BLINKER- SEAT WITH REAR-LIGHTING FEATURE

The rear-view blinker, generally placed in the seat cowl area, is an important Aesthetic Feature for 2-wheelers as it indicates actions like braking, cornering etc. Our new seat is an attempt to make this feature even more prominent. Varroc Blinker Seat comes equipped with a rear-view blinker on its back. Easily removable, the blinker not only improves the road safety of the ride but also elevates its aesthetic appeal.

Enhanced Safety

Aesthetic Design

Removable & User-friendly

Features
