterly returns/statements filed by the Company with such banks are in agreement with the books of accounts of the Company.
- (iii) The Company has not made any investment, provided guarantee or security, granted any loans or advances in the nature of loan, secured or unsecured to companies, firms, limited liability partnerships or other parties. Accordingly, reporting under clause 3(iii) of the Order is not applicable.
- (iv) In our opinion and according to the information and explanations given to us, the Company has not granted any loans in contravention of sections 185 and 186 of the Companies Act, 2013. The Company has complied with the provisions of section 186 of the Act, with respect to the investments made and loans given. The Company has not given any guarantee or provided security in connection with a loan to any other body corporate or person.
- (v) The Company has not accepted deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules framed, thereunder.
- (vi) Requirement to maintain cost records under sub-section (1) of section 148 of the Companies Act, 2013 does not apply to the Company.
- (vii) (a) According to the records of the Company, the Company was generally found to be regular in depositing undisputed statutory dues including Goods and Services Tax, provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities. According to the information and explanations given to us, no undisputed statutory dues were outstanding as at 31st March, 2023 for a period of more than six months from the date those became payable.

(b) According to the records of the Company, there are no statutory dues which have not been deposited on account of any dispute, save and except the following:

| Name of the Statute                                             | Nature of the<br>Dues   | Amount<br>(In ₹ millions) | Period                         | Forum where dispute is pending                                   |
|-----------------------------------------------------------------|-------------------------|---------------------------|--------------------------------|------------------------------------------------------------------|
| The Provident Fund and<br>Miscellaneous Provisions<br>Act, 1952 | Damages and<br>Interest | 0.70                      | July 2016 to<br>November, 2022 | Regional Provident Fund<br>Commissioner, Reginal Office,<br>Pune |

- (viii) There were no transactions relating to previously unrecorded income that have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961.
- (ix) (a) In our opinion and according to the information and explanation given to us, the Company has not defaulted in repayment of loans or other borrowings or in the payment of interest, except in the following cases

| Nature of borrowing | Name of the<br>lender | Amount<br>(In ₹ millions) | Whether principal or interest | Extent of delay (In days) | Remarks, if any                                        |
|---------------------|-----------------------|---------------------------|-------------------------------|---------------------------|--------------------------------------------------------|
| Intercorporate loan | Bharat Forge Limited  | 3                         | Principal                     | 322                       | The loan and interest thereon have been repaid in full |
| Intercorporate loan | Bharat Forge Limited  | 3                         | Principal                     | 230                       | The loan and interest thereon have been repaid in full |
| Intercorporate loan | Bharat Forge Limited  | 3                         | Principal                     | 138                       | The loan and interest thereon have been repaid in full |

- (b) According to the information and explanation given to us, the Company has not been declared as willful defaulter by any bank or financial institution or other lender.
- (c) According to the information and explanation given to us and on the basis of our examination, The Company has not availed any term loan during the year. Hence, reporting under clause 3(ix) (c) of the Order is not applicable.

## **Tork Motors Private Limited**

- (d) On an overall examination of the financial statements of the Company, funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.
- (e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
- (f) The Company has not raised any loans during the year on the pledge of securities held in its subsidiary company. Hence reporting under clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company has not raised moneys by way of initial public offer or further public offer (including debt instruments) during the year and hence reporting under clause 3(x)(a) of the Order is not applicable.
  - (b) During the year, the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) and hence reporting under clause 3(x)(b) of the Order is not applicable.
- (xi) (a) Based upon the audit procedures performed and the information and explanations given by the Management, we report that no fraud by the Company or no fraud on the Company has been noticed or reported during the period.
  - (b) No report under subsection (12) of section 143 of the Companies Act, 2013 was required to be filed by the auditors in Form ADT-4 as prescribed under rule 13 of the Companies (Audit and Auditors) Rules, 2014 with the Central Government.
  - (c) The Company has not received any whistle-blower complaints during the year.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, reporting under clause 3(xii) of the Order is not applicable.
- (xiii) According to the records of the Company and according to the information and explanations given to us, the Company has not entered into any transactions with the related parties in contravention of the provisions of section 188 of the Companies Act, 2013. The details of the related party transactions have been disclosed in the financial statements as required by the Ind AS. Provisions of section 177 of the Act do not apply to the Company.
- (xiv) In our opinion and based on our examination, the Company does not have an internal audit system and is not required to have an internal audit system as per provisions of the Companies Act, 2013.
- (xv) According to the information and explanations given to us, in our opinion during the year the company has not entered into any non-cash transactions with its directors or persons connected with its directors and hence provisions of section 192 of the Companies Act, 2013 are not applicable to the company.
- (xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.
  - (b) The Company has not conducted any Non-Banking Financial or Housing Finance activities requiring a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.
  - (c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India.
  - (d) In our opinion and according to the information and explanations given to us, there is no core investment company as part of the Group. Hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.

