THE SKID PLATE WITH A DIFFERENCE

When it comes to off-road bikes, a skid plate is a lifesaver. And while a metal skid plate does a pretty good job of protecting the overexposed parts of a bike from damage during mishaps, it does add a considerable amount of excess weight to the vehicle. The Plastic Skid Plate from Varroc provides the support and strength of metal while being lighter on the vehicle.

Features

Aesthetic look

Metal to plastic conversion

PA6 GF 15% material

Up to 40% lighter than metal

Ergonomic design

Typical Application Conditions

✓ Sport/adventure & dirt bikes
