NO MORE WET SEATS DURING **RAINY RIDES**

PERFORM@CHANGE

WATER-RESISTANT SEAT FOR OPTIMUM COMFORT

Wet seats can be a major dampener for two-wheeler rides. During monsoons, water can enter through the seat cover seam and cause discomfort to the rider. The excess moisture also causes degradation of the seat foam over time. Varroc Water-Resistant Seat has been specially developed to prevent this from happening. Using anti-wick Rexine and thread, and seam-sealing tape, we have created a completely airtight seat cover that doesn't allow water droplets to seep in and cause dampness.

Features

- Stitched cover with sealed seam tape
- Anti-wick Thread & water-repellent rexine
- Highly reliable & long-lasting
- Prevent water seepage
- Water-repellent rexine for restricting water flow
- Sealed with recyclable seam tape

80% Less Water Ingress

Optimised Seat Longevity

Elimination of PE film

Soft Feel

Typical Application Conditions

- ✓ 2-Wheeler Seat assembly
