# LEAKPROOF SEAT FOR OPTIMUM COMFORT

Wet seats can be a major dampener for two-wheeler rides. During monsoons, water can enter through the seat cover seam and cause discomfort to the rider. The excess moisture also causes degradation of the seat foam over time. Varroc Leakproof Seat has been specially developed to prevent this from happening. Using anti-wick Rexine and thread, and seam-sealing tape, we have created a completely airtight seat cover that doesn't allow water droplets to seep in and cause dampness.

**80% Less Water Ingress**

**Optimised Seat Longevity**

**Elimination of PE film**

**Soft Feel**