(xvii) The Company has incurred the following amounts of cash losses during the financial year covered by this report and also in the preceding financial year.

|                      | Current Financial Year | Preceding Financial Year |
|----------------------|------------------------|--------------------------|
|                      | (In ₹ millions)        | (In ₹ millions)          |
| Cash losses incurred | 379.94                 | 63.23                    |

- (xviii) There has been resignation of the statutory auditors during the year on account of preoccupations. No issues, objections or concerns were found raised by the outgoing auditors.
- (xix) On the basis of the verification of the financial ratios, ageing and expected dates of the realization of financial assets and payment of financial liabilities and other information accompanying financial statements, and information and explanation given to us, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) Provisions of 135 of the Companies Act, 2013 do not apply to the Company. Hence, reporting under clause 3(xx) of the Order is not applicable.

# "ANNEXURE B" REFERRED TO IN THE INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS OF TORK MOTORS PRIVATE LIMITED FOR THE PERIOD ENDED 31<sup>ST</sup> MARCH, 2023.

We have audited the internal financial controls over financial reporting of **Tork Motors Private Limited** ("the Company") as of 31st March, 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

## **Management's Responsibility For Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

## **Auditor's Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

### **Meaning Of Internal Financial Controls Over Financial Reporting**

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

## **Inherent Limitations Of Internal Financial Controls Over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **Opinion**

In our opinion, the Company has, in all material respects, internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31st March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# Notes forming part of the standalone financial statements for the year ended 31st March, 2023

### **1** Corporate information:

Tork Motors Private Limited ("the Company") was incorporated on 22<sup>nd</sup> March, 2010 as a private limited company under the erstwhile Companies Act, 1956. The Company is a subsidiary of Kalyani Powertrain Limited, which holds 64.29% of the issued and subscribed equity share capital of the Company. The Company's CIN is U34104PN2010PTC135855.

The Company is engaged in the business of design, development, manufacture and distribution of electric motorcycles and three wheeler electric drive train.

The Company has identified 12 months as its operating cycle.

These standalone financial statements were authorised for issue in accordance with resolution of the Board of Directors on 24<sup>th</sup> April, 2023.

## 2 Significant accounting policies:

#### 2.1 Basis of accounting and preparation of standalone financial statements:

The standalone financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended thereafter and the provisions of the Companies Act, 2013 (to the extent notified).

The standalone financial statements have been prepared on a historical cost basis, except for the following assets and liabilities wherever existed, which have been measured at fair value:

- i Derivative financial instruments,
- ii Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The standalone financial statements are presented in INR and all values are rounded to the nearest rupees million.

#### 2.2 Current versus non-current bifurcation:

The Company presents assets and liabilities in the balance sheet based on current and noncurrent classification.

An asset is treated as current when it is:

- i Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii Held primarily for the purpose of trading,
- iii Expected to be realised within twelve months after the reporting period, or
- iv Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- i It is expected to be settled in normal operating cycle,
- ii It is held primarily for the purpose of trading,
- iii It is due to be settled within twelve months after the reporting period, or
- iv There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

## 2.3 Foreign currency transactions and translations :

The Company's standalone financial statements are presented in INR, which is also the Company's functional currency. Items included in the financial statements are measured using functional currency.

#### a) Transactions and balances

Transactions in foreign currencies are initially recorded by the Company in its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange difference that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognised as income or expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or statement of profit and loss are also recognised in OCI or statement of profit and loss, respectively).

## b) Exchange differences

Gains/losses arising out of fluctuations in the exchange rates are dealt with in the statement of profit and loss in the period in which they arise. In respect of assets and liabilities, the overall net loss or gain, if any, on conversion at the exchange rates prevailing on the date of balance sheet is charged to revenue.

#### 2.4 Investment in subsidiaries, joint ventures and associates

The Company has accounted for its investment in subsidiaries, joint ventures and associates at cost less accumulated impairment. [Refer note 2.12].

#### 2.5 Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances

and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the standalone financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the standalone financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets. Involvement of external valuers is decided upon annually by the management. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

The management decides, after discussions with the Company's external valuers, which valuation techniques and inputs to use for each case.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

## 2.6 Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

#### a) Sale of goods:

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer. The control of the goods manufactured in case of export sales is transferred usually on the date of issue of Bill of Lading while in case of domestic sales, the control is transferred usually on delivery of goods.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Company considers the effect of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer, if any.

