THE VERSATILE VARROC INSTRUMENT PANEL

Varroc Instrument Panel is a hybrid construction assembly and CCB structure that includes features like Floating Audio and Swing-type Glove Box. The design encloses the sheet metal, providing ample housing for vehicle instrumentation and storage space. The floating display head is positioned higher compared to those built into dashboards, bringing it more in the line of sight of the driver. This improves safety and the aesthetics of the drive.

Features

- Floating head for infotainment display
- Swing-type glovebox
- Hybrid construction IP assembly with CCB structure
- RH side storage inner with over-moulding
- Single piece with weight optimisation

Aesthetic Appearance

Space Flexibility

Convenient Display

Technical Specifications

- ✓ Cross Car Beam (CCB) assembly
- ✓ Injection moulded grab handle
