ADVANCED PROTECTION **IN A BUMPER**

PERFORM@CHANGE

THE RELIABLE PROTECTION OF VARROC BUMPER

The bumper is a plastic structure attached at the front and rear ends of a vehicle. It is one of the largest parts moulded in a single mould with a 3500-tonnage machine. Built to withstand high-speed impact, Varroc Bumper can absorb frontal and rear collision, helping to minimise significant damage to the vehicle.

Features

Primary impact absorber in low speed

Largest injection-moulded part

Enhances vehicle safety

Primary impact absorber in low speed