## b) Sale of Services:

Revenue on time and material contracts are recognised as the related services are performed and control of the services are transferred to the customer and revenue from the end of the last invoicing to there porting date is recognised as unbilled revenue. Revenue from fixed-price, fixed-time frame contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognised as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such

uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion.

### c) Interest income:

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instruments (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in "other income" in the statement of profit and loss.

### d) Profit / Loss on sale of investments:

Profit / Loss on sale of investments is recognised when all the significant risk and rewards of ownership in investment is transferred.

### e) Contract assets:

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

### f) Trade receivables:

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in note no.2.15.

### g) Contract liabilities:

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

### 2.7 Taxes:

Tax expense comprises current and deferred tax.

Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates and generates taxable income. The tax rates and tax laws used to compute the amount are those that are enacted, at the reporting date.

Current income tax relating to items recognised outside the statement of profit and loss is recognised outside the statement of profit and loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluated the positions taken in the tax returns with respect to the situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognised amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is provided using the liability method on temporary differences between the tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognised for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset can be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on the tax rates (and the tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the statement of profit and loss is recognised outside the statement of profit and loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxation authority.

In the situations where the Company is entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where it operates, no deferred tax (asset or liability) is recognised in respect of temporary differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognised in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent that it has become probable that future taxable profit will be available against which such deferred tax assets can be realised.

### Indirect taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of sales/ value added taxes paid, except:

- i When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

### 2.8 Property, plant and equipment:

Property, plant and equipment, capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and accumulated impairment losses, if any. Internally manufactured property, plant and equipment are capitalised at factory cost, including GST for which credit is not available. All the significant costs relating to the acquisition and installation of property, plant and equipment are capitalised. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise,

when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognised in the statement of profit and loss as incurred. The present value of the expected cost of the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for the provision are met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the statement of profit and loss during the financial period in which they are incurred.

Depreciation is computed on a straight-line method based on the useful lives, determined based on internal technical evaluation by the management.

Depreciation on additions to assets during the year is being provided on pro-rata basis from the date of acquisition/ installation. Depreciation on assets sold, discarded or demolished during the year, is being provided at their respective rates on pro-rata basis upto the date on which such assets are sold, discarded or demolished.

The Management's estimate of the useful lives of various property, plant and equipment is given below

| Туре | e of | asset                                     | Estimated useful life |
|------|------|-------------------------------------------|-----------------------|
| i)   |      | Computer and data processing equipments   |                       |
|      | (a)  | Servers and networks                      | 6 years               |
|      | (b)  | Other end user devices                    | 3 years               |
| ii)  |      | Furniture and fixtures                    | 10 years              |
| iii) |      | Office equipment's                        | 5 years               |
| iv)  |      | Plant and machinery (including test jigs) | 2 years to 15 years   |
| v)   |      | Motor vehicles                            | 10 years              |
| vi)  |      | Lease improvement                         | Over the lease period |

Losses arising from the retirement of, and gains and losses arising from disposal of property, plant and equipment which are carried at cost are recognised in the statement of profit and loss.

An item of property, plant and equipment or any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its used or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and the methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

### 2.9 Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in the statement of profit and loss in the period in which the expenditure is incurred.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life

or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised.

The summary of amortization policy applied to the Company's intangible assets is as below:

| Type of asset                    | Estimated useful life |
|----------------------------------|-----------------------|
| i) Computer software             | 3 years               |
| ii) Vehicle development expenses | 5 years               |
| iii) Petants                     | 5 years               |

### Research and development costs

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Company can demonstrate:

- i. The technical feasibility of completing the intangible asset so that the asset will be available for use or sale
- ii. Its intention to complete and its ability and intention to use or sell the asset
- iii. How the asset will generate future economic benefits
- iv. The availability of resources to complete the asset
- v. The ability to measure reliably the expenditure during development

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation expense is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset. During the period of development, the asset is tested for impairment annually.

### 2.10 Leases:

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

### Company as a lessee:

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

i) Right of use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the Underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any

measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

| Type of asset     | Estimated useful life |
|-------------------|-----------------------|
| Land and building | 4 years               |

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

### ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liability and Right-of-use asset have been separately presented in the balance sheet and lease payments have been classified as financing cash flows.

### iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

### The Company as a lessor:

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit and loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

### 2.11 Inventories:

Cost of inventories have been computed to include all cost of purchases, cost of conversion and other costs incurred in bringing the inventories to their present location and condition.

Inventories of research and development (R & D) activity are valued at cost or estimated realisable value whichever is lower.

### 2.12 Impairment of Non-financial assets:

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Intangible assets under development are tested for impairment annually.

