A HOUSING UNIT FOR EV FANS

Varroc Fan Housing Unit for 2W & 3W vehicles is designed to not only protect the battery cooling fan from damage, but also protect the commuters from a potential injury that can be caused by the rotating fan blades. The motor fan in EVs is normally made from plastic and therefore susceptible to wear and tear caused by debris and other external aggressors. Our fan housing is equipped to not only safeguard the assembly but also directs the airflow in an optimal way to make the convection cooling much more efficient.

Features

- Protects the Fan from Wear & Tear
- Prevents Injury to Commuters
- Improved Cooling Operation
- Easy Installation

Safeguards Fan System

Optimizes Cooling

Ergonomic Design

Typical Application Conditions

- ✓ Proper installation
- ✓ Maintaining proper distance from fan blades
