OIL PAN

PERFORM@CHANGE

PERFORMANCE IN A PAN

A crucial component in engine lubrication systems, the Oil Pan acts as a reservoir, storing and circulating oil to critical engine parts for optimal performance and longevity. Crafted with precision from durable materials, it withstands the rigors of engine operation, ensuring reliable performance under demanding conditions. Its design incorporates features for efficient oil drainage and replenishment, facilitating smooth oil flow and maintenance procedures. Trust in our Oil Pan to safeguard your engine's health, providing the necessary lubrication for smooth operation and extended engine life.

Features

Metal to Plastic Conversion Weight Reduction by 20%

**As Compare to Metallic
Oil Pan Weight Reduction
by 20%**

Technology Specifications

- ✓ Top flange flatness required within 1 mm & achieved in 0.6 mm through windage tooling, to prevent oil leakage