For the assets, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

### 2.13 Provisions and contingent liabilities:

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current

pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

### **Provision for warranty**

The estimated liability for product warranties is recognised when products are sold or when new warranty programmes are initiated. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future warranty claims, customer goodwill and recall complaints. The timing of outflows will vary depending on when warranty claim will arise, being typically up to three years. The Company also has back-to-back contractual arrangement with its suppliers in the event that a vehicle fault is proven to be a supplier's fault.

Estimates are made of the expected reimbursement claim based upon historical levels of recoveries from supplier, adjusted for inflation and applied to the population of vehicles under warranty as on Balance Sheet date. Supplier reimbursements are recognised as separate asset.

### **Provision for onerous contract**

A provision for onerous contracts is recognized when the expected benefits to be derived by the Company from a contract are lower than the unavoidable costs of meeting its obligations under the contract. It is recognized when the Company has entered into a binding legal agreement for the purchase of components from suppliers that exceeds the benefits from the expected future use of the components and the Company sells the finished goods using the components at a loss.

### 2.14 Retirement and other employee benefits :

### a) Gratuity:

The Company operates a defined benefits plan for its employees. The cost of providing benefits under these plans is determined on the basis of actuarial valuation at each year end. Actuarial valuation is carried out using the project unit credit method.

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- i The date of the plan amendment or curtailment, and
- ii The date that the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- i Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- ii Net interest expense or income

### b) Privilege leave benefits:

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end.

Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The Company presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where the Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

### 2.15 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

### A Financial asset :

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i Debt instruments at amortised cost
- ii Debt instruments at fair value through other comprehensive income (FVTOCI)
- iii Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- iv Equity instruments measured at fair value through other comprehensive income (FVTOCI)

### c) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the statement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss. This category generally applies to trade and other receivables.

### d) Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognised in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the statement of profit and loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to the statement of profit and loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

### e) Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorisation as at amortised cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

### f) Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to the statement of profit and loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

### g) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance

sheet) when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

h) Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- ii Financial assets that are debt instruments and are measured as at FVTOCI
- iii Lease receivables under Ind AS 116
- iv Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- v Loan commitments which are not measured as at FVTPL
- vi Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- i All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- ii Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECL impairment loss allowance (or reversal) recognised during the period is recognised as income/ expense in the statement of profit and loss. This amount is reflected under the head 'other expenses' in the statement of profit and loss.

The balance sheet presentation for various financial instruments is described below:

- i Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables:
  - ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- ii Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

### **B** Financial liabilities:

a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables.

b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

i Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109.

Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the statement of profit and loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognised in OCI. These gains/ loss are not subsequently transferred to the statement of profit and loss. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit and loss.

The Company has not designated any financial liability as at fair value through statement of profit and loss.

### ii Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in the statement of profit and loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

### iii Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

### c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

### C Embedded derivatives:

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through statement of profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in the statement of profit and loss, unless designated as effective hedging instruments.

### D Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

| Original classification | Revised classification | Accounting treatment                                                                                                                                                                                                                                 |
|-------------------------|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised cost          | FVTPL                  | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in P&L.                                                                                                                     |
| FVTPL                   | Amortised cost         | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.                                                                                                                 |
| Amortised cost          | FVTOCI                 | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                           |
| FVTOCI                  | Amortised cost         | Fair value at reclassification date becomes its new amortised cost carrying amount. However, cumulative gain or loss in OCI is adjusted against fair value. Consequently, the asset is measured as if it had always been measured at amortised cost. |
| FVTPL                   | FVTOCI                 | Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.                                                                                                                                                |
| FVTOCI                  | FVTPL                  | Assets continue to be measured at fair value. Cumulative gain or loss previously recognised in OCI is reclassified to P&L at the reclassification date.                                                                                              |

### **E** Offsetting of financial instruments :

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

### 2.16 Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

### 2.17 Dividend to equity holders:

The Company recognises a liability to make cash or non-cash distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

### 2.18 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the Board of Directors that makes strategic decisions.

### 2.19 Earnings per share:

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

### 2.20 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) after tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

### 2.21 Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements.

Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

| Refer note no. 36                        |                          |                        |
| Other provisions                         |                          |                        |
| Provision for warranty <sup>(a)(b)</sup> | 11.24                    | -                      |
| Total                                    | 12.33                    | 0.42                   |

(a) In pursuance of Ind AS-37 'Provisions, contingent liabilities and contingent assets', the provisions required for warranty have been incorporated in the books of account in the following manner:

|                          | As at<br>31 <sup>st</sup> March, 2023 | As at 31st March, 2022 |
|--------------------------|---------------------------------------|------------------------|
| Opening Balance          | -                                     |                        |
| Arising during the year  | 11.24                                 | -                      |
| Utilised during the year | -                                     | -                      |
| Provision Written Back   | -                                     | -                      |
| Closing balance          | 11.24                                 | _                      |

(b) The estimated liability for product warranties is recognised when products are sold or when new warranty programmes are initiated. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future warranty claims, customer goodwill and recall complaints. The timing of outflows will vary depending on when warranty claim will arise, being typically up to three years. The Company also has back-to-back contractual arrangement with its suppliers in the event that a vehicle fault is proven to be a supplier's fault.

Estimates are made of the expected reimbursement claim based upon historical levels of recoveries from supplier, adjusted for inflation and applied to the population of vehicles under warranty as on Balance Sheet date. Supplier reimbursements are recognised as separate asset.

### 27 Other current liabilities

### 36 Disclosure pursuant to Ind AS 19 on "Employee Benefits"

### (a) Defined contribution plans:

The Company makes Provident Fund contributions to defined contribution retirement benefit plans for qualifying employees. Under the schemes, the Company is required to contribute a specified percentage of the payroll costs to the funds. The Company recognized ₹ 3.65 millions (Previous Year: ₹ 0.95 millions) for the provident fund contributions in the statement of profit and loss. The contributions payable to this plan by the Company are at the rates specified in respective legislations.

### (b) Gratuity plan:

The present value of defined benefit obligation and the related current service costs are measured using the projected unit credit method, with actuarial valuations being carried out at each balance sheet date.

The gratuity benefits are governed by the Payment of Gratuity Act, 1972. Under the Act, every employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age. Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn) for each completed year of service as per the provisions of the Payment of Gratuity Act, 1972.

Risk exposure and asset liability matching

Provision of a defined benefit scheme poses certain risks, some of which are detailed hereunder, as companies take on uncertain long term obligations to make future benefit payments.

### 1) Liability risks

### a) Asset-liability mismatch risk:

Risk which arises if there is a mismatch in the duration of the assets relative to the liabilities. By matching duration with the defined benefit liabilities, the Company is successfully able to neutralize valuation swings caused by interest rate movements. Hence companies are encouraged to adopt asset-liability management.

### b) Discount rate risk

Variations in the discount rate used to compute the present value of the liabilities may seem small, but in practise can have a significant impact on the defined benefit liabilities.

### c) Future salary escalation and inflation risk

Since price inflation and salary growth are linked economically, they are combined for disclosure purposes. Rising salaries will often result in higher future defined benefit payments resulting in a higher present value of liabilities especially unexpected salary increases provided at management's discretion may lead to uncertainities in estimating this increasing risk.

### 2) Unfunded plan risk

This represents unmanaged risk and a growing liability. There is an inherent risk here that the Company may default on paying the benefits in adverse circumstances. Funding the plan removes volatility in the Company's financials and also benefit risk through return on the funds made available for the plan.

The following table summarises the components of net benefit expense recognised in the statement of profit and loss and the funded status and amounts recognised in the balance sheet for the gratuity plan.

### The principal assumptions used in determining gratuity for the Company's plan is shown below:

### Amount recognised in statement of other comprehensive income (OCI)

|                                                                    | Year ended 31 <sup>st</sup> March, 2023 | Year ended 31st March, 2022 |
|--------------------------------------------------------------------|-----------------------------------------|-----------------------------|
| Opening amount recognised in OCI outside profit and loss account   | (1.01)                                  | (1.28)                      |
| Remeasurement for the period-obligation (gain)/loss                | 0.64                                    | 0.27                        |
| Remeasurement for the period-plan assets (gain)/loss               | -                                       | -                           |
| Total remeasurement cost/(credit) for the period recognised in OCI | 0.64                                    | 0.27                        |
| Closing amount recognised in OCI outside profit and loss account   | (0.37)                                  | (1.01)                      |

### The amounts to be recognised in the balance sheet

|                                                           | Year ended 31 <sup>st</sup> March, 2023 | Year ended 31st March, 2022 |
|-----------------------------------------------------------|-----------------------------------------|-----------------------------|
| Present value of obligation as at the end of the period   | 5.68                                    | 3.29                        |
| Fair value of plan assets as at the end of the period     | -                                       | -                           |
| Net asset / (liability) to be recognised in balance sheet | (5.68)                                  | (3.29)                      |

### Expense recognised in the statement of profit and loss

|                                                                          | Year ended 31 <sup>st</sup> March, 2023 | Year ended<br>31 <sup>st</sup> March, 2022 |
|--------------------------------------------------------------------------|-----------------------------------------|--------------------------------------------|
| Current service cost                                                     | 1.70                                    | 0.59                                       |
| Net interest (income) / expense                                          | 0.22                                    | 0.14                                       |
| Benefits (paid)                                                          | 0.16                                    | -                                          |
| Transfer in/(out)                                                        | -                                       | -                                          |
| Net periodic benefit cost recognised in the statement of profit and loss | 2.08                                    | 0.73                                       |

### Reconciliation of net asset/(liability) recognised:

|                                                                   | Year ended<br>31st March, 2023 | Year ended<br>31 <sup>st</sup> March, 2022 |
|-------------------------------------------------------------------|--------------------------------|--------------------------------------------|
| Net asset / (liability) recognised at the beginning of the period | (3.29)                         | (2.29)                                     |
| Company contributions                                             | 0.17                           | -                                          |
| Expense recognised at the end of period                           | (1.91)                         | (0.73)                                     |
| Amount recognised outside profit & loss for the period            | (0.64)                         | (0.27)                                     |
| Mortality charges and taxes                                       | -                              | -                                          |
| Adjustment to fund                                                | -                              | -                                          |
| Net asset / (liability) recognised at the end of the period       | (5.67)                         | (3.29)                                     |

### Sensitivity analysis

Impact of change in discount rate when base assumption is decreased/increased by 100 basis point

| Discount rate                                 | <b>Year ended</b> Year er <b>31<sup>st</sup> March, 2023</b> 31 <sup>st</sup> March, 2 |      |
|-----------------------------------------------|----------------------------------------------------------------------------------------|------|
| Increase in discount rate by 100 basis points | 5.35                                                                                   | 3.03 |
| Decrease in discount rate by 100 basis points | 6.05                                                                                   | 3.60 |

Impact of change in salary growth rate when base assumption is decreased/increased by 100 basis point

| Salary growth rate                                 | Year ended         Year ended           31st March, 2023         31st March, 20 |      |
|----------------------------------------------------|---------------------------------------------------------------------------------|------|
| Increase in salary growth rate by 100 basis points | 5.95                                                                            | 3.50 |
| Decrease in salary growth rate by 100 basis points | 5.42                                                                            | 3.10 |

Impact of change in withdrawal rate when base assumption is decreased/increased by 100 basis point

| Withdrawal rate                                 | Year ended Year er 31st March, 2023 31st March, 2 |      |
|-------------------------------------------------|---------------------------------------------------|------|
| Increase in withdrawal rate by 100 basis points | 5.64                                              | 3.26 |
| Decrease in withdrawal rate by 100 basis points | 5.72                                              | 3.33 |

The estimates of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The sensitivity analyses above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

### (c) Other long term employee benefits:

The table below gives summary of the Company's obligations for other long term employee benefits in the form of compensated absences.

|                                                       | Year ended<br>31 <sup>st</sup> March, 2023 | Year ended<br>31 <sup>st</sup> March, 2022 |
|-------------------------------------------------------|--------------------------------------------|--------------------------------------------|
| Present value of obligation                           | 3,185.66                                   | -                                          |

<sup>\*</sup>As at  $31^{st}$  March 2023:2,101 ( $31^{st}$  March 2022:1,074) ESOP Shares were excluded from weighted average number of Ordinary Shares for the computation of diluted earnings per share as these were anti-dilutive.

## 40 Significant accounting judgements, estimates and assumptions

The preparation of the Company's standalone financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. These estimates are reviewed regularly and any change in estimates are adjusted prospectively.

## a) Revenue recognition

The Company's contracts with customers could include promises to transfer multiple services to a customer. The Company assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables.

Judgement is also required to determine the transaction price for the contract. The transaction price could be either a fixed amount of customer consideration or variable consideration with elements such as volume discounts, service level credits, performance bonuses, price concessions and incentives. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component. Any consideration payable to the customer is adjusted to the transaction price, unless it is a payment for a distinct product or service from the customer. The estimated amount of variable consideration is adjusted in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur and is reassessed at the end of each reporting period. The Company allocates the elements of variable considerations to all the performance obligations of the contract unless there is observable evidence that they pertain to one or more distinct performance obligations.

The Company uses judgement to determine an appropriate standalone selling price for a performance obligation. The Company allocates the transaction price to each performance obligation on the basis of the relative standalone selling price of each distinct product or service promised in the contract. Where standalone selling price is not observable, the Company uses the expected cost plus margin approach to allocate the transaction price to each distinct performance obligation.

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

Revenue for fixed-price contract is recognised using percentage-of-completion method. The Company uses judgement to estimate the future cost-to-completion of the contracts which is used to determine the degree of completion of the performance obligation.

#### b) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer note 41 and 42 for further disclosures.

## c) Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its

recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Company.

## d) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Further, the Company also evaluates risk with respect to expected loss on account of loss in time value of money which is calculated using average cost of capital for relevant financial assets.

#### e) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Actual amounts available for offset depend upon acertainment by tax authorities in assessments of the Company. The Company will be able to offset tax losses and allowances only to the extent of availabliity of adquate taxable income within the time permissible as per the taxing legislations.

#### f) Current / Non-Current Classification

The Company evaluates funds requirement on the basis of internal budgets and forecasts and believes that on the basis of current scale of operations and cash realisation cycle, it would be able to generate sufficient funds from operations in order to meet such requirement in the foreseeable future of upto one year.

#### g) Leases

# Determining the lease term of contracts with renewal and termination options – Company as lessee

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Company has several lease contracts that include extension and termination options. The Company applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customisation to the leased asset).

Refer Note 46 for information on potential future rental payments relating to periods following the exercise date of extension and termination options that are not included in the lease term.

## 41 Financial instruments by categories

The following table presents the carrying amounts and fair value of each category of financial assets and liabilities :

|                                                          | Carrying value   |                              | Fair val         | ue               |
|----------------------------------------------------------|------------------|------------------------------|------------------|------------------|
| _                                                        | As at            | As at                        | As at            | As at            |
|                                                          | 31st March, 2023 | 31 <sup>st</sup> March, 2022 | 31st March, 2023 | 31st March, 2022 |

## 43 Financial risk management disclosure

The Company's principal financial liabilities, other than derivatives, comprise trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include Investments in equity instruments, loans, cash and cash equivalents and other bank balances that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management advises on financial risks and the appropriate financial risk governance framework for the Company. The senior management provides assurance for the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

#### a) Market risk:

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, FVTPL investments.

The sensitivity analyses in the following sections relate to the position as at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022.

The analyses exclude the impact of movements in market variables on: the carrying values of gratuity and other post retirement obligations; provisions.

The following assumptions have been made in calculating the sensitivity analyses:

The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31<sup>st</sup> March, 2023 and 31<sup>st</sup> March, 2022 including the effect of hedge accounting (if any).

#### i) Equity price risk

The Company's investment in equity instruments comprise of investments in subsidiaries which is strategic long term investments. Reports on the equity portfolio are submitted to the Company's management on a regular basis. The Company's Board of Directors reviews and approves all equity investment decisions.

At the reporting date, the exposure to unlisted equity securities at carrying value was ₹ 1.33 millions (for previous year ended 31st March, 2022 - 1.33 millions).

## ii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

## iii) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency).

The Company does not hedges its exposure to fluctuations on the translation into INR of its foreign operations.

## Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities.

(In ₹ millions)

|                  | Change in USD Rate | Effect on profit before tax | Effect on equity pre-tax |
|------------------|--------------------|-----------------------------|--------------------------|
| 31st March, 2023 | 5.00%              | 0.43                        | 0.43                     |
|                  | -5.00%             | (0.43)                      | (0.43)                   |
| 31st March, 2022 | 5.00%              | -                           | -                        |
|                  | -5.00%             | -                           | -                        |

#### b) Credit risk:

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, investment in mutual funds, other receivables and deposits, foreign exchange transactions and other financial instruments.

The Company's maximum exposure to credit risk for the components of the balance sheet at 31st March, 2023 and 31st March, 2022 is the carrying amounts as illustrated in the respective notes.

#### c) Liquidity risk:

| Lycan Electric Private Limited | 0.00%                   | -                                  | 3.58                               |

## 49 Disclosure pursuant to Ind AS 115 on "Revenue from contracts with customers"

## a) Trade receivables and Contract balances:

The Company classifies the right to consideration in exchange for deliverables as either a receivable or as unbilled revenue.

A receivable is a right to consideration that is unconditional upon passage of time. Revenue for time and material contracts are recognized as related service are performed. Revenue for fixed price maintenance contracts is recognized on a straight line basis over the period of the contract. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset for these cases as right to consideration is unconditional upon passage of time.

Revenue recognition for fixed price contracts is based on percentage of completion method. Invoicing to the clients is based on completion of the contract. This would result in the timing of revenue recognition being different from the timing of billing the customers. Unbilled revenue for fixed price development contracts is classified as non financial asset as the contractual right to consideration is dependent on completion of contractual milestones.

Invoicing in excess of earnings are classified as unearned revenue.

Trade receivable and unbilled revenues are presented net of impairment in the Balance Sheet.

During the year ended 31<sup>st</sup> March, 2023 ₹ NIL (Previous Year : ₹ NIL) of unbilled revenue pertaining to fixed price development contracts has been reclassified to Trade receivables upon billing to customers on completion of contracts.

#### b) Changes in Contract Assets are as under:

## d) Performance obligations and remaining performance obligations :

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognized as at the end of the reporting period and an explanation as to when the Company expects to recognize these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts where the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date, typically those contracts where invoicing is on time and material basis. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revalidations, adjustment for revenue that has not materialized and adjustments for currency.

The aggregate value of performance obligations that are completely or partially unsatisfied as at 31st March, 2023, other than those meeting the exclusion criteria mentioned above, is ₹ 1.64 Mio (Previous year : NIL). Out of this, the Company expects to recognize revenue of ₹ 1.64 Mio (Previous year : NIL) within the next one year and the remaining thereafter. This includes contracts that can be terminated for convenience without a substantive penalty since, based on current assessment, the occurrence of the same is expected to be remote.

## Reconciliation for revenue as per Statement of profit & loss and the contracted price arising on account of various adjustments:

## 50 Share based payments

The Company provides share-based payment schemes to its employees. During the year ended 31st March 2023, an employee stock option plan (ESOP) was in existence. The relevant details of the scheme and the grant are as below.

The Company had introduced Tork Motors Private Limited – Employee Stock Option Plan I (TMPL ESOP SCHEME I) in the FY 2018-19 pursuant to approval of Shareholders at its meeting held on 25<sup>th</sup> January, 2019. In order to make the said ESOP more flexible and beneficial to the Employees to ensure wide coverage of the Employees; to give employees who are performing well, a certain minimum opportunity to gain from the Subsidiary Company's performance thereby acting as a preservation tool and to attract the best talent available in the market, the Company amended the said TMPL ESOP SCHEME I in its General Meeting held on 12<sup>th</sup> November, 2020 and introducted the Tork Motors Private Limited – Amended Employee Stock Option Plan – 2020 (TMPL Amended Employee Stock Option Plan – 2020). The said ESOP Plan 2020 was further amended and approved by the Board in its meeting held on 23<sup>rd</sup> October, 2021 resolving thereby few discrepancies, ambiguities etc.

The fair value of the share options is estimated at the grant date using fair value taken for issue of share to Bharat Forge Limited, taking into account the terms and conditions upon which the share options were granted. The exercise price of the share options is the face value i.e.  $\ref{totaleq}$  10. The contractual term of each option granted is 3 years.

|                                                                      |                 | (In ₹ millions) |
|----------------------------------------------------------------------|-----------------|-----------------|
|                                                                      | 31st March 2023 | 31st March 2022 |
| Expense arising from equity-settled share-based payment transactions | 21.10           | 16.29           |
| Total expense arising from share-based payment transactions          | 21.10           | 16.29           |

The following table illustrates the number and weighted average exercise prices (WAEP) of, and movements in, share options during the year.

|                           | 31st March 2023 |                                 | 31 <sup>st</sup> Mar | rch 2022                        |
|---------------------------|-----------------|---------------------------------|----------------------|---------------------------------|
| _                         | Number          | Weighted average exercise price | Number               | Weighted average exercise price |
| Outstanding at 1 April    | 1,198           | 10                              | 650                  | 10                              |
| Granted during the year   | 1,027           | -                               | 573                  | -                               |
| Forfeited during the year | -               | -                               | -                    | -                               |
| Exercised during the year | -               | -                               | -                    | -                               |
| Expired during the year   | (124)           | -                               | (25)                 | -                               |
| Outstanding at 31 March   | 2,101           | ₹ 10                            | 1,198                | ₹ 10                            |
| Exercisable at 31 March   | 1,198           | -                               | 650                  | -                               |

The weighted average share price at the date of exercise of these options would be ₹ 10

The expected life of the share options is based on historical data and current expectations and is not necessarily indicative of exercise patterns that may occur.

| Income tax expense reported in the statement of profit and loss | 0.16                                | -                                   |

#### b) **Deferred Tax:**

The Company has not recognized deferred tax asset in respect of timing differences on account of business loss aggregating to ₹ 32.97 Mio (Previous year : ₹ Nil) and on account of unabsorbed depreciation and other disallowances aggregating to ₹ 160.89 Mio (Previous year : ₹ NIL) under the Income Tax Act, 1961 on the considerations of prudence.

## 52 Disclosures required under Section 22 of the Micro, Small and Medium Enterprises Development Act, 2006

As per the Micro, Small and Medium Enterprises Development Act, 2006, the Company is required to identify the Micro, Small and Medium suppliers and pay interest to micro and small enterprises on overdue beyond the specified period irrespective of the terms agreed with the suppliers. For the purpose of identification of such suppliers, the Company has sent confirmations to all its suppliers. Based upon the confirmations received as of 31<sup>st</sup> March, 2023 and the supplier profile available with the Company, the management believes that there are no dues to such suppliers.
